1. Details of the Offer

1.1 The Offer

The Offer under this Prospectus is a renounceable pro-rata offer to Eligible Shareholders on the basis of 1 Share for every 2.4 Shares held on the Record Date at an issue price of \$0.01 per Share (**Offer**).

At the date of this Prospectus the Company has on issue:

- (a) 3,917,819,915 Shares;
- (b) 678,643,023 Listed Options;
- (c) 103,446,000 Unlisted Options;
- (d) 19,125,000 \$0.20 partly paid shares to \$0.00001; and
- (e) 121 Existing Warrants which are convertible into 44,992,640 Shares.

The holders of partly paid Shares will not be entitled to participate in the Offer without first paying any unpaid amount on their Shares.

The holders of Options will not be entitled to participate in the Offer without first exercising their Options.

The Existing Warrants are not capable of being exercised prior to the Record Date and are to be cancelled pursuant to the GUP Note Agreement (refer to Section 1.2(b)). Accordingly, the holders of the Existing Warrants will not participate in the Offer

On the basis that no partly paid Shares are paid in full, and that no Options or Existing Warrants are exercised prior to the Record Date, the Offer is for 1,632,424,965 Shares.

Where the determination of the Entitlement of any Eligible Shareholder results in a fraction of a Share, such fraction will be rounded down to the nearest whole Share.

Refer to Section 5.1 for a summary of the terms and conditions attaching to the Shares.

1.2 Placement, Redemption of GUP Notes and Gidgee Sale

The Offer is part of a number of initiatives presently being undertaken by the Company to significantly strengthen its balance sheet and to assist the prospects of the Company going forward as follows:

(a) Placement

The Company has recently undertaken a placement of Shares to sophisticated and professional investors (as defined in sections 708(8) and 708(11) of the Corporations Act respectively) (**Placement**).

The Placement comprised the issue of 350,000,000 Shares at an issue price of \$0.018 per Share to raise up to approximately \$6,300,000 (before costs). The Placement was completed on 3 February 2011.

The Shares issued pursuant to the Placement were issued within the Company's 15% limit permitted under Listing Rule 7.1 without the need for Shareholder approval.

The Placement was undertaken prior to the Record Date. Therefore, participants in the Placement will be eligible to participate in the Offer.

(b) Redemption of GUP Notes

As announced on 2 February 2011, the Company has entered into an agreement (**GUP Note Agreement**) with the holders of the GUP Notes to redeem all outstanding fully secured GUP Notes for \$18,000,000, payable in two tranches. The Company will also issue to the GUP Note holders 180,000,000 Proposed Warrants with an expiry date 3 years after issue exercisable at 3.5 cents per Share.

The 121 Existing Warrants, exercisable into 44,992,640 Shares, currently held by the GUP Note holders will be cancelled for no additional consideration.

For further details of the terms of the redemption of the GUP Notes refer to Section 5.5.

The Listing Rules require Shareholder approval of the cancellation of the Existing Warrants and the issue of 5,950,413 Proposed Warrants to Mr Kim Robinson as consideration for the redemption of his GUP Notes. This will be sought in due course. In addition, Mr Robinson will purchase 19,338,843 Proposed Warrants from another GUP Note holder but will sell 9,669,421 of those Proposed Warrants to a third party.

(c) Sale of the Gidgee Project

The Company has recently entered into an agreement to sell its Gidgee Project to Panoramic Gold Pty Ltd for \$15,500,000. Further details of the sale of the Gidgee Project are in Section 5.4.

1.3 Purpose of the Offer and Placement

Completion of the Offer will result in an increase in cash in hand of up to approximately \$16,300,000 (before the payment of costs associated with the Offer), assuming that no Options or Existing Warrants are exercised and no partly paid Shares become fully paid, prior to the Record Date.

The main purpose of the Offer and Placement is to raise funds to:

- (a) redeem the GUP Notes (as detailed in Section 1.2(b) above);
- (b) reduce current liabilities;
- (c) lodge environmental bonds; and
- (d) fund general working capital.

The combined funds raised under the Offer, Placement and from the Gidgee Sale are proposed to be expended as follows:

Description of Cash Outflows	Total
Redemption of GUP Notes	\$18,000,000
Reduction in current liabilities ⁽¹⁾	\$9,500,000
Environmental Bonds ⁽²⁾	\$1,500,000
General Working Capital	\$6,600,000
Transaction costs and costs of the Offer and Placement ⁽³⁾	\$2,500,000
Total funds raised under the Offer, Placement and the Gidgee Sale	\$38,100,000

⁽¹⁾ Includes overdue statutory taxation obligations (including PAYG and Payroll Tax) of approximately \$7,100,000 (see Note 2e of the Company's Annual Report 2010) and reduction in overall creditors.

⁽²⁾ Replacing environmental bonds previously provided by Mr Mark Creasy – see Note 35 of the Company's Annual Report. \$2,000,000 being provided by Panoramic Gold Pty Ltd in respect of the Gidgee Tenements and \$1,500,000 cash backing.

