Letter from the Chairman of Viking

2014

Dear Auminco Shareholder

Recommended Off-Market Takeover Bid

On behalf of the board and management of Viking Ashanti Limited (**Viking**) and our shareholders, I am delighted to enclose an offer by Viking for all of your shares in Auminco Mines Limited (**Auminco**).

Viking believes this offer provides an attractive opportunity for Auminco shareholders to benefit from the merger of Auminco's coal and other assets in Mongolia and Australia with Viking's advanced exploration gold assets in Ghana, while achieving an ASX listing for your existing investment.

Viking's gold assets are located in the geologically well-endowed and tightly held Ashanti Gold Belt in Ghana. The Ashanti Gold Belt is home to several major mining corporations and is host to two of the largest gold assets in the world at Obusai and Tarka. Viking's lead asset Akoase contains a 790,000 inferred JORC resource which is close to existing infrastructure including several processing plants in the area. Newmont's 8 million ounce Akyem mine is just 25 km to the south west of Akoase.

Viking has a highly experienced and well-credentialed board and management team with extensive experience in conducting exploration activities and mining operations in emerging markets. The Viking team has a proven ability to access capital markets to finance its activities in challenging market conditions.

We believe the combined assets of Auminco and Viking are complementary and the strategic, economic and operational benefits of the merger are compelling. Investors in these volatile times have a clear preference for production or near production resource assets with attractive supply and demand fundamentals occupying the lowest part of the cost curve. The near term production potential of the main projects of both Auminco and Viking will benefit from the greater access to capital and investor interest that the combined group will enjoy.

Your board of directors has unanimously recommended that Auminco shareholders accept the offer in the absence of a superior proposal and each of your board members (intends to accept/has accepted) the offer for their own shares.

We are pleased to confirm that, post completion of the merger two directors of Auminco, Mr Andrew Whitten and Mr Matthew Morgan will join the Board of Viking. Mr Trygve Kroepelien, an existing director of Viking, will resign resulting in a four person board for the combined group. Mr Michael Langoulant, who is currently the company secretary of Viking, will continue in that role.

By accepting the offer, you will, subject to the terms and conditions of the offer receive 61.2 Viking Shares and 20.4 Viking Options for every 100 Auminco Shares that you hold. Based on the last traded price of Viking shares, immediately prior to the announcement of the offer, the offer represents an implied value of approximately 2.8 cents per Auminco Share.

If you require further information regarding Viking's offer, please do not hesitate to contact me directly on +618 6313 5151 or our corporate adviser Matthew Howison at Emerald Partners on +612 9 251 5065.

I commend this offer to you and look forward to welcoming you as a shareholder of Viking.

John William Gardner
Chairman

What happens if Viking improves the terms of the Offer?	<p>If Viking improves the terms of the Offer, all the Auminco Shareholders who accept the Offer (whether or not they have accepted the Offer before or after such improvement) will be entitled to the benefit of the improved terms of the Offer, should the Offer become or be declared unconditional.</p> <p>Annexure A to this Bidder's Statement sets out further information.</p>

2. Reasons why you should accept the Offer

- **The Offer gives you the opportunity to become a shareholder in Viking**

Viking is a focused exploration company with a well-credentialed board of directors and, on successful completion of the Capital Raising and the Offer, will have sufficient cash reserves available for ongoing exploration and development of Auminco's and Viking's exploration projects. Auminco Shareholders accepting the Offer will gain the benefit of exposure to Viking's existing and future projects. The opportunity for maximising the potential profitability of your investment in Auminco will be considerably enhanced by converting your shareholding in Auminco to Viking Shares and Viking Options.

- **Improved access to funding**

The Merged Group is likely to have improved access to the funding required to continue the exploration and possible future development of both the Viking and Auminco assets. Viking's interest in acquiring Auminco is directly related to its interest in developing Auminco's assets, particularly the Khonkhor Zag and Berkh Uul Projects. Viking will, as a matter of priority, devote its technical and financial capacities to ensuring these projects receive appropriate levels of exploration and development funding.

- **The Offer will give you exposure to additional high quality projects and reduce your risk profile**

By accepting the Offer, you will not only retain exposure to existing Auminco projects but you will gain exposure to Viking's diverse and high quality Ghanaian assets. You will also improve your risk profile by diversifying, and thus reducing, overall risk.

The additional geographic diversification of exploration and development assets held by the Merged Group may allow for year round exploration activity.

- **Increased board and technical capability**

The integration of the boards and management teams of Viking and Auminco will allow for effective allocation of resources to the Merged Group's assets at both the operating and development levels.

Following successful completion of the Offer, it is proposed that Auminco Directors Mr Matthew Morgan and Mr Andrew Whitten will be appointed to the Merged Group's Board, that Mr Trygve Kroepelien will resign as a Director and that Mr John Gardner and Mr Peter McMickan will remain as Directors of the Merged Group.

- **Improved liquidity**

There is no ready market for Auminco Shareholders to trade Auminco Shares. By accepting the Offer you will receive Viking Shares which are freely tradeable on ASX. There will be no escrow restrictions, so if you wish to sell your Viking Shares immediately, you can.

- **The Offer is unanimously recommended by the Auminco Directors, in the absence of a Superior Proposal and subject to Viking receiving approval from Viking Shareholders for the Offer Resolution**

The Auminco Directors unanimously agree that the Offer is the best opportunity currently available for Auminco Shareholders to achieve a return on their investment

in Auminco. Whilst the Auminco Directors' recommendation that Auminco Shareholders accept the Offer is conditional on the absence of a Superior Proposal and subject to Viking receiving approval from Viking Shareholders for the Offer Resolution, the Auminco Directors have advised the Viking Directors that they are not aware of any alternative proposal.

- **You may be eligible for tax rollover relief**

In the event that Viking achieves its minimum acceptance condition of being entitled to 90% of the Auminco Shares, then Auminco Shareholders accepting the Offer may be entitled to rollover relief.

In summary, rollover relief means that accepting the Offer will not crystallise a taxation event in relation to the value attributed to the proceeds from the sale of your Auminco Shares. Any potential tax liability will not accrue until such time as you sell your Viking Shares or exercise your Viking Options into Viking Shares.

It is anticipated that rollover relief will not be available for Auminco Shareholders in relation to the sale proceeds attributable to the Viking Options received by Auminco Shareholders under the Offer.

Auminco Shareholders should consult their professional advisers in regard to how accepting the Offer will affect their individual circumstances.

3. How to accept the Offer

The Viking mineral licences are located in southern Ghana, West Africa (Figure 1) in one of the most strongly gold endowed and tightly held geological provinces in the world, the Ashanti Gold Belt. Numerous multi-million ounce gold deposits are located within and on the margins of the Ashanti Gold Belt, including two of the largest gold deposits in the world, Obuasi and Tarkwa.

Viking holds more than 250 km² of ground in two project areas; Akoase and West Star/Blue River. The most advanced prospect, Akoase East hosts a significant near surface JORC (2012) classified Inferred resource of 790,000 oz of gold.

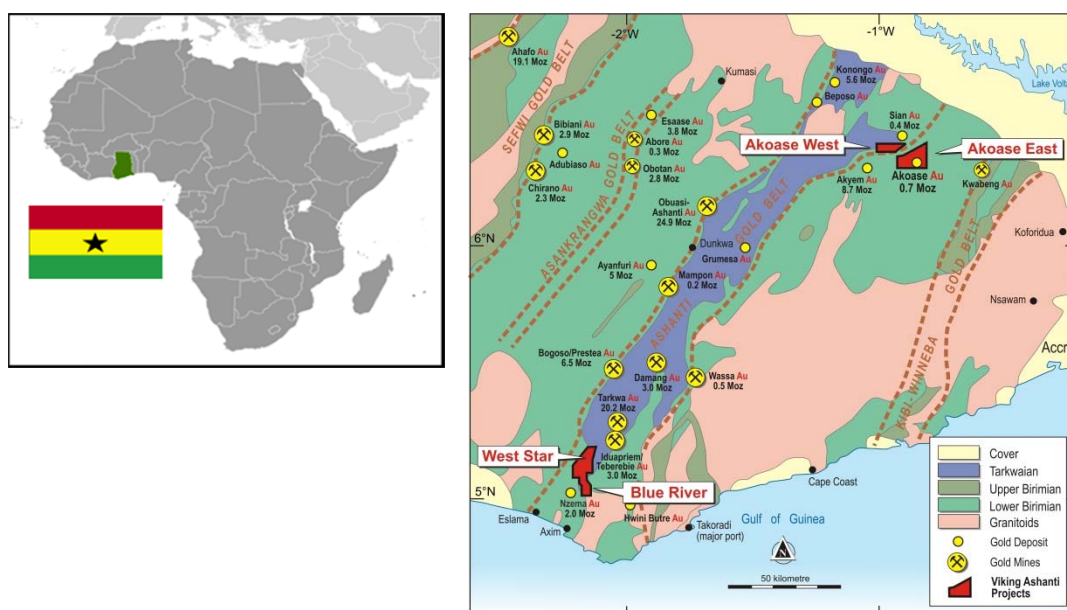

Figure 1: Project Locations in Southern Ghana

4.3 Project overview

Akoase Gold Project - Ghana (VKA 100%)

The Akoase gold project is located approximately 125km north-northwest of Accra in southern Ghana (Figure 1), with sealed road access within 5km and grid power within 10km of the project area.

The Akoase prospecting licences are 100% owned by Viking and cover 106km² in the northern part of the Ashanti gold belt. A number of major gold mines and projects are located within this belt, including Newmont's 8.7 million ounce Akyem gold project, which is approximately 25km southwest of the Akoase project area.

Gold mineralisation at the Akoase East deposit is typically vein-hosted and is associated with quartz-carbonate breccia and stockwork veins developed in zones of strong sericite-ankerite-pyrite alteration along the regionally extensive Kadewaso structural trend (Figure 2).

The initial programs of diamond drilling at Akoase East were to extend the mineralisation at depth, and to provide valuable geological and structural information on the deposit. More recently, diamond and Reverse Circulation (**RC**) drilling has focussed on extending the mineralisation along strike.

