BigAir Group Limited

Appointment of Paul Tyler as independent Non-Executive Chairman

SYDNEY, Australia – September 15th, 2008 – BigAir Group Limited (“BigAir”) today announced the appointment of Mr Paul Tyler to the Board of BigAir Group Limited as independent non-executive Chairman. Mr. Tyler joins recently appointed non-executive Director Mr. Vivian Stewart and Mr. Nigel Jeffries who is also non-executive. Mr. Jason Ashton and Mr. Patrick Choi remain as executive Directors. The addition of Mr. Tyler provides an injection of both international communications experience and best practice management skills.

Mr. Tyler has more than 15 years of international experience in the telecommunications industry and a wealth of experience in customer support, delivery and sales. Mr. Tyler is the Head of Australia and New Zealand for Nokia Siemens Networks overseeing all operations for the company in the region with a team of approximately 500 people. He was previously the Country Director of Nokia Networks Australia. Commencing his career as a software testing engineer at Alcatel in Sydney, Paul has held a wide variety of roles spanning customer support, R&D, project management, sales, business development and general management.

Joining Nokia Australia in 1997 he has since held many international executive roles across Australia, Europe and Asia. Recent roles have included Director of Business Development, Regional Operators, Europe, based in Dublin, Ireland and General Manager, O2 Business Team, based in the United Kingdom.

Mr. Tyler returned to Australia in October 2004 with Nokia in the role of General Manager, Vodafone Business Team, Asia Pacific. He also held the roles of Country Director for Nokia Networks, Australia and chair of the Nokia Australia Country Management Team. During his career Paul has managed large teams of people based in multiple locations in matrix managed organisations.

Born in Sydney, Paul has a holds an Executive MBA from the National University of Ireland and a Bachelor of Electrical Engineering from the University of New South Wales.

About BigAir Group Limited

BigAir owns and operates Australia’s largest metropolitan fixed WiMAX* broadband networks.

The Australian business market comprises nearly one million businesses and BigAir’s network provides near blanket coverage across its three largest cities Sydney, Melbourne, and Brisbane. BigAir sells broadband and data services directly to business customers and also partners with other IT service companies who have existing relationships with business customers in order to deliver BigAir’s high speed, cost effective WiMAX* broadband solutions.

BigAir’s competitive advantage includes its state-of-the-art WiMAX* network which allows it to install business-grade symmetric broadband services at speeds up to 100Mbps and distances up to 30km from its base stations with installation taking just a few hours. Most of BigAir’s competitor’s rely on access to Telstra’s copper network which can takes weeks to install a service and does not deliver fast symmetric speeds. Competing legacy wireless networks such as the 3G mobile phone networks are also not nearly fast enough to meet the demands of business Internet users in an office environment.
