## **Uranium Drilling Completed in Guinea, West Africa – Next Phase of Drilling Being Planned for Mauritania**

---

Murchison United NL (**ASX: MUR, AIM: MUU**) is pleased to announce that it has successfully completed the first phase of its uranium exploration program in West Africa, with the 2,050 metre RC drilling programme at the Company's **Firawa Prospect** in southern **Guinea** now completed.

Samples are currently en route to Canada for multi-metal analytical processing. Assay results will be released to the market when available.

Following the completion of this first drilling programme in West Africa, the Company is also pleased to advise that it is currently negotiating access to a drilling rig in order to commence a drilling programme at its licences in the **Bir En Nar** region in **Mauritania**.

Depending upon drill rig availability, the Company aims to commence drilling within 2 to 3 months.

Murchison presently holds five uranium exploration permits in Mauritania covering a total area of 7,000km<sup>2</sup>. Reprocessed historic airborne radiometric data have indicated a number of prospective uranium anomalies within these tenements which returned encouraging grades of up to 9,500ppm **U<sub>3</sub>O<sub>8</sub>**. Drilling will initially focus on the Bir En Nar region.
