- Fully franked interim dividend of 7.0c up 17% from the prior corresponding period

FlexiGroup Limited (ASX:FXL, “FlexiGroup”) today announced a 16% increase in consolidated Cash Net Profit After Tax to \$32.6m and 22% like-for-like receivable growth for the 6 months to 31 December 2012.

The Board of Directors declared a fully franked (interim) dividend of 7.0 cents per share, compared to 6.0 cents per share paid for the same period last year.

FlexiGroup Managing Director and Chief Executive Officer, Mr Tarek Robbiati, said: “This is a strong result which highlights the successful diversification of our business revenue streams over the past few years. Our business mix is changing rapidly and our receivables are growing faster than our cash NPAT because of that and seasonal factors.

“Through a strategic program of organic start-ups and acquisitions FlexiGroup has established itself as an agile and highly competitive financial services company well placed for further growth initiatives.

“First half receivables growth has been largely driven by Certegy and Flexi Commercial, with receivables increasing 29% and 82%, respectively on 1H12.

“These two businesses are well positioned to deliver future cash EPS growth because they have the right combination of large receivables volumes with low loss rates, and are highly scaleable with low cost operating platforms.

“The company’s acquisition of Lombard has seen NPAT double in the first 6 months and provided FlexiGroup with an entry point into the \$45 billion credit card market with a competitive interest-free value proposition.”

### **FY13 guidance reaffirmed and FY14 outlook is strong**

FlexiGroup reaffirms Cash NPAT guidance of 11% to 16% growth for FY13.

The Group remains committed to strong NPAT growth through to FY14 from receivables growth, increased economies of scale, reducing risk profile and funding costs. Strong new business volumes in the Commercial, Certegy and Lombard businesses are expected to underpin future earnings momentum for the company.

## Group Strategy

Mr Robbiati said: "FlexiGroup will continue to be very focused on expansion of our core businesses by acquiring market share in low risk customer segments, while capitalising on economies of scale across the Group."

"We are also ramping up our online, wireless and payment functions to be ready for a world where 24x7 transactions at home or on the move are increasingly characterising the purchasing behaviour of consumers and businesses alike.

"For these reasons the shared services platform we are developing is fundamental to make FlexiGroup highly scalable and provide compelling value propositions to retailers, vendors and end customers.

"We will also remain focused on value accretive acquisition opportunities to accelerate our growth for the Group."

Over the next 12 months we will focus our effort to:

- Continue to organically build scale in Certegy and Flexi Commercial – superior cash EPS growth to be generated through a combination of longer term receivables, lower capital utilisation and highly scalable, low cost operating platforms
- Accelerate organic growth in Interest Free Credit Cards (Lombard) to offset any impact of softness in retail leasing volumes
- Improved cost base across the Group by building a low cost shared-services platform
- Drive improved capital efficiency by continuing FlexiGroup's securitisation program
- Selectively acquire Consumer and Commercial finance businesses to accelerate scale in existing segments or reach new market segments
- Accelerate the building of FlexiGroup's online, wireless and payment capabilities
