RCR AWARDED \$57 MILLION SMP UNDERGROUND CONTRACT

Integrated engineering company RCR Tomlinson Ltd (ASX: RCR) is pleased to announce that its **Resources** business has been awarded a contract valued at \$57 million for structural, mechanical and piping installation works for the underground portion of the expansion at Newcrest's Cadia Valley Operations in New South Wales.

The scope includes the provision of structural, mechanical and piping (SMP) installation for conveyors and crushers underground. The project is scheduled to commence in November 2010, with completion in the second half of 2011.

This is the third contract awarded to RCR at Cadia and follows the successful delivery and installation of a tertiary grinding mill earlier this year.

RCR Chief Executive Officer, Paul Dalglish, said that the contract award continued the company's ongoing relationship with Newcrest and reflects RCR's focus on supporting strategic relationships with its customers.

"RCR is now recognised as consistently delivering structural, mechanical, piping and electric (SMP&E) projects of this size and scope and has the capacity to grow further," said Dr Dalglish.

The contract award coincides with the appointment of Milos Jankovic as General Manager of the RCR Resources division. Mr Jankovic has extensive project management construction, shutdowns and maintenance experience, primarily in resources and industrial plants including mining, minerals, petrochemical, oil and gas. Prior to joining RCR he has held positions with Transfield Worley Services, Clough and UGL.

"We now have the experienced management and systems in place to deliver larger projects in our key market sectors of Energy, Mining, Resources and Power," said Dr Dalglish.
