

31 July 2014

ASX/TSX ANNOUNCEMENT
Quarterly Report of Operations
For The Period Ended 30 June 2014

HIGHLIGHTS

Olaroz Lithium-Potash-Boron Project:

- **Project construction is approximately 93% physically complete with significant milestones achieved.**
- **A total of approximately US\$214 m has been spent or committed via executed contracts on the construction project to date.**
- **Construction is projected to be completed on budget with the primary lithium carbonate plant start-up/commissioning scheduled to commence at the end of August 2014.**

Brine holding pond and road across the salar

Borax Argentina

- **Completed the year on budget.**
- **Borax plant relocated within the original budget of US\$3.7m from Campo Quijano (close to the city of Salta) to the Tincalayu mine with production commencing on 5 July 2014.**

Corporate

- **Cash position of A\$25.8m at the end of the quarter excluding funds in Olaroz Lithium Project companies.**
- **Corporate videos produced and available on the Company website.**

Olaroz Lithium-Potash-Boron Project

The Olaroz Project is Orocobre's flagship project located in Jujuy province of Argentina. Together with partners, Toyota Tsusho Corporation ("TTC") and Jujuy Energia y Minería Sociedad del Estado ("JEMSE"), Orocobre is building the first large scale "green fields" lithium brine project in approximately 20 years at a capital cost of US\$229m and will have a design capacity of 17,500tpa of battery grade lithium carbonate. The Olaroz Project joint venture is operated through Argentine subsidiary Sales de Jujuy SA (SDJ SA). The effective Olaroz Project equity interest is: Orocobre 66.5%, TTC 25.0% and JEMSE 8.5%.

Construction Update

The construction of the project continues to proceed within budget and a total of approximately \$214m has been spent or committed via executed contracts in the construction project (refer Construction Update on the Olaroz Lithium Project, 2 July, 2014). In terms of physical progress, the construction program is approximately 93% complete.

During the quarter, import licences were received by the Company for its purchase of the remaining directly imported equipment required for the Olaroz project. Primary lithium carbonate plant start-up/commissioning is scheduled to commence at the end of August 2014, with commissioning/start up of the micronizing and drying circuit to follow in mid September. Full automated control operations are scheduled to be introduced during October (refer Construction Update on the Olaroz Lithium Project dated 2 July, 2014). The project implementation is through EPCM (Engineering, Procurement and Construction Management) with a high proportion of local involvement through construction and supply contracts and local employment. The community and shared value policy "Jujuy First" continues as a key success factor, training local people under the supervision of high quality experienced professionals.

Borax Argentina

Borax Argentina has extensive operations and a fifty year production history producing borax chemicals, boric acid and boron minerals. The production currently comes from three principal mines at Tincalayu, Sijes and Porvenir with concentrators at the first two locations and a chemicals plant at Campo Quijano producing refined products. The borax circuit at the chemicals plant has been relocated to the Tincalayu mine where the mineral for borax production, tincal, is mined.

Operations

Approximately 9,558 tonnes of combined products were sold during the quarter. This is in line with the June quarter last year but lower than budget. Sales were negatively impacted by insufficient stocks caused by the relocation of the borax plant. Demand for borax chemical products was higher than anticipated in the original inventory planning. The company expects to recover the sales momentum during the coming quarters as production ramps up at the borax plant. This is against a backdrop of improving market conditions for borax products. In spite of the challenging market conditions during the year and a dip in borax sales during the past quarter, Borax Argentina achieved its budget for the financial year.

**Combined product sales volume by quarter:*

<u>Quarter</u>	<u>Combined Product Sales (tonnes)</u>
<i>September 2012</i>	<i>9,161</i>
<i>December 2012</i>	<i>10,007</i>
<i>March 2013</i>	<i>9,182</i>
<i>June 2013</i>	<i>9,562</i>
<i>September 2013</i>	<i>10,103</i>
<i>December 2013</i>	<i>11,410</i>
<i>March 2014</i>	<i>9,027</i>
<i>June 2014</i>	<i>9,558</i>

**Combined product sales volumes include borax chemicals, boric acid and boron minerals*

Borax Plant Relocation

During the quarter, the relocation of the borax decahydrate plant from Campo Quijano to the Tincalayu mine was completed with production commencing on 5 July 2014 (for more detail refer Borax Plant Relocation Completed).

