THE PLACEMENT

Focus Minerals Limited ("Focus") [ASX: FML], an Australian gold producer and explorer, is pleased to announce that it has entered in to a Share Subscription Deed with Shandong Gold International Mining Corporation Limited ("Shandong Gold"), under which Shandong Gold has agreed to subscribe for new fully paid ordinary Focus shares to raise \$227.5 million.

Shandong Gold, a subsidiary of one of China's three largest gold producers by production, will subscribe for approximately 4.55 billion new fully paid ordinary Focus shares ("New Shares") at 5 cents per New Share, to raise \$227.5 million ("Placement"). The Placement represents a premium of:

- 13.6% to the closing price of Focus shares of 4.4 cents per share on 19 September 2012; and
- 28% to the 60 day VWAP of 3.9 cents per share for the period ending 19 September 2012.

Focus Minerals Chairman Don Taig said: *"The investment by Shandong Gold will make Focus Minerals a vastly stronger company with a robust balance sheet, capable of pursuing organic and non-organic growth opportunities. Importantly, the investment represents the commencement of a long-term, mutually beneficial relationship which will allow Focus to unlock the potential of our large tenement holdings and resource base and lays the foundation for Focus to become a significant gold producer."*

Focus has four producing gold mines located at Coolgardie and Laverton in the eastern goldfields region of Western Australia and has 1,650 square kilometres of tenement holdings and an existing mineral resource of 4.3 million ounces¹ of gold.

¹ Approximately 2 million ounces of this Mineral Resource are owned by Focus Minerals (Laverton) Limited. Focus owns 81.57% of this subsidiary company. Please refer to Annexure B – Mineral Resource Table and competent person's statement.

“Focus has the operations, the people and the skills to grow significantly and for some time the Board has been seeking a like-minded investor with a unique blend of complementary qualities,” said Focus Chief Executive Officer Campbell Baird. *“The investment by Shandong Gold will help the senior management of Focus to unlock the Company’s growth potential at an accelerated pace. Only 4% of our landholding has so far been explored.”*

The Placement is subject to a number of conditions, including: Shandong Gold obtaining Chinese regulatory approvals; Foreign Investment Review Board (“FIRB”) approval (under the Australian Government’s foreign investment policy and the Foreign Acquisitions and Takeovers Act 1975 (Cth); Focus shareholder approval for the purpose of section 611 (item 7) of the Corporations Act 2001 (Cth); no material adverse change that has a fundamental and sustained impact occurring in respect of Focus and other customary conditions. A complete list of the conditions to the Placement are summarised at Annexure D.

A notice of meeting (including an Independent Expert’s Report) will be sent to all Focus shareholders in due course advising the date and location of the meeting.

The Share Subscription Deed contains customary exclusivity provisions, including no shop, no talk and no due diligence provisions as well as a matching right granted to Shandong Gold. The no talk and no due diligence provisions are subject to a fiduciary out which enables the Focus board to consider unsolicited alternative transactions in circumstances where, on the basis of authoritative expert or objective evidence, failing to do so would be reasonably likely to involve a breach of their fiduciary or statutory duties, or the alternative transaction is more favourable to Focus shareholders. The exclusivity obligations apply during the exclusivity period which expires on the earlier of, the end of the shareholder meeting to approve the Placement and 31 December 2012. The exclusivity provisions of the Share Subscription Deed are extracted at Annexure E. Focus Minerals has also agreed to pay a break fee of \$600,000 to Shandong Gold in certain circumstances, including if Focus shareholders do not approve the Placement or if Focus directors change their recommendation in respect of the Placement.

The timing of the Placement is dependent on the receipt of the necessary approvals. However, it is currently anticipated that payment and allotment will occur in early December 2012. Upon completion of the Placement, Shandong Gold will hold 51% of Focus’ fully diluted share capital.

Following approvals being received in respect of the Placement and the allotment of the New Shares, Focus has agreed to appoint three nominees of Shandong Gold to the Board of Focus. Each nominee will stand for re-election at Focus’ next AGM as required by law and the Focus constitution. Focus already has, and will retain, four non-executive directors on the Board.

