

ANNOUNCEMENT TO THE AUSTRALIAN SECURITIES EXCHANGE: 24 JANUARY 2013

## DECEMBER 2012 QUARTERLY REPORT

The Directors of WCP Resources Limited ("**WCP**" or "**Company**") are pleased to present its December 2012 quarterly report. Highlights during the quarter include:

### **Al Hariqah Gold Project:**

- *The Al Hariqah Gold Project ("**Al Hariqah Project**") is a prospective and potentially large scale gold project located in the Republic of Yemen.*
- *During the quarter four holes for 582m of drilling was completed at the Al Hariqah Project as part of a limited ongoing drilling program. All four holes were drilled to the south of the main body of drilling and are targeting the extensions to the mineralisation encountered in the northern kilometre of strike.*
- *Two drill rigs were operating during the quarter, including a larger dual core/percussion rig that commenced work in September 2012. All drill samples are being collated into batches and will be shipped for assaying progressively over the coming 12 months.*
- *The Company is currently reviewing the political and operational conditions in Yemen and is considering increasing exploration activities to a level more appropriate for a project of this scale potential. To assist with this process, the Company is currently finalising the appointment of an exploration manager to be based in Yemen.*

### **Yalgoo Gold Project:**

- *The Yalgoo Gold Project ("**Yalgoo Project**") comprises a prospective tenement located in the Yalgoo Mineral Field in Western Australia where encouraging rock chip assays have returned: 9.36g/t Au, 9.98g/t Au, 25.1g/t Au and 60.4g/t Au.*
- *During the quarter the Company finalised and signed a Native Title agreement with the Badimia People. A request for a Native Title heritage clearance survey has been lodged with the Badimia People's representative. The survey is currently planned to be undertaken during the March 2013 quarter.*
- *Upon receiving the required Native Title clearances, the Company plans to commence a scout style drilling program to investigate the potential for narrow vein high grade gold style mineralisation at the Yalgoo Project.*

**Enquires: Peter Woodman – Managing Director**  
Telephone: (61 8) 9322 6322

## AL HARIQAH GOLD PROJECT

The Al Hariqah Gold Project is a near-surface gold deposit located 130km northwest of Sana'a, Yemen. The Al Hariqah Project is 100% owned by Cantex Mine Development Corporation which is listed on the TSX Venture Exchange and headquartered in Kelowna, British Columbia, Canada.

The tenement was originally granted to Cantex in 1997 as part of a larger reconnaissance license. Cantex has now been granted a new Exploration Licence over the Al Hariqah Project area under recently introduced new mining laws.

The new Exploration Licence covers approximately 957km<sup>2</sup> and is valid for four years from the date of grant with the option for two further four year extensions (providing 50% area relinquishments are carried out at the first extension).

The new Yemen mining laws were drafted with assistance from the World Bank so as to encourage new investment. Importantly, the new mining laws have removed the option enabling the government to purchase a 49% interest in the project at market rates.