Viking's licences cover 11 strike km of the regionally extensive Kadewaso structural trend, within which the current gold resource is located. Viking has now drill tested the central 6.5 strike km of this trend. Anomalous soil geochemistry and ground geophysics along this trend provide multiple exploration targets for future drilling.

Figure 2: Akoase East geology

An updated Inferred Mineral Resource estimate, classified in accordance with the JORC (2012) Code, of 20.6 Mt @ 1.2 g/t Au for 790,000 ounces of contained gold, at a 0.5 g/t Au cut-off, was completed in September 2013 for the Akoase East deposit (Figure 2) by internationally recognised consultancy GHD Pty Ltd in Brisbane.

The updated resource model has extended the resource 700 metres to the northeast, outlining multiple sub-parallel zones of mineralisation over a strike length of 3.5km, from surface to an average depth of 130 metres. The Akoase East deposit remains open at depth, and along strike to the northeast.

The resource model has also confirmed that higher grade mineralisation is best developed in the area of Akoase East's Alimac prospect, where the thickest and highest grade drill intercepts have previously been reported.

The new resource estimate is based on geological, drilling and assay information up to the end of August 2013. It includes approximately 10,000 metres of historical RC drilling data, plus data from approximately 10,000 metres of RC and 3,000 metres of diamond drilling completed by Viking over the past three years.

The resource is reported at various cut-off grades, and by weathering type in Table 1.

The above information is extracted from Viking's announcement to ASX entitled "12% Increase to 790,000 oz in Gold Resource for Ghana Project" dated 4 October 2013 and is available to view on www.vikingashanti.com. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves that all material assumptions and technical parameters

underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

West Star/Blue River Gold Project - Ghana (VKA 100% hard rock gold rights)

The West Star/Blue River project is located approximately 185km west of Accra in southern Ghana (Figure 1), with sealed road access within 5km and grid power within 10km of the project area.

The West Star and Blue River properties are subject to joint venture agreements with local Ghanaian companies, where Viking has earned 100% of the rights to all hard rock gold mineralisation. The joint venture partners retain rights to the alluvial mineralisation on the licences.

The licences are located in the southern part of the Ashanti Gold Belt and cover an area of 130km². The licences adjoin Endeavour Mining's 2 million ounce Nzema gold mine, which is approximately 7km southwest of the West Star/Blue River project (Figure 3).

Figure 3: West Star/Blue River Geology

Soil sampling programs at 400m x 50m spacing over the entire project area have defined numerous sub-parallel anomalous zones of greater than 200ppb gold along the 14km strike length of the Salman shear zone. Individual anomalies vary from 400m to 1.2km long, and up to 150m wide (Figure 4). The anomalies appear to be closely related to individual fault structures identified from mapping and geophysics, within and on the margins of the Salman shear zone, the major controlling structure hosting significant gold deposits at the neighbouring 2 million ounce Nzema gold mine.

On the contiguous Blue River mining lease on West Star's southern boundary, RC drilling around historic economic grade and width drill intersections at the Jasmine prospect has returned further positive results.

4.4 Directors of Viking

Profiles of the Viking Directors, as at the date of this Bidder's Statement, are set out below.

**John William Gardner
Non-Executive
Chairman**

John William Gardner was appointed a Director on 27 July 2007. He graduated with Bachelor of Engineering from the University of Melbourne in 1962. He has a Master of Business degree from Curtin University. He is a Fellow of The Institution of Engineers Australia.

Mr Gardner has a long and distinguished career in servicing the mining industry in Australia as well as in West Africa. As a Director and General Manager of Minproc Engineers he was responsible for design and construction of gold and base metal plants. He established Minproc in Ghana where that company became that country's leading mining project engineers. He completed many project feasibility studies including geology, resources, mine plans and process plants. When he left the company Minproc Engineers had built more than 60 gold treatment plants.

In Ghana he also headed Ghana Manganese Company (**GMC**) as Executive Chairman after negotiating the purchase of its projects from the Government of Ghana. Privately owned, GMC grew from 300,000 tpa to 1.7 million tpa of manganese carbonate shipments, until it was acquired for cash.

Mr Gardner has been a Director of Mincor Resources Limited since its inception and 1996 ASX listing having completed an IPO raising of \$8 million. Mincor operates underground nickel sulphide mines in Western Australia. Mincor previously spun out a copper company, Tethyan Copper with an ASX listing and IPO of \$3 million. Tethyan was in joint venture with BHP Billiton, and when it was taken over by Antofagasta, a major copper producer in joint venture with Barrick Gold Corporation, for more than \$150 million; it had a resource above 1 billion tonne of low grade near surface porphyry copper with 20Moz of low grade gold contained.

Mr Gardner was also associated with Guinor from 1993 as a consultant to the company. He took an executive role in 1996, overseeing a number of expansions of the Lero heap leach project, and was pivotal in the development of the LEFA Corridor Project. Guinor was acquired by Crew Gold Corporation Inc.

Peter McMickan
Managing Director

Peter McMickan was appointed a Director on 27 July 2007. He graduated with an Honors Degree in Geology from the University of Melbourne, Australia in 1977. He has post-graduate qualifications in Mineral Economics from Macquarie University and is a Member of the Australasian Institute of Mining and Metallurgy.

His professional career has spanned 30 years worldwide with a number of major, well respected international exploration and mining companies including Newmont, Pancontinental Mining, BP Minerals, Kalgoorlie Consolidated Gold Mines and Homestake. He is a highly regarded geologist and manager, with a proven record of business and technical success throughout his career.

His recent experience covers corporate, senior management and technical supervision of mining, development and exploration projects throughout Australia, Africa and Europe. He managed the mine geology, exploration and successful resource development of Guinor's Lero gold project in Guinea, West Africa. During his four years with the company, the company's exploration spend increased to US\$1 million per month, which sustained the existing heap leach operation and resulted in expansion of the resource to over 4Moz of gold in the space of two years. This expanded resource base underpinned a major redevelopment of the Lero project to a 6Mtpa CIP/CIL operation producing 350,000 ounces of gold per year.

Mr McMickan joined Viking from Aditya Birla Minerals Ltd, one of Australia's largest copper producers, where he was General Manager of Geology and Business Development. During his period of employment he was responsible for worldwide evaluation of advanced copper projects, the development of the Esperanza South and Maroochydore copper projects and new exploration discoveries in the Pilbara region of Western Australia.

Trygve Kroepelien
Non-Executive Director

Trygve Kroepelien was appointed a Director on 27 July 2007. He is a graduate of Dartmouth College, N.H., USA (BA) and Tuck School of Business Administration, N.H., USA (MBA).

Mr Kroepelien has a wealth of successful experience throughout West Africa, particularly in Guinea, Ghana, Burkina Faso and Mauritania. For the past 30 years he has been active in the private sector, promoting mineral resource projects in West Africa.

4.6 Corporate governance

The Viking Board seeks, where appropriate, to provide accountability levels that meet or exceed the ASX Corporate Governance Council's Principles for good governance and Best Practice Recommendations.

Details of Viking's corporate governance policies, procedures and practice can be found at Viking's website www.vikingashanti.com.

4.7 Capital Raising

It is a Condition to the Offer that Viking undertakes a capital raising to raise a minimum of \$3,000,000 and up to a maximum of approximately \$5,600,000 by issuing:

- (a) a maximum of 140,000,000 new Viking Shares at an issue price of not less than 80% of the market price for Viking Shares calculated over the last 5 days on which sales in Viking Shares are recorded before the day on which the Company lodges a disclosure document under Chapter 6D of the Corporations Act for the capital raising; and
- (b) one free attaching Viking Option for every four Viking Shares offered (being a maximum of 35,000,000 new Viking Options) exercisable at \$0.09 each on or before 30 April 2017 and otherwise on the terms and conditions set out in Annexure B,

(Capital Raising).

The purpose of the Capital Raising is to advance exploration of the Company's projects in Ghana, Mongolia and Australia, to commence feasibility studies in relation to the Berkh Uul coal project in Mongolia and for general working capital purposes.

At this time, the actual quantum of the Capital Raising is still to be determined and will depend on the issue price of the Viking Shares offered for subscription at the relevant time. The Company presently considers that a minimum of \$3,000,000 and a maximum of approximately \$5,600,000 will be required to be raised to fund the Company's proposed activities in the next 24 months in Ghana, Mongolia and Australia.

The actual number of Viking Shares to be issued under the Capital Raising will depend on the issue price of those Viking Shares and the capital able to be raised.

The issue of Viking Shares under the Capital Raising is subject to Viking Shareholder approval at the General Meeting.

4.8 Issue of Viking Shares to the Auminco Lenders

The Auminco Lenders have collectively advanced approximately \$1.75 million (plus accrued interest) to Auminco as both secured loans and convertible notes.

Subject to Viking achieving a Relevant Interest in at least 90% of all Auminco Shares under the Offer, Viking has agreed to acquire or take an assignment of (as the case may be) the interest of the Auminco Lenders in the debt associated with these facilities in exchange for the issue of 35,246,742 Viking Shares and 11,748,913 Viking Options to the Auminco Lenders.

Further details of these arrangements are set out in Section 10.22.

5.3 Mining regime in Mongolia

Classification of deposits – Government Ownership

The Mineral Resources Authority of Mongolia (**MRAM**) is an agency of the Government of Mongolia which is responsible for the mining and mineral industry of Mongolia.

Under the Minerals Law of Mongolia, the State is the owner of all mineral deposits and has the right to grant exploration and mining rights. Mineral deposits are grouped into one of three classifications:

- (a) *Minerals of strategic importance* - A strategic deposit is one which may have a potential impact on national security, economic and social development of the country at the national and regional levels or that is producing or has the potential of producing more than 5% of total GDP in a given year. Examples include copper and coal.
- (b) *Common minerals* – These are abundant sediments and rock concentration that might be used as construction material. Iron ore is an example.

- (c) *Conventional minerals* – These are minerals that are neither of strategic importance nor common minerals.

Where the State has funded the exploration work to determine there are proven reserves at a deposit of strategic importance, the State may participate jointly up to 50% in a venture with a private legal person, to exploit the mineral deposit. Where proven reserves in a strategic deposit have been determined through funding sources other than the State, the State may own up to 34% of the shares of an investment to be made by the licence holder.

