## ASX ANNOUNCEMENT

ASX: VXL & VXLO

Thursday, 25 September 2014

### CLEANSING NOTICE – SHARE PLACEMENT

Placement cleansing notice under section 708A(5)(e) of the Corporations Act

---

**Issuer: Valence Industries Limited (ASX Codes: VXL and VXLO)**

**Release date: 25 September 2014**

Valence Industries Limited (**Valence**) has issued 17,142,844 fully paid ordinary shares in the company at an issue price of \$0.70 per share under a placement made to investors exempt from receiving a disclosure document (**Placement**).

#### Details of the Placement

Class of Securities:	Ordinary shares
ASX Code of the securities:	VXL
Date of the issue	25 September 2014
Total number of shares issued:	17,142,844

Valence advises that:

1. The shares offered under the Placement were issued without disclosure to investors under Part 6D.2 *Corporations Act 2001* (Cth) (**Corporations Act**).
2. This notice is given under section 708A(5)(e) of the Corporations Act.
3. As at the date of this notice, Valence has complied with the provisions of Chapter 2M Corporations Act as they apply to Valence and has complied with section 674 Corporations Act.
4. As at the date of this notice, there is no excluded information of the type referred to in sections 708A(7) and 708A(8) of the Corporations Act that has not already been disclosed to investors generally.

*The information in this announcement that relates to the in situ Mineral Resources is based on, and fairly represents, the Mineral Resources and information and supporting documentation extracted from the report, which was prepared by a competent person in accordance with the JORC Code (2012 edition) and released to ASX by the Company on 18 November 2013. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement. All material assumptions and technical parameters underpinning the Mineral Resource estimates in that previous release continue to apply and have not materially changed.*

## VALENCE INDUSTRIES

### About Valence Industries & Graphite Manufacturing

Valence Industries (ASX:VXL & VXLO) is the owner and operator of the only graphite mining and manufacturing facilities in Australia located at Uley in South Australia near the major regional centre of Port Lincoln. In April 2014 and just four months after listing on the ASX, Valence Industries achieved the first sales of graphite by an Australian company in more than 20 years and recently signed MoUs for the supply of 80,000 tonnes of graphite over a period of 2+ years.

The Company is bringing its existing plant and substantial infrastructure into production in Phase I with a focus on global markets across multiple graphite product ranges. Graphite production will commence in the second half of 2014, with plans for expanded mining and graphite manufacturing in Phase II increasing through 2015.

Located only 23 kilometres from Port Lincoln, the regional centre for the Lower Eyre Peninsula in South Australia, Valence Industries' Uley Graphite project is recognised as a significant area of graphite mineralisation, and one of the largest coarse flake graphite deposits in the world. The deposit contains disseminated, high-grade flake graphite and the mineralisation is near surface, with the final manufactured graphite products recognised and purchased by many customers for its high quality.

The company holds two existing Mining Leases and two associated Retention Leases, along with an extensive Exploration Licence, for the conduct of its operations. The company anticipates regulatory works approval verification during the September Quarter of 2014.

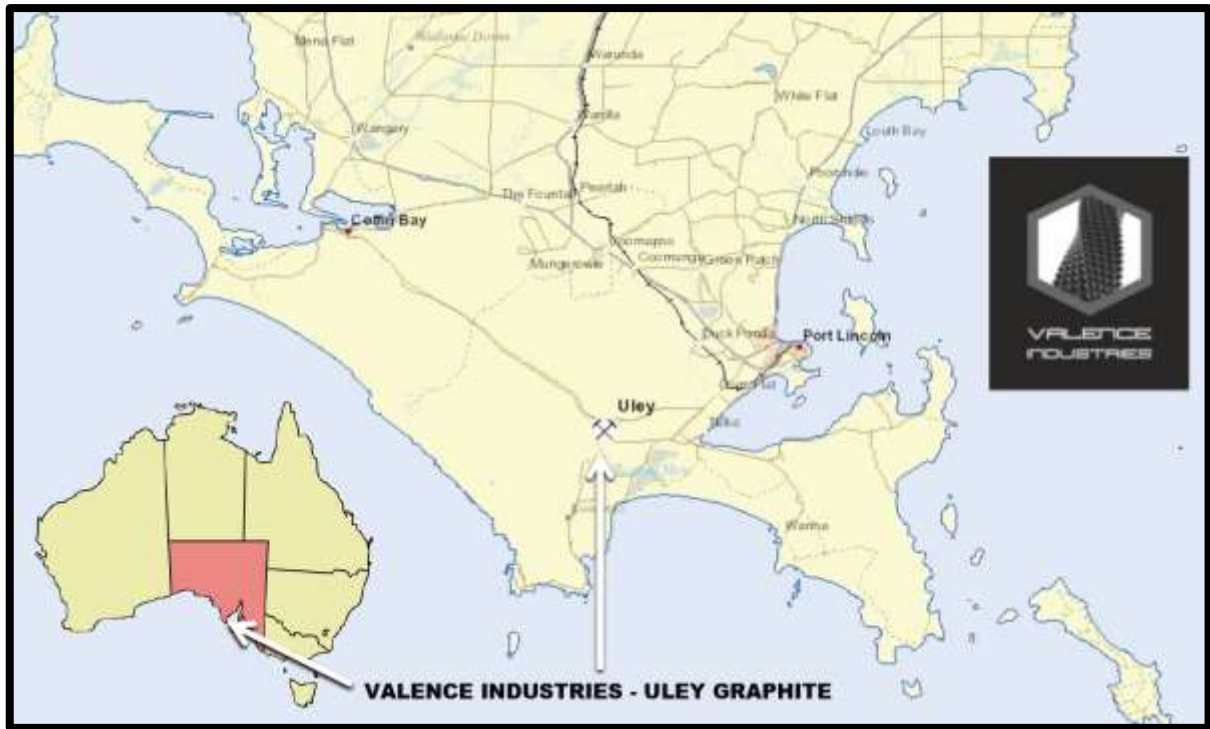

Valence Industries is in the fortunate position of owning the land on which its current and proposed expanded operations are conducted along with the extensive existing infrastructure.

### Manufacturing A New Carbon Future & Advanced Graphene Program

The Company operates as an industrial manufacturer of high-grade flake graphite products for distribution and sale to global markets. Valence Industries owns established processing facilities and infrastructure to manufacture a wide range of graphite product lines for multiple applications and multiple industries.

The Company produces and sells its graphite products from its Uley Graphite facilities in regional South Australia for delivery to diversified markets for graphite in the Asia Pacific, Europe and North America. As a vertically integrated manufacturer of specialist graphite product ranges Valence Industries' branded products are designed to meet current and future customer demand.

The Company is also pursuing research into advanced fields and applications for graphite. That program includes the relationship with the University of Adelaide for the establishment of a dedicated Graphene Research Centre in Adelaide. Graphene is one of the most significant steps forward in the world of advanced materials with the potential for transformative and disruptive technologies and the leading research in this area from the University of Adelaide on natural flake graphite has originated from work on the Company's Uley Graphite. The Graphene Research Centre program will see the development and commercialisation of processes and products for the application of graphene.