⁽³⁾ The Company had appointed Azure Capital as the corporate adviser and lead manager of the Placement and will pay Azure Capital a placement fee of \$378,000 (exclusive of GST) (being an amount equal to 6% of the funds raised under the Placement). Refer to Section 5.16 for further details of the costs of the Offer of approximately \$1,035,268.

1.4 Opening and Closing Dates

The Company will accept Entitlement and Acceptance Forms from the Record Date for determining Eligible Shareholders' Entitlements under the Offer until 5pm WST on the Closing Date or such other date as the Directors in their absolute discretion shall determine, subject to the requirements of the Listing Rules.

1.5 Rights Trading

The Entitlements under the Offer are renounceable. Accordingly, there will be trading of Entitlements on ASX and you may dispose of your Entitlements to another party. If you do not take up your Entitlement or dispose of your Entitlement by the Closing Date, the Offer to you will lapse.

1.6 Risks of the Offer

An investment in securities should be regarded as speculative. In addition to the general risks applicable to all investments in listed securities, there are specific risks associated with an investment in the Company which are set out in Section 4.

1.7 Entitlement and Acceptance Forms and BPAY® Payments

Acceptance of a completed Entitlement and Acceptance Form, or alternatively, a BPAY® payment, by the Company creates a legally binding contract between the Applicant and the Company for the number of Shares accepted by the Company. The Entitlement and Acceptance Form does not need to be signed to be a binding acceptance of Shares.

If the Entitlement and Acceptance Form is not completed correctly it may still be treated as valid. The Directors' decision as to whether to treat an acceptance as valid and how to construe, amend or complete the Entitlement and Acceptance Form is final.

1.8 Underwriting the Offer

The Offer is underwritten by Azure Capital. Azure Capital will be paid an underwriting fee of 6% of the total amount raised pursuant to the Offer.

The Company and Azure Capital have entered into the Underwriting Agreement further details of which are in Section 5.6.

As the Offer is underwritten, subject to the paragraph below, Shareholders will not be offered the opportunity to apply for any Shortfall Shares.

In the event that the Underwriting Agreement is terminated and not all Eligible Shareholders accept their full entitlement:

- (a) the Company may proceed to allot Shares irrespective of the amount raised under the Offer; and
- (b) the Directors reserve the right, subject to any restrictions imposed by the Corporations Act and the Listing Rules, to issue the Shortfall Shares at their sole discretion. Refer to Section 5.15 for further details of the Shortfall Offer.

1.9 Issue and dispatch

Shares under the Offer are expected to be issued, and security holder statements dispatched, on or before the date in the Proposed Timetable in this Prospectus.

In the event that:

- (a) the Underwriting Agreement is terminated; or
- (b) the Directors form the opinion that the sale of the Gidgee Project is not capable of being completed; or
- (c) the Directors form the opinion that the GUP Note Agreement is not capable of being completed,

the Directors may elect, in their absolute discretion:

- (a) to proceed to allot the Acceptances that have been received; or
- (b) not to proceed with the Offer and return all Application Monies (without interest) in accordance with Section 1.10.

It is the responsibility of Applicants to determine their allocation prior to trading in the Shares. Applicants who sell Shares before they receive their holding statements do so at their own risk.

1.10 Application Monies held on trust

All Application Monies received for the Shares will be held on trust in a bank account maintained solely for the purpose of depositing Application Monies received pursuant to this Prospectus until the Shares are issued. All Application Monies will be returned (without interest) if the Shares are not issued.

1.11 ASX quotation

Application will be made to ASX no later than 7 days after the date of this Prospectus of Official Quotation of the Shares offered under this Prospectus. If permission is not granted by ASX for Official Quotation of the Shares offered by this Prospectus within 3 months after the date of this Prospectus (or such period as the ASX allows), the Company will repay, as soon as practicable, without interest, all Application Monies received pursuant to this Prospectus.

1.12 CHESS

The Company participates in the Clearing House Electronic Subregister System, known as CHESS. ASTC, a wholly owned subsidiary of ASX, operates CHESS in accordance with the Listing Rules and the Securities Clearing House Business Rules.

Under CHESS, Applicants will not receive a certificate but will receive a statement of their holding of Shares.

If you are broker sponsored, ASTC will send you a CHESS statement.

The CHESS statement will set out the number of Shares issued under this Prospectus, provide details of your holder identification number, the participant identification number of the sponsor and the terms and conditions applicable to the Shares.

If you are registered on the Issuer Sponsored subregister, your statement will be dispatched by the Share Registry and will contain the number of Shares issued to you under this Prospectus and your security holder reference number.

A CHESS statement or Issuer Sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their Shareholding changes. Shareholders may request a statement at any other time; however, a charge may be made for additional statements.

1.13 Residents Outside Australia and New Zealand

The Offer is not being extended to any Shareholders whose registered address is outside Australia or New Zealand. The Company is of the view that it is unreasonable to make the Offer to Shareholders outside Australia and New Zealand, having regard to:

- (a) the number of those Shareholders;
- (b) the number and value of Shares to be offered to those persons; and
- (c) the cost of complying with overseas legal requirements.

