

## ANNOUNCEMENT

### Plan of Operations lodged for Daneros Uranium Mine, Utah USA

White Canyon Uranium Limited is pleased to announce that the Plan of Operations for the Company's proposed Daneros Uranium Mine near Blanding, Utah, USA, has today been advertised in the local SE Utah press. Advertising initiates a 30 day public comment period.

A period of formal environmental assessment, technical review and comment resolution will then proceed, to be concluded by the issue of a mine permit, at the earliest by the end of January 2009 and at the latest by March 2009.

Underground development will commence immediately upon issue of the permit, and mining and shipment of ore is expected in 60-120 days thereafter.

White Canyon Uranium has \$7.0 million in cash deposits – **underground development and mine production can be achieved within the current cash reserves of the Company.**

White Canyon Uranium Limited holds 100% of the advanced Thompson, Daneros, Blue Jay, Marcy, Look and Geitus Projects in south-east Utah, comprising over 8,000 acres of mining claims and mineral leases. The projects contain historically defined high grade uranium deposits.

The Daneros uranium deposit is a "brownfields" virgin exploration discovery in close proximity to major past producing uranium mines of the Red Canyon mining area, near Blanding. The deposit is 100 km by established roads from the White Mesa Uranium Mill (Denison Mines).