Where the State has funded exploration work in respect of licence areas which are not strategic deposits, the mining licence holder must reimburse exploration expenses that were funded from the state budget. The amount payable is determined by MRAM and the mining licence holder is required to enter into a repayment agreement with MRAM regarding the timing of those reimbursements.

Strategic deposits

The Mongolian government has identified a number of the largest deposits that have strategic importance for the country where development of the mining industry should be focused. There are 15 strategic deposits consisting of coal, uranium, iron ore, copper, phosphate, gold, zinc and silver located throughout Mongolia. Not less than 10% of the shares of a company that holds a licence for a strategic deposit must be sold on the Mongolian Stock Exchange.

Licences

MRAM has indicated that currently, Mongolia has approximately 1,300 mining licences and an additional 1,625 exploration licences. Mineral exploration and mining licences are only granted to legal persons and tax payers in Mongolia, duly formed and operating under the laws of Mongolia. This requirement has to be met for the entire duration of a valid licence.

Licence fees are due annually, in advance of the date the first licence was issued. One month before an exploration licence is due to expire, the licence holder may apply for an extension of the licence by submitting an application to the State administrative agency.

Failure to pay licence fees on time results in MRAM having the right to revoke the licence. Failure to submit work, safety and environmental plans and reports may ultimately result in suspension or revocation of the licence.

Exploration licences

Licences have an initial term of 3 years and can be renewed two times for a period of 3 years and are granted for areas of land between 25 and 400,000 hectares (although there is no limit placed on the number of individual exploration licences any one business entity can hold). Application requires the submission of various types of information e.g. an area map of the exploration site, information about the qualifications of the staff conducting the exploration work and a preliminary plan that includes the type, scope and cost of the exploration work, amongst others. There is a current moratorium on the issue of new Exploration Licences, yet it is anticipated that this may be reviewed during 2014.

Mining licences

Only exploration licence holders are entitled to apply for a mining licence in the exploration area. In circumstances where an exploration licence has expired and the holder has failed to apply for a mining licence, the mining licence is granted by way of

a tender. Similar to an exploration licence application, the applicant for a mining licence must submit the approved form and associated documentation to the Government agency. The mining licence is valid for 30 years. Two years before the mining licence is due to expire (and no earlier) the licence holder may apply for an extension to the term of the mining licence. Mining licences may be extended twice for terms of 20 years each.

Environmental expenditure

Under the Minerals Law of Mongolia, a licence holder (exploration or mining) has obligations with regards to environmental protection. To ensure adherence to its environmental responsibilities, the licence holder must deposit 50% of its environmental protection budget (which is derived from the environmental plan which must be prepared by the licence holder and approved by the Governor of the relevant district where the exploration site is located) for the year into a 'special' bank account opened by the Governor. Failure to do so is a breach of the Minerals Law which may result in revocation of the licence.

The Corporate Income Tax Law allows a deduction for these funds that have been accumulated for the purposes of environmental rehabilitation. The deduction can be claimed when the funds are paid. Excess escrow funds not utilised are returned to the company and treated as taxable income.

Water and forest areas

If a license area fully or partially overlaps with a Restricted Area under the Law on Prohibition of the Exploration and Mining Minerals from Water Sources, Protection Area of Water Reservoir Land and Wood reservoir Area of Mongolia (2009), the Government has the right to revoke the affected licence or, arguably, the part of the licence that is partially overlapped with a Restricted Area, with compensation being paid.

Amendments to the Minerals Law

It is anticipated that the Minerals Law will be amended this year. The proposed amendments are proposed in the context of the State policy in respect of the minerals sector which was approved by the Mongolian Parliament in January 2014. The most positive impact of the proposed amendments are that they will end the three and half year moratorium on the issue and transfer of exploration licences, as the law prohibiting the new granting of exploration licences currently provides that exploration licences may not be granted or transferred until the Minerals Law is amended. It is, however, not possible to anticipate what changes will be made to the exploration and mining regimes with these amendments.

Royalties

The primary 'tax' that applies to mining companies is in the form of a royalty imposed on off take under the Minerals Law of Mongolia. The holder of a mining licence must pay a royalty that is calculated based on the total sales value of the minerals extracted. The sales value is determined differently depending on the product:

- *Exported products* – the sales value is the average monthly price of the product or a similar product, based on regularly published international market prices or on recognized principles of international trade;
- *Products sold or used on the domestic market* – the sales value is the domestic market price for that product or a similar product; and

- *Products sold in international or domestic markets where it is impossible to determine market prices* – the sales value is based on the revenue derived from the sale of the product as declared by the licence holder.

The standard royalty rates are 2.5% for coal sold in Mongolia and for other common mineral resources sold in Mongolia. A 5% royalty is levied on all other minerals that are sold, shipped for sale or used other than gold sold to the bank of Mongolia and other banks authorised by the Bank of Mongolia in respect of which a 2.5% royalty is levied. Mineral royalties are deductible for tax purposes. Royalties are generally applied to a benchmark tax base which references spot prices; however, there is often discussion and negotiation with the MTA as to what is the appropriate base to use for royalties.

Corporate income tax (CIT)

Mongolia operates a system of worldwide taxation both on corporations and individuals who are tax resident in Mongolia. The General Tax Law (2008) contains general provisions relating to the framework for taxation (including tax administration and the rights of the tax payers and the tax authorities) but the Corporate Income Tax Law (2006) that legislates which income and expenses are taxable. There are various other specific tax laws which apply to corporations, including the Value Added Tax Law (2006), mining tax (royalties) imposed under the Minerals Law of Mongolia, and various others. The General Tax Law does, however, have certain operative provisions which must be read in conjunction with the specific Corporate Tax Law; such as arms length pricing rules for transactions between related parties, and a provision which states that double tax agreements override domestic tax law to the extent of inconsistencies.

Corporate income tax rate

The corporate tax system is progressive with annual taxable income of up to MNT 3 billion subject to tax at a rate of 10% and taxable profits in excess of this amount taxed at a rate of 25%. There is no separate tax regime for mining entities, other than royalties (tax) imposed under the Mineral Laws of Mongolia. Certain income of corporations, however, is taxed at prescribed rates: such as dividends 10%, royalties 10%, interest 10%, sale of immovable property 2% of gross price and sale of rights 30% of gross price.

5.4 Auminco's projects

(a) Mongolia

Berkh Uul Project

The Berkh Uul bituminous coal project is located in the Orkhon-Selenge coal district in Selenge Province, Northern Mongolia, approximately 40km from the Russian border (Figure 5). The licence was granted in February 2009 for six years, with the option to extend for an additional three years. Auminco has a 100% interest in the licence.

The Project occurs in the Upper Jurassic - Lower Cretaceous age Shariin Gol Formation within the Orkhon-Selenge Coal Basin, which also hosts a number of large hard coal deposits including the Mongoin Gol, Sharin Gol and Ulaan Ovoot deposits.

The two main seams typically average greater than 1.5m in thickness, however average seam thicknesses are typically variable, ranging from 0.6m to 4.5m, with splitting common. The deposit is a multi-seam deposit lying on

the flanks of a broad synclinal structure with NE-SW axis trend. Current exploration has been carried out on the eastern flank of the syncline and coal of exploitable thickness has been identified. Seams dip gently at up to 11 degrees.

A 38.3Mt Inferred and Indicated JORC (2012) classified Mineral Resource of high quality bituminous thermal coal resource has been estimated by internationally recognised consultants Runge Pincock Minarco.

The Coal Resources by seam group are summarised in the following table.

The Berkh Uul resource information has been extracted from Viking's announcement to ASX entitled "New 38.3Mt resource for Merger Company's Mongolian coal project" dated 17 March 2014 and is available to view on the Company's website at www.vikingashanti.com. The Company confirms that it

is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of estimates of Mineral Resources or Ore Reserves that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The coal is of sales quality without washing. There is potential to further value add to the resource by washing and producing a high quality, high energy thermal coal suitable for export markets.

The project is strategically located; approximately 40km to rail facilities with access to China and Russia, plus a strong local domestic demand.

There is potential for rapid development of the project, with its shallow, flat lying coal seams amenable to open cut mining. Mining studies are planned for early 2014 to accompany a Mining Licence Application in the first half of 2014.

Khonkhor Zag Project

The Khonkhor Zag anthracitic coal project is located in the Trans-Altai Coal Basin in Govi-Altai Province, South West Mongolia (Figure 5).

Auminco holds a 100% interest in a mining licence granted in April 2013 for a period of 30 years.

Russian and Mongolian technical work has previously been completed on this exploration site, with high quality anthracite coal (metallurgical coal) delineated by previous drilling, and verified by the internationally recognised engineering consultancy Runge Pincock Minarco.

The coal deposit outcrops at surface and is exposed in a small historical open pit. Significant upside potential is considered to exist as only 30% of the licence has been explored, with 1 strike km of a potential 4km strike length of the coal deposit tested to date. Further potential exists for value adding by washing, and producing a premium, low ash anthracitic metallurgical coal.

The project is strategically located 40km by road from the Chinese export border port of Burgastai-Laoemyo, providing proximity to markets in rapidly developing western China.

Anthracite constitutes less than 1% of the world's total coal supply. It is a scarce, premium priced product, very high in fixed carbon and low in volatiles. Anthracite is particularly sought after for Pulverised Coal Injection, partially replacing coke, in steel making.

Further exploration and mining studies are planned for 2014, initially focussed on increasing the resource potential of the project.

Buduun Project (Buduun 1 & 2)

Buduun is an early stage exploration project located in a proven hard coal region in Khovd Province, of western Mongolia (Figure 5). It is 16km from the Olon Bulag coking coal deposit and 20km from the Chinese border port, Baitag-Uliastai, with access to western China.

The project is held under two exploration licences granted in January 2010 for six years, with the option to extend for an additional three years. Auminco holds a 100% interest in the licences.

Exploration studies, field work, and drill target generation are planned for 2014.

Dalt Project

Dalt is an early stage exploration project located in Dundgovi Province in central Mongolia (Figure 5). The exploration licence covering the Dalt project was granted in October 2008 for six years, with an option to extend for a further three years. Auminco holds a 100% interest in the licence.