The Prospectus does not constitute an offer in any place in which, or to any person to whom, it would not be lawful to make such an offer other than for Shareholders in Australia and New Zealand. The Company is not required to make offers under the Prospectus to Shareholders other than in Australia and New Zealand. Where the Prospectus has been dispatched to Shareholders domiciled outside Australia or New Zealand and where the country's securities code or legislation prohibits or restricts in any way the making of the offers contemplated by the Prospectus, the Prospectus is provided for information purposes only.

However, pursuant to ASX Listing Rule 7.7, the Company has applied to ASIC to appoint a nominee, Morgan Stanley Smith Barney Australia Pty Ltd, to sell the Entitlements to which non-qualifying foreign Shareholders are entitled. The nominee will have the absolute and sole discretion to determine the timing and price at which the Entitlements may be sold and the manner of any such sale.

Any interest earned on the proceeds of the sale of these Entitlements will firstly be applied against expenses of such sale, including brokerage, and any balance will accrue to the relevant non-qualifying foreign Shareholder as described below.

The net proceeds of the sale of these Entitlements will then be forwarded by the Company as soon as practicable to the non-qualifying foreign Shareholders, in proportion to their share of such Entitlements (after deducting brokerage commission and other expenses). If any such net proceeds of sale are less than the reasonable costs that would be incurred by the Company for distributing those proceeds, such proceeds may be retained by the Company.

Notwithstanding that the nominee may sell Entitlements, non-qualifying foreign Shareholders may nevertheless receive no net proceeds if the costs of the sale are greater than the sale proceeds.

Neither the Company nor the nominee will be subject to any liability for failure to sell the Entitlements or to sell them at a particular price. If, in the reasonable opinion of the nominee, there is no viable market for the Entitlements of the non-qualifying foreign Shareholders, or a surplus over the expenses of the sale cannot be obtained the Entitlements that would have been offered to the non-qualifying foreign Shareholders, then those Entitlements will be allowed to lapse. The Shares not taken up will form part of the Shares to be taken up by Azure Capital pursuant to the underwriting agreement.

Shareholders resident in Australia or New Zealand holding Shares on behalf of persons who are resident overseas are responsible for ensuring that taking up an Entitlement under the Offer does not breach regulations in the relevant overseas jurisdiction. Return of a duly completed Entitlement and Acceptance Form will be taken by the Company to constitute a representation that there has been no breach of those regulations.

1.14 Taxation implications

The Directors do not consider it appropriate to give Shareholders advice regarding the taxation consequences of subscribing for Shares under this Prospectus.

The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to Shareholders. As a result, Shareholders should consult their professional tax adviser in connection with subscribing for Shares under this Prospectus.

1.15 Major activities and financial information

A summary of the major activities and financial information relating to the Company for the financial year ended 30 June 2010 is in the Annual Report which was lodged with ASX on 2 November 2010 and is available on the Company's website at www.apexminerals.com.au.

Copies of these documents are available free of charge from the Company. Directors strongly recommend that Shareholders review these, and all other announcements, prior to deciding whether or not to participate in the Offer.

1.16 Privacy

The Company collects information about each Applicant provided on an Entitlement and Acceptance Form for the purposes of processing the Acceptance and, if the Acceptance is successful, to administer the Applicant's security holding in the Company.

By submitting an Entitlement and Acceptance Form, each Applicant agrees that the Company may use the information provided by an Applicant on the Entitlement and Acceptance Form for the purposes set out in this privacy disclosure statement and may disclose it for those purposes to the Share Registry, the Company's related bodies corporate, agents, contractors and third party service providers, including mailing houses and professional advisers, and to ASX and regulatory authorities.

4. Risk Factors

Activities in the Company and its controlled entities, as in any business, are subject to risks, which may impact on the Company's future performance. The Company and its controlled entities have implemented appropriate strategies, actions, systems and safeguards for known risks, however, some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which Shareholders need to be aware of in evaluating the Company's business and risks of increasing your investment in the Company. Shareholders should carefully consider the following factors in addition to the other information presented in this Prospectus.

The principal risks include, but are not limited to, the following:

4.1 Company Specific Risks

(a) Operation Costs

Operating costs are estimated based on the interpretation of geological data, feasibility studies, anticipated climatic conditions and other factors. Any of the following events, among the other events and uncertainties described in this Prospectus, could affect the ultimate accuracy of such estimates and result in an increase in actual operating costs incurred:

- (i) unanticipated changes in grade and tonnage of ore to be mined and processed;
- (ii) incorrect data on which engineering assumptions are made;
- (iii) equipment delays;
- (iv) labour negotiations;
- (v) changes in government regulation (including regulations regarding prices, costs of consumables, royalties, duties, taxes, permitting and restrictions on production quotas on exploration of minerals); and
- (vi) title claims.

The Company's Wiluna Project is currently a high cost operation and any material increase in the operating cost of the operation or reduction in the gold price (refer to Section 4.1(b) below) may adversely impact the cash flows of the Company.

