WESTERN AREAS HALF YEAR RESULTS

(Comparisons provided in brackets refer to the second half in Financial Year 2013)

- EBITDA of A\$65.4m (A\$58.3m) despite revenue being A\$9.3m lower than the previous period
- EBITDA margin improved by 20% to 45.6% (38.2%), reflecting a realisation of cost saving initiatives and ongoing productivity improvements
- Underlying Net Profit After Tax (NPAT) of A\$4.3m (underlying loss of A\$0.7m)¹
- Reported NPAT of A\$2.7m (reported loss of A\$96.2m)
- NPAT includes A\$1.6m of FinnAust Mining Plc expenditure predominantly related to transaction costs associated with its successful listing on the London AIM market
- Fully franked interim dividend of 1 cent per share declared (A\$2.3m)
- Free cashflow generation of A\$19.2m (-A\$5.1m outflow), one of the few nickel mining companies in the world to generate absolute free cashflow in the last six months
- Unit cash costs of production (nickel in concentrate) 10% lower at A\$2.41/lb, maintaining the Company's standing in the lowest quartile of global nickel production costs
- Western Areas has separately announced today a proposed underwritten placement to raise approximately A\$89m and a non-underwritten share purchase plan to raise up to a maximum of A\$15m to reduce debt and improve financial flexibility

WESTERN AREAS LTD

Western Areas Ltd (ASX:WSA, “Western Areas” or the “Company”) today announces the Company’s Half Year Results for the period ended 31 December 2013.

Against the backdrop of the challenging low nickel price, Western Areas reported NPAT of A\$2.7m. This result included A\$1.6m of costs primarily related to the successful listing of the 68% owned FinnAust Mining plc on the London AIM. Excluding the impact of FinnAust, the Company recorded an Underlying NPAT of A\$4.3m.

Western Areas Managing Director, Mr Dan Lougher, said that it was satisfying to be one of the few nickel mining companies in the world to report a profit.

“The standout financial measure for the half was the A\$19.2m in free cash flow we generated, which was a A\$24.2m turnaround from the previous half.”

“The quality of our assets and how the team at Forrestania manage them on a daily basis drives these results. The most pleasing outcome of these efforts was a reduction in our unit cash cost of production by 10% to A\$2.41.”

“In the Full Year Results announcement on 27 August 2013, I commented how the Company had reacted swiftly to the difficult nickel price environment. The results today reflect the delivery of those commitments with a 20% lift in EBITDA margins, free cashflow generation and a recent upgrade to full year guidance metrics. Importantly, all of these results have been achieved safely and without harm to our environment,” Mr Lougher said.

Dividend Payment

Given the free cashflow generation and underlying NPAT for the half, the Board has decided to declare an interim fully franked dividend of 1c per share, which will represent a payout of around A\$2.3m (or 54% of underlying NPAT for the half).

Key dates for the interim dividend will be:

- Record Date, 1 April 2014
- Payment date, 11 April 2013

Other

Separately, the Company has today announced an underwritten placement and share purchase plan, which will see Western Areas balance sheet significantly strengthened. Placement and share purchase plan participants will be eligible for the interim dividend. Please refer to the separate announcement for more details.

Also released today are the Company's half year report (incorporating the Appendix 4D) and a presentation that outlines the half year results in more detail.