The project area covers the coal-bearing Manlai Permian Formation, and has coking coal potential with numerous other coal projects in the region.

Exploration studies, field work, and drill target generation is planned for 2014.

Budargana Project

Budargana is an early stage exploration project located in the Dundgovi Province of central Mongolia (Figure 5). The project is held under exploration licence granted in November 2008 for six years, with the option to extend for a further three years. Auminco has a 100% interest in the licence.

The project is located approximately 30km north west of the Tsagaan-Ovoo hard coal deposit. Coal bearing sediments of the Mogoit Formation and the Manlai Formation are developed across the North West section of the licence. Field work in 2013 discovered two out cropping coal seams up to 10m thick on the surface and measuring approximately 14km in length.

The project has coking coal potential with exploration studies, field work, bulk sampling and drill target generation is planned for 2014.

Tsairt Zinc Project

The project is located in Sukhbaatar province in eastern Mongolia (Figure 5). The project is held under an exploration licence which expires on 24 December 2016. Auminco can earn an 80% interest in the licence under a farm-in agreement. (See Section 5.6 for further details.)

The project lies one kilometre north of, and on strike from, the current operating Tumurtiin Ovoo zinc mine, a skarn hosted iron-zinc deposit.

The exploration target at Tsairt is skarn hosted iron-zinc mineralisation. During 2013, a field sampling program targeting outcropping magnetic anomalies returned 56.8% Fe and 0.21% Zn from surface grab samples. Induced Polarisation (IP) surveys have identified several low, medium, and high rank drill ready targets that correlate with anomalous surface grab samples.

Auminco is currently in discussion with several groups in regards to acquiring the project or joint venturing into the project.

(b) Australia

Reedy Creek Gold Project (Victoria)

The Reedy Creek Gold Project is located 60km north of Melbourne in the state of Victoria (Figure 6). The Company has a 100% interest in the exploration project.

The project is located within the historic mining area of Reedy Creek, where gold is associated within Silurian to Devonian aged sediments in a Bendigo saddle reef style, or in northeast trending diorite dykes. Up to thirty kilometres of strike length remains unexplored, which presents further possibilities for a major new goldfield.

Auminco is currently in discussion with several groups in regards to realising the project.

5.6 Tsairt Project Joint Venture Agreement

In June 2011, Auminco Coal LLC (**AUM Subsidiary**), a 100% owned Mongolian incorporated subsidiary of Auminco, entered into a joint venture agreement with Boshigtkhairhan LLC (a company incorporated in Mongolia) (**BTK**) and B Khatanmagsar (a citizen of Mongolia) (**Tsairt JV Agreement**) in respect of a project to explore, develop and exploit potential zinc and base metal deposits in Mongolia in relation to Mineral Exploration Licence 13086X (**Licence**).

BTK is the 100% owner and holder of the Licence. B Khatanmagsar was entitled to be (at the time of entering the Tsairt JV Agreement) the sole shareholder of BTK.

The key terms of the Tsairt JV Agreement are as follows:

- (a) **Ownership:** AUM Subsidiary to own 80% of Tsairt Zinc Project, with the remaining 20% to be owned by B Khatanmagsar, with BTK as the joint venture vehicle. AUM Subsidiary to hold 80% of the issued shares in BTK.
- (b) **Finance and management of joint venture and project:** AUM Subsidiary to finance and manage development of the Licence. Finance is on a non-refundable basis, but is to be repaid from the cash flow of the Tsairt Zinc Project (based on a minimum cut-off grade of 3% Zinc or equivalent) and continues until either:
- (i) a 100,000 tonnes resource milestone is reached (referred to as the "100K Milestone" in the table below); or
 - (ii) a feasibility study establishes to AUM Subsidiary's satisfaction that a commercially viable mine can be developed; or
 - (iii) the Tsairt JV Agreement is terminated.

Should a decision to mine be made, any loan made from AUM Subsidiary to BTK shall be on commercial interest rates and on normal commercial terms secured by the project assets.

- (c) **Profits and payouts:** AUM Subsidiary is entitled to 80% of net profits of the Tsairt Zinc Project and the joint venture (in its own right and as shareholder of BTK), while Khatanmagsar is entitled to 20% of such net profits (in his own right and as a shareholder of BTK). B Khatanmagsar is entitled to bonus payouts on achieving the following milestones:

Amount of zinc or other valuable ore established in accordance with the JORC Code (based on minimum cut-off grade of 3% zinc or equivalent quantity and quality of other economic minerals)	Cash payout to Khatanmagsar	Auminco Shares issued to Khatanmagsar (Auminco Shares expressed in terms of cash value)
100,000 tonnes (100K Milestone)	US\$250,000 (within 1 month of reaching milestone)	US\$250,000 (within 1 month of reaching milestone)
200,000 tonnes	Additional US\$250,000 (within 1 month of reaching milestone)	Additional US\$250,000 (within 1 month of reaching milestone)
500,000 tonnes	NIL	Further US\$500,000 (within 1 month of reaching milestone)
Total (if 800,000 tonnes established)	US\$500,000	US\$1,000,000

- (d) **Minimum JORC resource:** if the 100K Milestone is not reached, no cash or Auminco Shares are payable to B Khatanmagsar, the Tsairt JV Agreement is terminated and BTK is to be wound up.
- (e) **Pre-emption, tag-along and sale of shares:** Each of AUM Subsidiary and B Khatanmagsar has a 14 day right of first-refusal in respect of any offer received by the other for their respective interests in the joint venture.

However, if AUM Subsidiary gives notice of its intention to sell its 80% of BTK to a public company that is listed or to be listed on the ASX (**Purchaser Company**) B Khatanmagsar has a 21 day tag-along right to sell his 20% of BTK to AUM Subsidiary (or its nominee) in return for shares in the Purchaser Company.

- (f) *Dividend*: Unless agreed otherwise BTK shall distribute a dividend to the shareholders (AUM Subsidiary and B Khatanmagsar) at least once during each quarter in each financial year of least a sum equal to the after tax net profit of BTK.

- Mr Peter McMickan, the current Managing Director of Viking, will be appointed as an Executive Director of the Merged Group and will be retained on the same terms of employment as he is currently, with a reduced total remuneration of \$180,000 per annum.
- Mr Bayarsaikhan Tsagdaa will be retained by the Merged Group under his existing consultancy agreement with Auminco, pursuant to which he is entitled to receive \$150,000 per annum in consultancy fees.

6.4 Financial information

Overview

This Section contains an unaudited statement of financial position for Viking and Auminco, with the relevant information extracted from Viking's management accounts as at 31 December 2013 and Auminco's internal management accounts as at 31 December 2013.

The unaudited pro-forma statement of financial position of the Merged Group presents the Viking Group's financial position as at 31 December 2013 as if Viking

had acquired 100% of Auminco on that date. Acquisition accounting entries have been based on the terms of the Offer and the assumptions set out at the end of the statement of financial position in order to arrive at an unaudited pro-forma consolidated statement of financial position for the Merged Group as at 31 December 2013.

Viking will undertake a comprehensive assessment of the fair value of the assets and liabilities acquired after completion of the Offer.

The unaudited pro-forma statement of financial position is indicative only. Viking has drawn its own conclusions based on the known facts and other publicly available information. If the factors, circumstances, assumptions or other information should prove to be different to that described, the conclusions may change accordingly.

Purchase consideration consists of 61.2 new Viking Shares and 20.4 new Viking Options for every 100 Auminco Shares resulting in the issue of 45,753,258 new Viking Shares and 15,251,087 new Viking Options. The purchase consideration has been assessed at approximately \$2,060,000 (based on the last available market price of Viking Shares prior to lodging this Bidder's Statement of \$0.039).

This Section should be read in conjunction with Section 7 of this Bidder's Statement, which provides details of Viking's current intentions regarding Auminco.

Assumptions

- Viking acquires 100% of Auminco Shares.
- Viking is assumed to be the acquirer for the purposes of Australian Accounting Standards and is required to consolidate Auminco. Australian Accounting Standard AASB 3 requires that all business combinations are accounted for using the purchase

method. This involves assigning fair values at the settlement date to identifiable assets, liabilities and contingent liabilities, including intangible assets assumed.

- A formal analysis of the fair values of the net assets acquired will be performed post completion of the transaction.
- Purchase consideration under the Offer consists of 61.2 new Viking Shares and 20.4 new Viking Options for each Auminco Share resulting in the issue of 45,753,258 new Viking Shares and 15,251,087 new Viking Options. The purchase consideration has been assessed at approximately \$2,060,000 (based on the last available market price of Viking Shares prior to lodging this Bidder's Statement of \$0.039).
- Viking acquires or takes assignment of (as the case may be) the \$1.75 million (plus \$215,802 in accrued interest) in convertible notes and secured loans from the Auminco Lenders by the issue of 35,246,742 Viking Shares and 11,748,913 Viking Options.
- The difference between the purchase consideration to the net assets and liabilities acquired has been offset against exploration expenditure.
- There are approximate expenses incurred as a result of completing the transaction of \$700,000, of which \$250,000 will be satisfied by way of the issue of Viking Shares.
- Viking completing the Capital Raising to raise up to a further \$5,600,000 in working capital less issue costs estimated to be 8% of the gross funds raised. The actual amount to be raised under the Capital Raising will depend on the issue price of Viking Shares offered, which is still to be determined.

6.5 Financial outlook for the Merged Group

This Bidder's Statement does not include any financial forecasts or projections for revenue or profit in relation to Viking, Auminco or the Merged Group.

Viking considers that the inclusion of financial forecasts would be speculative and potentially misleading for Auminco Shareholders given:

- (a) Viking's and Auminco's assets are either undeveloped or in the early stages of development;
- (b) development is subject to inherent risks associated with material grades and quantities, mining process equipment availability, the granting of production licences, extraction and logistics costs; and
- (c) the future market prices for coal and gold are inherently uncertain.

7. Intentions of Viking

7.1 Approach and intentions of Viking

Sections 7.2 to 7.6 set out the intentions of Viking on the basis of facts and information concerning Auminco which are known to Viking at date of this Bidder's Statement. However, Viking will only reach final decisions in light of material facts and circumstances at the relevant time.