USE OF PROCEEDS

The funds raised from the Placement will establish the foundation for Focus to grow to become a +500,000ozpa gold production company through development of existing gold projects, new discoveries from targeted exploration programmes and the potential for value accretive acquisitions.

In addition to funding ongoing working capital needs, the Placement funds are currently intended to be used to pursue the following growth initiatives:

- Accelerate exploration programmes at its majority-owned Laverton operations, to unlock the significant potential in the 1,200 square km landholding, where Focus has over 110 km in strike of mineralised shear systems that have been sparsely drilled.
- Aggressively pursue continued exploration at Focus’ greenfields exploration project at Treasure Island, where surface anomalies and recently announced drilling results indicate potential for significant gold endowment.

- Increased exploration at Coolgardie's existing operations and wider tenements, with the objective of increasing the resource position, especially at depth, and extending the current 10 year mine life at steady production rates for the Three Mile Hill Mill processing plant.
- Potentially pursue value accretive acquisition opportunities, placing the company in a strong position in a sector that rewards increased scale through consolidation.
- In addition, the opportunity to evaluate and develop a nickel strategy at Focus' Nepean nickel mine will be greatly enhanced opening up options with respect to how this asset may be advanced to maximum shareholder returns.

19th Sept 2012

Dear Mr Taig

Shandong Gold International Mining Corporation Limited (Shandong Gold) – strategic investment in Focus Minerals Limited (Focus Minerals)

It is with great pleasure that I introduce Shandong Gold to the shareholders of Focus Minerals.

Shandong Gold is a subsidiary of the Shandong Gold Group Co Ltd, which is one of the three largest gold producers in the People's Republic of China.

The Shandong Gold team has spent a great amount of time in Australia seeking to establish a relationship with an Australian domiciled gold producer and developer which has strong potential to grow its resource base through continued exploration. Shandong Gold has selected Focus Minerals, because of the quality of its asset portfolio, the prospectivity of its tenements, the quality and potential of its operations and, importantly, the quality of its people, including its Board and Management.

Shandong Gold is pleased to have negotiated with Focus Minerals a transaction under which Shandong Gold will subscribe for 51% (on a diluted basis) of the shares of Focus Minerals. Shandong Gold has been prepared to agree to subscribe at a material premium to Focus Minerals' recent market share price.

Shandong Gold Group Co Ltd has over 15 operating gold mines in China, and has over many years developed a highly skilled technical team across all facets of its operations, from exploration to development and production. Shandong Gold prides itself on the ability to control costs whilst increasing annually its reserve/resource inventory through targeted exploration and developing new deposits.

Shandong Gold will nominate three directors to an expanded Focus Minerals Board of seven directors. If requested by the Board of Focus Minerals, Shandong Gold is prepared, on arm's length terms, to make available to Focus Minerals some of its technical and management expertise, to help add significant value for all shareholders.

The investment of approximately \$227.5 million is a significant and important investment for Shandong Gold. We believe that Focus Minerals will grow into a substantial gold producer, and we look forward to working with our Australian friends to achieve this aim.

I would like to emphasise that within our business our top priorities are always the health and safety of our staff, and protecting the environment. These two issues will never diminish in importance, and our management will continue to strive for best in class to achieve a very high standard.

Lastly I would like to extend my thanks to Shandong Gold's advisory team in Australia, namely our financial advisor The PCF Capital Group Pty Ltd and our legal advisor Minter Ellison.

Yours sincerely

- (b) promptly diligently request the return or destruction of all information (in any form, including copies) that was provided to other parties in connection with any Competing Transaction or potential Competing Transaction.

2.2 No-shop restriction

During the Exclusivity Period, Focus Minerals must not, and must procure that none of its Authorised Persons directly or indirectly solicit, invite, encourage or initiate any enquiries, negotiations or discussions, or communicate any intention to do any of these things, with a view to obtaining any expression of interest, offer or proposal from any other person in relation to a Competing Transaction or potential Competing Transaction.

2.3 No-talk restriction

Subject to clause 2.6, during the Exclusivity Period, Focus Minerals must not, and must procure that none of its Authorised Persons:
