Commentary

Cash Expenditure

The Company's negative operating cash flow for the month of November 2011 is higher than normal due to significant payments to various creditors as well as the repayment of loans. As such, the high cash outflow for the month of November is not reflective of the Company's usual monthly operating cash flows. Cash outflow for subsequent months is expected to be lower than the level of cash outflow experienced during the month of November 2011.

IT Trading Business

The Company's trading business has improved in the month of December 2011 contributing an amount of around \$640K to the Group's revenue.

Capital Raising

On 30 November 2011, under a converting loan arrangement, Mr Li Baorong has converted \$526,892 short term loan into 175,630,567 new ordinary shares of the Company at A\$0.003 per share.

The continuation of the Company's capital raising activities as well as shareholder supports will address any negative cash flows in the short to medium term.
