

ASX Release

Correction re Star Medical (Botswana) Limited

Eastland Medical Systems Ltd (ASX:EMS) advises that it wishes to correct its announcement of 17 September 2009 which stated that :

*"Star holds the exclusive rights to the Intellectual Property for the patented sub-lingual anti malaria treatment **ArTiMist™** for Africa.*

Rather EMS's announcement of 8 December 2008 contained the correct statement of the current position, namely:

"Under ProtoPharma's agreements with Star & Eastland, Star's rights and obligations in respect of the Malaria Project in Africa have now vested in Eastland."

EMS confirms that Star Medical (Botswana) Limited is its 100% owned subsidiary as announced (on 17 September 2009).

HC Berlin Pharma AG's existing contract manufacturing position remains unaffected by any of the above, and as previously announced.

EMS apologises to shareholders for any inconvenience caused by this technical correction