The relocated plant will produce 100tpd of borax decahydrate at full capacity and the project has been completed within the original budget of US\$3.7m net of existing plant and equipment.

As a result of the borax plant relocation significant benefits are expected to be achieved in both the reduction of operating unit costs and an increase in overall mineral recovery from the mine. Previously, run-of-mine ore at 17% B₂O₃ was concentrated at Tincalayu using dry magnetic separation at about 60% recovery to produce a 21% B₂O₃ grade, which was then transported 350 kms to Campo Quijano for further production into borax chemicals. Relocating the borax plant to the Tincalayu mine site allows for the direct processing of run-of-mine ore at a 15% B₂O₃ head grade without the need for magnetic separation and associated mineral losses plus it improves transport efficiency and cost by carting a 37% B₂O₃ refined product rather than the 21% B₂O₃ grade concentrate.

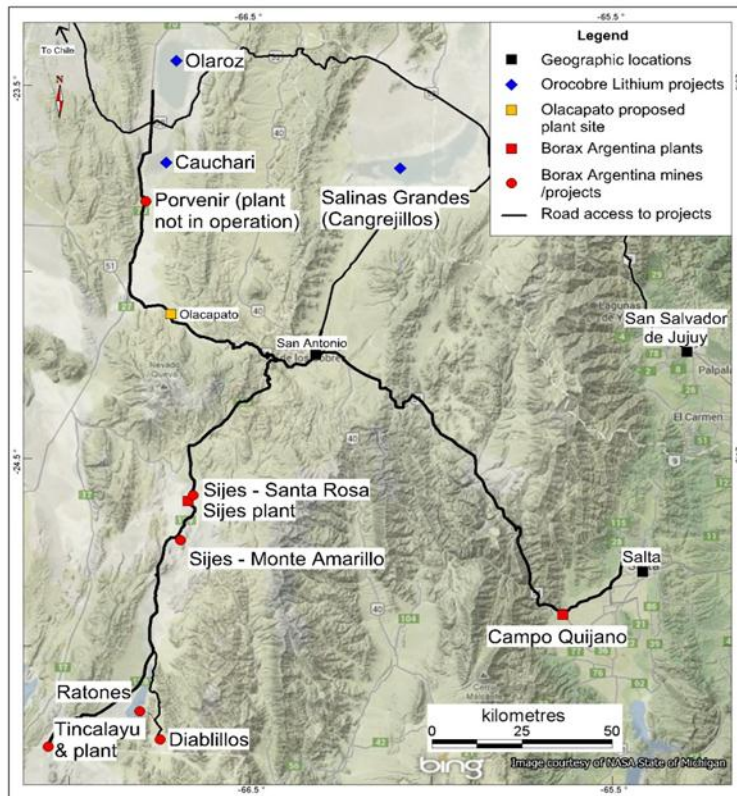

The Company considers this project an exciting development which will position the Borax Argentina business well for the future.

Historical Estimates to JORC Compliant Resource Conversion Programme

JORC Program

The company is in the process of upgrading the historical estimates of the different Borax Argentina mining properties to JORC/NI43-101 compliant mineral resources.

The Porvenir resource estimate, calculated in accordance with the requirements of JORC 2012 was the first re-evaluation of the Company’s borate resource base (refer Amended Porvenir Resource Announcement, 29 April 2014). Geological interpretation and re-estimation of the resources at the Diablillos and Tincalayu projects is

currently underway. The new resource estimate and exploration review reports for Tincalayu are expected to be completed by the end of the quarter and will shortly after lead into the development of a Life of Mine Plan (LOMP).

Once the geological interpretation and re-estimation of the resources at the Diablillos and Tincalayu projects are completed, the focus will move to the tertiary Sijes hydroboracite deposit.

Corporate and Administration

Cash Position

At the end of the quarter, the company had a cash position of A\$25.8m excluding funds in Olaroz Lithium Project companies.

Corporate Video

The Company has produced a corporate video package comprising three separate films, “Orocobre Corporate”, “Salar de Olaroz Lithium Project” and “Borax Argentina”. The links to these films are posted on the [Orocobre home page](#).