Accordingly, the statements set out in these Sections are statements of current intentions only and may vary as new information becomes available or circumstances change.

7.2 Intentions upon acquisition of 90% or more of the Auminco Shares and 90% of the value of all Auminco Securities

This Section describes Viking's intentions if Viking acquires a Relevant Interest in 90% or more of the Auminco Shares and in total 90% of the value of all Auminco Securities on issue at the end of the Offer Period. If this was to occur, Viking will be entitled to proceed to compulsory acquisition of the outstanding Auminco Shares and any other Auminco Securities on issue which it is entitled to compulsorily acquire in accordance with Part 6A.1 of the Corporations Act.

Viking intends (based on the information currently available to it) to implement its intentions as set out above except as noted below.

(a) Compulsory acquisition

Viking intends to proceed with the compulsory acquisition of any Auminco Shares not acquired under the Offer and any other Auminco Securities on issue which it is entitled to compulsorily acquire in accordance with the Corporations Act.

(b) Employees

As outlined in Section 6.2 of this Bidder's Statement, Mr Matthew Morgan will be appointed Managing Director of the Merged Group and Mr Bayarsaikhan Tsagdaa will be appointed General Manager – Mongolia.

Subject to the outcome of its review, it is Viking's intention to integrate the remainder of Auminco's management team into Viking.

Viking will make decisions regarding senior management positions following the general operation review referred to above, and will implement those decisions through its nominee directors.

Viking will seek to retain operational experience inherent in Viking's and Auminco's existing staff. However, where Viking decides there is duplication, the role will be filled by the best candidate in the opinion of the Viking management. Viking will consider whether there are opportunities elsewhere in the Merged Group for those employees whose positions may become redundant as part of the combining of management groups.

As a result of the implementation of these intentions, it is possible that certain operational functions will become redundant. Some redundancies may occur as a result, however, the incidence, extent and timing of such job losses cannot be predicted in advance. If redundancies do occur, the relevant

employees will receive benefits in accordance with their contractual and other legal entitlements.

It should be recognised that the growing of the Merged Group's business will require additional resources with the specific skills of the current Auminco team to be assessed against future requirements.

7.3 Intentions upon acquisition of more than 50% but less than 90% of the Auminco Shares

On successful completion of the Offer, Viking may hold a sufficient number of Auminco Shares to exercise control over the management and operations of Auminco, but may not be entitled to compulsorily acquire all outstanding Auminco Shares.

If Viking acquires less than 90% of the Auminco Shares on issue, Viking may declare the Offer free of the minimum 90% acceptance Condition (refer to Section 8.2(a)(ii) of Annexure A of this Bidder's Statement). If Viking acquires more than 50.1 % of the Auminco Shares on issue then Auminco Shareholders should be aware that, if they do not accept the Offer, they may become a "locked-in" minority after the end of the Offer Period.

Viking's specific intentions under this situation are as follows:

(a) Directors

Viking will seek the appointment of its nominees, Mr Gardner and Mr McMickan as Auminco Directors. Viking has not made any decision about whether Auminco nominee Directors (Mr Morgan and Mr Whitten) will be appointed to the Board.

If Viking's nominees are appointed as Auminco Directors, Viking will be seeking that its nominees implement the intentions set out in Section 7.2 (based on the information currently available to it). It should be noted that Viking expects that each of its nominees to the Auminco Board will exercise their own independent judgement and skill when it comes to the operational, financial and business decisions relating to Auminco. Viking's only influence will be through its position as a shareholder in Auminco.

(b) Financing

Under this scenario, Auminco will remain responsible for raising capital to undertake exploration and development work. This may lead to a dilution of remaining Auminco Shareholders as new capital is introduced into Auminco. To avoid further dilution, remaining Auminco Shareholders may also be required to contribute to the capital needs of Auminco to make available sufficient funding to facilitate development plans and future exploration.

(c) Dividends

Viking expects that as Auminco is still an exploration company, dividends will not be available from operating profits of Auminco for the foreseeable future.

(d) Review of Auminco operations and assets

Viking intends, through its nominee directors on the Auminco Board, to conduct an immediate review of Auminco's operations on both a strategic and financial level to determine mechanisms for improving the performance and

return to Auminco Shareholders and realise any potential operational and financial synergies.

The key objective of this review will be to ascertain the potential for fast tracking development of Auminco's exploration projects and to establish the operating and cost synergies from the incorporation of the Auminco team and operations into the Viking operating structure.

(e) Employees

The status of Auminco's existing employees will be considered as part of the review outlined in Section 7.3(d) above. Viking intends, through its nominee directors, to seek to retain operational experience inherent in Auminco's existing staff and cooperate with the existing Auminco employees to develop Auminco's assets. However, it is possible that Viking may consider that certain operational functions may be redundant and, if so determined by the Auminco Board, some redundancies may occur as a result. The incidence, extent and timing of such job losses cannot be predicted in advance.

7.4 Intentions upon acquiring less than 50.1% of the Auminco Shares

If, at the end of the Offer Period, Viking holds less than 50.1% of the Auminco Shares, the Offer will not proceed unless the defeating Condition of the Offer that Viking hold at least 90% of the Auminco Shares is waived.

If the Condition is waived, Viking intends (based on the information currently available to it) to seek to pursue its intentions as set out in Section 7.3 above.

7.5 Other intentions

Except for the changes and intentions set out in this Section 7 and subject to the outcome of the review, it is the present intention of Viking (based on the information presently available to it) to:

- (a) continue to hold the key assets of Auminco and maintain its business in substantially the same manner as it is presently being conducted;
- (b) not make any major changes to the business or assets of Auminco and not redeploy any of the fixed assets of Auminco; and
- (c) continue the employment of Auminco's key employees.

7.6 Limitations in giving effect to intentions

The ability of Viking to implement the intentions set out in this Section 7 will be subject to the legal obligations of the Viking Directors to have regard to the interests of Viking and all Viking Shareholders, and the requirements of the Corporations Act and the Listing Rules relating to transactions between related parties. Viking will only make a decision on the above mentioned courses of action following legal and financial advice in relation to those requirements.

8. Australian tax considerations

Viking and its advisers do not accept any liability or responsibility in respect of any statement concerning the taxation consequences of the Offer or in respect of the taxation consequences themselves. All Auminco Shareholders should consult their own independent professional tax advisers regarding the tax consequences of accepting the Offer.

Viking is not registered as a Tax Agent under the Tax Agents Services Act and cannot provide Tax Agent Services, which includes the giving of tax advice, under the Act.

8.1 Introduction

This Section of the Bidder's Statement provides a broad outline of the principal Australian income tax consequences for the Australian resident and non-resident Auminco Shareholders that receive Viking Shares and Viking Options as a result of acceptance of the Offer.

This outline is not exhaustive of all possible income tax considerations that could apply to particular Auminco Shareholders. Specifically, the limitations of this outline include the following:

- it applies only to Australian resident and non-resident Auminco Shareholders. Special additional rules may apply to particular Auminco Shareholders, such as insurance organisations, superannuation funds, tax exempt organisations and financial institutions; and
- it is based on the Australian tax law in effect at the date of the Bidder's Statement. It does not consider or anticipate any changes in the law (including changes to legislation, judicial authority or administrative practice).

8.2 Australian Resident Auminco Shareholders

The Australian taxation consequences for Auminco Shareholders who accept the Offer will be dependent upon a number of factors, including:

- whether the shareholder holds their shares in Auminco on capital or revenue account or as trading stock;
- the tax residency of the shareholder (i.e. whether Australian resident or not);
- when they acquired their Auminco Shares;
- whether they are an individual, a company or a trustee of a complying superannuation entity; and
- whether scrip for scrip rollover relief is available, including whether the level of acceptances under the Offer is ultimately at least 80% of the Auminco Shares.

Each Auminco Shareholder will need to determine which category they fall into. The Australian income tax consequences of accepting the Offer for each Auminco Shareholder will differ depending on which category of ownership applies to them.

(a) Auminco Shares held on capital account

Auminco Shareholders who hold their Auminco Shares as passive investments with the intention of generating dividend income and/or long term capital growth are likely to be considered to hold the shares on capital account for income tax purposes.

The acceptance of this Offer would constitute the disposal of Auminco Shares by the Auminco Shareholder which in turn would constitute a Capital Gains Tax (**CGT**) event for Australian income tax purposes.

Auminco Shareholders may realise a capital gain or capital loss in respect of the disposal of their Auminco Shares (refer to Section 8.2(a)(i) below), subject to the availability and the extent of scrip for scrip roll-over relief (refer Section 8.2(a)(ii) below).

In certain circumstances, Auminco Shareholders may be eligible to apply the CGT discount to reduce their assessable capital gain (the eligibility requirements for the CGT discount are discussed in the following paragraphs) (**CGT Discount**). The relevant rate of the CGT Discount is 50% for individuals and trusts, and 33 1/3% for complying superannuation funds.

Auminco Shareholders that are companies will not be entitled to the CGT Discount. Where a company realises a capital gain, it may be eligible to reduce that gain with capital losses from previous income years. We recommend that companies seek advice from their professional tax advisor in relation to the availability and deductibility of capital losses.

(i) Where roll-over relief is unavailable or not chosen

To the extent that scrip for scrip roll-over relief is not available (e.g. if Viking does not achieve an 80% level of acceptance) or is not accessed (e.g. the Auminco Shareholder chooses not to access the roll-over), the tax consequences should be as follows:

- A. a capital gain should arise to the extent that the capital proceeds from the disposal of Auminco Shares (being the aggregate of the market value of the Viking Shares (and consequential value of the Viking Options)) exceed the cost base of the Auminco Shares. The market value of the Viking Shares (and consequential value of the Viking Options) is determined at the time which is the later of the date the Auminco Shareholder accepts the Offer or the date the Offer becomes unconditional. If an Auminco Shareholder (being an individual, trust or superannuation fund) has held their Auminco Shares for at least 12 months as at the later of the date the Offer is accepted or the date the Offer becomes unconditional, the Auminco Shareholder may apply the CGT Discount.
- B. a capital loss should be realised to the extent the amount of the capital proceeds received (as above) by an Auminco Shareholder is less than the cost base of the Auminco Shares.

