

Infomediamedia Renews Exclusive Agreement with Toyota Material Handling USA for 3 Years

Thursday, 8 July 2013 – SYDNEY

International automotive industry IT developer, Infomediamedia Ltd, announced today the renewal of its agreement with Toyota Material Handling U.S.A., Inc. (TMHU) to produce and supply its Microcat® brand Electronic Parts Catalogue (EPC) to TMHU authorised dealers throughout North America. TMHU dealers first started using Microcat in 2008. The renewed agreement allows Infomediamedia to continue supplying its totally cloud-based solution, Microcat® LIVE™ through to 2016.

Microcat is a mission critical application that helps dealers quickly identify, locate and price specific genuine parts that are needed to service or repair lift trucks. Each part identification is particular to a specific model and the way it was built.

As part of the new expanded agreement, Infomediamedia will also develop a leading edge business to business (B2B) parts ordering and purchasing portal serving TMHU and its National Account users. TMHU engages with third parties that have material handling facilities across North America and who have standardised pricing on Toyota Fork Lift Trucks and genuine parts. These entities are referenced as 'National Accounts' and include firms such as: Federal Express, Coca Cola and Safeway.

Karen Blunden, Global Director of Business Development and CEO for the Americas said: "Infomediamedia is honoured to have this expanded opportunity to support TMHU. We will develop the portal using our leading edge Microcat LIVE cloud technology, helping TMHU, its dealers and its National Accounts to improve supply chain efficiency, manage online sales transactions and reduce operating cost."

Commenting on the agreement, Infomediamedia's Executive Chairman, Richard Graham, said: "The evolution of our relationship with TMHU to create a portal is an important landmark for Infomediamedia. We believe our technology is leading the industry with our vision for better relationships through Business to Business solutions. We are increasingly seeing interest from our customers wanting to transform their B2B relationships to operate in a new era of customer engagement. Our technology allows them to do that with its right combination of affordability, industry leading functionality and design providing reduced cycle time and increased sales"
