# Meridian tracking ahead of Prospectus forecasts

19 February, 2014

Meridian Energy today announced its interim results for the six months to 31 December 2013 – the first financial results announcement since the company's listing in October 2013.

Meridian's Net Profit after Tax (NPAT) was \$116.9 million, while Underlying NPAT (which excludes the effects of non-cash fair value movements, gains on sale of assets, impairments and other one-off items) was \$83.0 million and earnings before interest and taxation, depreciation and amortisation and fair value adjustments (EBITDAF) was \$268.2 million.

### *Performance against Prospectus forecast*

Meridian's Chief Executive Mark Binns said the earnings figures were very pleasing as Underlying NPAT was 27.7% above the company's internal half year split of the Prospectus forecast, while EBITDAF was up 6.9% on the same basis.

"The above average hydrology conditions in Meridian's catchments contributed to consistently high generation market share in the last six months, with generation volume being the highest in the Company's history."

NPAT was 49.3% above Prospectus forecast assumptions, including \$41.2 million of non-cash fair value gains.

### *Performance against the same period last year*

Compared with the same period last year, EBITDAF was down 3.2% and Underlying NPAT was down 6.0%. This was mainly due to increased New Zealand Transmission costs (\$11 million) and one off costs from the Initial Public Offering (\$8 million). With these excluded, Underlying NPAT would have been 9.6% higher than the same period last year.

NPAT was down 32.5% compared to the same period last year, which included \$102.1m of non-cash fair value gains in the six months to 31 December 2012.

### *Operating environment*

With hydrology inflows 122% of average in Meridian's catchments, the company was able to maintain a high

**Important Notice for Investors:** The securities of Meridian Energy Limited are represented by Instalment Receipts. Each Instalment Receipt carries a liability to pay a further instalment of NZ\$0.50 on 15 May 2015. When investors acquire the Instalment Receipts they assume the liability to pay the Final Instalment. It is the investor's responsibility to ensure that if they are on the register when the liability for the instalment arises, they can afford to pay the instalment. If an investor has a liability and does not pay the instalment, the Trustee can take action to recover the amount owing including costs and expenses.

Meridian Energy Limited (ARBN 151 800 396) A company incorporated in New Zealand 33 Customhouse Quay, PO Box 10840, Wellington 6143

---

generation market share (36% on average) during the period.

“Meridian’s position was enhanced with the completion of the Pole 3 upgrade in November. In December the upgrade resulted in the highest weekly northward flows since 2007,” said Mr. Binns.

The retail market remained highly competitive with a decrease in net retail contracted sales to \$296.9 million, down 3% on last year. Despite strong competition, customer numbers across both the Meridian and Powershop brands increased by 2% during the period.

“Meridian’s last increase in energy prices was in December 2012. While we will continue to pass on any increases or decreases in transmission or network costs, we do not foresee energy prices increasing until at least June 2015,” he said.

Meridian launched the Powershop brand in Australia during the period. Approximately 4,000 customers have now signed up to Powershop, which has a unique offering in the Victorian market.

#### *Interim dividend*

In line with the Prospectus, Meridian will pay an interim dividend of 4.19 cents per share on 15 April 2014, which will be imputed to 90% of the corporate tax rate.

#### *Outlook*

Following the positive half year result, Meridian has continued to deliver strong operating performance.

Given performance to date, should inflows from this point match the assumptions in Meridian’s Prospectus, full year EBITDAF would exceed the Prospectus forecast by approximately 7%.

Investors need to remain aware that hydrology and other risks described in the Prospectus can still significantly impact results.

## 1. Summary of Accounting Policies

### Reporting Entity and Statement of Compliance

Meridian Energy Limited (the “Company” or the “Parent”) is a profit-oriented entity domiciled in New Zealand, registered under the Companies Act 1993, and an issuer for the purposes of the Financial Reporting Act 1993. Meridian Energy Limited is a mixed ownership model Company, that is majority owned by Her Majesty the Queen in Right of New Zealand (the “Crown”) and is dual listed on the New Zealand Stock Exchange (NZX) and the Australian Securities Exchange (ASX). The Company is bound by the requirements of the Public Finance Act 1989 but is no longer bound by The State-Owned Enterprises Act 1986.

Meridian Energy Limited’s core business is the generation of electricity (including the management of related assets) and the trading and retailing of electricity and wider complementary products and solutions.

The following new standards and amendments below became effective during the period:

STANDARD/INTERPRETATION	EFFECTIVE FOR ANNUAL REPORTING PERIODS BEGINNING ON OR AFTER
NZ IFRS 10 Consolidated Financial Statements	1 January 2013
NZ IFRS 11 Joint Arrangements	1 January 2013
NZ IFRS 12 Disclosure of Interests in Other Entities	1 January 2013
NZ IFRS 13 Fair Value Measurement	1 January 2013
NZ IAS 19 Employee Benefits (revised 2011)	1 January 2013
NZ IAS 27 Separate Financial Statements (revised 2011)	1 January 2013
NZ IAS 28 Investments in Associates and Joint Ventures	1 January 2013
Amendments to NZ IFRS 7 Financial Instruments: Disclosures – Offsetting Financial Assets and Financial Liabilities	1 January 2013
Improvements to IFRS:2009-2011 cycle	1 January 2013

Apart from NZ IFRS 13 the adoption of these standards does not have a material impact on the reported results or financial position of Meridian.

The condensed interim financial statements comprise those of the Parent and its subsidiaries (together referred to as “Meridian” or “Group”). The reporting period for these financial statements is the six months ended 31 December 2013.

The financial statements were authorised for issue by the Directors on 18 February 2014.

### Basis of Preparation

These unaudited condensed interim financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards (IFRS) and New Zealand Equivalents to International Financial Reporting Standards (NZ IFRS) and in accordance with IAS 34: *Interim Financial Reporting* and NZ IAS 34: *Interim Financial Reporting* as appropriate for a profit-oriented entity.

The financial statements have been prepared on the basis of historical cost modified by the revaluation of certain assets and liabilities. The accrual basis of accounting has been used unless otherwise stated.

These financial statements are presented in New Zealand dollars rounded to the nearest million.

The introduction of NZ IFRS 13 establishes a single source of guidance for fair value measurement and disclosure requirements. Specific transitional provisions were given to entities such that they need not apply the disclosure requirements set out in the Standard in comparative information provided for periods before the initial application of the Standard. In accordance with these transitional provisions the Group, in these Condensed Interim Financial Statements, has not made any disclosures for the comparative period ending 31 December 2012 (notes 13 and 14). Other than additional disclosures, the application of NZ IFRS 13 has not had any material impact on the amounts recognised in the financial statements.

### Judgements and Estimations

The preparation of financial statements requires judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The application of these are consistent with those used in the preparation of the Group's financial statements for the year ended 30 June 2013. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements that have a significant effect on the financial statements and estimates with a

## 2. Segment Reporting

Management has determined the operating segments based on the reports reviewed by the Chief Executive to assess performance, allocate resources and make strategic decisions.

The Chief Executive assesses the performance of the operating segments on a measure of EBITDAF. Segment EBITDAF represents profit earned by each segment before the allocation of central administration costs, Directors' fees, equity accounted earnings of joint ventures, change in fair value of financial instruments, finance costs, gain/loss on sale of assets, depreciation, amortisation, impairments and income tax expense.

The following balance sheet items are not allocated to operating segments as they are not reported to the Chief Executive at a segmental level:

- Assets
- Liabilities
- Capital Expenditure

significant risk of material adjustment in the next year are in relation to the valuation of generation structures, plant assets and energy derivatives. In addition, accounting judgements are made in respect of the hedge designation and valuation of certain financial instruments, assessment of hedge effectiveness and the determination of useful lives of Property, Plant and Equipment.

### Accounting Policies

Except as described below, the same accounting policies, presentation and methods of computation are applied in these condensed financial statements as were applied in the preparation of the Group's financial statements for the year ended 30 June 2013. The following new policies were introduced:

#### SHARE BASED PAYMENTS

Employees (including Senior Management) of the Company may receive remuneration in the form of share-based payments, whereby employees render services as consideration for shares (equity settled) or cash (cash settled). The cost of equity settled transactions with employees is measured at the fair value of the shares at the date at which they are granted. The cost of cash settled transactions with employees is measured at the fair value of the liability at each reporting date.

The fair value of equity settled options at the grant date is recognised as an expense, together with a corresponding increase to the share option reserve within equity, over the vesting period in which the performance and/or service conditions are fulfilled. The total amount to be expensed is based on the fair value of each option along with the best estimate of the number of equity instruments that will ultimately vest which

includes an assessment of the likelihood that service conditions will be met.

The fair value of the liability associated with cash settled transactions is recognised as an expense, together with a corresponding increase in a share based payment liability, over the period in which the performance and/or service conditions are fulfilled. The total amount to be expensed is based on the fair value of the liability along with the best estimate of the number of notional shares that will ultimately vest which includes an assessment of the likelihood that service conditions will be met.

The expense or credit for a period represents the movement in cumulative expense recognised as at the beginning and end of that period.

#### FAIR VALUE HIERARCHY TRANSFERS

All assets and liabilities measured or disclosed at fair value are categorised into the following three-level hierarchy based on the inputs to the valuation:

- Level 1 Inputs – Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date
- Level 2 Inputs – Either directly (i.e. as prices) or indirectly (i.e. derived from prices) observable inputs for the asset or liability, other than quoted prices included in Level 1
- Level 3 Inputs – Inputs for the asset or liability that are not based on observable market data (unobservable inputs)

Should market liquidity/products alter significantly or the observability of inputs change, consideration will be given to transfers from one level of the hierarchy to another.

better assess performance. As the allocation methodology is based on current costs, it was not considered appropriate to restate prior periods to reflect this change since the data is unavailable and the cost to develop it would be excessive.

#### Wholesale Segment

The Wholesale segment encompasses New Zealand based activity associated with Meridian's generation of electricity and the sale into the wholesale electricity market, the purchase of electricity from the wholesale spot market to sell to large industrial customers and the Retail segment, development of renewable energy generation opportunities and activities such as risk management and dam consultancy services.

Costs to develop New Zealand renewable generation opportunities and dam consultancy services offered by Damwatch Engineering Limited (previously Damwatch Services Limited) are reported as part of the Wholesale operating segment as it is determined that they have similar long term economic characteristics.

The Chief Executive considers the business from the perspective of three reportable segments, being Wholesale, Retail and International.

Revenues are derived from external customers within New Zealand, Australia and the United States of America. Meridian sells the equivalent of approximately 40% (December 2012: 40%, June 2013: 40%) of its generation output to a single customer. The revenues received from this customer are attributable to the Wholesale segment.

The revenue from external parties reported to the Chief Executive is measured in a manner consistent with that in the Income Statement.

Except as described in the Summary of Accounting Policies, the accounting policies of the reportable segments are the same as those applied in the preparation of the Group financial statements for the year ended 30 June 2013.

In the year ended 30 June 2013, Meridian commenced allocating directly attributable ICT, Insurance, Property and Brand costs to segments in order to

## 2. Segment Reporting (continued)

### Retail Segment

The Retail segment encompasses activity associated with the purchase of electricity from the Wholesale segment, the retail sale of electricity to customers and provision of metering services.

The Retail segment purchases electricity from the Wholesale segment at an average fixed price of \$80-\$85 per MWh for electricity which is sold to customers on fixed price, variable volume agreements and electricity purchased for customers on spot agreements at the prevailing wholesale spot market rates.

### International Segment

The international segment comprises Meridian's Australian and United States of America operations which generate electricity, sell and retail electricity into the relevant markets.

On 28 June 2013, Meridian Wind Macarthur Holdings Pty Ltd, a controlled entity involved in the construction of the Macarthur Windfarm, was sold as a going concern.

### Other Segments

Other operations, which are not considered reportable segments, include Meridian's portfolio of subsidiaries that provide insurance services and energy solutions to industry. The results of these segments are included in 'Other Segments'.

On 20 December 2012 Energy for Industry Limited, a subsidiary that provided energy solutions to industry, was sold as a going concern.

### Unallocated

Unallocated Corporate encompasses Meridian's business functions and company-wide costs that provide support to the Wholesale, Retail, International and Other segments, and Meridian's non-operating subsidiaries.

### Inter-segment items

Inter-segment revenue and expenses are sales and purchases between the Wholesale, Retail and International segments.

The Unaudited Segment Information Provided to the Chief Executive for the Reportable Segments for the Six Months Ended 31 December 2013 is as follows:

## 7. Share Capital (continued)

On 19 September 2013 Meridian issued 962,999,998 bonus shares for total consideration of \$1.