Any capital gain realised in respect of the disposal of the Auminco Shares should be included in the Auminco Shareholder's assessable income in the tax year in which the Offer is accepted. The resulting capital gain can be reduced by capital losses by the Auminco Shareholder, if available.

The calculation of the cost base of the Auminco Shares depends on each Auminco Shareholder's circumstances. Generally, the cost base of the Auminco Shares would be equal to the amount paid by the Auminco Shareholder for the shares plus certain incidental costs incurred (for example, brokerage fees) of acquisition and disposal.

(ii) Where roll-over relief is available

Broadly, scrip for scrip roll-over relief may be available where shareholders dispose of some or all of their shares in one company in exchange for shares in another company. Rollover relief will be limited to that proportion of the Auminco Shares that are exchanged for Viking Shares.

No rollover is available for Auminco Shareholders in relation to the sale proceeds attributable to the Viking Options received by Auminco Shareholders. The market value of each Viking Option is in Viking's view \$0.01 per Viking Option (based on standard market accepted valuation methodology).

Partial roll-over relief may be available to Australian resident Auminco Shareholders where:

- A. the Auminco Shareholder receives Viking Shares in consideration for the disposal of all of their Auminco Shares under the Offer;
- B. as a result of the Offer, Viking obtains 80% or more of the Auminco Shares;
- C. the Auminco Shareholder acquired their Auminco Shares on or after 20 September 1985 and, but for the roll-over, a capital gain would arise from the exchange (refer Section 8.2(a) above);
- D. the Offer is to be made to all Auminco Shareholders and is on substantially the same terms for all Auminco Shareholders; and
- E. the relevant Auminco Shareholder chooses that the roll-over applies. The election does not have to be lodged with the Australian Tax Office, the manner in which an Auminco Shareholder's income tax return is prepared is sufficient evidence of the making of the choice.

If these requirements are met:

- A. the proportion of the capital gain which relates to the disposal of the Auminco Shares for Viking Shares is deferred until the replacement Viking Shares are disposed of; and
- B. the cost base of the Viking Shares acquired by Auminco Shareholders should equal the proportion of the cost base of the original Auminco Shares attributable to the Viking Shares obtained. Further, the Auminco Shareholders will be taken to acquire their Viking Securities at the time they originally acquired their Auminco Shares (for the purpose of determining any entitlement to a discount on an otherwise assessable capital gain in relation to a subsequent dealing in their Viking Securities).

Where an Auminco Shareholder realises a capital loss on the disposal of their Auminco Shares, no CGT scrip for scrip roll-over relief will be available.

(b) Auminco Shares held on revenue account

Auminco Shareholders who acquired their Auminco Shares with the purpose of reselling them at a profit are likely to be considered to hold their Auminco Shares on revenue account for income tax purposes.

Where this is the case, any gain or loss realised on disposal of the Auminco Shares (determined based on the market value of Viking Shares and the value of the Viking Options) over the cost of acquisition of the Auminco Shares) will be assessed as ordinary income or claimed as a revenue deduction. The scrip for scrip roll-over relief provisions will have no application. The CGT Discount will also not be available in this situation.

(c) Auminco Shares held as trading stock

Auminco Shareholders, who are engaged in the business of share trading, whereby they regularly acquire shares and hold them with a view to making short-term profits through sale or exchange in the ordinary course of carrying on a business, would hold the Auminco Shares as trading stock.

Where this is the case, scrip for scrip roll-over relief will not be available on acceptance of the Offer. In these circumstances, any proceeds arising from the Offer will be included in the assessable income of the shareholder. The CGT Discount will also not be available.

8.3 Non-resident Auminco Shareholders

It is imperative that non-resident Auminco Shareholders independently confirm their Australian tax position, and any taxation implications in their country of residence.

(a) Auminco Shares held on capital account

Auminco Shareholders who are non-residents of Australia for tax purposes may be subject to Australian CGT on the disposal of their Auminco Shares if:

- (i) together with their associates, they directly own at least 10% or more (by value) of the Auminco Shares either:
 - A. at the time of the sale; or
 - B. throughout a 12 month period beginning no earlier than 24 months before the time of the sale and ending no later than the time of the sale; and
- (ii) more than 50% of the value of Auminco's assets is attributable to Australian real property.

Auminco Shareholders may also be subject to Australian CGT on the disposal of their Auminco Shares if the Auminco Shares were used at any time in carrying on a business through a permanent establishment in Australia.

Roll-over relief may be available in these circumstances if certain conditions are satisfied. The ability for Australia to impose tax on any resulting capital gain will be subject to the terms of any applicable double tax agreement between Australia and the country of residence of the Auminco Shareholder.

(b) Auminco Shares held on revenue account or as trading stock

The taxation implications will depend on the source of the gain, the taxation rules of their country of residence and whether there is a double tax agreement between their country of residence and Australia.

8.4 GST

Holders of Auminco Shares should not be liable for GST in respect of a disposal of those shares.

For personal use only

9. Risk factors

9.1 Overview

If the Offer becomes unconditional, Auminco Shareholders who accept the Offer will become Viking Shareholders and Viking Optionholders. In those circumstances, Auminco Shareholders will:

- (a) continue to be exposed to the risks associated with the investment in Auminco as a result of their indirect interest in Auminco through Viking;
- (b) be exposed to the risks which are specific to an investment in Viking; and
- (c) be exposed to additional risks relating to the Offer and the Merged Group.

These risks are explained in detail below. Auminco Shareholders should read this Bidder's Statement carefully and consult their professional advisers before deciding whether to accept the Offer. By accepting the Offer, Auminco Shareholders will be investing in Viking.

The business activities of Viking and Auminco are subject to various risks that may impact on the future performance of Viking. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, while others can be covered by insurance but some are outside the control of Viking and cannot be mitigated or insured against.

Note that an investment in Viking carries no guarantee with respect to the payment of dividends, return of capital or price at which Viking Shares will trade and should be considered speculative. The principal risk factors include, but are not limited to, the following.

9.2 Specific risks of the Merged Group

The following risks have been identified as being key risks specific to an investment in the Merged Group. These risks have the potential to have a significant adverse impact on the Merged Group and may affect the Merged Group's financial position, prospects and price of its listed securities.

Licences and permits

The Merged Group's mining exploration activities are dependent upon the grant, or as the case may be, the maintenance of appropriate licences, concessions, leases, permits and regulatory consents which may be withdrawn or made subject to limitations. The maintaining of tenements, obtaining renewals, or getting tenements granted, may depend on the Merged Group being successful in obtaining the required statutory approvals for its proposed activities and that the licences, concessions, leases, permits or consents it holds will be renewed as and when required. There is no assurance that such renewals will be given as a matter of course and there is no assurance that new conditions will not be imposed in connection with them.

In particular, there is a risk that some of Auminco's licences, including those over its Berkh Uul Project, may be subject to revocation under Mongolian law, including under Water and Forest Law as certain licences sit over Water and Forest Law Areas (see also "Application of the Mongolian Water and Forests Law" below). Further, some of Auminco's licences overlap with State Funded Areas, which may require Auminco to pay compensation to the Mongolian Government.

It is unclear whether Auminco has filed all necessary environmental reports and made necessary environmental reclamation contributions in respect of its licences, which may result in the suspension or possible revocation of the relevant licences.

Exploration in Mongolia and Ghana

The Merged Group's main exploration activities will be in Mongolia and Ghana, both of which are less developed countries than Australia with associated political, economic, legal and social risks. There can be no assurance that the systems of government and the political systems in Mongolia and Ghana will remain stable, particularly in Mongolia which is undergoing rapid change with a large number of laws currently being re-written. There can be no assurance that government regulations relating to foreign investment, repatriation of foreign currency, environmental protection, the conduct of mining, taxation, restrictions on currency conversion and remittances abroad and the mining industry generally in Mongolia and Ghana will not be amended or replaced in the future to the detriment of Viking's business and/or projects.

Unlike more established jurisdictions, it is not possible to predict with any certainty how particular laws may be applied and how this may affect the Merged Group's future operations.

Sovereign risks

The operations of Auminco and Viking are subject to adverse changes in government policies or legislation in Australia, Ghana and Mongolia.

There is no assurance that future political and economic conditions in these countries will not result in the respective governments in those jurisdictions adopting policies precluding foreign development and ownership of mineral resources.

Any such changes in policy may result in changes in laws affecting ownership of assets, taxation, rates of exchange, environmental protection, labour relations, repatriation of income and return of capital, which may affect both the Merged Group's ability to undertake exploration and development activities in respect of future properties in the manner currently contemplated, as well as its ability to continue to explore and develop those properties in respect of which it has obtained exploration and development rights to date. The possibility that a future government may adopt substantially different policies, which might extend to expropriation of assets, cannot be ruled out. There can be no assurance that the governments of these countries or their instrumentalities, agencies or controlled entities and operations will not impose measures that could have material adverse effects on the Merged Group's operations or will renew or issue new exploration or mining licences to the Merged Group.

The Mongolian legal system shares several of the qualitative characteristics typically found in a developing country insofar as many of its laws tend to be basic and have not evolved to a point where they contemplate or recognise more sophisticated transactions and business structures involving relatively well established legal concepts. Likewise the interpretation and enforcement of Mongolian laws and regulations involve uncertainties, in particular, the government officials responsible for administering these laws may lack experience in assessing these types of transactions such that a transaction or business structure that would be likely to be regarded as appropriate and relatively straightforward under a Western legal system may be regarded by Mongolian government officials as novel and without precedent and therefore outside the scope of Mongolian law.

Outcomes in courts in Mongolia may be less predictable than in Australia, which could affect the enforceability of contracts entered into by Auminco or its subsidiaries in Mongolia.

The Mongolian operations of the Merged Group are subject to the jurisdiction of Mongolia's courts, except where parties to a contract have chosen arbitration (local and international such as Hong Kong, Singapore or London arbitration). The legal system operating in Mongolia is developing which may result in risks such as:

- (a) political difficulties in obtaining effective legal redress in the courts whether in respect of a breach of law or regulation, or in an ownership dispute;
- (b) a high degree of discretion on the part of governmental agencies;
- (c) a lack of political or administrative guidance on implementing applicable rules and regulations including, in particular, as regards local taxation and property rights; or
- (d) inconsistencies or conflicts between and within various laws, regulations, decrees, orders and resolutions.

