

## **Dear Shareholders**

## Operational Review

Yesterday the Company released an Operational Review to the Australian Stock Exchange and I wanted to ensure all our major shareholders did not miss this announcement as it contains news of some encouraging developments.

Over the six months to 31 December 2010 the Company's gross revenue grew 124% and our global user base grew to 4.9 million. We are also in the process of completing the acquisition of EyeVibe mobile video community in the UK, which will enhance our presence in this market.

The announcement also provides you with an overall update on the Company's carrier deployments in Malaysia, Greece, Japan and USA, as well as a summary of the recent capital raisings undertaken by the Company.

The social networking sector is undergoing exciting transformation and the directors believe that MOKO.mobi Limited, being focused on the mobile platform, is well placed to participate in this growing phenomenon.

I encourage you to follow our progress and read the announcement at the following link.
