

30 April 2014

QUARTERLY ACTIVITY REPORT

For the period ended 31 March 2014

Carnavale Resources Ltd (ASX: CAV) is pleased to report on its activities at projects in Utah, USA and Western Australia for the March 2014 Quarter.

- ◆ Program of works continuing to determine the economics of the Essex Project, Utah, USA. This program is estimated to be completed in May 2014.
- ◆ After review of independent technical reports, CAV will determine whether to exercise its option and continue with the Essex Project.
- ◆ During the quarter the Company also continued to review new project opportunities to complement the existing asset portfolio.
- ◆ CAV has approximate cash reserves of \$1,636,000 at the end of the March quarter.

Essex Project, Utah, USA

The Essex Project consists of nearly 30 hectares (72 acres) of land located 5km (3 miles) outside of the town of Milford, Beaver County, Utah. This area is located in south-western Utah, an approximate 3.5 hour drive from Las Vegas, Nevada (heading north-east) or a 3.5 hour drive (south-west) from Salt Lake City, Utah. The property is close to an existing sealed road and is located on private land. See Figure 1 below.

Background

- The Essex Project comprises an historic two-acre minerals processing facility originally in operation from the early 1960s to 1976 and the tailings which are remnant of this operation.
- In the 1960s through to mid-1970s, high-grade ore was processed by typical flotation methods or vat leach processes. These processes only partially removed copper and precious metals. This has left copper and precious metals in the tailings.
- Fresh water and grid electricity are accessible from close proximity to the Essex Project site.

Long Horse Project – Joint Venture (Western Australia)

The Long Horse Project covers a total of 87 blocks south-west of Coolgardie, WA. It is adjacent to mineral claims and nickel sulphide occurrences known as the Queen Victoria Rocks Project owned by Hannans Reward Limited (ASX: HNR). The Long Horse project area also includes areas formerly included in a joint venture between Emu Nickel Limited and Mincor Resources NL.

The Emu Nickel Limited and Mincor Resources NL joint venture identified a large magnetic anomaly at the margin of felsic granitoid intrusions. Postulated causes for the magnetic anomaly were a large magnetite source formed at an endoskarn setting or a folded banded iron formation (“BIF”) wrapped around the granitoid. One reverse circulation drill hole (WRC017) was completed which tested the peak of a magnetic anomaly to 175 metres for a possible magnetite iron deposit. The hole was planned to go deeper but was abandoned as water inflows became too high. The hole intersected a number of thin BIF sequences.

No work is planned at Long Horse until the remaining application is granted.

The information in this report that relates to exploration results is based on information compiled by Mr Klaus Eckhof who is a member of the Australasian Institute of Mining and Metallurgy (AusIMM). Mr Eckhof is a Director of the Company, has sufficient relevant experience in respect of the style of mineralization, the type of deposit under consideration and the activity being undertaken to qualify as a Competent Person within the definition of the 2004 Edition of the AusIMM’s “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Eckhof consents to the inclusion in this report of the matters that are based on his information in the form and context in which it appears.

Addendum to March 2014 Quarterly Report

Carnavale Resources Limited (ASX:CAV) provides the following addendum to the March 2014 Quarterly Activities Report lodged with the ASX on 30 April 2014 in relation to additional information required by Listing Rule 5.3.3.

Mining Tenements held at the end of the quarter and their location

None

Mining Tenements acquired during the quarter and their location

None

Mining Tenements disposed of during the quarter and their location

None

Beneficial percentage interests held in farm-in or farm-out agreements at the end of the quarter

Carnavale is in joint venture with Barrambie Minerals Limited over licences E15/1352 and E15/1372 whereby Carnavale can earn up to 80% interest in these licences by spending \$1,250,000 in exploration. As at the end of the quarter, CAV had not earned an interest in the licences.

Beneficial percentage interests in farm-in or farm-out agreements acquired or disposed of during the quarter

None

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities.** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