### LONG-TERM INCENTIVE

During the period the Group established a long-term equity settled incentive plan for New Zealand based senior executives. The movement in treasury shares during the period relates to the purchase of shares by an external trustee as part of this plan. It is designed to enhance the alignment between Shareholders and those executives most able to influence the performance of the company.

Under the plan senior executives have the option to purchase shares at market value funded by an interest free loan from the Company, with the shares held on trust by the Trustee of the long term incentive (LTI) plan until the end of the vesting period. Vesting of shares is dependent on continued employment through the vesting period. It is also dependent on the Company achieving a positive total shareholder return over the period and the Company's performance relative to the benchmark peer group. If the

Company's total shareholder return performance over the vesting period exceeds the 50th percentile total shareholder return of the benchmark peer group, 50% of the shares will vest. 100% of an executive's shares will vest upon meeting the performance of the 75th percentile of the benchmark peer group, with vesting on a straight line basis between these two points. In the event that total shareholder return is negative over the period or less than 50th percentile of the benchmark peer group, no shares will vest. The benchmark peer group comprises a selected number of NZX and ASX listed electricity generators and energy retailers.

Should the relevant total shareholder return performance hurdle not be met, or if the executive ceases to be employed by the Company other than for a qualifying reason, or the executive does not execute the option, the shares or notional shares will be forfeited to the trustee without compensation and the relevant executive will receive no benefits (subject to the Board exercising a discretion to allow some or all of the shares or notional shares to vest).

If the shares vest, executives are entitled to a bonus amount which, after deduction of tax, is equal to the loan balance at grant date for the shares which have vested. That amount must be applied towards repayment of their loan balance and the corresponding shares are released by the trustee to the individual. The initial vesting period for the plan is from January 2014 to June 2016.

The plan represents the grant of in-substance nil-price options to executives. The fair value of the options granted under the plan are estimated as at the date of grant using an option pricing model that takes into account the terms and conditions upon which the options were granted. In accordance with the rules of the plans, the model simulates the Company's total shareholder return and compares it against the peer group over the vesting period. The model takes into account the historic dividends, share price volatilities and co-variances of the Company and peer group to produce a predicted distribution of relative share performance. This is applied to the relevant grant to give an expected value of the total shareholder return element for the plan.

Meridian has committed bank facilities of \$858.8 million of which \$379.8 million were undrawn at 31 December 2013. The expiry of these facilities range from November 2015 to November 2017.

## 13. Financial Risk Management

Meridian's activities expose it to a variety of financial risks: liquidity risk, market risk (including currency risk, cash flow risk, interest rate risk, electricity and other price risk) and credit risk. Meridian's overall risk management programme focuses on the unpredictability of financial markets and the electricity spot price and seeks to minimise potential adverse effects on the financial performance and economic value of the Group. In order to hedge certain risk exposures, Meridian uses derivative financial instruments such as: foreign exchange contracts (FECs) and options; cross currency interest rate swaps (CCIRs); interest rate swaps (IRSs) including forward rate agreements and interest rate options; electricity contracts for differences (CfDs) and options; and financial transmission rights (FTRs) and options.

Risk management is carried out under policies approved by the Board.

Specific details of certain risks and sensitivities to movements in underlying assumptions are shown below. Sensitivities are calculated by moving one input assumption while holding all other inputs constant.

### Liquidity Risk

Meridian maintains sufficient funding through adequate committed funding facilities and the ability to close out market positions as part of its management of liquidity risk. Due to the dynamic nature of the underlying businesses, Group Treasury maintains flexibility in funding by keeping committed undrawn funding facilities available of at least \$250 million to ensure it has sufficient headroom under normal and abnormal conditions.

### Market Risk

#### FOREIGN EXCHANGE RISK

Where Meridian raises debt funding denominated in a foreign currency, its policy is to hedge all foreign currency and interest rate exposures back into the currency of the funds ultimate utilisation. The resulting local currency floating interest rate risk is managed as part of the interest rate risk management as described in the following section.

Meridian establishes a combination of both cash flow and fair value hedges for the CCIRs and the foreign denominated borrowings.

Meridian incurs capital and operating expenditure denominated in foreign currencies which creates an exposure to foreign exchange risk primarily in respect of US dollars, Australian dollars and the Euro. Meridian does not enter into FECs for speculative purposes.

Foreign currency expenditure, once approved is hedged 100% whilst anticipated foreign currency expenditure but not yet approved may be hedged up to 50% based on criteria set out in the Group Treasury Policy.

All committed foreign currency exposures below \$1 million NZD equivalent may be hedged at the discretion of the Group Treasurer. Foreign currency exposures of \$1 million NZD equivalent or greater are hedged.

For any FECs that are individually or part of a series of exposures that is in excess of \$5 million NZD equivalent, Meridian establishes cash flow hedges for accounting purposes.

### 13. Financial Risk Management (continued)

#### Sensitivity Analysis – Foreign Currency<sup>1</sup>

		GROUP			
		IMPACT ON AFTER TAX PROFIT		IMPACT ON EQUITY	
		UNAUDITED 31 DEC 2013 \$M	AUDITED 30 JUNE 2013 \$M	UNAUDITED 31 DEC 2013 \$M	AUDITED 30 JUNE 2013 \$M

	+20%	(1.5)	(0.5)	(1.6)	(2.1)
NZ Dollar / Euro	-20%	4.1	0.1	7.7	10.8
	+20%	(2.1)	(0.1)	(5.1)	(7.2)
AUD / Euro	-20%	-	-	12.3	19.0
	+20%	-	-	(8.2)	(12.6)

<sup>1</sup> Sensitivities that relate to translating the financial statements of subsidiaries denominated in foreign currency into NZ dollars are not included in the analysis.

#### CASH FLOW AND INTEREST RATE RISK

Meridian's primary interest rate risk arises from long-term borrowings which are sourced at both fixed interest rates and floating interest rates.

In addition, as described in the section above, the combination of foreign denominated borrowings and the CCIRs result in an exposure to floating interest rates in the currency of the funding's ultimate destination. Borrowings in floating New Zealand or Australian interest

rates expose Meridian to risk of changes in cash flow and the fair value of the debt issued. Meridian does not enter into interest rate hedges for speculative purposes.

Interest rate risk is managed on a dynamic basis and various scenarios are simulated taking consideration of existing and forecast debt requirements, existing hedge positions, forecast interest rates and in accordance with the Board approved policies.

In accordance with the Board policy, Meridian manages its exposure to interest rate risk by identifying a core level of debt and using IRs that apply minimum and maximum bands of interest rate (hedge) cover to fix interest rates.

The majority of Meridian IRs are not designated as hedges for accounting purposes and are therefore classified as held for trading.

#### Sensitivity Analysis – Interest Rates

		GROUP			
		IMPACT ON AFTER TAX PROFIT		IMPACT ON EQUITY	
		UNAUDITED 31 DEC 2013 \$M	AUDITED 30 JUNE 2013 \$M	UNAUDITED 31 DEC 2013 \$M	AUDITED 30 JUNE 2013 \$M

Australian BBSY	-100 bps	(8.9)	(6.6)	(8.9)	(6.6)
	+100 bps	8.4	6.2	8.4	6.2

#### PRICE RISK

Meridian is exposed to movements in the spot price of electricity arising through the sale and purchase of electricity to and from the market. Meridian manages this exposure by entering into electricity derivative contracts to manage the net risk. Meridian does not enter into derivative contracts for speculative purposes.

	+100 bps	<b>(0.6)</b>	1.0	<b>(0.6)</b>	1.0

#### Credit Risk

Credit risk is managed based on net exposures at Group level. Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to wholesale and retail customers, including derivatives which have a positive value, outstanding receivables and committed transactions. For banks and financial

institutions, only independently rated parties with a minimum rating of 'A' are accepted and where wholesale customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, the Credit Management Unit assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Board.

The utilisation of credit limits and provision of prudential security by wholesale customers is regularly monitored by line management. Credit risk surrounding the sales to retail customers is predominantly mitigated by the accounts being settled on a monthly basis. Retail credit management continually monitors the size and nature of the exposure and acts to mitigate the risk deemed to be over acceptable levels.

### 14. Financial Instruments

NZ IFRS 13 provides for a three-level fair value hierarchy of valuation data inputs that requires financial instruments inputs to be categorised as follows:

- Level 1 Inputs – Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date
- Level 2 Inputs – Either directly (i.e. as prices) or indirectly (i.e. derived from prices) observable inputs for the asset or liability, other than quoted prices included in Level 1

- Level 3 Inputs – Inputs for the asset or liability that are not based on observable market data (unobservable inputs)

The fair value of a derivative financial instrument is calculated as the present value of the estimated future cash flows of the instrument. Two key types of variables used by the valuation technique are:

- Forward price curve; and
- Discount rates

The following table gives information about how the fair values of financial assets and financial liabilities are determined (in particular, the valuation technique(s) and input(s) used).

## 14. Financial Instruments (continued)

FINANCIAL ASSETS/ FINANCIAL LIABILITIES	FAIR VALUE HIERARCHY	VALUATION TECHNIQUE(S) AND KEY INPUT(S)	SIGNIFICANT UNOBSERVABLE INPUTS	RELATIONSHIP OF UNOBSERVABLE INPUTS TO FAIR VALUE
Electricity related CfDs	Level 3	<p>Valuation technique: Discounted cash flows.</p> <p>Future cash flows have been calculated with reference to:</p> <p><b>Price</b></p> <p>Quoted market data (Australian Securities Exchange (ASX)) where available and relevant. Where quoted prices are not available or not relevant (ie. for long dated and large volume contracts such as the NZAS CfD) Meridian's best estimate of long-term forward wholesale electricity price is used. Meridian's best estimate is based on a fundamental analysis of expected demand and cost of new supply</p> <p><b>Discount Rate</b></p> <p>Rates based on the forward interest rate swap curve adjusted for additional risks including counterparty credit risk</p> <p><b>Term and volumes</b></p> <p>All contracts are assumed to run for the full duration of the contract and are adjusted for any potential early termination or discontinuation of the contracts and for the volume stated in the contracts</p> <p><b>Other factors</b></p> <p>London Metal Exchange (LME) quoted prices of primary aluminium</p> <p><b>Calibration factor</b></p> <p>Factor applied to forward price curve as a consequence of initial recognition differences</p>	Estimate of forward wholesale electricity price ranging from \$55 per MWh to \$98 per MWh (in real terms)	For a buy contract the higher the forward wholesale electricity price the lower the fair value loss or the higher the gain and for a sell contract the higher the fair value loss or lower the fair value gain
Electricity related CfD's	Level 2	Valuation technique: Discounted cash flows. Quoted market data for similar assets and liabilities in an active market (ASX) and discount rates based on the forward interest rate swap curve adjusted for counterparty credit risk	N/A	N/A
Electricity related CfD's	Level 1	Quoted market data (Australian Securities Exchange (ASX))	N/A	N/A
Interest rate Swaps and Cross Currency Interest Rate Swaps	Level 2	Valuation technique: Discounted cash flows. Published market interest rates as applicable to the remaining life of the instrument and discount rates based on the forward interest rate swap curve adjusted for counterparty credit risk	N/A	N/A
Foreign Exchange Contracts	Level 2	Valuation technique: Discounted cash flows. Published forward exchange market rates and discount rates based on the forward interest rate swap curve adjusted for counterparty credit risk	N/A	N/A
Held for Sale Financial Assets - Listed securities	Level 1	Quoted bid prices in an active market	N/A	N/A

In estimating the fair value of an asset or liability, the Group uses market-observable data to the extent it is available. Where observable inputs are not available, the Group engages third party experts to support the establishment of appropriate valuation techniques and inputs to valuation models.

The Audit and Risk Committee of the Company determines the overall appropriateness of key valuation techniques and inputs for fair value measurement.

The Chief Financial Officer, in his report to the Board, includes explanation of fair value movements.