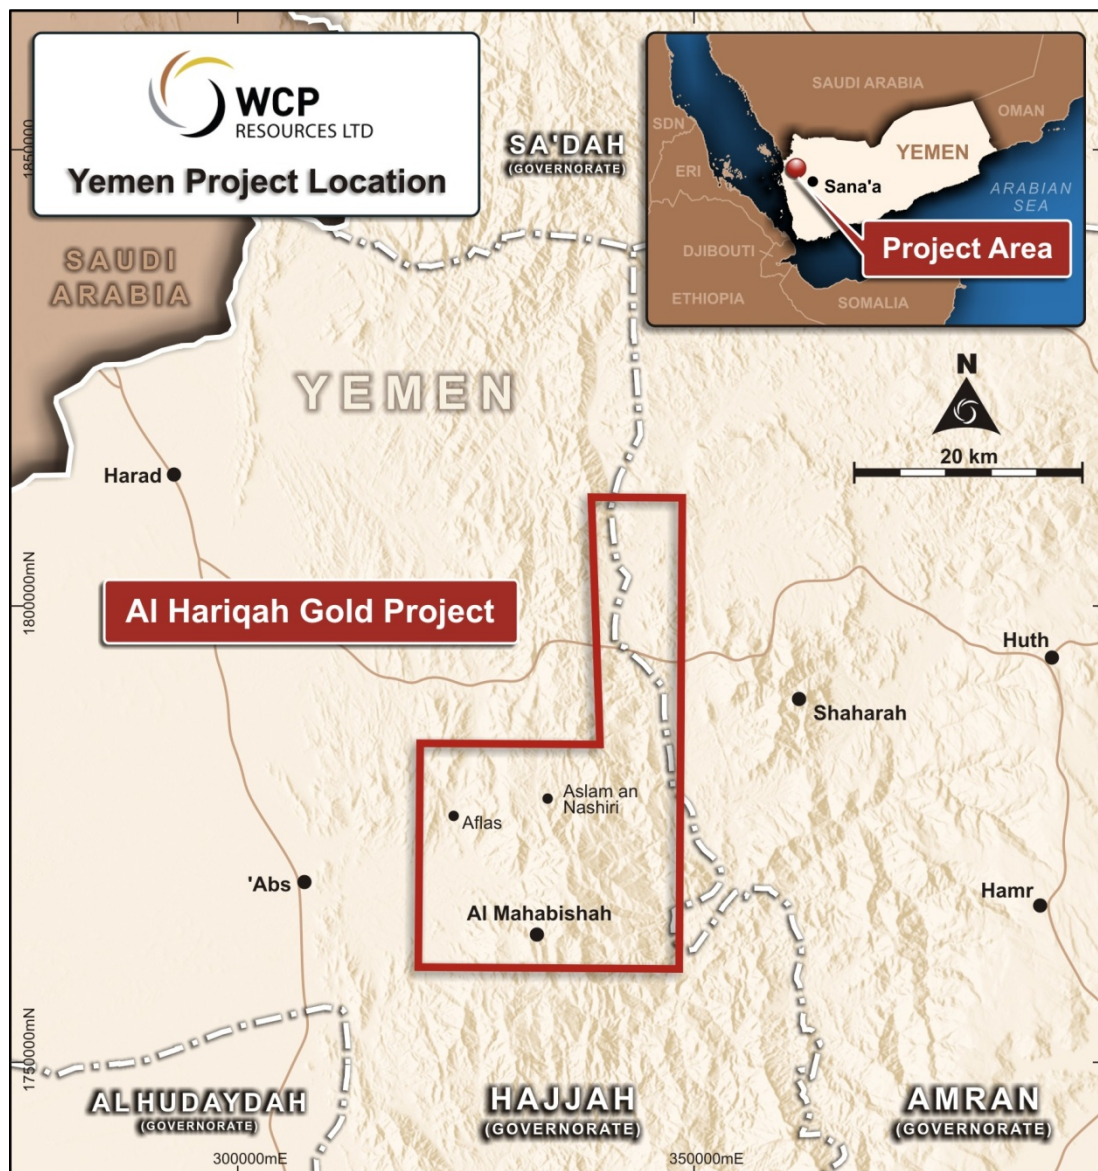

Figure 1: Project Location Map

Gold mineralisation on the Al Hariqah Project was discovered in the late 1990's during the follow up of anomalous gold values found in heavy mineral concentrates originally targeting diamond mineralisation. WCP believes the Al Hariqah Project has the potential to host a large scale gold project.

Mapping, soil/rock chip sampling and drilling have demonstrated that gold mineralisation occurs for a strike length of nearly 4km in a north northwest trending zone which stretches up to 500m wide at the northern end.