(b) Decreases in the Price of Gold

The price of gold will affect the profitability of the Company. The price of gold fluctuates and is affected by numerous factors beyond the control of the Company such as industrial and retail supply and demand, exchange rates, inflation rate fluctuation, changes in global economies, confidence in the global monetary system, forward sales of precious metals by producers and speculators as well as other global or regional political, social or economic events. The supply of precious metals consists of a combination of new mine production and existing stocks held by governments, producers, speculators and consumers.

Future production from the Company's mining properties, is dependent upon the price of gold being adequate to make it economic.

Future price declines in the market price of gold could cause commercial production from the Company's projects to be rendered uneconomic. Declining precious metal prices will also adversely affect the Company's ability to obtain financing both now and in the long term.

(c) Future funding

There may be a need for funds in the future even if the Offer and the sale of the Gidgee Project proceed, as a result of the risks factors in this Section 4 which are out of the control of the Company, its directors, employees and advisors. The ability of the Company to meet this future requirement, should it arise, will be dependent on the Company's continued access to credit markets, funding sources and financing facilities.

Recent developments in global financial markets have adversely affected the liquidity of global credit markets, which has resulted in an increase in the cost of funding and in certain cases a reduction in the availability of funding sources throughout global markets. Access to credit markets on less favourable terms will impact the Company's access to financing facilities should the need arise, and may have a material adverse effect on the Company's future financial performance and position.

(d) Claims Liability and Litigation

The Company is currently involved in legal proceedings in respect of the two statutory demands issued by Atlas Copco Australia Pty Ltd in May and June 2010 totalling \$4,400,000. The Company has applied to the Supreme Court of Western Australia for the statutory demands to be set aside. In the event that the Company's application is unsuccessful, then the Company may seek leave to appeal the decision and as part of this apply for a stay of the decision made by the Court including an extension of the time to comply with the statutory demands. In the event that the application is unsuccessful, the Company will either have to pay any amount held to be due and owing or enter into an arrangement with Atlas Copco for repayment of any amount held to be due and owing or, if no arrangement can be made, Atlas Copco may seek to have the Company wound up by appointing a liquidator. Either outcome will have an adverse effect on the Company's future financial performance and position. An adverse decision in respect of Atlas Copco's statutory demands may also impact on the underwriting of the Offer (refer to section 5.6).

The Company may have disputes with counterparties in respect of major contracts, or may be exposed to customer or environmental, occupational health and safety or other claims. The Company may incur costs in defending or making payments to settle any such claims, which may not be adequately covered by insurance, or at all. Such payments may have an adverse impact on the Company's profitability and/or financial position.

(e) Execution Risk

There are a number of conditions that must be satisfied in order for certain key events including the sale of the Gidgee Project and the payout of the GUP Notes to be completed. These conditions are outlined in Sections 5.4 and 5.5.

There is a risk that if some conditions are not met and the sale of the Gidgee Project or payout of the GUP Notes does not complete, then Azure Capital may terminate the Underwriting Agreement which may result in the Offer raising less than the full amount intended or the Directors determining not to proceed with the Offer.

(f) Termination of the Underwriting Agreement

The Underwriting Agreement includes various termination events upon the occurrence of which Azure Capital may elect, in its discretion, to terminate the underwriting arrangements.

In the event that the Underwriting Agreement is terminated:

- (i) the Offer will not be underwritten and may not raise the full amount intended;
- (ii) the Directors may determine not to proceed with the Offer (refer to Section 5.15); and/or
- (iii) the Company may have insufficient funds to complete all the expenditure set out in Section 1.3(a) to 1.3(d).

For further details of the Underwriting Agreement refer to Section 5.6.

(g) Geotechnical Risk

In the first half of 2009, the Company experienced a seismic event that curtailed gold production at its operations. Although the Company has had independent geotechnical advice and undertaken a number of measures to mitigate this risk, including diversifying ore feed sources by opening up new deposits and implementing various geotechnical operating procedures, the Company can not guarantee that this will not affect future production and performance.

(h) Production Estimates

The Company may not achieve its production estimates. The failure of the Company to achieve its production estimates could have a material adverse effect on any or all of its future cash flows, profitability, results of operations and financial conditions. The realization of production estimates is dependent on, among other things, the accuracy of mineral reserve and resource estimates, the accuracy of assumptions regarding ore grades and recovery rates, ground conditions (including hydrology), the physical characteristics of ores, the presence or absence of particular metallurgical characteristics, and the accuracy of the estimated rates and costs of mining, ore haulage and processing.

Actual production may vary from estimates for a variety of reasons, including: the availability of certain types of ores; the actual ore mined varying from estimates of grade or tonnage; dilution and metallurgical and other characteristics (whether based on representative samples of ore or not); short-term operating factors such as the need for sequential development of ore bodies and the processing of new or adjacent ore grades from those planned; mine failures, slope failures or equipment failures; industrial accidents; natural phenomena such as inclement weather conditions, floods, droughts, rock slides and earthquakes; encountering unusual or unexpected geological conditions; changes in power costs and potential power shortages; shortages of principal supplies needed for mining operations, including explosives, fuels, chemical reagents, water, equipment parts and lubricants; plant and equipment failure; the inability to process certain types of ores; labour shortages or strikes; lack of required labour; civil disobedience and protests; and restrictions or regulations imposed by government agencies or other changes in the regulatory environment.

