The Macquarie Winton Global Opportunities Trust (the "Trust") has exposure to the Alpha Select Winton FF Limited, a managed account with essentially the same trading strategy as the Winton Futures Fund, as outlined in section 3 of the Trust's Product Disclosure Statement (PDS)².

Comment from Winton Capital

The major markets in our portfolio generally closed the month not far from where they started, albeit with some intra-month twists and turns. The S&P 500, the Euro US Dollar exchange rate, US 10 year bonds, Brent Crude and Corn all fell into this category. Whilst it is hardly needed, this served as further evidence of the lack of available diversification in the world's major markets. As a consequence, the Fund suffered losses which were spread fairly evenly across the portfolio. Our short aluminium position proved an exception to this, leading the base metals sector to register positive performance. Cash equities also registered a small positive return.

The Fund ended the month down, with gains in base metals and cash equities not compensating for the losses from other positions in the portfolio.

Note: Total return index with price at 1 December 2005 = 100. All dates are as at month end.

How the Trust is managed

The Trust has been designed to offer investors a way to access the investment management expertise of Winton with the security of capital protection of the Trust's underlying investment at 30 November 2012.

The Trust's managed futures exposure is managed in accordance with the Alpha Select Winton FF Limited's investment strategy.

This strategy aims to identify a market trend, assess the likelihood of its continuation and extent, and invest to profit from that view. Winton's investment philosophy is that specific market behaviour and trends can be identified and profitably exploited.

Winton's trading model and research program studies the interaction between price and other data series to identify and assess trends with the aim of profiting from them.