## 14. Financial Instruments (continued)

The table below shows the fair value hierarchy of the financial assets and financial liabilities measured at fair value on a recurring basis by the Group:

DERIVATIVE FINANCIAL INSTRUMENTS	GROUP							
	UNAUDITED LEVEL 1 \$M	UNAUDITED LEVEL 2 \$M	UNAUDITED LEVEL 3 \$M	UNAUDITED 31 DEC 2013 \$M	AUDITED LEVEL 1 \$M	AUDITED LEVEL 2 \$M	AUDITED LEVEL 3 \$M	AUDITED 30 JUNE 2013 \$M
<b>Assets:</b>								
Held for Trading								
NZAS CfD	-	-	-	-	-	-	18.4	18.4
Electricity Related CfDs	5.0	(0.1)	72.9	77.8	3.7	62.6	64.6	130.9
Interest Rate Swaps	-	10.0	-	10.0	-	9.9	-	9.9
Foreign Exchange Contracts	-	-	-	-	-	0.1	-	0.1

### Cash Flow Hedge Reserve

The effective portion of changes in the fair values of derivatives that are designated and qualify as cash flow hedges are recognised in the cash flow hedge reserve. The movement in the cash flow hedge reserve for the six months ended 31 December 2013 of \$(2.0) million is net of tax (December 2012 \$(5.2) million, June 2013 \$50.7 million).

This movement comprises the realised and unrealised changes in the fair value of electricity derivatives of \$Nil (December 2012 \$(0.1) million, June 2013 \$(0.8) million), and the realised and unrealised changes in fair value of treasury derivatives (FECs, IRSS and CCIRSs) of \$(2.0) million (December 2012 \$(5.1) million, June 2013 \$51.5 million).

## 14. Financial Instruments (continued)

### Material CfD Agreements

On 7 August 2013, Meridian and New Zealand Aluminium Smelters (NZAS) entered into an electricity price agreement (2013 Agreement). This replaced the previous agreement negotiated in 2007 which took effect on 1 January 2013 (2007 Agreement).

The 2013 Agreement is for a period of up to eighteen years and is based on 400 to 572MW of continuous consumption at the Tiwai smelter, thereby providing NZAS price certainty for this consumption volume which NZAS is responsible for purchasing from the New Zealand wholesale market. The agreed energy price is subject to escalation with reference to the Consumers Price Index (All Groups) and world aluminium prices.

Meridian considers that the 2013 Agreement will best ensure that the electricity price NZAS pays will remain competitive for the scale of electricity consumption at the Tiwai smelter, while recognising both the commodity-price driven cycles of NZAS's business environment and the wholesale electricity price cycles to which Meridian is exposed.

The 2007 and 2013 agreements have been accounted for at fair value as required by NZ IAS 39 *Financial Instruments: Recognition and Measurement*. Fair value changes subsequent to initial recognition are recognised in the Income Statement. The 2013 Agreement has been measured using the fair value guidelines under NZ IFRS 13.

### Initial Recognition Difference

An initial recognition difference (also referred to as Day 1 adjustment) arises when an electricity derivative is entered into at a fair value determined to be different to the transaction price. This difference is accounted for by recalibrating the valuation model by a fixed percentage to result in a value at inception equal to the transaction price (fair value). This recalibration adjustment is then applied to future valuations over the life of the contract.

The table below shows the aggregate Day 1 adjustment yet to be recognised in the Income Statement under the recalibration method:

	GROUP	
	UNAUDITED 31 DEC 2013 \$M	AUDITED 30 JUNE 2013 \$M

### Guarantees

Meridian Energy Limited has provided parent guarantees for various construction and grid connection obligations of Mt Mercer Wind Farm Pty Limited. The maximum liability under these guarantees is \$211.6 million (31 December 2012 \$Nil, 30 June 2013 \$221.9 million).

Three River Holdings No 2 Limited has provided a bank guarantee (A\$37.9 million, 31 December 2012 A\$Nil, 30 June 2013 A\$37.9 million) to the financiers of the Macarthur Wind Farm, guaranteeing that it will comply with its various obligations under the Refinancing Coordination Deed (with that guarantee expected to be released in quarter 4 of the 2014 calendar year).

## 16. Subsequent Events

On the 18 February 2014 the Board declared a partially imputed dividend of \$107.4 million payable on the 15th of April 2014. The dividend has not been included as a liability in these

financial statements. The payment of the dividend will not have tax consequences for the Group other than reducing the imputation credit balance.

There have been no other material events subsequent to 31 December 2013.

## 17. Contingent Assets and Liabilities

There were no contingent assets (31 December 2012 \$Nil, 30 June 2013 \$Nil) or contingent liabilities at 31 December 2013 (31 December 2012 \$Nil, 30 June 2013 \$Nil).

# Review Report of the Auditor-General

## TO THE SHAREHOLDERS OF MERIDIAN ENERGY LIMITED

We have reviewed the condensed consolidated interim financial statements on pages 2 to 24. The condensed consolidated interim financial statements provide information about the past financial performance of Meridian Energy Limited ("the Company") and its subsidiaries ("the Group") and its financial position as at 31 December 2013. This information is stated in accordance with the accounting policies referred to on page 9.

### BOARD OF DIRECTORS' RESPONSIBILITIES

The Board of Directors is responsible for the preparation, in accordance with New Zealand law and generally accepted accounting practice, of condensed consolidated interim financial statements which give a true and fair view of the financial position of the Group as at 31 December 2013 and the results of its operations and cash flows for the six months ended on that date.

### REVIEWER'S RESPONSIBILITIES

The Auditor-General is the auditor of the Group pursuant to section 5(1)(f) of the Public Audit Act 2001. Pursuant to section 32 of the Public Audit Act 2001, the Auditor-General has appointed me, Michael Wilkes, using the staff and resources of Deloitte to undertake the annual audit of the Group.

We are responsible for reviewing the condensed consolidated interim financial statements presented by the Board of Directors in order to report to you whether, in our opinion and on the basis of the procedures performed by us, anything has come to our attention that would indicate that the condensed consolidated interim financial statements do not give a true and fair view of the matters to which they relate.

### BASIS OF OPINION

A review is limited primarily to enquiries of Company personnel and analytical review procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

We have reviewed the condensed consolidated interim financial statements of the Group for the six months ended 31 December 2013 in accordance with the Review Engagement Standards issued by the External Reporting Board. These standards require that we plan and perform the review to obtain moderate assurance as to whether the condensed consolidated interim financial statements of the Group are free from material misstatement.

In addition to this review and the audit of the Company and Group annual financial statements, we have carried out other assignments for the Company and Group consisting of a carbon emissions audit, audit of the securities registers and were appointed as the investigating accountant in respect of the public offer which are compatible with the independence requirements of the Auditor-General, which incorporate the independence requirements of the External Reporting Board. In addition, principals and employees of our firm deal with the Company and Group on normal terms within the ordinary course of trading activities of the business of the Company and Group. Other than these assignments and transactions within the ordinary course of trading activities of the Company and Group, and in our capacity as auditor acting on behalf of the Auditor-General, we have no other relationships with, or interests in, the Company or Group.

### OPINION

Based on our review, which is not an audit, nothing has come to our attention that causes us to believe that the condensed consolidated interim financial statements on pages 2 to 24 do not give a true and fair view of the financial position of the Group as at 31 December 2013 and the results of its operations and cash flows for the six months ended on that date in accordance with NZ IAS 34: Interim Financial Reporting and IAS 34: Interim Financial Reporting.

Our review was completed on 18 February 2014 and our review opinion is expressed as at that date.

**Michael Wilkes**  
Deloitte  
On behalf of the Auditor-General  
Christchurch, New Zealand

*This review report relates to the unaudited condensed consolidated interim financial statements of Meridian Energy Limited and its subsidiaries ("the Group") for the six months ended 31 December 2013 included on Meridian Energy Limited's website. The Board of Directors is responsible for the maintenance and integrity of Meridian Energy Limited's website. We have not been engaged to report on the integrity of Meridian Energy Limited's website. **AUSTRALIA**

Dear Sir/Madam

**Re: Meridian Energy Limited (MEZCA)  
Listing Rule 4.2A.2A – Details of Directors and Directors' Declaration in Respect of the Half  
Year Financial Statements and Notes**

This announcement is made pursuant to ASX Listing Rule 4.2A.2A and relates to, and should be read in conjunction with, the company's announcement of its result for the six months to 31 December 2013 dated 19 February 2014.

The directors of Meridian Energy Limited, at any time during or since the end of the half year ended 31 December 2013, were:

Chris Moller	Chairman
Peter Wilson	Deputy Chairperson
Mary Devine	Director
Stephen Reindler	Director
Anake Goodall	Director
John Bongard	Director
Sally Farrier	Director
Janice Dawson	Director

**Attached** is a declaration on behalf of the directors of the company in respect of the company's half year financial statements and notes for the six months to 31 December 2013.

Yours faithfully

**Jason Stein**  
General Counsel and Company Secretary

**Meridian Energy Limited**

**("Company")**

**Directors' declaration in respect of the Group Financial Statements for six months ended 31 December 2013**

---

**Introduction**

It is a requirement of the Australian Securities Exchange Listing Rule 4.2A.2A that a declaration be given by the directors for the Company in respect of the financial statements for the Company and its subsidiaries (Meridian Group) for the six months ended 31 December 2013. This declaration must be filed with the Australian Securities Exchange.

**Declaration**

The directors of the Company hereby declare that in the directors' opinion:

1. the Meridian Group financial statements for the six months ended 31 December 2013 and the notes to those financial statements comply with generally accepted accounting practice in New Zealand as it relates to the half year financial statements;
2. the Meridian Group financial statements for the six months ended 31 December 2013 and the notes to those financial statements give a true and fair view of the financial position and performance of the Meridian Group; and
3. there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the directors dated 18 February 2014 and is signed and on behalf of the directors by the Board Chairman.

Signed

Chris Moller  
Chairman

RESULTS PRESENTATION *for the six months ended December 2013*

## Disclaimer

---

The information in this presentation was prepared by Meridian Energy with due care and attention. However, the information is supplied in summary form and is therefore not necessarily complete, and no representation is made as to the accuracy, completeness or reliability of the information. In addition, neither the company nor any of its directors, employees, shareholders nor any other person shall have liability whatsoever to any person for any loss (including, without limitation, arising from any fault or negligence) arising from this presentation or any information supplied in connection with it.

This presentation may contain forward-looking statements and projections. These reflect Meridian's current expectations, based on what it thinks are reasonable assumptions. Meridian gives no warranty or representation as to its future financial performance or any future matter. Except as required by law or NZX or ASX listing rules, Meridian is not obliged to update this presentation after its release, even if things change materially.

This presentation does not constitute financial advice. Further, this presentation is not and should not be construed as an offer to sell or a solicitation of an offer to buy Meridian Energy securities and may not be relied upon in connection with any purchase of Meridian Energy securities.

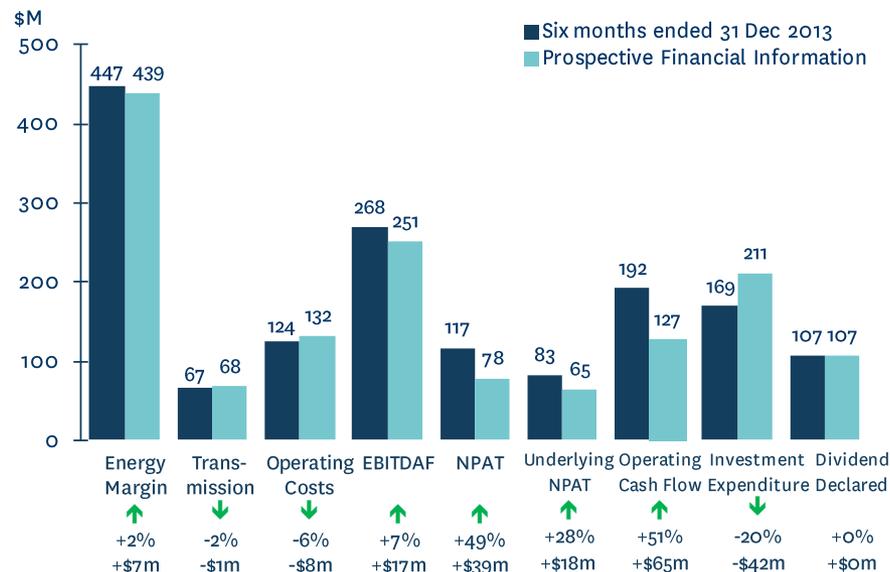

This presentation contains a number of non-GAAP financial measures, including Energy Margin, EBITDAF, Underlying NPAT and gearing. Because they are not defined by GAAP or IFRS, Meridian's calculation of these measures may differ from similarly titled measures presented by other companies, nor should they be construed as an alternative to other financial measures determined in accordance with GAAP. Although Meridian believes they provide useful information in measuring the financial performance and condition of Meridian's business, readers are cautioned not to place undue reliance on these non-GAAP financial measures.

All currency amounts are in New Zealand dollars unless stated otherwise.