Such occurrences could also result in damage to mineral properties or mines, interruptions in production, injury or death to persons, damage to property of the Company or others, monetary losses and legal liabilities in addition to adversely affecting mineral production. These factors may cause a mineral deposit that has been mined profitably in the past to become unprofitable forcing the Company to cease production.

(i) Exploration, development, mining and processing risks

The business of mineral exploration, project development and mining by its nature contains elements of significant risk. Ultimate and continuous success of these activities is dependent on many factors such as the discovery and/or acquisition of mineral resources, the degree of conversion to economically recoverable ore reserves, changes to mineral resource and ore reserve estimates as a result of the identification of new resources and reserves, the reclassification of resources and reserves, the depletion of resources and reserves by mining, increases and decreases to ore reserves as a result of changing costs and revenues, successful conclusions to feasibility studies, access to adequate capital for project development, design and construction of efficient mining and processing facilities within capital expenditure budgets, metallurgical recoveries, performance of BIOX® bacteria, securing and maintaining title to tenements, obtaining consents and approvals necessary for the conduct of exploration and mining, and access to competent operational management and prudent financial administration, including the availability and reliability of appropriately skilled and experienced employees, contractors and consultants.

Whether or not income will result from the development of tenements depends on the successful establishment of mining operations. Factors including costs, actual mineralisation consistency and reliability of ore grades and commodity prices affect successful project development and mining operations.

(j) Reliance on key personnel

The Company's success depends to a significant extent upon its key management personnel, as well as other management and technical personnel including those employed on a contractual basis. The loss of the services of such personnel could have an adverse effect on the Company.

There are currently no service agreements between the Company and any Director, which require a Director to remain as a Director of the Company for any period of time.

(k) Mineral Resource and Ore Estimation Risk

The Company's mineral resources and ore reserves are estimates only and no assurance can be given that any particular recovery level of gold ore will in fact be realised. The Company's estimates comply with the JORC Code, 2004. However, mineral resources and ore reserves are expressions of judgement based on knowledge, experience and industry practice, and may require revision based on actual production experience. Estimates which are valid when made may change significantly when new information becomes available.

(l) Insurance

The Company currently maintains insurance coverage as determined appropriate by the Board and management, but no assurance can be given that the Company will continue to be able to obtain such insurance coverage at reasonable rates (or at all), or that any coverage it obtains will be adequate and available to cover all claims.

4.2 Mineral Industry Risks

(a) Operational Risks

The operations of the Company may be affected by various factors, including operational and technical difficulties encountered in production, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, adverse weather conditions, industrial and environmental accidents, industrial disputes, fluctuations in commodity prices, and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

(b) Environmental risks

The Company's projects are subject to Western Australian and Federal Australian Government regulations regarding environmental matters. The Governments and other authorities that administer and enforce environmental laws determine these requirements. As with all exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly through its mining operations. The Company intends to conduct its activities in an environmentally responsible manner and in accordance with applicable laws.

Environmental regulations are likely to evolve in a manner that will require stricter standards and enforcement, increased fines and penalties for non-compliance, and more stringent environmental assessments of proposed projects. Environmental regulations could impact upon the viability of the Company's projects. The cost and complexity of complying with the applicable environmental laws and regulations may prevent the Company from being able to develop potentially economically viable mineral deposits.

Although the Company believes that it is in compliance in all material respects with all applicable environmental laws and regulations, there are certain risks inherent to its activities, such as accidental spills, leakages or other unforeseen circumstances, which could subject the Company to extensive liability against which it has not insured or cannot insure, including those in respect of past mining or other activities for which it was not responsible.

Further, the Company may require approval from the relevant authorities before it can undertake activities that are likely to impact the environment. Failure to obtain such approvals will prevent the Company from undertaking its desired activities and could lead to forfeiture of its tenements. The Company is unable to predict the effect of additional environmental laws and regulations, which may be adopted in the future, including whether any such laws or

regulations would materially increase the Company's cost of doing business or affect its operations in any area.

There can be no assurances that new environmental laws, regulations or stricter enforcement policies, once implemented, will not oblige the Company to incur significant expenses and undertake significant investments in such respect which could have a material adverse effect on the Company's business, financial condition and results of operations.

(c) Metallurgy

Metal and/or mineral recoveries are dependent upon the metallurgical process, and by its nature contain elements of significant risk such as:

- (i) identifying a metallurgical process through test work to produce a saleable metal and/or concentrate;
- (ii) developing an economic process route to produce a metal and/or concentrate; and
- (iii) changes in mineralogy in the ore deposit can result in inconsistent metal recovery, affecting the economic viability of the project.

(d) Title risk

Under mining and exploration tenements and certain other contractual agreements to which the Company is or may in the future become party, the Company is or may become subject to payment and other obligations. Tenement holders are required to meet prescribed expenditure conditions. Failure to meet these expenditure commitments will render tenements liable to be forfeited unless a total or partial exemption is granted in accordance with relevant legislation.

