Profit from discontinuing operations	307	78
Loss attributable to members of Immuron Limited	<u>(2,243)</u>	<u>(2,858)</u>

Income

The major increase in the revenues from the sale of goods was from the initial sale of bulk Travelan powder to Alaven Consumer Healthcare (Alaven) in the United States for the production of Travelan™ capsules under the terms of the licence agreement with Alaven.

In respect of the income from tied government grants income there has been a reduction of \$446,000 as a number of projects have either been completed or are close to reaching their completion date. Our major influenza project has received ongoing funding through the recently announced ARC Linkage grant with the University of Melbourne.

Expenses

Expenses decreased overall by \$868,000 with the main variations being in the following categories:

Research & Development

With the reduced level of R & D activity within Australia there has been a reduction in employee costs of approximately \$208,000, together with a reduced requirement for consultants and other costs directly linked to the R & D projects. Offsetting the reductions in the level of local R & D, there has been an increase in the R & D activities being conducted overseas with two clinical trials being conducted in Israel, together with the costs associated with acquiring the intellectual property from Hadasit. These costs amounted to \$213,000 in the current financial year.

Other expenses

There has also been a significant reduction in general corporate and marketing expenses due partly to the sale of the manufacturing business in the 2008 financial year that were not directly attributable to that business. The major savings in this area has been associated with outside consultants, which have reduced by \$176,000, a reduction in direct product and marketing expenses of \$148,000, together with a reduction in personnel costs of \$304,000 directly related to product marketing.
