High Impact Deep
Sea Drilling Portfolio

INVESTOR PRESENTATION

April 2006

This presentation contains forward looking statements that are subject to risk factors associated with oil and gas businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to: price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimates, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory developments, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates.

All references to dollars, cents or \$ in this presentation are to U.S. currency, unless otherwise stated.

Previously Vice President, Deepwater Gulf of Mexico, Unocal Corp. more thn 30 years industry

GOLDEN GATE

PETROLEUM LTD

Recent Achievements

- ✓ Purchased Medco's (Novus) interest in the Padre Island Project
- ✓ Secured operatorship of the Padre Island Deep prospects as a result of Medco purchase.
- ✓ Reduced risk by forming a joint venture with Lodore Resources and Pantheon Resources
- ✓ Further cleaned up the Joint Venture by acquiring Mitsui's interest
- ✓ As operator of the JV have instigated and progressed negotiations with other parties to farm out a 25% working interest for cash payments and carry on the exploration wells.
- ✓ Concluded arrangements with BNP to share in shallow plays at up to a 35% working interest. As part of arrangements Golden Gate will have the use of an existing BNP drilling pad, significantly reducing the costs of drilling Plum and Manzano.
- ✓ Employed a highly qualified and experienced Chief Operations Officer (Mike Bell) assisted by a very experienced support group to execute the drilling of the Company's high impact deep wells.
- ✓ Re-completed LaPlaya Deep resulting in 4.7mmcf/d flow - 35% working interest
- ✓ Drilled Dunn Peach #6 – stabilized rate of 1.9 mmcf/d flow – 10 % working interest

GOLDEN GATE

PETROLEUM LTD

Why Golden Gate?

1. Large high quality prospect inventory in a proven hydrocarbon province
2. Good balance of high impact deep prospects and low risk shallow prospects
3. Success rate so far is more than 70%
4. Present production provides an underlining cash flow of more than US\$300K per month
5. Scope to increase production in the shallow prospects and thus the underlying cash flow
6. Large deep prospects provide potential for exponential growth
7. Proven management track record
8. High quality operations team lead by Mike Bell
9. Debt free with around \$4 million in cash