Approximately 160 drill holes, totalling over 17,000 metres, have been drilled to date at the Al Hariqah Project. The drilling has concentrated on the northern 1km of strike where numerous mineralised intercepts have been returned. There has been no resource estimate prepared for the Al Hariqah Project to date.

Drilling results to date indicate that the gold mineralisation extends to at least 150 metres depth with several deep holes ending in mineralisation. The southern 3km strike has only been subjected to sporadic drilling on the eastern side which did return gold mineralisation that warrants follow up drilling. The deposit is open along strike to the south, across strike and at depth.

The geology at Al Hariqah consists of Proterozoic quartz mica schist bordered to the east by Proterozoic metavolcanics and to the west by Proterozoic Metasediments. The mineralisation appears to be dominantly hosted by the quartz mica schist and is commonly associated with arsenopyrite.

During the quarter, four holes for 582m of drilling were completed at the Al Hariqah Project as part of a limited ongoing drilling program. All four holes were drilled to the south of the main body of drilling and are targeting the extensions to the mineralisation encountered in the northern kilometre of strike. The drill samples are being collated into batches and will be shipped for assaying progressively over the next 12 months.

Two drill rigs were operating during the quarter, including a larger dual core/percussion rig that commenced work in September 2012.

In February 2012, a new President was inaugurated following interim presidential elections in Yemen. The election was the first since 2006. The change in Government follows more than 12 months of violence and civil unrest across Yemen. Should these ongoing issues be satisfactorily resolved, WCP will look to increase drilling and other exploration activities, including drilling to test the depth and strike extensions at the Al Hariqah Project.