## Highlights

- Financial performance ahead of half year split of the annual Prospective Financial Information (PFI) in Meridian's Offer Document
  - NPAT +49.3% including larger non cash fair value gains than assumed in PFI
  - EBITDAF +6.9%
  - Underlying NPAT +27.7%
- Continued strong cash flow performance
  - Operating cash flow +50.8% on PFI and +10.8% on the prior year
- Interim dividend of 4.19 cents per share (cps), imputed to 90% of the corporate tax rate

### FINANCIAL PERFORMANCE AGAINST PFI

#### YIELD ON SHARES

#### YIELD ON INSTALMENT RECEIPTS

	Cash dividend yield	Gross dividend yield	Cash instalment yield	Gross instalment yield
Interim dividend (4.19 cps)	2.8%	3.8%	4.2%	5.7%
Full year PFI dividend (10.5 cps)	7.0%	8.9%	10.5%	13.4%

## Highlights

- Improved hydrology conditions
  - Inflows to 31 December 2013 18% higher than the same period last year, at 122% of average
  - Contributed to Meridian's highest July to December generation on record<sup>1</sup> (6,651 GWh)
  - Supported a sustained period of high generation market share
- Lower wholesale market prices accompanied high hydro generation
- Market share and generation volumes also reflected the completion of the HVDC upgrade
  - December 2013 saw the highest weekly northward flow since 2007
  - Meridian's January 2014 hydrology conditions were similar to January 2013, with around 800GWh less spill last month

NEW ZEALAND WEEKLY GENERATION MARKET SHARE

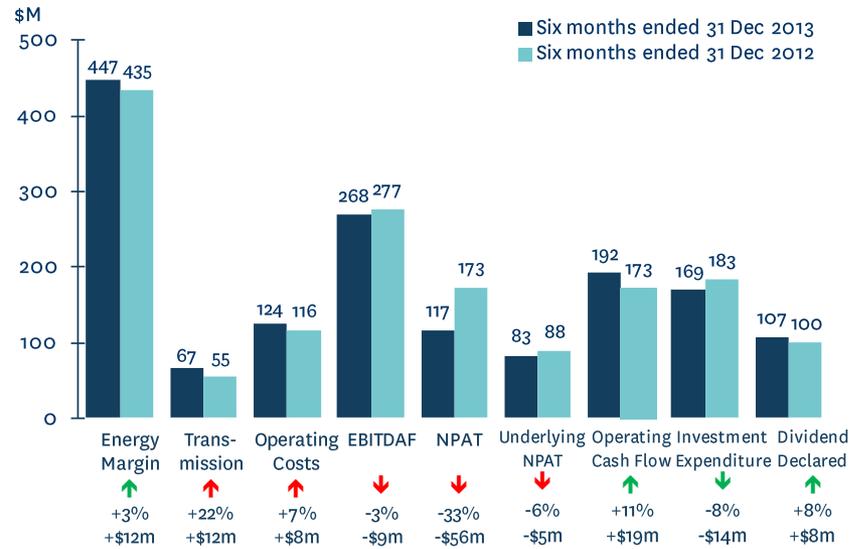

<sup>1</sup>Where historical generation before 2011 is adjusted for the sale of the Tekapo stations

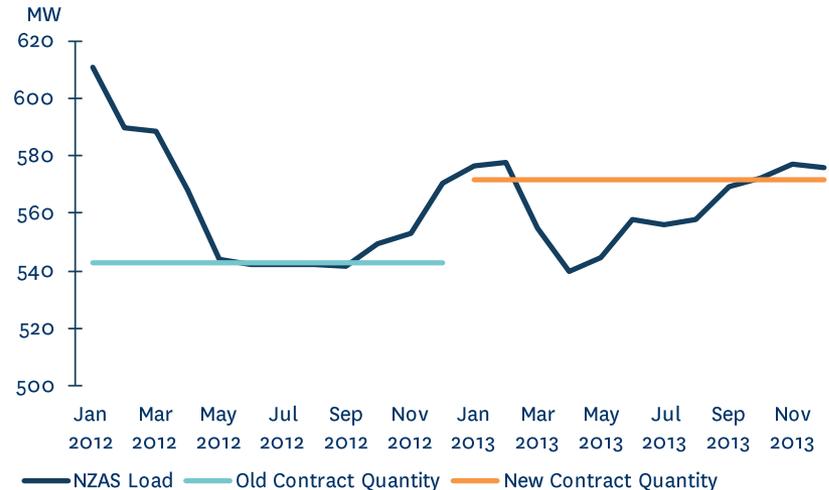

# Highlights

- Reported financial performance for the six months to December 2013 lower than the same period last year
  - NPAT -32.5%, largely non cash fair value gains last year
  - EBITDAF -3.2%
  - Underlying NPAT -6.0%
  
- Adjusting for increased New Zealand Transmission costs (\$11m) and IPO costs (\$8m)
  - EBITDAF +3.7%
  - Underlying NPAT +9.6%
  
- Transitioned to an amended NZAS contract

## FINANCIAL PERFORMANCE AGAINST PRIOR YEAR

## NZAS AVERAGE MONTHLY LOAD

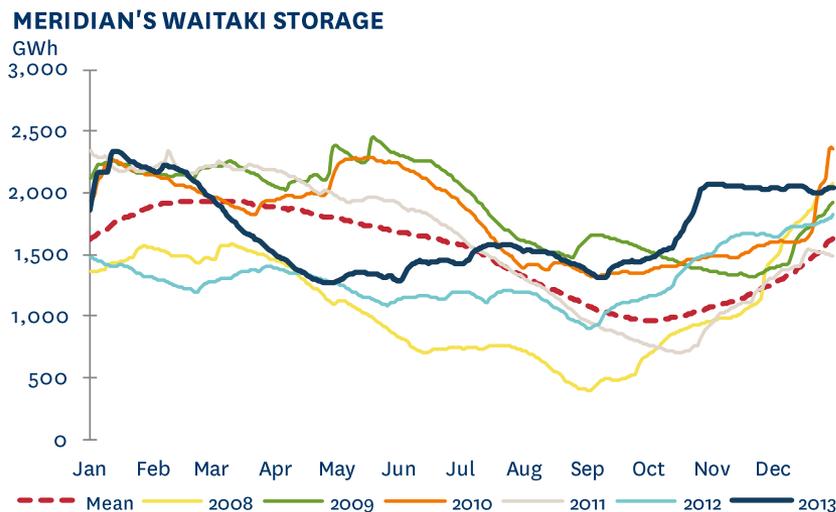

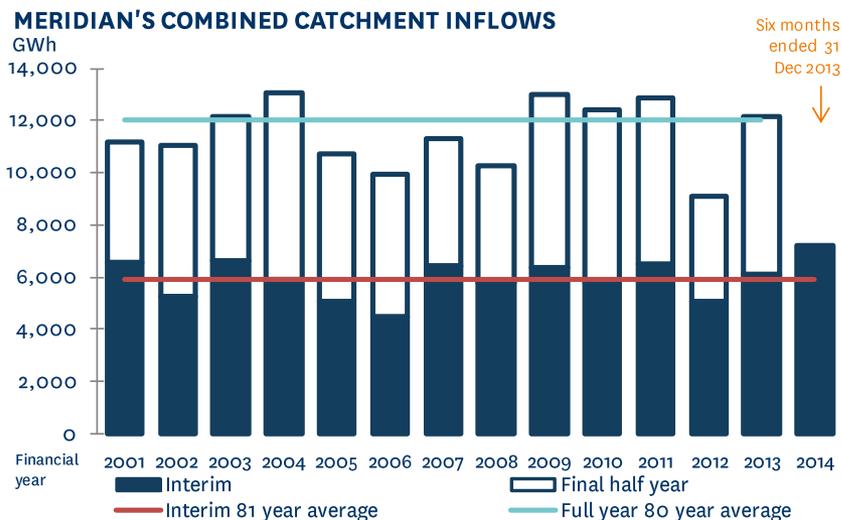

# Operating Performance

## Meridian's Operating Performance - Hydrology

- For the six months ended December 2013, inflows were 122% of historic average, representing the 7<sup>th</sup> highest July to December inflows on record
- Highest level of July to December inflows since 1996
- Multiple flood events in Meridian's catchments were managed during a very wet October 2013
- Meridian's Waitaki catchment storage at the end of December was at 2,042GWh, which was 125% of historic average and 12% higher than at the same time last year
- Storage has remained relatively flat since late October 2013, despite below average inflows in both November 2013 and December 2013
- Above average inflows in January 2014

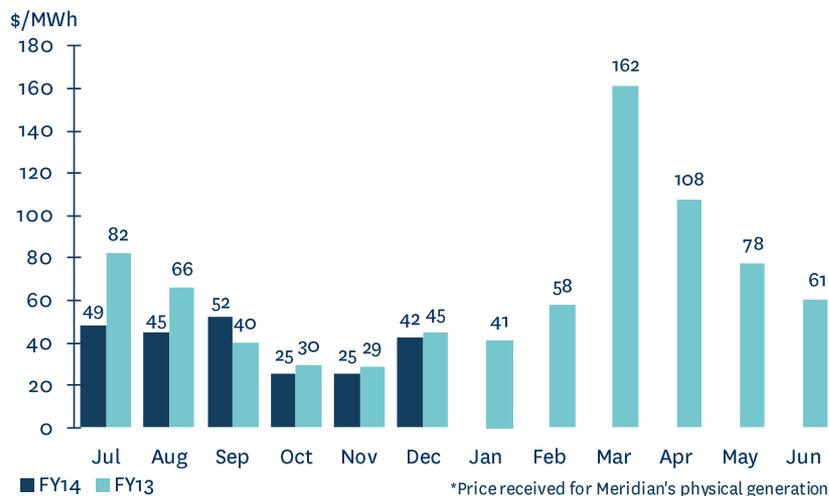

## Meridian's Operating Performance - Generation

- For the six months ended December 2013, Meridian's New Zealand generation was 10% higher than the same period last year
- Since mid October 2013 Meridian has maintained a weekly generation market share well above 35%
- Market conditions have reflected high hydro storage, good wind conditions, uncommitted thermal generation and several plant outages
- The average price Meridian received for its generation in the six months ended December 2013 was 17% lower than the same period last year
- Similarly, the price Meridian paid to supply contracted sales in the six months ended December 2013 was 17% lower than the same period last year
- Both prices reflect the higher than average hydro storage position

**MERIDIAN'S NEW ZEALAND GENERATION**

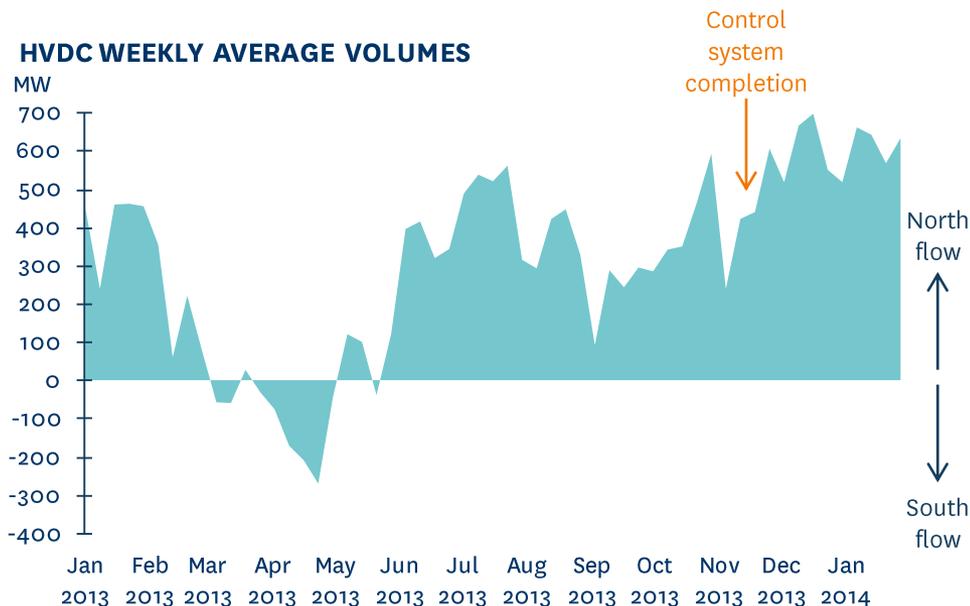

**MERIDIAN'S AVERAGE GENERATION PRICE\***

## Meridian's Operating Performance - Transmission Improvement

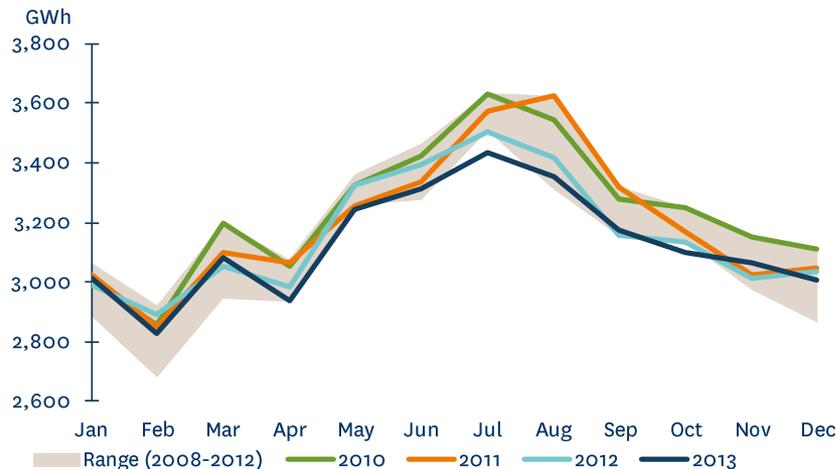

- Completion of the HVDC control system in late November 2013 helped to further increase Meridian's generation market share
- Since the start of December 2013, Meridian's generation market share has been well above 40%
- During December 2013 the HVDC saw the highest weekly northward flow since 2007
- Meridian's January 2014 hydrology conditions were similar to January 2013, with around 800GWh less spill last month

