Funds Under Management Capacity

- Current theoretical capacity of the Global Equity and Infrastructure strategies is US\$50 billion¹
 - Global Equities US\$40 billion
 - Infrastructure US\$10 billion
- Theoretical capacity is not static and should be approximately indexed to changes in world equity markets over time.

For example²: if world equity markets increased by 7% p.a. over the next 5 years, our theoretical capacity should increase to approximately US\$70 billion.

¹ The capacity numbers are purely theoretical and should in no way be taken as a forecast or indication as to the level of funds under management that Magellan may have in the future.

² This example is for illustrative purposes only and should not be construed as a forecast.

Investment Performance Observations

For personal use only

Observations of the Magellan Global Fund performance, net inflows, adviser support:

- Near top of peer group over 3 and 5 years
- Designed as a quality / low volatility product - lower volatility investments have substantially underperformed world equity markets
- Performing in line with objectives 9%p.a. net of fees
- Historical tracking error to MSCI World NTR Index is approx. 7.9%
- Likely to underperform standard equity indices in strong up markets and outperform in adverse market environments – adviser community and clients understand this
- Adviser support continues to build, the number of advisers using the Fund has increased from approximately 5,600 to 7,500 over the last year
- Substantial progress penetrating the bank/AMP aligned advice markets
