

ASX Announcement  
28 January, 2011

## Drilling at Uley completed

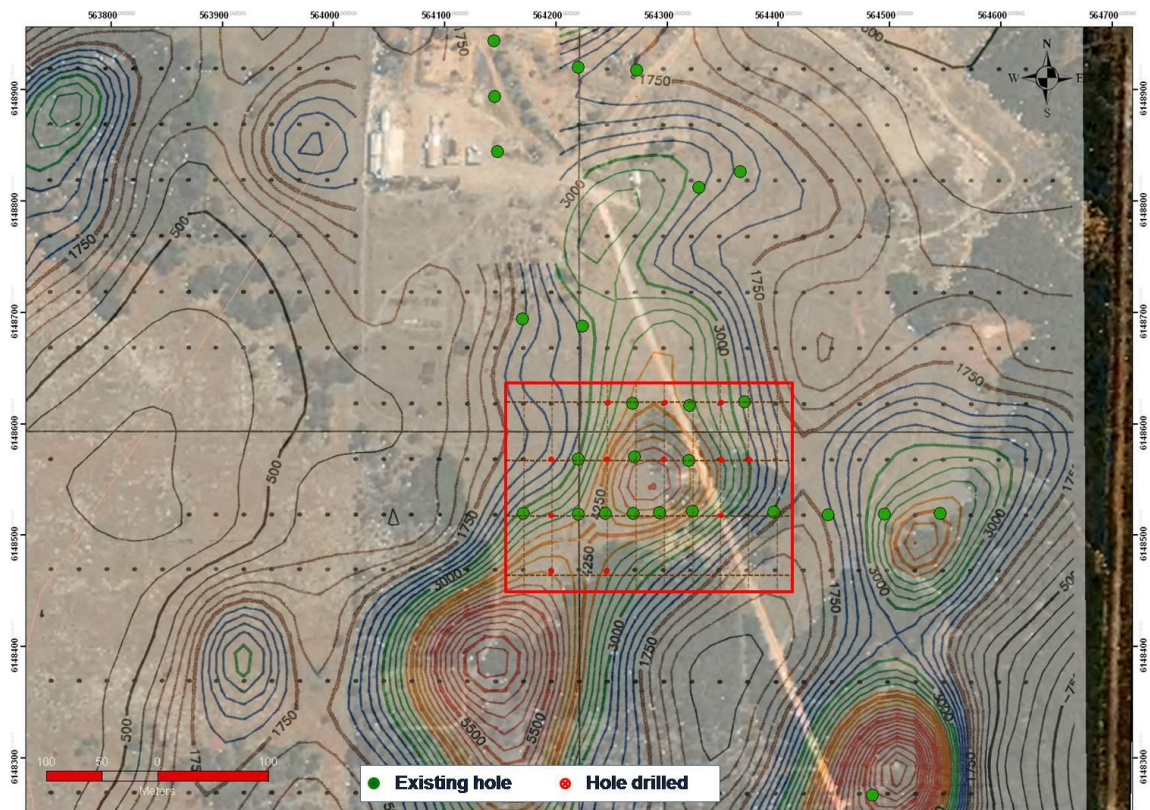

Strategic Energy Resources Limited (ASX: SER) is pleased to announce that on Thursday the 27<sup>th</sup> of January, the drilling program at our Main Road deposit was completed.

A program of 12 diamond drill holes was completed (initially 10 holes were planned) and the results will be available during the first quarter.

The purpose of the drilling is to confirm the shape of the current Main Road resource.

It is expected that there will be an upgrade of the resource as well as the opportunity to undertake pit design, which will feed into the mining information for the feasibility study and the re-commissioning of the facilities.

In order to expedite production of graphite, SER is fully focussing on the Main Road deposit.