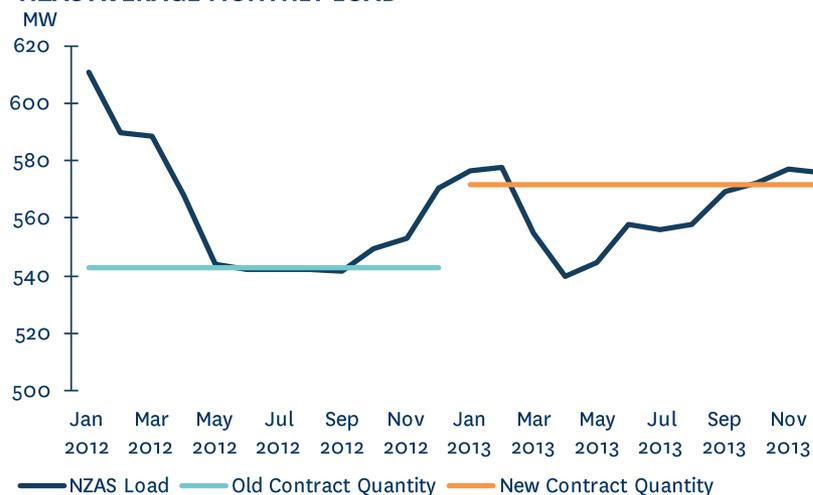

## Meridian's Operating Performance - Demand

- Subdued annual demand in the 12 months to December 2013 compared with the same period last year
- The current New Zealand Aluminium Smelters (NZAS) Agreement base quantity of 572MW has been in place since 1 January 2013
- Meridian and NZAS agreed to a period of lower than contract load during the dry conditions earlier in 2013
- NZAS average load has been above the 572MW base quantity of the NZAS Agreement since October 2013
- Overall NZAS demand is flat in the 12 months ended December 2013 compared to the same period last year

### NATIONAL DEMAND

### NZAS AVERAGE MONTHLY LOAD

## Meridian's Operating Performance - Retail Competition

- For the six months ended December 2013, market switching numbers were 18% higher than the same period last year
- Meridian's customer connection numbers (ICP's) have increased 1.6% since June 2013

### Residential/SME segment

- Segment remains highly competitive
- Meridian has seen a 1.6% decrease in average net sales price compared with the same period last year
- Meridian's last energy tariff increases were in December 2012
- Energy sales prices are forecast to remain unchanged through until at least June 2015
- Latest MBIE residential electricity price survey<sup>1</sup> reinforces Meridian's competitive retail pricing

### Corporate/Industrial segment

- Volumes have increased +6.4% as dry conditions in 2012 saw Meridian reduce load to manage risk
- Pricing has followed lower ASX pricing

### MARKET ICP SWITCHING (ALL RETAILERS)

### MBIE QUARTERLY SURVEY OF ELECTRICITY PRICES<sup>1</sup>

<sup>1</sup>MBIE Quarterly Survey of Domestic Energy Prices November 2013

## Meridian's Operating Performance - Growth Initiatives

### Mill Creek

- Access roading and concrete foundations now complete
- Turbine erection will commence late March 2014
- On track for expected first generation in May 2014 and full production in early FY2015
- Construction costs are on budget

### Australia

- In November 2013, first power was generated at the Mt Mercer Wind Farm in Victoria, Australia
- On track for scheduled full production in late 2014
- Construction costs are on budget
- Official launch of Powershop in Australia this month with approximately 4,000 customers signed up

### Efficiency Focus

- Continued cost and efficiency focus across the group
- Operating costs for the six months to December 2013 were 6% lower than PFI

## Meridian's Operating Performance - Health and Safety

- Two and half years since the last recorded lost time injury
- No significant harm or injury events during the six months to December 2013
- Shifting focus to Total Recordable Injury Frequency Rate (TRIFR) across employees and contractors
- Particular focus this year is on
  - Driving industry wide improvement through Staylive
  - Managing Meridian's two wind construction projects
  - Broadening the company's safety culture with contractors and sub-contractors
- Maintaining company wide vigilance – “safety is for keeps”

## Meridian's Operating Performance - Community Initiatives

### Community Funds

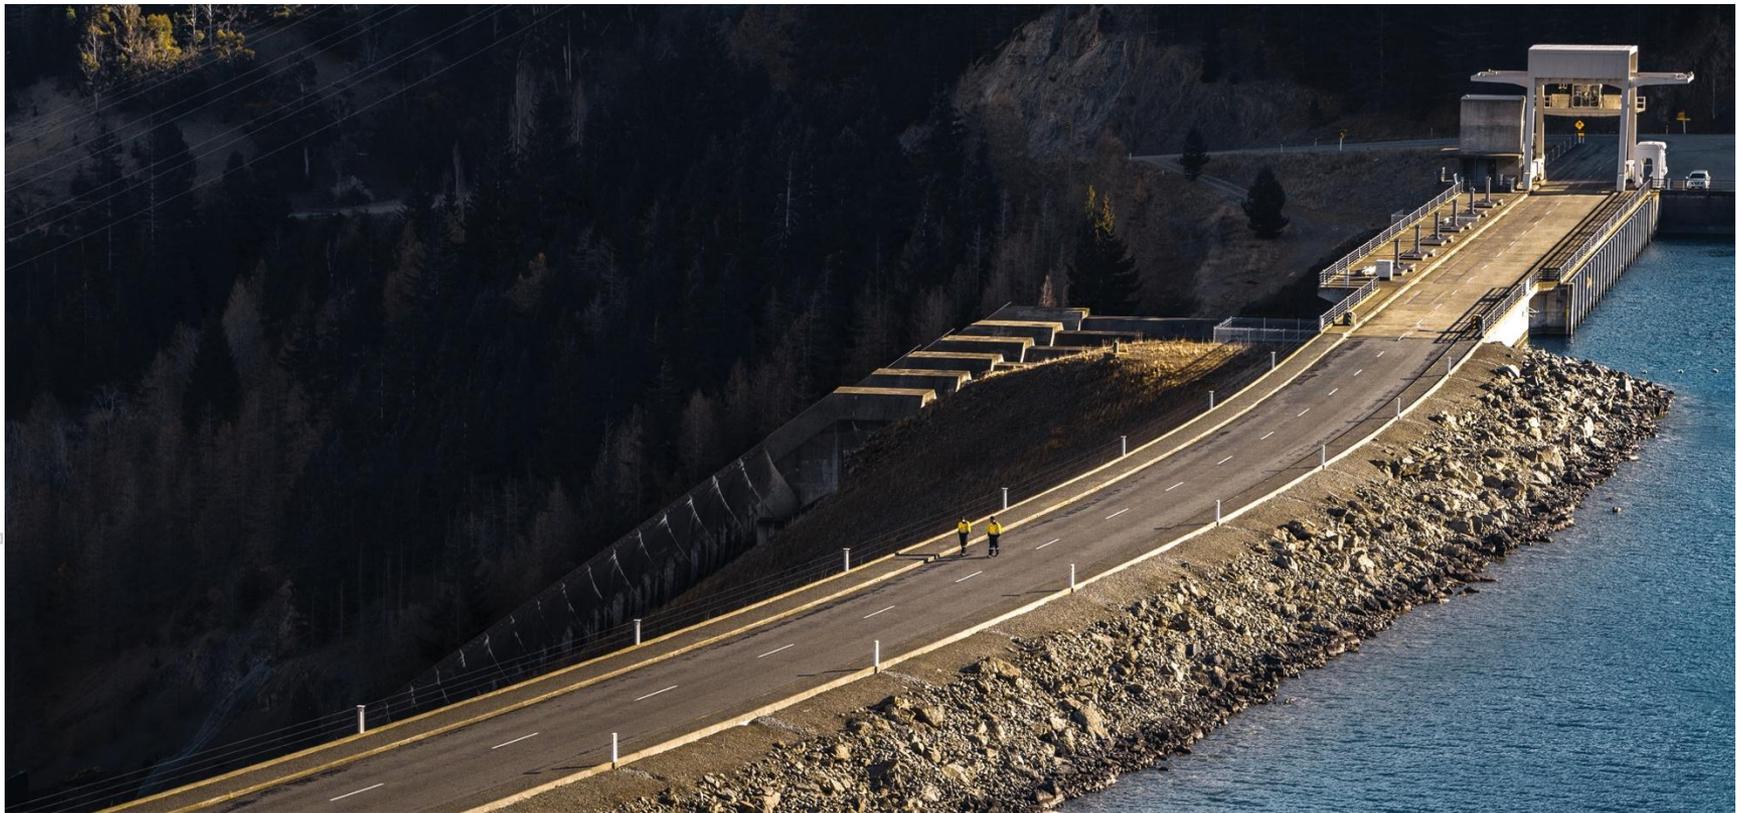

- Meridian's community funds programme continues to support local projects that make a difference
- In the six months ended December 2013, Meridian granted a further \$314,000 to community projects throughout New Zealand

### KidsCan Sponsorship

- Meridian is the principal partner of KidsCan, supporting hands-on assistance to schools
- Meridian's support has enabled more than 60 schools to be taken off the waiting list to receive assistance

# ***Regulatory Environment***

## Meridian's Regulatory Environment

### Labour-Green proposed market reform

- Proposals are still unclear and difficult to assess
- Current market is delivering positive change – security of supply, retail competition benefiting consumers, exporting New Zealand's renewable energy expertise
- Government and not the market would carry major risk of security of supply and dry weather impacts on price under a central buyer model
- Tax payers and consumers would bear any risk and cost of inefficient central planning
- Risk of replacing current commercial contracts (e.g. NZAS)
- Disincentive to the development of renewables
- Potential to lose New Zealand's expertise in renewable energy
- Options to enhance competition through transparency and simplification for retail customers

## Meridian's Regulatory Environment

### Transmission pricing

- Electricity Authority has developed four alternative models on ways the beneficiaries-pay principle could be applied to transmission pricing
- All the alternatives look more beneficial to Meridian than the current pricing methodology

### Australia

- Australia's new coalition government plans to review the country's Renewable Energy Target (RET) in 2014
- Timing on the review is unclear
- Significant weakening of the RET would impact future Australian activity