In the case where there is a dispute about the actions of the State in Mongolia with regard to the Merged Group's Mongolian projects, it is unlikely that a claim could be raised in Australian courts for reasons of comity or the doctrine of sovereign immunity.

The occurrence of these various factors and uncertainties cannot be accurately predicted and could have an adverse effect on the operations or profitability of the Merged Group.

Legal risks associated with operating in Mongolia

The Mongolian Parliament has previously passed laws that may restrict or limit the Merged Group's operations or make them uneconomic. These include the laws that impose the right to participate in "mineral deposits of strategic importance" (see Section 5.3 above). Should the Merged Group's exploration activities lead to an economically viable mineral deposit, there is a risk that the Mongolian State may seek to acquire an interest in those deposits. This interest can be up to 34% (or 50% where the deposit was identified using State funding).

The Merged Group's ability to efficiently conduct its exploration, mining and development activities is subject to changes in legislation or government regulations or shifts in political attitudes within Mongolia that are beyond its control.

Government policy may change to be less favourable to foreign investment, nationalisation of mining industries may occur or other government limitations, restrictions or requirements not currently foreseen may be implemented. There can be no assurance that the Merged Group's assets will not be subject to nationalization, requisition or confiscation, whether legitimate or not, by any authority or government body.

The provisions under Mongolian law for compensation and reimbursement of losses to investors under such circumstances and any negotiations with the Mongolian government with respect to such compensation and reimbursement are subject to a great degree of uncertainty and there can be no assurance that the outcome would be effective to restore the value of the Merged Group's original investment. Similarly, the Merged Group's operations may be affected to varying degrees by government regulations with respect to restrictions on production, price controls, export controls, income and other taxes, royalties, environmental legislation, mine safety and annual

fees to maintain mineral licences in good standing. There can be no assurance that Mongolian laws protecting foreign investment will not be amended or abolished or that existing laws will be enforced or interpreted to provide adequate protection against any or all of the risks described above.

In addition Mongolia may experience political instability. Political instability in Mongolia could have a material adverse effect on economic or social conditions in Mongolia which in turn could have a material adverse effect on the Merged Group's business.

Amendments to legislation and the development of new laws

In 2006, the Mongolian Parliament enacted the 2006 Minerals Law. The 2006 Minerals Law revoked much of the security of tenure for minerals licence holders which was contained in the 1997 Minerals Law and contains provisions that could increase the potential for political interference. In particular, the 2006 Minerals Law contains provisions which potentially allow licences to be revoked for perceived non-compliance with various provisions of the law based on subjective determination by government officials. There is a risk that further actions could affect the private ownership of minerals assets in Mongolia whether through changes in law or regulation, government policy, court judgments or the actions of government officials. Certain provisions of the 2006 Minerals Law are ambiguous and it is unclear how they will be interpreted and applied in practice. As such, the impact, if any, of these provisions of the 2006 Minerals Law on the Merged Group's projects cannot be measured and any further amendments to the minerals legislation may materially and adversely affect the Merged Group's financial condition and results of operations.

Various factions within Mongolia have recently called for major changes to the current minerals law and other related laws and governmental policies. However, there is uncertainty as to what effect, if any, a new minerals law may have on issues such as state participation in the minerals sector and the Water and Forests Law.

Application of the Mongolian Water and Forests Law

In July 2009 the Mongolian Parliament enacted what is commonly referred to as the Water and Forests Law. This law authorises the Government of Mongolia to revoke all mineral exploration and mining licences located within the areas described in the law. These areas include:

- (a) within 200 metres of the headwaters of rivers and lakes as defined in the Water Law of Mongolia dated 22 April 2004;
- (b) within 200 metres of rivers and lakes as defined in the Water Law of Mongolia dated 22 April 2004; and
- (c) within 100 metres of forest areas defined in the Forest Law of Mongolia 17 May 2007,

((a), (b), and (c) collectively referred to as **Restricted Areas**).

The Water and Forests Law provides that no new minerals exploration and mining licences encompassing Restricted Areas will be issued and previously granted licences that overlap Restricted Areas will be terminated.

To date, a definitive list of affected licences has not yet been published.

There is a risk that if the Water and Forests Law is enforced a portion of Auminco's licences including those over its Berkh Uul Project which sit over Water and Forests Law area will be revoked and, whilst the law contemplates that compensation would

be paid to Auminco in these circumstances, due to the lack of financial resources available to the Mongolian Government, there is a risk that no compensation will be paid to the Merged Group for the termination.

Joint venture parties, agents and contractors

There is a risk of financial failure or default by a participant in any joint venture to which Auminco is or may become a party or the insolvency or managerial failure by any of the contractors used by the Merged Group in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Merged Group for any activity.

Liquidity

There is no guarantee that there will be an ongoing liquid market for Viking Shares. Accordingly, there is a risk that, should the market for Viking Shares become illiquid, Viking Shareholders will be unable to realise their investment in Viking.

No production revenues

To date neither Viking nor Auminco have recorded any revenues from its projects nor have they commenced commercial production on any of their respective projects. There can be no assurance the Merged Group will be profitable in the future, or at all.

Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Merged Group will depend substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Merged Group if one or more of these employees cease their employment.

Operational and technical risks

The operations of the Merged Group may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades and/or resources in exploration and mining, operational and technical difficulties encountered in mining and extraction, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical or recovery problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes, and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment prevention or restriction of access by reason of political unrest, outbreak of hostilities, and inability to obtain consents or approvals, and restriction of access to infrastructure by Russian, Chinese or Mongolian authorities.

The Merged Group's Mongolian projects will be subject to extreme climatic conditions which restrict the period within which exploration, appraisal and possibly production activities may take place and may also place the Merged Group's personnel at risk if exposed to these extreme conditions.

Mongolia has a foreign worker quota system that may make it difficult to hire qualified personnel even where local manpower is unavailable.

9.3 Industry risks for the Merged Group

Exploration, mining and development risks

Exploration and mining are high risk, speculative activities that require large amounts of expenditure over extended periods of time. The Merged Group's exploration activities would be subject to all the hazards and risks normally encountered in the exploration of minerals, including climatic conditions, hazards of operating vehicles and plant, risks associated with operating in remote areas and other similar considerations. Conclusions drawn during exploration and development are subject to the uncertainties associated with all sampling techniques and to the risk of incorrect interpretation of geological, geochemical, geophysical, drilling and other data.

Profitability depends on successful exploration and/or acquisition of reserves, design and construction of efficient processing facilities, competent operation and management and proficient financial management.

Resource estimates

Resource estimates are expressions of judgment based on knowledge, experience and industry practice. Estimates, which were valid when originally calculated, may alter when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates may change. Accordingly, the actual resources may materially differ from these estimates and assumptions and no assurances can be given that the resource estimates and the underlying assumptions will be realised. This could result in alterations to development and mining/extraction plans, which may, in turn, affect the Merged Group's operations and ultimately its financial performance and value.

Commodity price fluctuations

In the event of exploration and development success, any future revenue derived through any future sales of valuable minerals exposes the potential income of the Merged Group to commodity price risks. Commodity prices fluctuate and are affected by numerous factors beyond the control of the Merged Group. These factors include world demand for commodities, forward selling by producers and the level of production costs in major commodity-producing regions. Moreover, commodity prices are also affected by macroeconomic factors such as expectations regarding inflation, interest rates and global and regional demand for, and supply of, commodities.

Exchange rate fluctuations

International prices of most commodities are denominated in United States dollars, whereas any income and the expenditure of the Merged Group will be in Australian, Ghanaian and Mongolian currencies, exposing the Merged Group to the fluctuations and volatility of the rate of exchange between the United States dollar, the Australian dollar, Ghanaian cedi and Mongolian Tugrik, subject to any currency hedging the Merged Group may undertake.

Competition

The Merged Group will compete with other companies, including major mining companies in Australia and internationally. Some of these companies have greater financial and other resources than the Merged Group and, as a result, may be in a better position to compete for future business opportunities. There can be no assurance that the Merged Group can compete effectively with these companies.

Title risks

There is no guarantee that title to the Merged Group's projects will not be challenged or impugned.

The projects may be subject to prior unregistered agreements or transfers or land claims and title may be affected by undetected defects. There is no guarantee that the licences / permits granted to the Merged Group will be renewed.

9.4 General investment risks

The business activities of the Merged Group will be subject to various general economic and investment risks that may impact on the future performance of the Merged Group. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Merged Group and cannot be mitigated. There are a number of general economic and investment risk factors that apply to companies generally and may include economic, financial, market or regulatory conditions.

General economic conditions

Economic conditions, both domestic and global, may affect the performance of the Merged Group. Factors such as fluctuations in currencies, commodity prices, inflation, interest rates, supply and demand and industrial disruption may have an impact on operating costs and share market prices. The Merged Group's future possible revenues and share price can be affected by these factors, all of which are beyond the control of the Merged Group.

Equity market conditions

Securities listed on the stock market, and in particular securities of mining and exploration companies, can experience extreme price and volume fluctuations that are often unrelated to the operating performances of such companies. The market price of securities may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general.

General factors that may affect the market price of securities include economic conditions in both Australia and internationally, investor sentiment, local and international share market conditions, changes in interest rates and the rate of inflation, variations in commodity prices, the global security situation and the possibility of terrorist disturbances, changes to government regulation, policy or legislation, changes which may occur to the taxation of companies as a result of changes in Australian and foreign taxation laws, changes to the system of dividend imputation in Australia, and changes in exchange rates.

Changes in government policy & legislation

Any material adverse changes in relevant government policies or legislation of Australia, Ghana and Mongolia may affect the viability and profitability of the Merged Group, and consequent returns to investors. The activities of the Merged Group will be subject to various federal, state and local laws governing prospecting, development, production, taxes, labour standards and occupational health and safety, and other matters.

Future capital requirements

The continued operations of the Merged Group are dependent on its ability to obtain financing through debt and equity financing, or generating sufficient cash flows from future operations. There is a risk that the Merged Group may not be able to access

capital from debt or equity markets for future projects or developments, which could have a material adverse impact of the Merged Group's business and financial condition.