Even if the Company is entitled to seek an exemption from the requirements to meet expenditure requirements, it may nevertheless be the subject of an attempt by a third party to claim a failure to satisfy expenditure conditions which may need to be resolved through litigation.

Further, there is no guarantee that current or future applications, extensions or renewals of the tenements in which the Company has an interest will be granted.

(e) Regulatory Risk

The Company's operations are subject to various federal, state and local laws and plans including those relating to mining, prospecting, development permit and licence requirements, industrial relations, environment, land use, royalties, water, native title and cultural heritage, mine safety and occupational health.

Approvals, licences and permits required to comply with such rules are subject to the discretion of the applicable government officials. No assurance can be given that the Company will be successful in obtaining any or all of the various approvals, licences and permits or maintaining such authorisations in full force and effect without modification or revocation. To the extent such approvals are required and not retained or obtained in a timely manner or at all, the Company may be curtailed or prohibited from continuing or proceeding with production and exploration.

(f) Native title and access risks

Exploration and mining activities can be affected by land claim compensation and environmental considerations. The Company is subject to the Native Title Act 1993 (Cth) which recognises and protects the rights and interests in Australia of Aboriginal and Torres Strait Islander people in land and waters, according to their traditional laws and customs. There is significant uncertainty associated with native title in Australia and this may impact on the Company's operations and future plans.

It is possible that Aboriginal sacred sites found within mining tenements held by the Company may preclude exploration and mining activities and the Company may also experience delays with respect to obtaining permission from the traditional owners to explore and extract resources.

The Company must also comply with Aboriginal heritage legislation requirements and access agreements which require heritage survey work to be undertaken ahead of the commencement of mining operations.

- (g) Joint Venture parties, contractors and agents

The Directors of the Company are unable to predict the risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party or the insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.

4.3 General Risks

- (a) Commodity Price and General Economic conditions

Substantially all of the Company's cash flows and revenues are derived from the sale of gold, and as such, the Company is exposed to gold price fluctuations. These fluctuations may be influenced by numerous factors beyond the control of the Company. These factors include world demand for base and other metals, forward selling by producers, and costs of production of other gold producers.

Moreover, commodity prices are also affected by macroeconomic factors such as inflationary expectations, monetary and fiscal policy (which, for example, may impact interest rates), currency exchange rates as well as general global political trends. These factors may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

- (b) Foreign Exchange Risk

The Company is an Australian business that reports in Australian dollars. The Company's revenue is in US dollars derived from the sale of gold. However, as the Company's costs are mainly in Australian dollars, movements in the USD/AUD exchange rate may adversely or beneficially affect the Company's results of operations and cash flows.

- (c) Rising Energy and Commodity Costs

The Company has significant commodity (diesel) and energy (gas and electricity) requirements and it relies on being able to fulfil those requirements at a cost which does not negatively impact on its cash flows. A number of factors (particularly the strength of the US dollar) may lead to an increase in commodity and energy costs, which may materially adversely affect the earnings of the Company.

- (d) General Equity Market Risk

The value of the Company's Shares, including new Shares to be issued under the Offer may fluctuate. In recent times, the extent of the volatility in the price of the Company's Shares and the wider market has been significant.

Investments in equity markets are generally speculative in nature and potential investors should carefully consider this risk before making any investment in Shares.

There is no guarantee that the Shares will trade at or above the price pursuant to the Offer. Potential investors should also note that past performance of the Shares on ASX provides no guidance as to the future performance of these Shares on ASX.

Many factors will affect the price of Securities including local and international stock markets, movements in interest rates, economic conditions and investor sentiment generally. In addition, the commencement of, or escalation in, any war, armed conflict, hostilities between nations, civil unrest or terrorist activities may affect the price of Securities.

(e) Economic factors

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that general economic climate include the level of direct and indirect competition against the Company, industrial disruption in Australia, the rate of growth of Australia's gross domestic product, interest rates and the rate of inflation.

(f) Security holders' Margin Lending arrangements

Security holders may, from time to time, enter into margin lending arrangements for the purchase of Securities in the Company on terms and conditions not known to the Company.

The Directors are unable to predict the risk of financial failure or default by a Security holder who has entered into such an arrangement or insolvency or other managerial failure by any party who may have provided such an arrangement to the Security holder. Such an event may lead to parcels of Securities being made available for sale which may impact negatively on the price of the Company's Securities.

4.4 Investment speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may, in the future materially affect the financial performance of the Company and the value of the Shares offered under this Prospectus. Therefore, the Shares offered pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares. Potential investors should consider that the investment in the Company is speculative and should consult their professional adviser before deciding whether to apply for Shares pursuant to this Prospectus.

5. Additional Information

5.1 Rights attaching to Shares

The rights attaching to Shares are set out in the Constitution and in certain circumstances, are regulated by the Corporations Act, the Listing Rules and general law. The Constitution may be inspected free of charge during normal business hours at the principal place of business of the Company at First Floor, 10 Ord Street, West Perth.