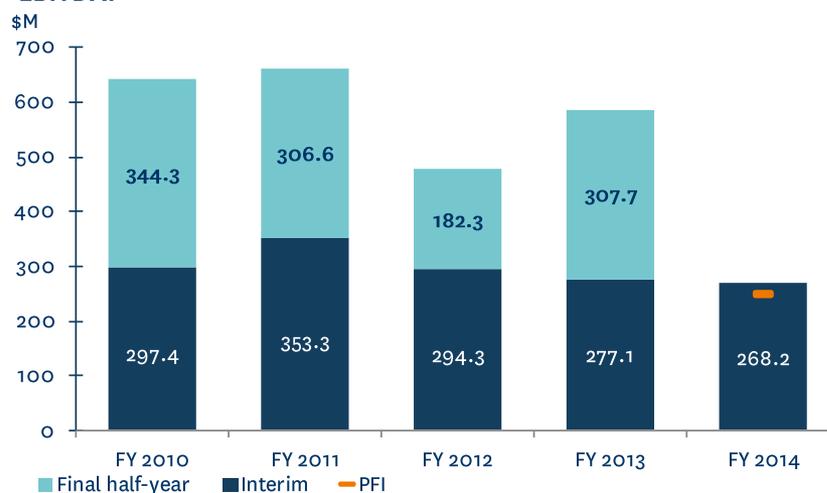

# ***Financial Performance***

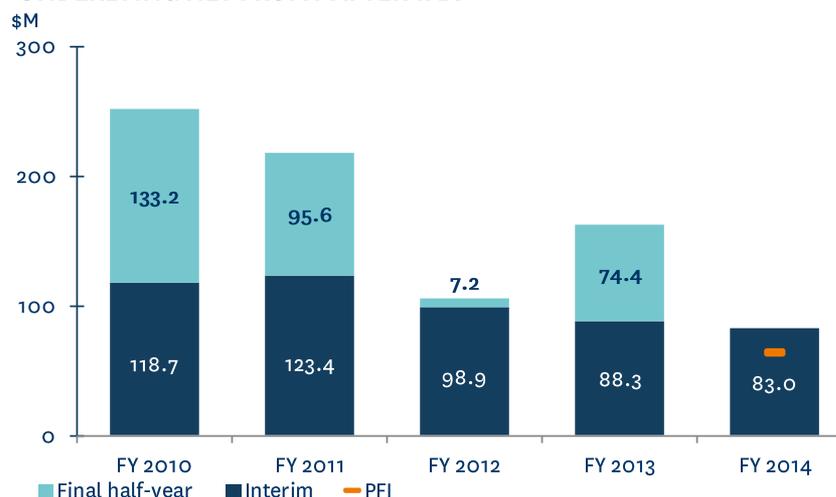

# Earnings

- Significant decline in Net Profit after Tax (\$116.9m, down from \$173.3m) due to non cash, fair value gains last year
- EBITDAF -\$8.9m (-3.2%) with higher Transmission costs and IPO costs (collectively \$19m) offsetting increased Energy Margin of \$12m
- Adjusting for increased New Zealand Transmission costs (\$11m) and IPO costs (\$8m)
  - EBITDAF +3.7%
  - Underlying NPAT +9.6%
- Increased Energy Margin from lower acquired generation and higher spot exposed revenues
- Partly offset by lower contracted sales

## EBITDAF<sup>1</sup>

## UNDERLYING NET PROFIT AFTER TAX<sup>2</sup>

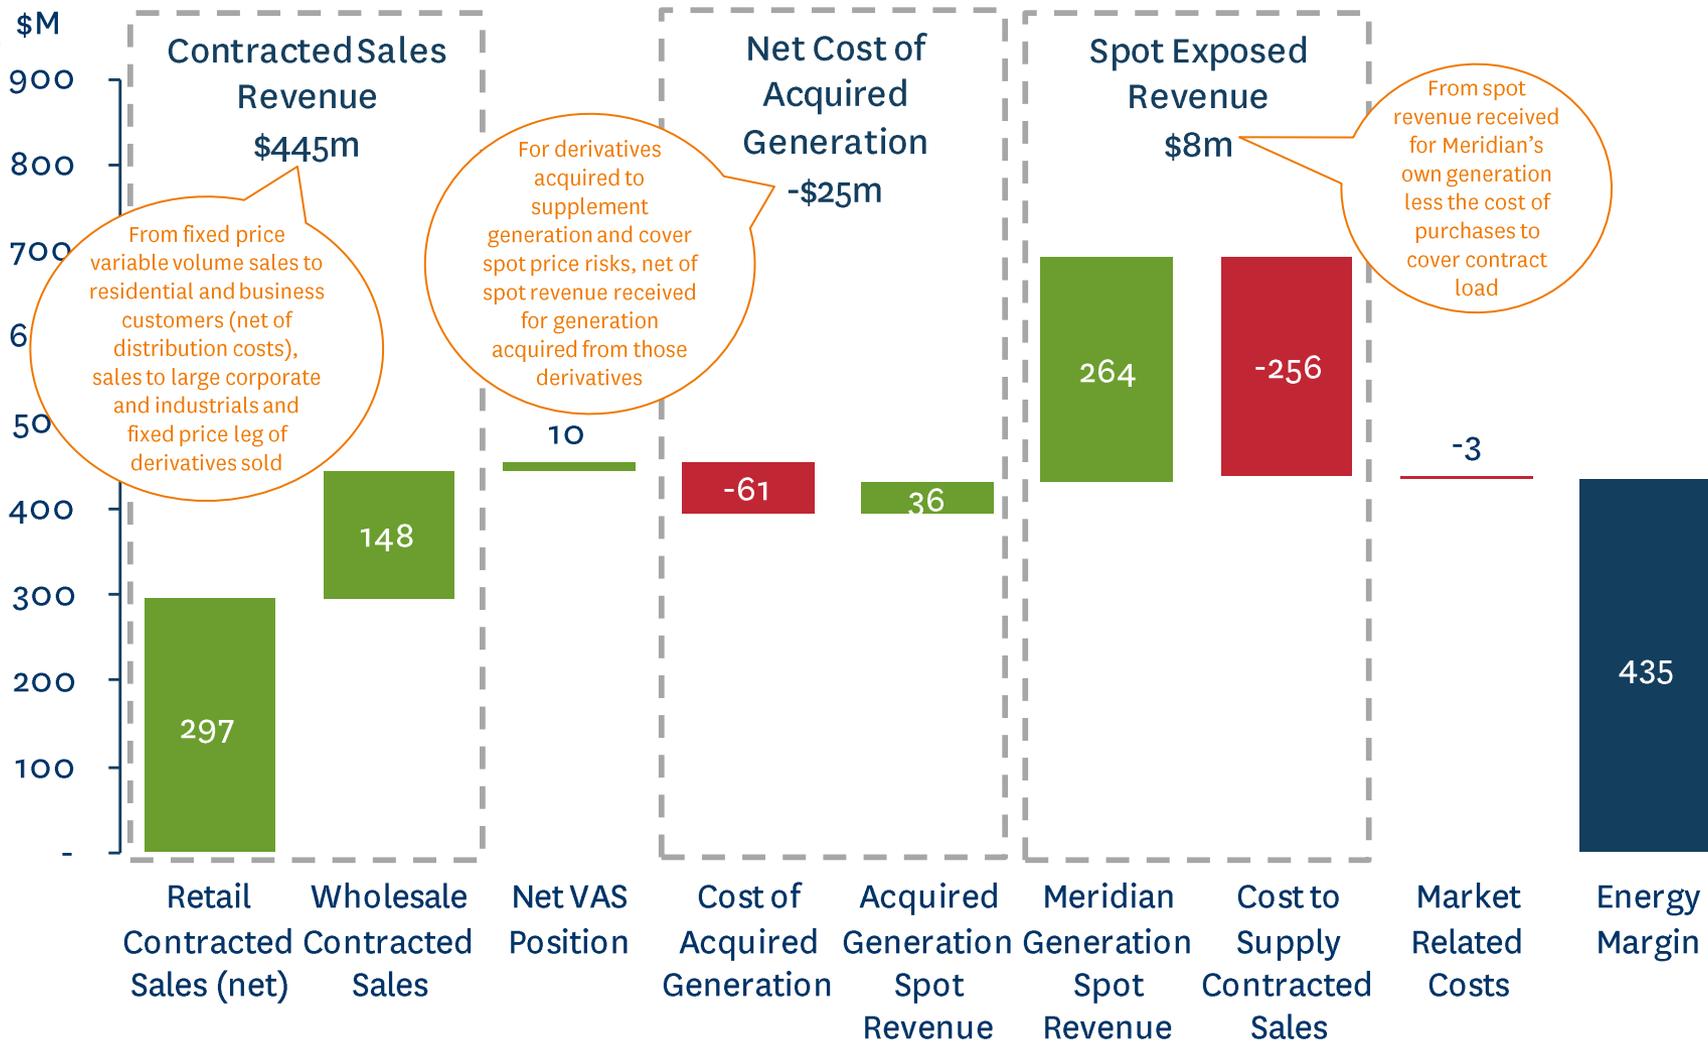

<sup>1</sup>Earnings before interest, taxation, depreciation, amortisation, changes in fair value of financial instruments, impairments and gain/(loss) on sale of assets

<sup>2</sup>Net Profit after Tax adjusted for the effects of non cash fair value movements and other one-off items

A reconciliation between Net Profit after Tax and Underlying Net Profit after Tax is provided on p35

