SER engages Senior Geological Consultant as part of its management team

Highlights

- **Senior Geological consultant engaged to assist development of exploration programs**
- **Initial evaluation programs designed for:**
 - **Falcon Bridge nickel prospect in WA**
 - **Cultana and Myall Creek IOGC targets in SA**
- **Assist implementation of recommendations from consultants on Uley Graphite Project**

Based in Melbourne Victoria, Strategic Energy Resources (SER) is a versatile explorer working on a diversified portfolio of exploration assets including the world class Uley Graphite Project. The company aims to create shareholder value through the systematic exploration of our tenements with the aim of becoming a producer.

Strategic Energy Resources Limited (SER) is pleased to advise that it has engaged Dr Wenlong Zang as its senior geological consultant to review and plan potential exploration programs over the company's mineral assets. Dr Zang is an excellent fit for SER's diverse portfolio of exploration assets, as he has experience in both mineral and oil/gas exploration.

Dr Zang received his PhD from the Australian National University in 1989 and graduated in 1982 from Beijing University, with a Bachelor of Science degree.

His has wide experience in both mineral and oil/gas exploration including field geological, geochemical and geophysical mapping, data compilation and interpretation, and is experienced using the various software packages used for both mineral and oil/gas exploration. Dr Zang also has the necessary project management skills required to handle the budgeting of drilling programs, drill hole design and well site operations.

Dr Zang has both public and private sector experience. He has worked for Primary Industries and Resources SA ('PIRSA') as a senior geologist for over a decade and has consulted to the Energy division of the Victorian Department of Primary Industries ('DPI') in respect of oil and gas geology within the Gippsland Basin, in which the Company has interests – Vic/P41, Vic/P47, Vic/P65 and Vic/P66. Over the years he has consulted for various Australian public companies, has authored many papers and undertaken major studies of geological regions, primarily in South Australia. Dr Zang has also been instrumental in helping Chinese companies enter into joint venture arrangements with Australian companies.

As previously announced SER has commissioned consultants to review the geological data surrounding the Uley Graphite project. The results are expected soon and Dr Zang will help progress any recommendations.

SER is also evaluating the best way to progress the Cultana and Myall Creek projects in South Australia and Falcon Bridge in Western Australia. A consultant has provided an initial review of the nickel potential at Falcon Bridge and Dr Zang will develop the recommendations and action plan.
