## ASX ANNOUNCEMENT

### QUARTERLY REPORT – PERIOD TO 30 SEPTEMBER 2011

MIL Resources (“MIL” or “the Company”), the PNG focused gold and base metal exploration Company, is pleased to provide shareholders with its Quarterly Report for the period ending 30<sup>th</sup> September 2011.

#### SUMMARY

- Drilling rig contracted for the 4000 meter drilling program at Golden Peak and Poi
- Drilling commenced at Golden Peak on 19<sup>th</sup> September with 189m drilled by the end of the quarter
- Work continues to secure all available historical data on the Company’s licences and to prepare documentation and presentations for discussions with potential partners.
- Ongoing discussions with third parties to jointly explore MIL’s PNG gold/copper projects
- Discussions continued with potential development partners for Amazon Bay Vanadium rich iron sands project
- Preparations now underway for drilling to commence at Poi
- Poi Exploration Licence EL1628 renewed until 27 November 2012
- New Board appointments strengthen Papua New Guinea gold-copper focus
- Cash balance at the end of quarter \$3.07 million

#### DRILLING CONTRACT SIGNED

A key milestone for the Company achieved during this quarter was the securing of a suitable drilling rig. Following discussions with a number of contractors, a drilling contract was signed in early July with Quest Exploration Drilling (“QED”) for a diamond core drilling program of up to 4,000m at the Golden Peak and Poi gold/copper projects.

#### GOLDEN PEAK DRILLING

Drilling commenced at Golden Peak on the 19<sup>th</sup> of September and 189 m had been drilled by the end of the quarter.

At Golden Peak, drilling is predominantly targeting the Avo Creek area, which includes the **20m @ 7.21g/t Au** trench identified during the geochemical sampling program conducted earlier in 2011.

## **POI FIELD ACTIVITIES FOCUSED ON PREPARATION FOR DRILLING**

During the quarter, MIL continued trench, soil and stream sampling at Poi with the majority of activity focussed on the key prospects; Aladdins, Wallaby Ridge and Morti, which are scheduled to be tested in the upcoming drill program. A detailed ground magnetic survey at high priority drill targets was largely completed during the quarter.

Preparation of drill sites and other infrastructure for drilling continued throughout the quarter.

On completion of the Golden Peak drilling, the rig will be relocated to Poi with drilling expected to commence during November.

## **AMAZON BAY**

MIL continued with preparations for the reconnaissance drilling program that commenced in October. This drilling program is designed to define the inland strandlines and provide information about the grade and quality variability of the deposit – in particular the vanadium content, which was previously identified as greater than 1% in concentrate.

Discussions continued with potential development partners with a focus on selling a vanadium rich titanomagnetite concentrate into China.

## **BOARD APPOINTMENTS**

Given MIL's move to focus on copper/gold in PNG, in July 2011 the Company appointed two directors with requisite experience and as such, Doug Halley joined the Board as Chairman and John Holliday as Non-Executive Director.

Bruce Griffin was appointed to the Board as Managing Director in July 2011. However, soon afterwards, Bruce advised of his decision to resign to pursue a coveted position within the titanium industry. Executive Director John Haggman, who has been working alongside Bruce in the ongoing day to day management of the drilling and exploration of the Company's PNG projects, will continue in this role.

The Board is currently in the process of identifying a successor for the position. Bruce will continue with MIL until November 2011 to oversee the ongoing 4,000m drilling program at Golden Peak and Poi.

## **OTHER**

Sales of magnesite from Mrytle Springs continued under the contract with Sibelco Australian and New Zealand (formerly Unimin).

Throughout the quarter the Company continued existing and commenced new discussions with a number of major mining houses to jointly explore one or more of the PNG gold/copper projects.

## ABOUT MIL RESOURCES LIMITED

MIL Resources is a Papua New Guinea focussed mineral exploration company listed on the Australian Securities Exchange (ASX : MGX). The Company is exploring primarily for gold and copper in eight 100% owned projects across Papua New Guinea and is actively seeking partners for the development of a large, vanadium rich, titanomagnetite project at Amazon Bay in South Eastern Papua New Guinea (MIL earning 51%).

**[www.milresources.com](http://www.milresources.com)**

*To the extent that there is information included in the projects set out above any potential quantity and grade is conceptual in nature, there has been insufficient exploration to define a mineral resource under the JORC Code and it is uncertain if further exploration will result in the determination of a mineral resource under the JORC Code.*

*The information contained in this report that relates to Exploration Results or Mineral Resources or Ore Reserves is based on information compiled by John Haggman who is a Member of the Australian Institute of Geoscientists. Mr Haggman is a Director of MIL Resources Limited and has sufficient experience which is relevant to the style of mineral deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 edition of the "Australasian Code for Reporting of Mineral Resources and Ore Reserves". Mr Haggman consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.*