# Energy Margin

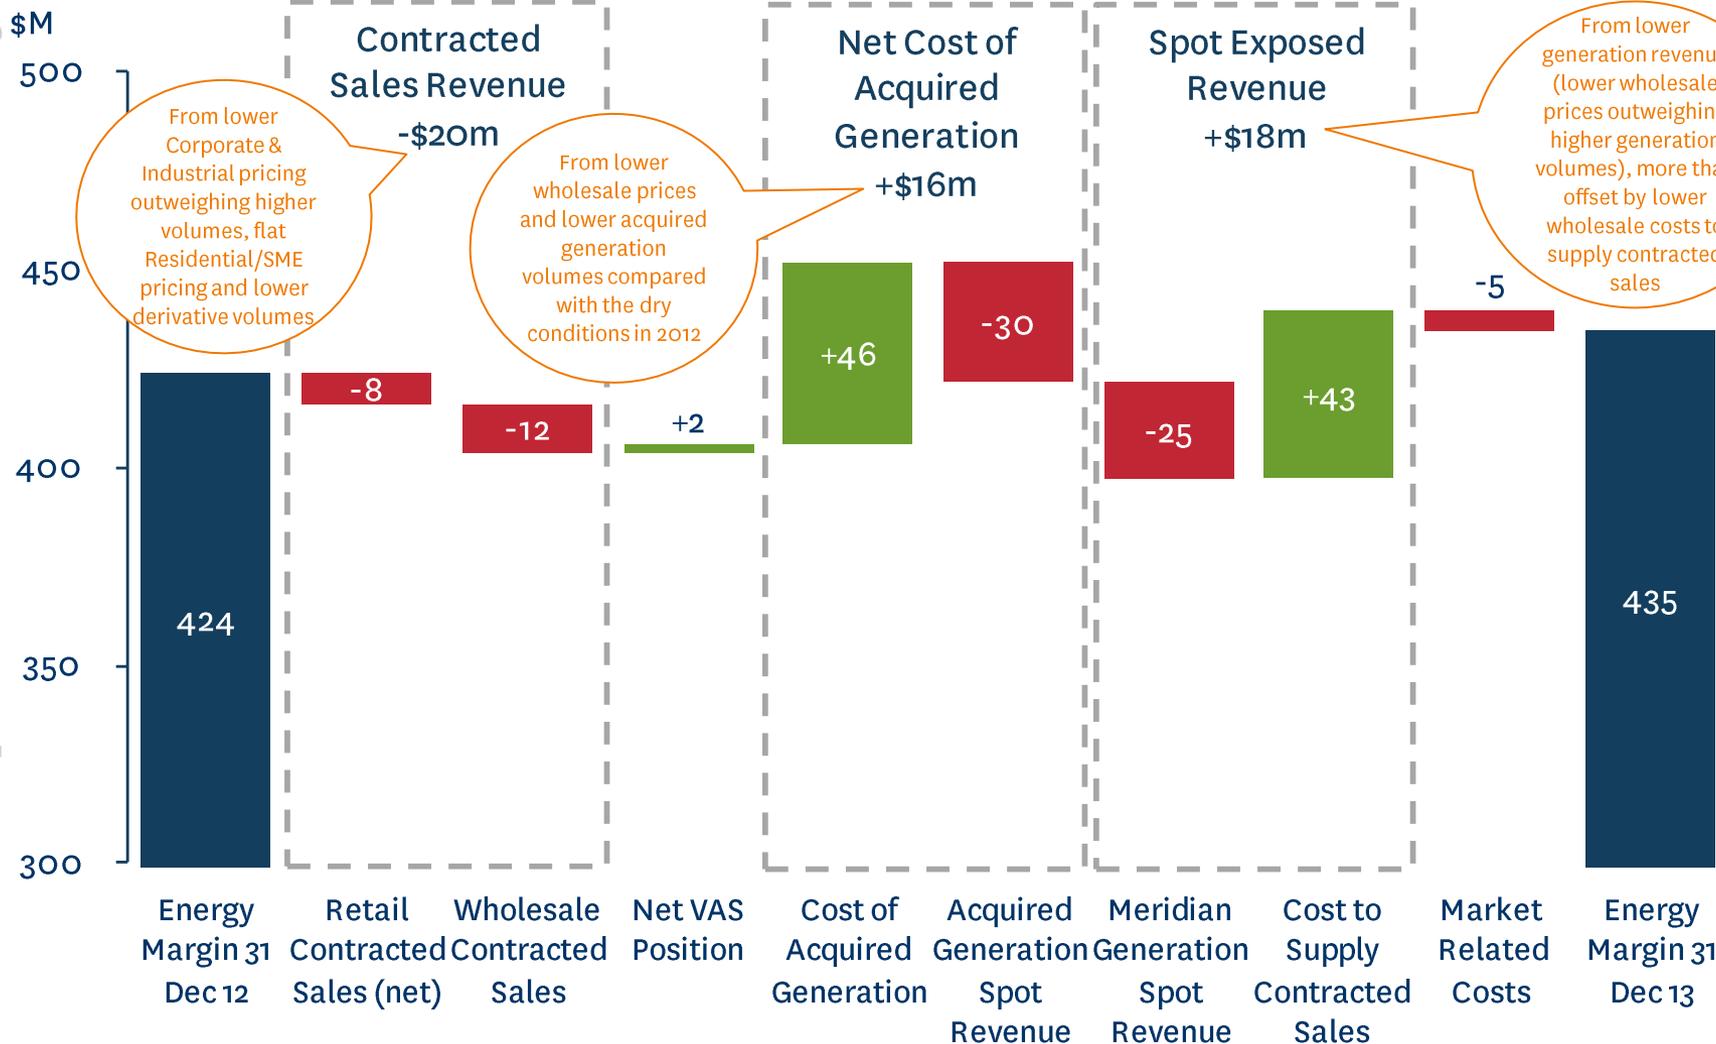

## NEW ZEALAND ENERGY MARGIN

For personal use only

# Energy Margin Change from Prior Year

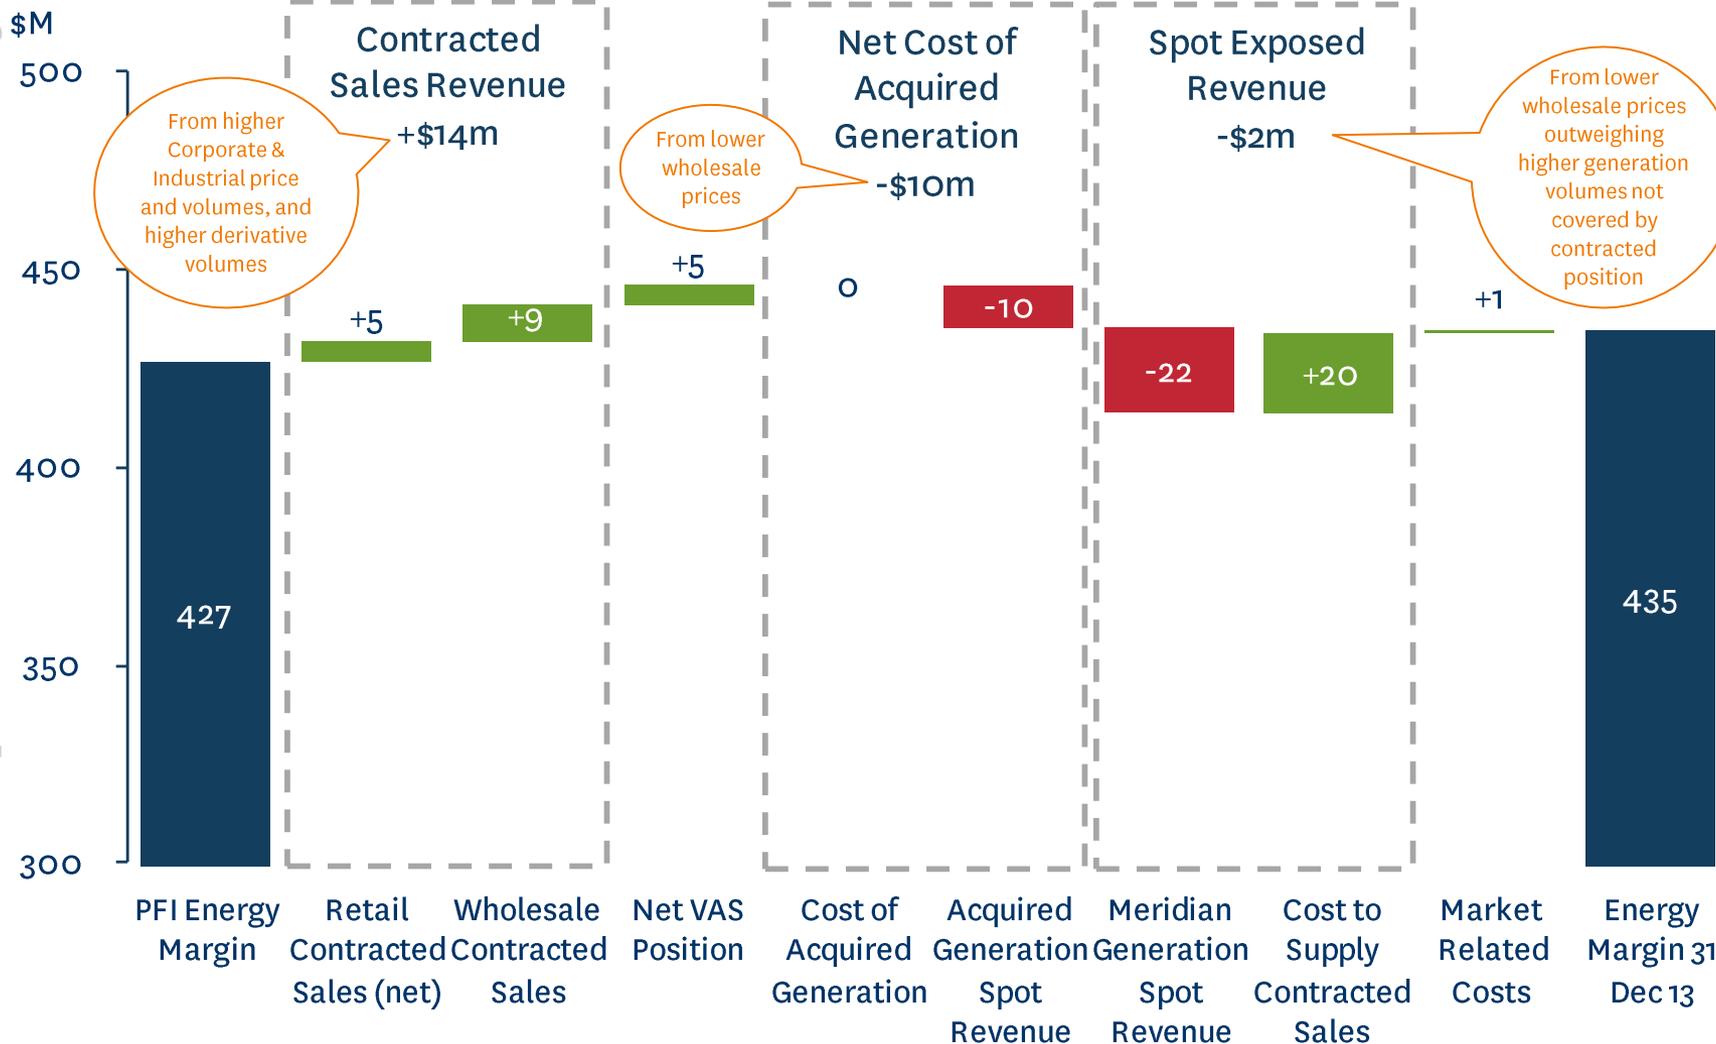

## NEW ZEALAND ENERGY MARGIN

For personal use only

# Energy Margin Change from PFI

## NEW ZEALAND ENERGY MARGIN

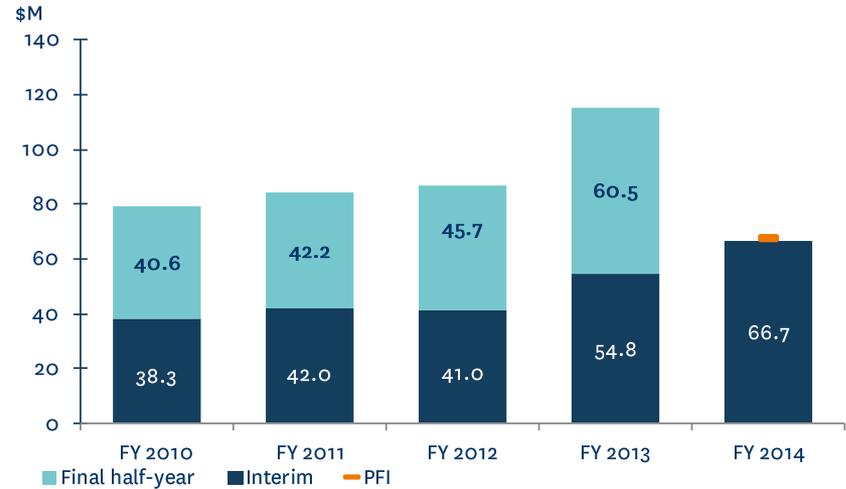

For personal use only

## Costs

- 21.9% increase in Transmission costs over the same period last year
- Increase reflects Meridian's majority share of higher HVDC costs
- Increases were included in PFI
- Full year PFI forecast for Transmission costs of \$135.6m in FY2014
- 7.0% increase in Operating costs over the same period last year
- Six months to 31 December 2013 includes \$8.3m of IPO costs compared with \$0.2m last year
- Excluding these IPO costs, Operating costs were flat compared to the same period last year
- Lower costs than PFI forecast reflects continued pressure on Operating costs

### TRANSMISSION COSTS

### OPERATING COSTS

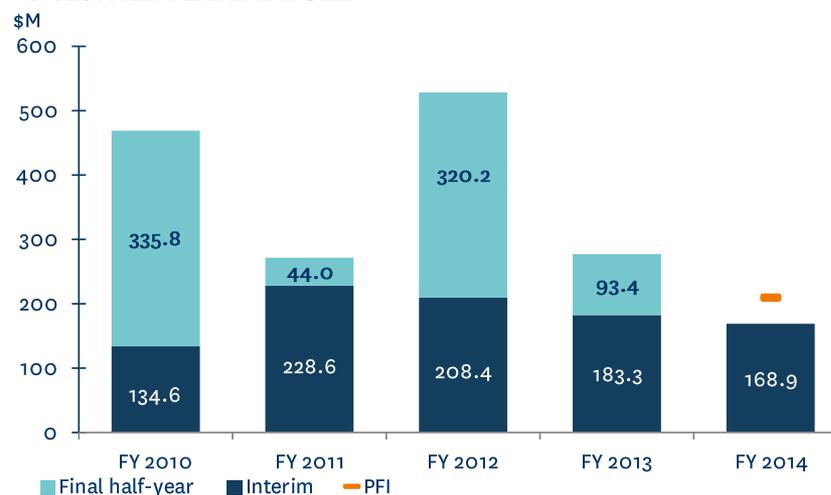

## Operating Cash Flow and Investment Expenditure

- Net cash flow from operating activities was \$64.5m ahead of PFI
- This reflects both improved EBITDAF, and the close out of aluminium hedges following the removal of aluminium indexation from the NZAS contract
- Investment expenditure was \$42.0m lower than PFI, reflecting the timing of cash payments in respect of Mill Creek and Mt Mercer construction projects