Insurance

The Merged Group will maintain insurance where it is appropriate for their needs, however insurance against all risks associated with mineral exploration and production is not always available or affordable. Insurance coverage against all risks may not be undertaken by the Merged Group either because such cover is not available or because the Directors consider that the associated premiums are excessive having regard to the benefits from the cover.

The occurrence of an event that is not covered or is only partially covered by insurance could have a material adverse effect on the business, financial condition and results of the operations of the Merged Group. There is no assurance that the Merged Group will be able to maintain adequate insurances in the future at rates that the Directors consider reasonable.

Other

Other risk factors include those normally found in conducting business, including litigation resulting from the breach of agreements or in relation to employees (through personal injuries, industrial matters or otherwise) or any other cause, strikes, lockouts, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the business or trade of the Merged Group.

9.5 Risks relating to the Offer

Issue of consideration

Auminco Shareholders are being offered specific quantities of Viking Shares and Viking Options as consideration under the Offer. As a result, the value of the consideration will fluctuate depending upon the market value of Viking Shares. Accordingly, the market value of the Viking Shares at the time you receive them may vary significantly from their market value on the date of your acceptance of the Offer. Viking is not obliged to make any adjustment in the consideration payable under the Offer if the value of Viking Shares (and the underlying or corresponding value of Viking Options) changes during the Offer Period.

Rollover relief

A Condition of the Offer is that the level of acceptance must result in Viking obtaining a relevant interest in at least 90% of all Auminco Shares. Viking reserves the right to waive this Condition.

If the minimum acceptance Condition is varied or reduced below 80%, Viking may not acquire the number of Auminco Shares sufficient to bring its total interest in Auminco to at least 80% of the voting shares, in which case scrip-for-scrip CGT rollover relief will not be available to holders of Auminco Shares.

Sale of Viking Securities

Under the Offer, Viking will issue a significant number of new Viking Shares and Viking Options to Auminco Shareholders. Some Auminco Shareholders may not intend to continue to hold their Viking Shares and Viking Options and may wish to sell them. There is a risk that this may adversely impact on the price of and demand for

Viking Shares (and accordingly the subsequent underlying or corresponding value of the Viking Options).

Acquisition of less than 90% of Auminco Shares

It is possible that Viking could acquire less than 90% of all of the Auminco Securities on issue under the Offer, which would prevent Viking compulsorily acquiring all remaining Auminco Securities. The existence of a minority interest in Auminco may have an impact on the operations of the Merged Group, although this impact will depend upon the ultimate level of Auminco ownership acquired by Viking.

If Viking acquires less than 90% of the Auminco Shares on issue, Viking may declare the Offer free of the minimum 90% acceptance Condition (refer to Section 9(a)(ii) of Annexure A of this Bidder's Statement).

Merger integration

Integrating Viking and Auminco may produce some risks, including the integration of management, information systems and work practices. Furthermore, there is no guarantee that any synergy benefits or costs savings will be achieved on time or at all.

Due diligence

In preparing the information relating to Auminco contained in this Bidder's Statement, Viking has relied on publicly available information relating to Auminco and information provided to Viking as part of its due diligence. Risks may exist in relation to Auminco (which will affect the Merged Group) of which Viking is unaware. If any material risks are known to the Auminco Directors, they must be disclosed in the Target's Statement to be issued by Auminco.

10. Additional information

10.1 Viking's interest in Auminco Shares

Immediately before this Bidder's Statement was lodged with ASIC and as at the date immediately before the Offer is sent, Viking and its Associates did not have any Relevant Interest in, or voting power in relation to, Auminco Shares.

10.2 Acquisitions of Auminco securities by Viking and its Associates during the last 4 Months

Viking and/or its Associates have not made any acquisitions or disposals of Auminco Shares in the 4 months prior to the date of this Bidder's Statement.

10.3 Collateral benefits

During the period of 4 months before the date of this Bidder's Statement, neither Viking nor any Associate of Viking gave, or offered to give or agreed to give, a benefit to another person that was likely to induce the other person, or an Associate of that person, to:

- (a) accept the Offer; or
- (b) dispose of their Auminco Shares,

and which is not offered to all holders of Auminco Shares under the Offer.

10.4 Viking is a disclosing entity

Due to the fact that Viking is offering Viking Shares as consideration for the acquisition of Auminco Shares under the Offer, the Corporations Act requires that this Bidder's Statement must include all information that would be required for a prospectus for an offer of Viking Shares under sections 710 to 713 of the Corporations Act.

Viking is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all disclosing entities, Viking is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of Viking's Securities.

Viking Securities have been quoted on the official list of ASX during the 3 months prior to the date of this Bidder's Statement. For this reason, Viking is only required to disclose information about Viking in this Bidder's Statement that would usually be required in a "transaction specific prospectus".

In general terms "transaction specific prospectuses" are only required to contain information in relation to the effect of the issues of securities on Viking and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company unless such information has not previously been disclosed to ASX.

Having taken such precautions and having made such enquiries as are reasonable, Viking believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 12 months before the issue of this

Bidder's Statement which required Viking to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not been reported in this Bidder's Statement, other than that which is considered necessary to make this Bidder's Statement complete.

Viking, as a disclosing entity under the Corporations Act, states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with ASIC in relation to Viking (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of ASIC; and
- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Bidder's Statement and the Closing Date:
 - (i) the annual financial report most recently lodged by Viking with ASIC;
 - (ii) any half year financial report lodged with ASIC by Viking after the lodgement of the annual financial report referred to in (i) and before the lodgement of this Bidder's Statement with ASIC; and
 - (iii) any documents used to notify ASX of information relating to Viking during that period in accordance with the Listing Rules as referred to in section 674(1) of the Corporations Act.

Copies of all documents lodged with ASIC in relation to Viking can be inspected at the registered office of Viking during normal office hours.

10.5 Information about Viking Shares

The Viking Shares to be issued pursuant to the Offer will, from their date of issue, rank equally in all respects with existing Viking Shares on issue. The rights attaching to the Viking Shares arise from a combination of Viking's constitution, statute and general law. A summary of the rights attaching to the Viking Shares is set out below:

(a) General meetings

Viking Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of Viking.

Except as provided for by the Corporations Act, Viking Shareholders are not entitled to call a general meeting.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of Viking Shares (at present there are none), at meetings of Viking Shareholders:

- (i) each Viking Shareholder entitled to attend and cast a vote may vote in person by proxy or by attorney;
- (ii) on a show of hands, every person present who is a Viking Shareholder entitled to vote or a proxy, attorney or representative of a Viking Shareholder entitled to vote has one vote; and
- (iii) on a poll, every person present who is a Viking Shareholder entitled to vote or a proxy, attorney or representative of a Viking Shareholder entitled to vote shall, in respect of each fully paid Viking Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote and shall have a fraction of one vote for each partly paid share held by him, where that fraction is equal to the proportion which the amount paid up on that share (excluding amounts

credited) is of the total amount paid up and payable (excluding amounts credited) on that Viking Share.

(c) Dividend rights

Subject to the rights of holders of shares issued with special, preferential or qualified rights (at present there are none), Viking may pay dividends as the Directors resolve but only out of profits of Viking. All dividends as declared by the Directors shall be payable on all shares in proportion to the amount of capital paid (excluding amounts credited) on the shares unless the share is issued on terms providing to the contrary.

(d) Winding-up

Subject to the rights or restrictions of holders of shares with special rights in a winding up (at present there are none), on a winding up of Viking any surplus must be divided among the Viking Shareholders in the proportions which the amount paid (including amounts credited) on the Viking Shares of a Viking Shareholder is of the total amounts paid and payable (including amounts credited) on the Viking Shares of all Viking Shareholders.

(e) Transfer of Viking Shares

Subject to the Constitution, the Corporations Act, and any other laws and ASX Settlement Rules and the Listing Rules, Viking Shares are freely transferable.

(f) Future increase in capital

The allotment and issue of any Viking Shares is under the control of the Directors. Subject to restrictions on the allotment of Viking Shares to Directors or their Associates, the Listing Rules, the Constitution and the Corporations Act, the Directors may allot or otherwise dispose of Viking Shares on such terms and conditions as they see fit.

(g) Variation of rights

Under the Corporations Act, Viking may, with the sanction of a special resolution passed at a meeting of Viking Shareholders vary or abrogate the rights attaching to shares. If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of the issue of the shares of that class), whether or not Viking is being wound up may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

10.6 Terms of Viking Options to be issued under the Offer

10.10 Viking General Meeting to approve the Offer and Listing Rule requirements

ASX has notified Viking that it requires Viking to comply with Listing Rule 11.1.2 by seeking Shareholder approval of the Takeover.

The Notice of General Meeting issued by Viking seeks, among other things, Viking Shareholder approval for change in scale of Viking's activities as a result of the Takeover, for the purposes of Listing Rule 11.1 (**Offer Resolution**).

Mr Gardner will acquire his Viking Shares and Viking Options via Jaytu Pty Ltd, a company Associated with Mr Gardner.

As the issue price under the Capital Raising is yet to be determined, the precise number of Viking Shares that may be issued to the current Directors and Proposed Directors cannot be ascertained at the date of this Bidder's Statement. The above table sets out two scenarios based on what the Directors consider to be a realistic pricing range for the Capital Raising by reference to recent trading prices of Viking Shares. The actual issue price of Viking Shares under the Capital Raising has yet to be determined.

10.13 Directors' fees and benefits

The constitution of Viking provides that the Viking Directors are entitled to be remunerated for their services as Viking Directors at an amount and in the manner determined by the Viking Directors; however, the aggregate remuneration paid or provided to all Viking Directors in any year may not exceed an amount fixed by Viking in general meeting.

Each non-executive Director receives a separate fixed fee for their services as a Director. Currently, the Chairman is entitled to receive a fixed fee of \$75,000 per annum and each other non-executive is entitled to receive a fixed fee of \$50,000. However, in reflection of Viking's cash position and the condition of the equity markets, Director fees were reduced by 30% as from October 2012. As from September 2013, Director fees have been further reduced to 45% of the original amounts.
