Commentary

Operation

Based on the Company's management accounts for BPG and BPG's subsidiaries (**Group**), BPG expects the Group's operating revenue for its first six months to be in the vicinity of A\$3.89M being an increase of over 400% compared to the corresponding period last financial year.

BPG considers that the increase in operating revenue will result in an operating profit for the half year ending 31 December 2012 representing an increase/improvement on the same period of the previous financial year. The Group's cash position has also improved, reporting a positive cumulative operating cashflow for the period Jul-Dec 2012 as compared to negative cashflows in the preceding periods.

The significant improvement is due to the Company's consistent returns in its IT trading activity over recent months, and also steady growth in its Asian business division. The Company's outlook is positive.

Funding

While the Company's cashflow has improved, the Board continues to explore capital raising activities in order to support its growth.