About Orocobre Limited

Orocobre Limited is listed on the Australian Securities Exchange and Toronto Stock Exchange (ASX:ORE, TSX:ORL), and is building a substantial Argentinian-based industrial minerals company through the construction and operation of its portfolio of lithium, potash and boron projects and facilities

For personal use only

For personal use only

in the Puna region of northern Argentina. The Company is building in partnership with Toyota Tsusho Corporation the first large-scale, de-novo brine based lithium project in 20 years at its flagship Salar de Olaroz resource, with projected production of 17,500 tonnes per annum of low-cost battery grade lithium carbonate scheduled to commence in Q3 2014. The Company also wholly-owns Borax Argentina, an important regional borate producer. Orocobre is included in the S&P/ASX300 Index. For further information, please visit www.orocobre.com.

Technical Information, Competent Persons' and Qualified Persons Statements

The technical information in this report has been extracted from the announcements entitled Amended Porvenir Resource Announcement, 29 April 2014 and Borax Plant Relocation Completed dated 15 July 2014 both available on asx.com.au. The Company confirms that it is not aware of any new information or data that materially affects the information included in the references above and that all material assumptions and technical parameters underpinning the resource estimates continue to apply and have not materially changed. The Company also confirms that the form and context in which the Competent Person's findings are presented have not been materially modified. The Company is not in possession of any new information or data relating to historical estimates that materially impacts on the reliability of the estimates or the company's ability to verify the historical estimates as mineral resources, in accordance with the JORC Code. The supporting information provided in the initial market announcement of 21/08/12 continues to apply and has not materially changed.

Additional information relating to the Company's projects is available on the Company's website in "Technical Report – Salar de Olaroz Lithium-Potash Project, Argentina" dated May 30, 2011, (the Olaroz Report), the "Technical Report – Salinas Grandes Project" dated April 30, 2010 and the "Technical Report – Salar de Cauchari Project, Argentina" dated April 30, 2010, respectively, which have each been prepared by John Houston, Consulting Hydrogeologist, together with, in the case of the Olaroz Report, Mike Gunn, Consulting Processing Engineer, in accordance with NI 43-101.

Caution Regarding Forward-Looking Information

This news release contains "forward-looking information" within the meaning of applicable securities legislation. Forward-looking information contained in this release includes, but is not limited to, construction at the Olaroz Project and the timing thereof, the commencement of commercial production at the Olaroz Project and the timing thereof, the projected production of lithium carbonate at the Olaroz Project; the expected brine cost and grade at the Olaroz Project; the future performance of the relocated borax plant, including without limitation the plant's estimated production rate, financial data, the estimates of mineral resources or mineralisation grade at the Tincalayu mine, the economic viability of

such mineral resources or mineralisation, mine life and operating costs at the Tincalayu mine, the projected production rates associated with the borax plant, the market price of borax whether stated or implied, demand for borax and other information and trends relating to the borax market, tax, royalty and duty rates.

Such forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause actual results to be materially different from those expressed or implied by such forward-looking information, including but not limited to the risk of further changes in government regulations, policies or legislation; the possibility that required concessions may not be obtained, or may be obtained only on terms and conditions that are materially worse than anticipated; the risk that the conditions precedent to draw down the project financing with Mizuho Corporate Bank will not be met; that further funding may be required, but unavailable, for the ongoing development of the Company's projects; fluctuations or decreases in commodity prices; uncertainty in the estimation, economic viability, recoverability and processing of mineral resources; risks associated with weather patterns and impact on production rate; risks associated with construction and development of the Olaroz Project; unexpected capital or operating cost increases; uncertainty of meeting anticipated program milestones at the Olaroz Project; general risks associated with the feasibility and development of the Olaroz Project; general risks associated with the operation of the borax plant; a decrease in the price for borax resulting from, among other things, decreased demand for borax or an increased supply of borax or substitutes, as well as those factors disclosed in the Company's Annual Report for the year ended June 30, 2013 filed at www.sedar.com.

The Company believes that the assumptions and expectations reflected in such forward-looking information are reasonable. Assumptions have been made regarding, among other things: the timely receipt of required approvals and completion of agreements on reasonable terms and conditions; the ability of the Company to obtain financing as and when required and on reasonable terms and conditions; the market prices of lithium and boron products; and the ability of the Company to operate in a safe, efficient and effective manner. Readers are cautioned that the foregoing list is not exhaustive of all factors and assumptions which may have been used. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Accordingly, readers should not place undue reliance on forward-looking information. The Company does not undertake to update any forward-looking information, except in accordance with applicable securities laws.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

For personal use only

- 2 The “Nature of interest” (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