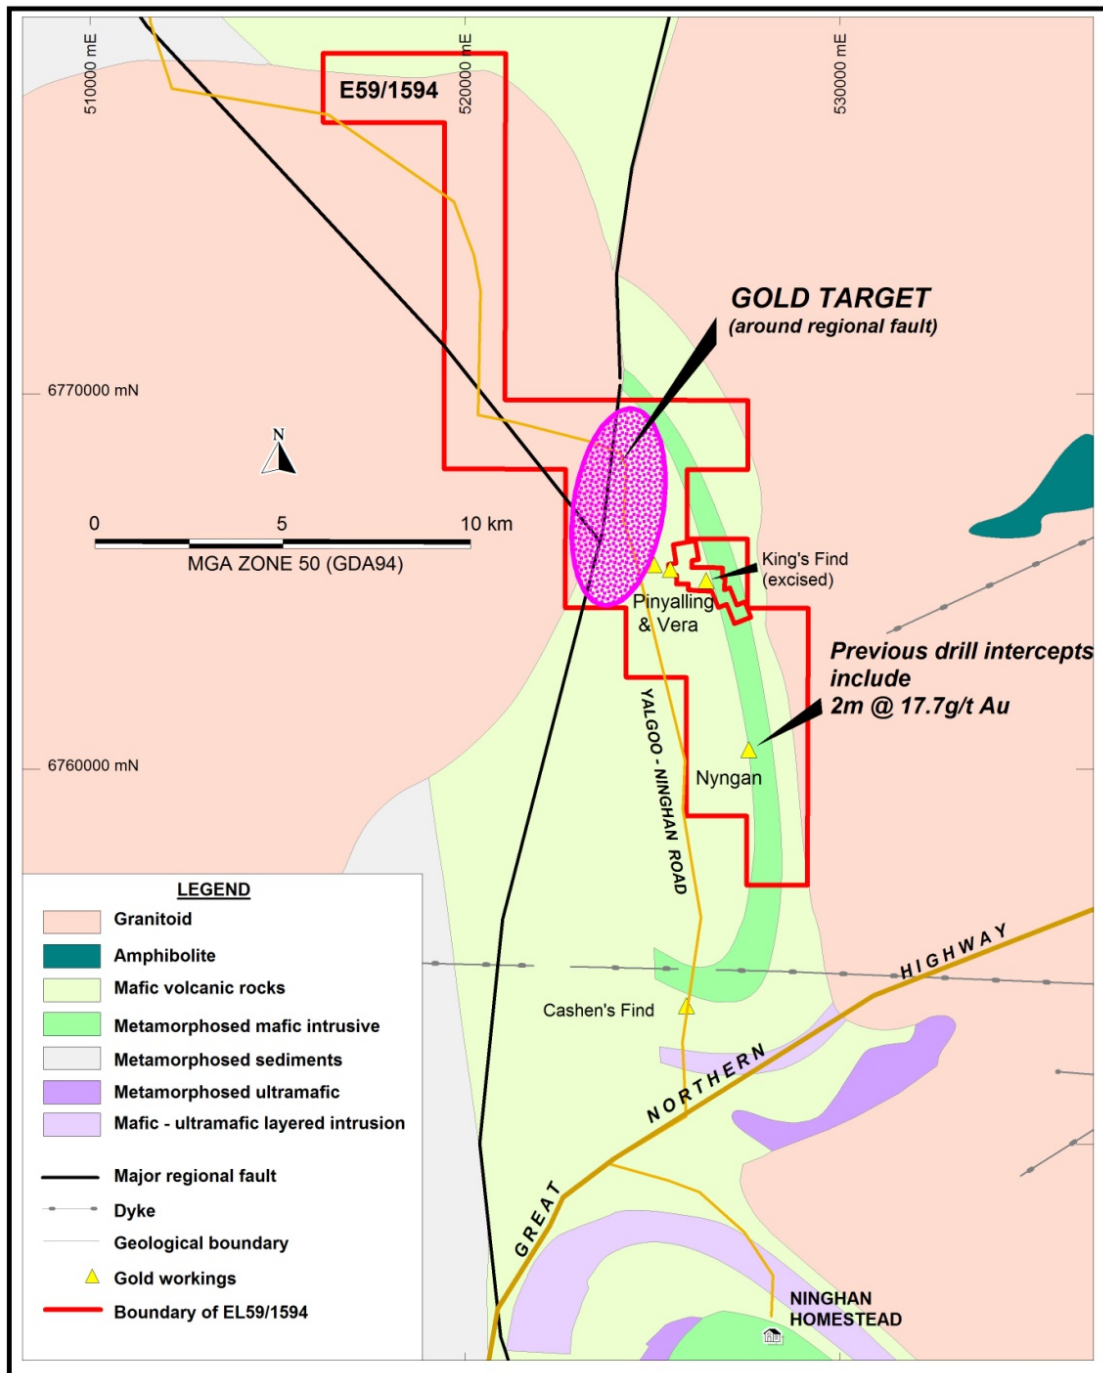

Whilst no materially adverse issues were identified during the due diligence process in respect to technical and legal title to determine if WCP should proceed with its two year option period, the Company notes that there are a number of inherent risks specific to the Al Hariqah Project, including sovereign risk.

WCP has until 10 February 2014 to exercise its option to farm-in to the Project. Upon exercise, and by meeting a series of expenditure commitments, WCP will be able to progressively earn up to a 70% interest in Project.

# YALGOO GOLD PROJECT

The Company's 100% owned Yalgoo Gold Project comprises a prospective tenement located in the Yalgoo Mineral Field in Western Australia. The Yalgoo Project is close to a number of important gold and base metal operations.

The Yalgoo Project is located within 70km of the Mount Gibson gold mine, the Golden Grove base-metal mine, Karara Magnetite Project and the Kirkalocka gold mine. The Mount Gibson gold mine has gold resources in excess of 559,000 ounces and produced 870,000 ounces of gold between 1986 and 1998 (source: Legend Mining Limited). Between 2002 and 2008 the Kirkalocka gold mine produced 294,000 ounces of gold (source: Mount Magnet South NL).