The following is a summary of the principal rights of the holders of Shares. This summary is not exhaustive nor does it constitute a definitive statement of the rights and liabilities of the Company's members.

(a) Meetings and Notices

Each Shareholder is entitled to receive notices of meetings. The failure of a Shareholder to receive a notice of meeting does not invalidate the proceedings, or any resolution passed at, any such meeting. No business may be transacted at any meeting of Shareholders unless a quorum of Shareholders is present. Shareholders may attend a general meeting at which the Shareholder is entitled to be present in person, by proxy, by attorney or, in the case of a Shareholder which is a body corporate, by a corporate representative.

(b) Voting Rights

Subject to any rights or restrictions for the time being attached to any class or classes of Shares whether by the terms of their issue, the Constitution, the Corporations Act or the Listing Rules, at a general meeting of the Company every Shareholder present in person or by a representative or attorney has one vote on a show of hands and every such Shareholder present in person or by a representative, proxy or attorney has one vote per fully paid Share on a poll.

Where there are two or more joint holders of the Shares and more than one of them is present at a meeting and tenders a vote in respect of the Share (whether in person or by proxy or attorney), the Company will count only the vote cast by the member whose name appears before the other(s) in the Company's register of Shareholders.

(c) Dividend Rights

Subject to any rights or restrictions attaching to a class of shares, the Company may pay dividends as the Directors resolve. The Directors may fix the time for payment and the method of distribution.

- (i) a proper ASTC transfer;
- (ii) an instrument of transfer in compliance with the Constitution; or
- (iii) any other method permitted by the Corporations Act, the Listing Rules or the ASTC Operating Rules.

The Company may decline to register a transfer of Shares where permitted to do so under the provisions of the Constitution, the Corporations Act and the Listing Rules. If the Directors decline to register a transfer, the Company must, within 5 Business Days after the transfer is delivered to the Company, give the party lodging the transfer written notice of the refusal and the reason for refusal. The Directors must decline to register a transfer of shares when required by the Corporations Act, by the Listing Rules or by the ASTC Operating Rules.

(e) Future Issues

Subject to the Constitution, the applicable law and the Listing Rules, the Directors may allot, issue or grant options over, or otherwise deal with the unissued shares in the Company at the times and on the terms and conditions that the Directors think proper and a share may be issued with preferential, deferred, qualified or special rights, privileges or conditions or restrictions including, but not limited to, restrictions in regard to dividends, voting or return of capital as the Directors from time to time determine.

(f) Alteration of Constitution

The Constitution can only be amended by a special resolution (that is, a resolution that has been passed by at least three-quarters of the votes cast by shareholders entitled to vote on the resolution). While the Company is listed, at least 21 days written notice of the special resolution must be given.

(g) Variation of Rights

The Company may only modify or vary the rights attaching to any Shares with the prior approval by a special resolution passed at a separate meeting of the holders of shares of that class or with the written consent of the holders of at least three-quarters of the issued Shares of the affected class.

(h) Directors

The minimum number of Directors is three and the maximum is ten. Currently there are three Directors. Directors must retire on rotational basis so that one-third of Directors must retire at each annual general meeting. Any other Director who has been in office for three or more years must also retire. The Directors may appoint a director either in addition to existing Directors or to fill a casual vacancy, who then holds office until the next annual general meeting.

(i) Officers' Indemnity

To the extent permitted by the law, the Company must indemnify each officer (including a Director, Auditor and agent of the Company) against any liability which that officer may incur by reason of being an officer or in carrying out the business or exercising the powers of the Company.

5.4 Sale and Purchase Agreement – Gidgee Project

Under the terms of a sale and purchase agreement between the Company and Apex Gold Pty Ltd (together the **Sellers**), Panoramic Gold Pty Ltd (**Buyer**) and Panoramic Resources Limited (**Holding Company**) dated 28 January 2011 (**Gidgee Agreement**) the Buyer has agreed to purchase and the Sellers have agreed to sell the Gidgee Project.

The consideration for the sale of the Gidgee Project is \$15,500,000 (subject to a possible reduction of up to \$1,000,000 in accordance with the terms of the Gidgee Agreement). The Holding Company has covenanted with the Sellers that it will pay the purchase price if the Buyer does not.

Completion of the Gidgee Agreement is conditional on:

- (a) Ministerial approval of the transfer of the Gidgee Tenements which are mining leases;
- (b) the Sellers obtaining all approvals, waivers and consents required for the assignment of the Gidgee Tenement that are subject to permitted encumbrances; and
- (c) the Sellers obtaining a discharge of all the assets from charges, namely the security held by the holders of GUP Notes which will be released concurrently with the completion of the sale of the Gidgee Project.

Panoramic will assume approximately \$2 million in environmental bonds. From the date of the Gidgee Agreement and pending its completion, the Sellers will provide the Buyer and its representatives with free access to the Gidgee Tenements in order to carry out exploration activities. The Buyer will be responsible for all costs and expenses incurred by the Buyer in relation to such activities and will indemnify the Sellers against all claims that may arise as a result of that access.

