Exploration works for iron ore at the Group's Silverstone Project has substantially completed, and the focus now is the application for the necessary permits to commence commercial production. Pending receipt of these permits, the Company employs part of its excess cash holdings for trading of commodities, primarily copper coils, to generate revenue to offset the Group's operating expenses. These trades are carried out on a "covered" basis (that is to say, that purchases are contracted for only when there is a sale of the items contracted for). The net decrease in the Group's cash holdings represents cash employed in such commodity trading.
