## ASX MARKET RELEASE

### EXPANSION OF GROUP RISK BUSINESS

Diversa Limited (ASX: DVA) is pleased to advise that it has entered into a strategic alliance with InterPrac Limited in relation to the marketing and promotion of its group risk products.

Interprac provides services to members of the National Tax & Accounting Association (NTAA) to help members of the NTAA offer a range of financial services to their clients without the need for practice based specialists.

As the NTAA has over 8,500 firms of accountants as its membership base, the number SMSF clients looked after by members of the NTAA is a very significant part of the Self Managed Super Fund market.

Diversa offers group life and salary continuance risk products through two managed investment schemes, either directly to individuals via super funds or employer groups.

Diversa is creating a "tailored" version of the products for NTAA members' clients. InterPrac selected Diversa as a result of its competitive offer including its premium rates as well as the ability to provide automatic cover for members of SMSF's which will becoming increasingly important to trustees of an SMSF as regulation ensures that all members of an SMSF are offered life insurance protection.
