Mining Equipment Onsite at Maldon

- **Underground mining equipment arrives onsite at Union Hill for the commencement of underground mine development**

The Directors of Octagonal Resources Limited (ASX: ORS) (“**Octagonal**” or “**Company**”) are pleased to announce that underground mining equipment has arrived onsite at Union Hill, Maldon, in Central Victoria for the commencement of underground mining operations to access the Alliance South Deposit.

The Alliance South Deposit is hosted with the Eaglehawk Reef at the southern end of the Central Maldon Shear Zone. The deposit contains an Inferred Mineral Resources of 473,000 tonnes grading 12 g/t gold for 182,000 ounces of gold (Figure 1 and Table 1).

The Company will extend the Union Hill Decline 180 metres to the south and develop two levels in the upper area of the Alliance South Shoot to determine the reef grade, assess ground conditions, and determine the most appropriate mining technique for an ongoing operation.

Octagonal intends to develop the Alliance South Shoot as an owner / operator and has recently purchased appropriate mining equipment, however as this machinery will not arrive onsite until early 2012 the Company has engaged the services of a Victorian based private mining contractor to provide labour and equipment to commence mining earlier than would have otherwise been possible.

An Elphinstone R2800 loader and Bell 25 tonne articulated dump truck arrived on site this week ahead of the jumbo drilling rig and will be used to re-surface the Union Hill Decline prior to the commencement of mine development. This work is expected to take a couple of weeks to complete after which mining will commence.

Additional information relating to Octagonal and its various exploration projects can be found on the Company’s website:

The information in this report that relates to Exploration Results, Mineral Resources and Ore Reserves is based on information compiled by Anthony Gray. Anthony Gray is a full-time employee of the Company and is a member of the Australian Institute of Geoscientists. Anthony Gray has sufficient experience which is relevant to the style of mineralization and type of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’ and consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to Mineral Resources for the Alliance South Deposit are based on information evaluated by Mr TG Summons who is a Member of The Australian Institute of Geoscientists (MAIG) and Mr MV McKeown who is a Fellow the Australasian Institute of Mining and Metallurgy (FAusIMM). These people have sufficient experience relevant to the style of mineralisation and type of deposit under consideration and are each qualified to act as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the “JORC Code”). Mr Summons is an associate of Mining One Pty Ltd, and Mr Mc Keown is an employee of Mining One Pty Ltd and they consent to the inclusion in the report of the Mineral Resource in the form and context in which it appears.

		Measured			Indicated			Inferred		
		'000t	Au g/t	'000oz	'000t	Au g/t	'000oz	'000t	Au g/t	'000oz
Alliance South	West Zone							287	12	110
	East Zone							186	12	72
Total								473	12	182

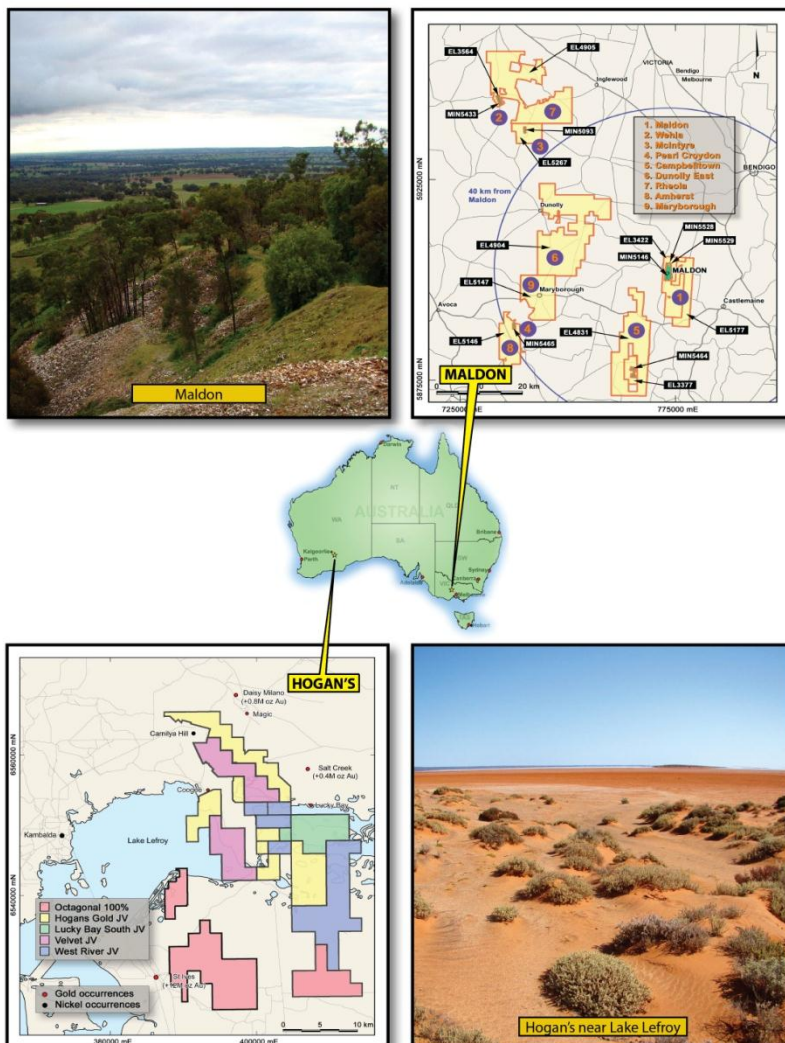

About Octagonal Resources

Octagonal Resources is a gold focused exploration and mining company with projects located in underexplored areas of two of Australia's most significant gold producing regions; the Central Victorian Goldfields and the Eastern Goldfields of Western Australia.

The Company's Victorian operations are centred at Maldon, the third largest historic primary gold producer in Central Victoria after Bendigo and Ballarat. It is here that Octagonal owns a recently refurbished and operation ready CIL gold processing plant, 235,000 ounces of inferred gold resources and a decline that extends to the undeveloped underground resources. Octagonal intends to commence open pit and underground gold mining operations at Maldon during 2011.

In Western Australia Octagonal is earning an 80% interest in the Hogan's Project by exploring for gold deposits in a highly prospective but underexplored area only 70 kilometres from Kalgoorlie. The gold potential of this emerging gold producing district is demonstrated by the recent exploration and mining success achieved by Silver Lake Resources at the Daisy Milano Mine and Integra Mining at the Salt Creek Mine and Lucky Bay Prospect. Octagonal has identified four high priority exploration target areas with the potential to host a major gold deposit.

Octagonal's corporate strategy is to develop a long term sustainable mining operation in Central Victoria to fund the Company's growth through the discovery and development of major gold deposits.