The Yalgoo Project consists of Exploration License E59/1594, which covers an area of 75km<sup>2</sup>. The Yalgoo Project is located 330km northeast of Perth, Western Australia, within the Yalgoo Mineral Field. E59/1594 is comprised of folded Archean mafic volcanic rocks and is cut by a number of regional faults that can be traced southwest to the Mount Gibson gold mining centre.

E59/1594 is readily accessible by the Great Northern Highway and the Ninghan-Yalgoo Road. The Yalgoo Project is located within the southern Murchison Terrance and contains greenstone and granitoids cut by regional faults. These faults underpin the gold mineralisation potential of the tenement. The tenement wholly contains the old Nyngan gold workings and several small groups of historical gold workings. The Nyngan gold workings are the only feature within the tenement that has been drill tested.

Previous exploration outside of the old gold workings is limited to broad spaced soil sampling. Although this work defined a number of gold anomalies, these remain untested.

Best selective rock chip assays from a sampling program completed in the September 2011 quarter included: **9.36g/t Au, 9.98g/t Au, 25.1g/t Au and 60.4g/t Au.**

The results were returned from selective sampling of quartz veins hosted in Archean metamorphosed mafic intrusive rocks and from a north-south striking zone approximately 3km in length between the Kings Find and Nyngan historic workings.

During the quarter the Company finalised and signed a Native Title agreement with the Badimia People. A request for a Native Title heritage clearance survey has been lodged with the Badimia People's representative. The survey is currently planned to be undertaken during the March 2013 quarter.

Upon receiving the required Native Title clearances, the Company plans to commence a scout style drilling program to investigate the potential for narrow vein high grade gold style mineralisation at the Yalgoo Project.

## **CORPORATE**

The Company continues to examine new business opportunities in the resources sector, both domestic and overseas.

*The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr Peter Woodman, who is a member Australian Institute of Mining and Metallurgy. Mr Woodman is a full-time employee of WCP Resources Limited. Mr Woodman has sufficient experience, which is relevant to the styles of mineralisation and types of deposit under consideration and to the activity, which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Woodman consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.*

Quarter ended ("current quarter")

31 DECEMBER 2012

### Consolidated statement of cash flows

Cash flows related to operating activities	Current quarter \$A'000	Year to date (6 months) \$A'000
1.1 Receipts from product sales and related debtors	-	-
1.2 Payments for		
(a) exploration and evaluation	(526)	(571)
(b) development	-	-
(c) production	-	-
(d) administration	(215)	(492)
1.3 Dividends received	-	-
1.4 Interest and other items of a similar nature received	135	186
1.5 Interest and other costs of finance paid	-	-
1.6 Income taxes paid	-	-
1.7 Other (provide details if material):		
- Business development	(74)	(134)
<b>Net Operating Cash Flows</b>	<b>(680)</b>	<b>(1,011)</b>
<b>Cash flows related to investing activities</b>		
1.8 Payment for purchases of:		
(a) prospects	-	-
(b) equity investments	-	-
(c) other fixed assets	-	-
1.9 Proceeds from sale of:		
(a) prospects	-	-
(b) equity investments	-	-
(c) other fixed assets	-	-
1.10 Loans to other entities	-	-
1.11 Loans repaid by other entities	-	-
1.12 Other (provide details if material)	-	-
<b>Net investing cash flows</b>	<b>-</b>	<b>-</b>
1.13 Total operating and investing cash flows (carried forward)	<b>(680)</b>	<b>(1,011)</b>

+ See chapter 19 for defined terms.