The parties have agreed post completion matters including that they will negotiate in good faith to share infrastructure to enable resources or reserves from the Wilsons deposit to be developed by the Sellers and, at the Buyer's request, the Sellers will toll treat ore from the Gidgee Tenements at the Company's Wiluna Project.

The Sellers have provided customary warranties for an asset sale and purchase including in relation to ownership, encumbrances and good standing of the Gidgee Tenements and the Buyer has provided warranties as to incorporation, no lawsuits pending and due authorisation.

5.5 GUP Note Agreement

The GUP Note Agreement is dated 28 January 2011 and was entered into by the Company, its subsidiaries, Apex Gold Pty Limited, Youanmi Mines Pty Ltd and Goldcrest Mines Pty Ltd, and the holders of the GUP Notes issued by the Company in September 2008. The GUP Note holders (or their related entities) also hold the 121 Existing Warrants.

The GUP Note holders include two of the largest Shareholders of the Company and the Company's Chairman, Kim Robinson.

Pursuant to the GUP Note Agreement the parties have agreed to:

- (a) redemption and cancellation of all of the GUP Notes and all of the Existing Warrants in exchange for a one-off payment of \$18,000,000 by the Company to the GUP Note holders and the issue of 180,000,000 Proposed Warrants to the GUP Note holders;
- (b) cancellation of all of the Existing Warrants, subject to Shareholder approval;

- For personal use only
- (c) discharge of all registered charges and mining mortgages held by the GUP Note holders over the assets of the Company or its subsidiaries, Apex Gold Pty Limited, Youanmi Mines Pty Ltd and Goldcrest Mines Pty Ltd; and
 - (d) discharge of all guarantees in favour of the GUP Note holders as given by Apex Gold Pty Limited, Youanmi Mines Pty Ltd and Goldcrest Mines Pty Ltd.

The redemption and cancellation includes full and final satisfaction of all existing and future obligations under the GUP Note transaction documents entered into in September 2008. The GUP Note Agreement also provides that no further GUP Notes or Existing Warrants can be issued and that holders of:

- (a) issued GUP Notes cannot transfer, deal with, encumber or surrender any GUP Notes; and
- (b) the Existing Warrants cannot exercise or transfer their Existing Warrants.

On 7 February 2011 the Company paid \$5,000,000 as the first instalment of the \$18,000,000 redemption consideration. The \$5,000,000 was paid to an escrow agent appointed by the GUP Note holders. The GUP Note holders are obliged to deliver to the escrow agent by 14 February 2011 various documents that have the effect of terminating the transaction and security documents that were entered into when the GUP Notes were issued in September 2008. Upon delivery into escrow of those documents the \$5,000,000 will be released to the GUP Note holders.

The \$13,000,000 balance of the redemption consideration will be paid to the GUP Note holders on completion of the Offer. The Proposed Warrants will be issued to the GUP Note holders at the same time. It is intended that the proceeds from the sale of the Gidgee Project and/or the Offer will fund the \$13,000,000 obligation.

The final date for payment of the \$13,000,000 is 31 March 2011 (or any later date if the parties agree to extend that date). On making of that payment the documents held by the escrow agent will be released to the Company. This will enable the Company to discharge all registered charges and mining mortgages held by the GUP Note holders (as referred to above).

The issue of Proposed Warrants to Kim Robinson is subject to Shareholder approval. If Shareholder approval is not obtained by 31 December 2011, the Company must pay to Mr Robinson a cash sum that is equal to the fair value of the Proposed Warrants to be issued to Mr Robinson as at the Settlement Price Date (as that term is defined in the GUP Note Agreement).

A GUP Note holder has reached an agreement with Kim Robinson, to sell all of the Proposed Warrants that it will be issued to Mr Robinson on arms length terms. It is intended that that sale will occur at the time the Proposed Warrants are issued.

5.6 Underwriting Agreement

The Company has entered into the Underwriting Agreement with Azure Capital pursuant to which Azure Capital will underwrite the Offer. Under the terms of the Underwriting Agreement, Azure Capital will be paid a fee of 6% of the total amount raised under the Offer and the Company must reimburse Azure Capital for costs incidental to the Offer.

Azure Capital may appoint sub-underwriters at its own cost.

Azure Capital's underwriting obligations under the Underwriting Agreement are conditional upon a number of matters including that the Gidgee Agreement and the GUP Note Agreement are completed or, in Azure Capital's opinion, are capable of being completed.

The Underwriting Agreement contains customary representations, warranties and indemnities in favour of Azure Capital. It also contains customary rights of termination by Azure Capital. In addition, Azure Capital may terminate the Underwriting Agreement if:

- (a) the Company's applications to set aside statutory demands issued by Atlas Copco are dismissed and an amount equal to or greater than \$2,000,000 is held to be due and payable to Atlas Copco (refer to Section 4.1(d) for further details);

- (b) the Gidgee Agreement is terminated, materially amended, or amended with the effect that the consideration to be received by the Company is reduced by more than \$1,000,000; and
- (c) the GUP Note Agreement is amended or terminated.