### NET CASH FLOW FROM OPERATING ACTIVITIES

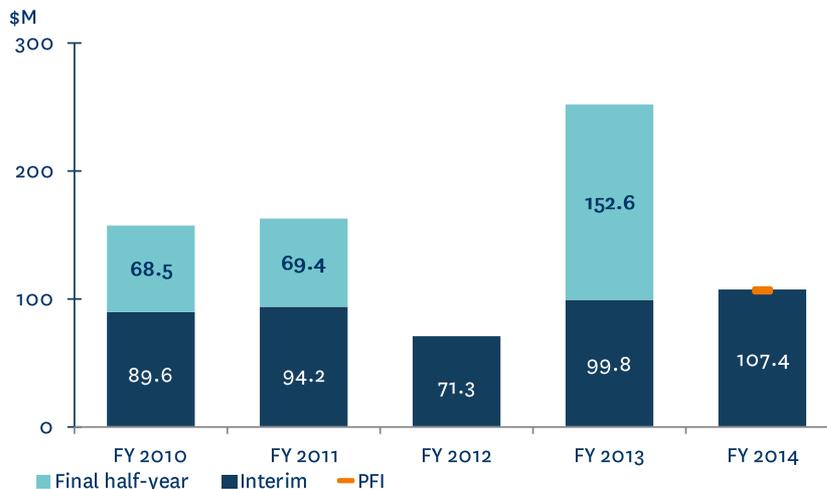

### INVESTMENT EXPENDITURE

## Dividends

- Interim dividend of 4.19 cps (\$107.4m) in line with PFI forecast
- Imputed to 90% of the corporate tax rate
- Interim dividend represents a 3.8% gross yield on Meridian's IPO share price
- Prospective full year gross dividend yield of 8.9% (10.5 cps)
- Represents a prospective full year gross instalment yield of 13.4%

### ORDINARY DIVIDENDS DECLARED

# Summary

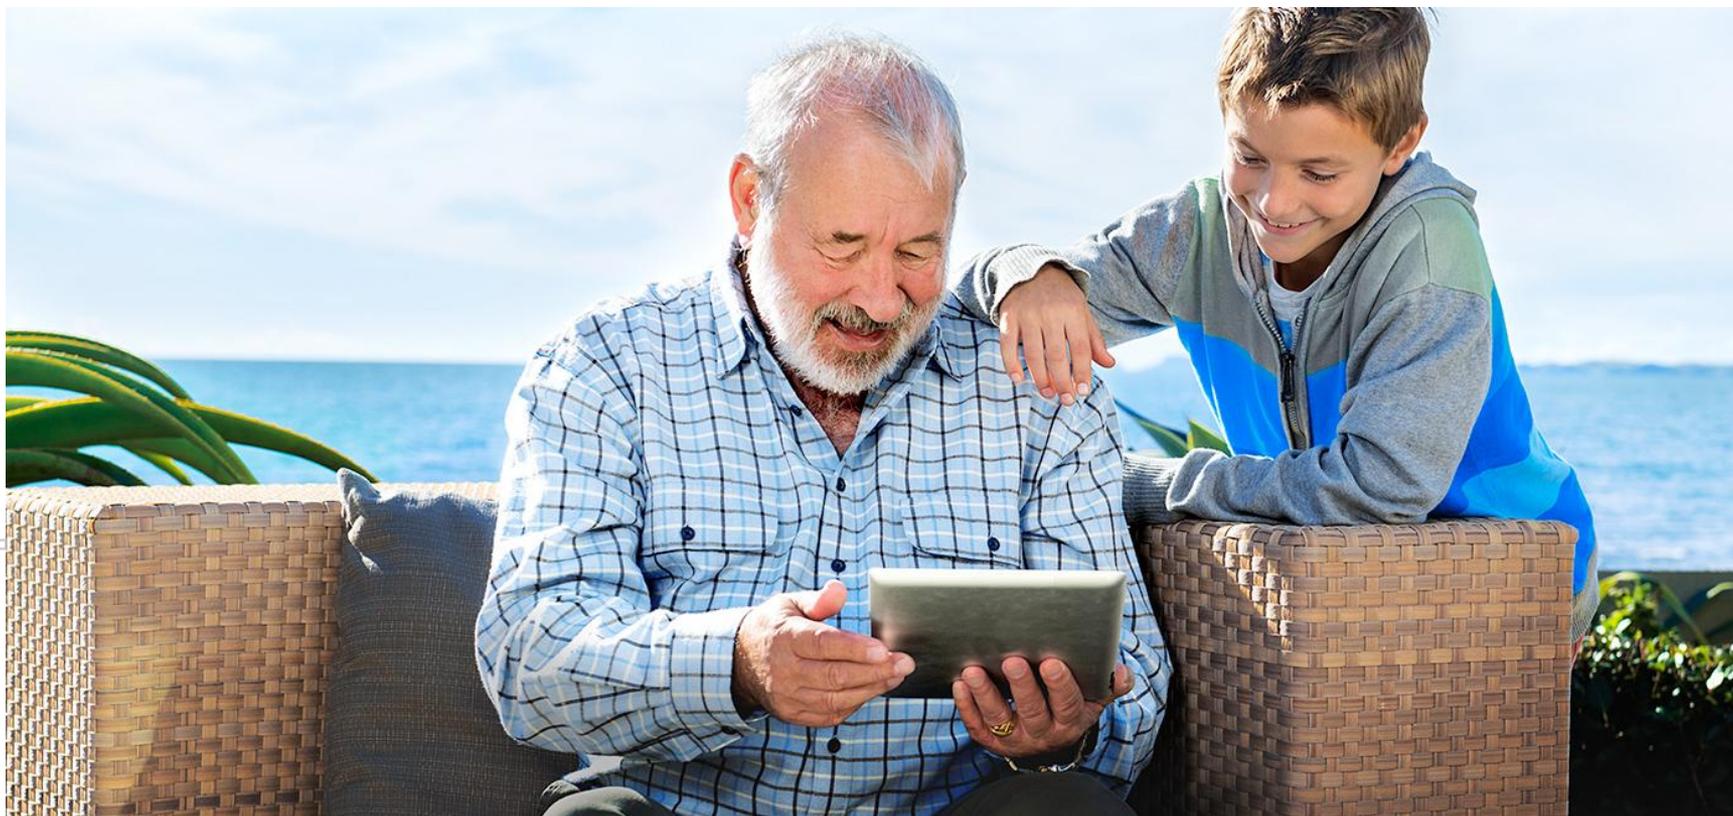

## Summary

- Good operating conditions supported financial performance ahead of the half year internal split of the annual PFI
- EBITDAF adjusted for one-off cost increases up 3.7% on last year
- Focus remains on improving the efficiency of the business and delivery of the two wind farm construction projects
- Following the positive half year result, Meridian has continued to deliver strong operating performance
- Given performance to date, should inflows from this point match the assumptions in Meridian's Prospectus, full year EBITDAF would exceed the PFI forecast by approximately 7%
- Investors need to remain aware that hydrology and other risks described in the Prospectus can still significantly impact results

\*\*Net Profit after Tax adjusted for the effects of non cash fair value movements and other one-off items

A reconciliation between Net Profit after Tax and Underlying Net Profit after Tax is provided on p35

## Additional Financial Information

### New Zealand Energy Margin

- Energy Margin is a non-GAAP financial measure representing Energy Sales Revenue less Energy Related Expenses and Energy Distribution Expenses
- Energy Margin is used to measure the vertically integrated performance of the retail and wholesale businesses. This measure is used in place of statutory reporting which requires gross sales and costs to be reported separately, therefore not accounting for the variability of the wholesale spot market and the broadly offsetting impact of the wholesale prices on the cost of retail electricity purchases
- Energy Margin is defined as:
  - + revenues received from sales to retail customers net of distribution costs (fees to distribution network companies that cover the costs of distribution of electricity to customers), sales to large industrial customers and fixed price revenues from derivatives sold (Contract sales revenue)
  - ± the net position of virtual assets swaps with Genesis Energy and Mighty River Power
  - the cost of fixed cost of derivatives acquired to supplement generation and spot price risks, net of spot revenue received for generation acquired from those derivatives (Net cost of acquired generation)
  - ± revenue from the volume of electricity that Meridian generates that is in excess of volumes required to cover contracted customer sales (Spot exposed revenues)
  - ± other associated market revenues and costs including electricity authority levies and ancillary generation revenues (i.e. frequency keeping)

## Additional Financial Information

### Funding

- Total borrowings as at 31 December 2013 of \$1,126.1m, down \$54.1m from 30 June 2013
- Committed bank facilities of \$858.8m of which \$379.8m were undrawn at 31 December 2013
- FFO interest cover of 5.2 times
- FFO/average net debt of 41.2%
- Standard & Poor's A2 BBB+ (stable) credit rating retained
- Net financing costs 2.8% lower than half year split of the annual PFI forecast

DEBT MATURITY PROFILE AS AT 31 DEC 2013

SOURCES OF FUNDING AS AT 31 DEC 2013

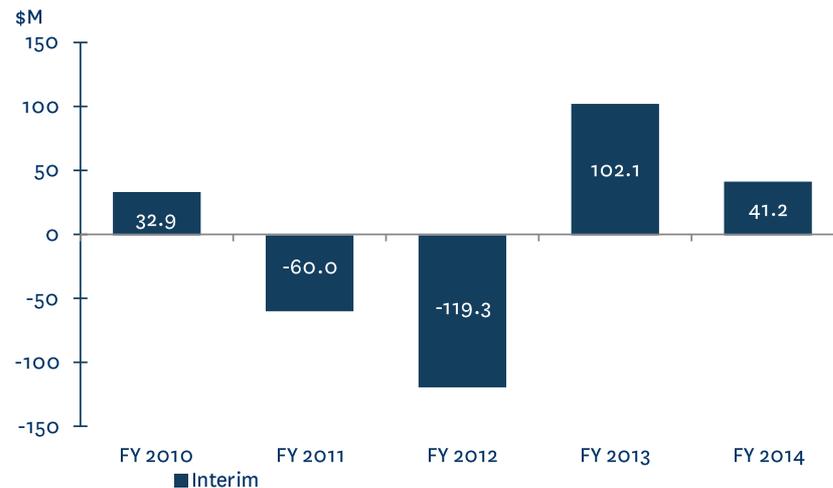

## Additional Financial Information

### Fair Value Movements

- Meridian uses derivative instruments to manage commodity price, interest rate and foreign exchange risk
- As forward prices and rates on these instruments move, non cash changes to their carrying values are reflected in NPAT
- Accounting standards only allow hedge accounting if specific conditions are met, which creates NPAT volatility
- Net changes in the fair value of derivatives was an unrealised gain of \$41.2m for the six months ended 31 December 2013
- This compares to an unrealised gain of \$102.1m for the same period last year

### CHANGE IN FAIR VALUE OF FINANCIAL INSTRUMENTS

### Overhead Allocations

In the year ended 30 June 2013, Meridian commenced allocating directly attributable ICT, Insurance, Property and Brand costs to segments in order to better assess performance. Prior periods have not been restated.

## Glossary

---

<b>Acquired generation volumes</b>	buy-side electricity derivatives excluding the buy-side of virtual asset swaps
<b>Average generation price</b>	the volume weighted average price received for Meridian's physical generation
<b>Combined catchment inflows</b>	combined water inflows into Meridian's Waitaki and Manapouri hydro storage lakes
<b>Cost to supply contracted sales</b>	volume weighted average price Meridian pays to supply contracted customer sales
<b>Customer connections</b>	installation control points, excluding vacants
<b>GWh</b>	gigawatt hour. Enough electricity for 125 average New Zealand households for one year
<b>Historic average inflows</b>	the historic average combined water inflows into Meridian's Waitaki and Manapouri hydro storage lakes over the last 81 years
<b>Historic average storage</b>	the historic average level of storage in Meridian's Waitaki catchment since 1979
<b>HVDC</b>	high voltage direct current link between the North and South Islands of New Zealand
<b>ICP</b>	installation control points, excluding vacants
<b>ICP switching</b>	the number of installation control points changing retailer supplier in New Zealand, recorded in the month the switch was initiated
<b>MWh</b>	megawatt hour. Enough electricity for one average New Zealand household for 46 days
<b>NZAS</b>	New Zealand Aluminium Smelters Limited
<b>Retail contracted sales average price</b>	volume weighted average electricity price received from retail customers, less distribution costs
<b>Retail sales volumes</b>	contract sales volumes to retail customers, including both non half hourly and half hourly metered customers
<b>Sell side derivatives</b>	sell-side electricity derivatives excluding the sell-side of virtual asset swaps
<b>Wholesale contracted sales average price</b>	volume weighted average electricity price received from wholesale customers, including NZAS

**Important Notice for Investors:** The securities of Meridian Energy Limited are represented by Instalment Receipts. Each Instalment Receipt carries a liability to pay a further instalment of NZ\$0.50 on 15 May 2015. When investors acquire the Instalment Receipts they assume the liability to pay the Final Instalment. It is the investor's responsibility to ensure that if they are on the register when the liability for the instalment arises, they can afford to pay the instalment. If an investor has a liability and does not pay the instalment, the Trustee can take action to recover the amount owing including costs and expenses.

Meridian Energy Limited (ABRN 151 800 396) A company incorporated in New Zealand 33 Customhouse Quay, PO Box 10840, Wellington 6143