For personal use only

**Appendix 5B**  
**Mining exploration entity quarterly report**

1.13	Total operating and investing cash flows (brought forward)	(680)	(1,011)
<b>Cash flows related to financing activities</b>			
1.14	Proceeds from issues of shares, options, etc.	281	281
1.15	Proceeds from sale of forfeited shares	-	-
1.16	Proceeds from borrowings	-	-
1.17	Repayment of borrowings	-	-
1.18	Dividends paid	-	-
1.19	Other (provide details if material) - Capital raising expenses	-	-
	<b>Net financing cash flows</b>	281	281
<b>Net increase (decrease) in cash held</b>			
		(399)	(730)
1.20	Cash at beginning of quarter/year to date	8,485	8,816
1.21	Exchange rate adjustments to item 1.20	-	-
1.22	<b>Cash at end of quarter/year to date</b>	8,086	8,086

**Payments to directors of the entity and associates of the directors**  
**Payments to related entities of the entity and associates of the related entities**

		Current quarter \$A'000
1.23	Aggregate amount of payments to the parties included in item 1.2	116
1.24	Aggregate amount of loans to the parties included in item 1.10	-

1.25 Explanation necessary for an understanding of the transactions

Payments include directors' fees, superannuation, executive remuneration, company secretarial services and provision of a fully serviced office.

**Non-cash financing and investing activities**

2.1 Details of financing and investing transactions which have had a material effect on consolidated assets and liabilities but did not involve cash flows

Not applicable

2.2 Details of outlays made by other entities to establish or increase their share in projects in which the reporting entity has an interest

Not applicable

+ See chapter 19 for defined terms.

For personal use only

### Financing facilities available

Add notes as necessary for an understanding of the position.

	Amount available \$A'000	Amount used \$A'000
3.1 Loan facilities	-	-
3.2 Credit standby arrangements	-	-

### Estimated cash outflows for next quarter

	\$A'000
4.1 Exploration and evaluation	300
4.2 Recovery of expenditure	-
4.3 Production	-
4.4 Administration	150
<b>Total</b>	<b>450</b>

### Reconciliation of cash

Reconciliation of cash at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts is as follows.

	Current quarter \$A'000	Previous quarter \$A'000
5.1 Cash on hand and at bank	846	285
5.2 Deposits at call	7,240	8,200
5.3 Bank overdraft		
5.4 Other (provide details)		
<b>Total: cash at end of quarter</b> (item 1.22)	<b>8,086</b>	<b>8,485</b>

### Changes in interests in mining tenements

	Tenement reference	Nature of interest (note (2))	Interest at beginning of quarter	Interest at end of quarter
6.1	Interests in mining tenements relinquished, reduced or lapsed			
6.2	Interests in mining tenements acquired or increased			

+ See chapter 19 for defined terms.

For personal use only

**Appendix 5B**  
**Mining exploration entity quarterly report**

**Issued and quoted securities at end of current quarter**

*Description includes rate of interest and any redemption or conversion rights together with prices and dates.*

	Total number	Number quoted	Issue price per security (cents)	Amount paid up per security (see note 3) (cents)
7.1 <b>Preference +securities</b> <i>(description)</i>				
7.2 Changes during quarter (a) Increases through issues (b) Decreases through returns of capital, buy-backs, redemptions				
7.3 <b>+Ordinary securities</b>	397,808,129	397,808,129	N/A	N/A
7.4 Changes during quarter (a) Increases through issues (b) Decreases through returns of capital, buy-backs	3,750,000	3,750,000	\$0.075	\$0.075
7.5 <b>+Convertible debt securities</b> <i>(description)</i>				
7.6 Changes during quarter (a) Increases through issues (b) Decreases through securities matured, converted				
7.7 <b>Options</b> <i>(description and conversion factor)</i>	600,000 4,250,000 4,750,000	Nil Nil Nil	<i>Exercise price</i> \$0.20 \$0.10 \$0.15	<i>Expiry date</i> 21 Feb 2013 30 June 2013 31 Dec 2013
7.8 Issued during quarter				
7.9 Exercised during quarter	(3,750,000)	Nil	<i>Exercise price</i> \$0.075	<i>Expiry date</i> 31 Dec 2012
7.10 Expired during quarter				
7.11 <b>Debentures</b> <i>(totals only)</i>				
7.12 <b>Unsecured notes</b> <i>(totals only)</i>
