**Attention:** Farlee Walker

Dear Farlee

**REQUEST FOR TRADING HALT**

The Company requests a halt in the trading of its securities from market opening on Thursday, 23 September 2010 pending a more detailed release in relation to a partial wall failure which occurred in the Central Pit on 22 September 2010 at the Company's Bronzewing Gold Project.

The Company has been closely monitoring that section of the pit wall for a number of weeks and its safety procedures ensured that no personnel were in the area at the time and that there was no injury risk to employees.

The failed material has partially covered future ore in the south-western corner of the pit and an RC grade control drill rig was damaged by the flow of material on to the pit floor. Haul road access into the pit floor is unaffected.

Whilst staged mining activities in Central Pit will resume within the next two days, it is apparent that budgeted ore supply from this source will be impacted to a degree in the short term. The Company's staff are assessing changes to the immediate mine plan as well as the slip cleanup methodology with the intention of maintaining overall ore supply to the mill from its several open pit ore sources.

The Company will make a detailed release prior to the market opening on Monday, 27 September 2010.

The Company is not aware of any reasons as to why this request should not be granted.

Yours sincerely

**G F KACZMAREK**  
**Company Secretary**
