IMPORTANT INFORMATION

This presentation contains general information in summary form which is current as at October 1st, 2014. This presentation is not a recommendation or advice in relation to Clean Seas Tuna Limited (CSS). It is not intended to be relied upon as advice to investors or potential investors, and does not contain all information relevant or necessary for an investment decision. It should be read in conjunction with CSS's other periodic and continuous disclosure announcements filed with the Australian Securities Exchange. These are also available at www.cleanseas.com.au.

No representation or warranty, express or implied, is made as to the accuracy, adequacy, completeness or reliability of any statements, estimates or opinions or other information contained in this presentation. To the maximum extent permitted by law, CSS, its subsidiaries and their respective directors, officers, employees and agents disclaim all liability and responsibility for any direct or indirect loss or damage which may be suffered by any recipient through use of or reliance on anything contained in or omitted from this presentation. An investment in CSS is subject to investment and other known and unknown risks, many of which are beyond the control of CSS. CSS does not guarantee any particular rate of return or the performance of CSS, nor does it guarantee the repayment of capital from CSS or any particular tax treatment. No recommendation is made as to how investors should make an investment decision. Investors must rely on their own examination of CSS, including the merits and risks involved. Investors should consult with their own professional advisors in connection with any acquisition of securities.

The information in this presentation is for general information only. Certain statements contained in this presentation may constitute 'forward-looking statements' or statements about 'future matters', including information as to future financial or operating performance of CSS. Such statements reflect CSS's intent, belief or expectations at the date of this presentation. CSS gives no undertaking to update this information over time (subject to legal or regulatory requirements). Any forward-looking statements, including projections, guidance on future revenues, earnings and estimates, are provided as a general guide only and should not be relied upon as an indication or guarantee of future performance. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause CSS's actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by these forward-looking statements. Any forward-looking statements, opinions and estimates in this presentation are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Neither CSS, nor any other person, gives any representation, assurance or guarantee that the occurrence of the events express or implied in any forward-looking statements in this presentation will actually occur. In addition, please note that past performance is no guarantee or indication of future performance.

Directors and Management

Paul Steere – Chairman (Joined 2010, appointed Chairman May 2012)

15 years as MD of New Zealand King Salmon from 1994 to December 2009. New Zealand King Salmon is the leading aquaculture company in NZ and the largest Chinook salmon farmer globally, with an international reputation for quality, service, process/product innovation and professionalism.

Craig Foster – Chief Executive Officer (January 2012)

Appointed in January 2012. Experienced CEO, aquaculturist, veterinarian and fish nutritionist since 1986. Former MD of Skretting in Australia, a major aquaculture feed producer. Previous experience in the Salmon and Barramundi industries.

Hagen Stehr AO – Non Executive Director (2000)

Founding Director with extensive knowledge of and experience in the fishing and aquaculture industries, having been involved in the tuna industry in Australia since 1960. A Director of Australian Tuna Fisheries Pty Ltd and leadership roles in a number of industry Associations.

Nick Burrows – Non Executive Director (April 2012)

Former CFO and Company Secretary of Tassal Group Limited, retired in 2009 after 21 years with Tassal. Thirty years senior experience with listed entities and private companies in corporate compliance, financial and treasury operations and senior strategic input.

Marcus Stehr – Non Executive Director (2000)

Marcus has accumulated 24 years of hands on experience in marine finfish aquaculture operations encompassing Tuna, Kingfish and Mulloway. A Director of Australian Tuna Fisheries Pty Ltd and leadership roles in a number of industry Associations.

Clean Seas turned the corner

For personal use only

The turning point in achieving operational profit comes after-

- two years of solid restructuring;
- support from our shareholders in our over-subscribed capital raising of November 2013;
- significant improvements in biological performance and fish husbandry
- implementing clear strategies focussed on sustainable grow-out to optimal harvest weights and input level that is profitable relative to market pricing as biomass rebuilds.

Strategies giving rise to improved performance

For personal use only

- A priority focus on fish health and performance following identified diet improvement
- Consequent improved growth rates and survival levels
- Improved Kingfish hatchery productivity
- Continuing sales placement at value levels for Sashimi and white table food service reflecting a premium against commodity fish
- Maintenance of cost control disciplines in all sectors of the company's operations
- Close attention paid to health, safety and efficiency measures
- Rationalization of farm sites reducing the span of control needed
- Concentration of effort on Hiramasa Yellowtail Kingfish while the substantive program of Southern Bluefin Tuna research has been scaled back
- Careful marshalling of cash resources following the shareholder support of last November plus cash generated from R&D tax incentives

Hatchery - Continuing to Improve Performance

- We continue to improve the fundamental performance of the yellowtail Kingfish hatchery.
- Yield of fingerling from egg now approaches twenty percent from ten percent.
- Fingerling unit costs will reduce as production increases.
- Existing Hatchery capacity sufficient for annual sales of 6,000 tonnes

For personal use only

Farming Operations – Further Improvement

- Biomass growth up thirty eight percent on forecast
- Farming operations currently consolidated to Port Lincoln, with September 2014 fingerlings transferred to pens in Arno Bay
- Existing water leases sufficient for annual sales of 6,000 tonnes, including leases at Port Lincoln, Louth Bay, Arno Bay, Whyalla and Wallaroo (subject to approvals)
- Fish yearclass survival has improved from circa fifty percent to 85-90 percent.

Sales

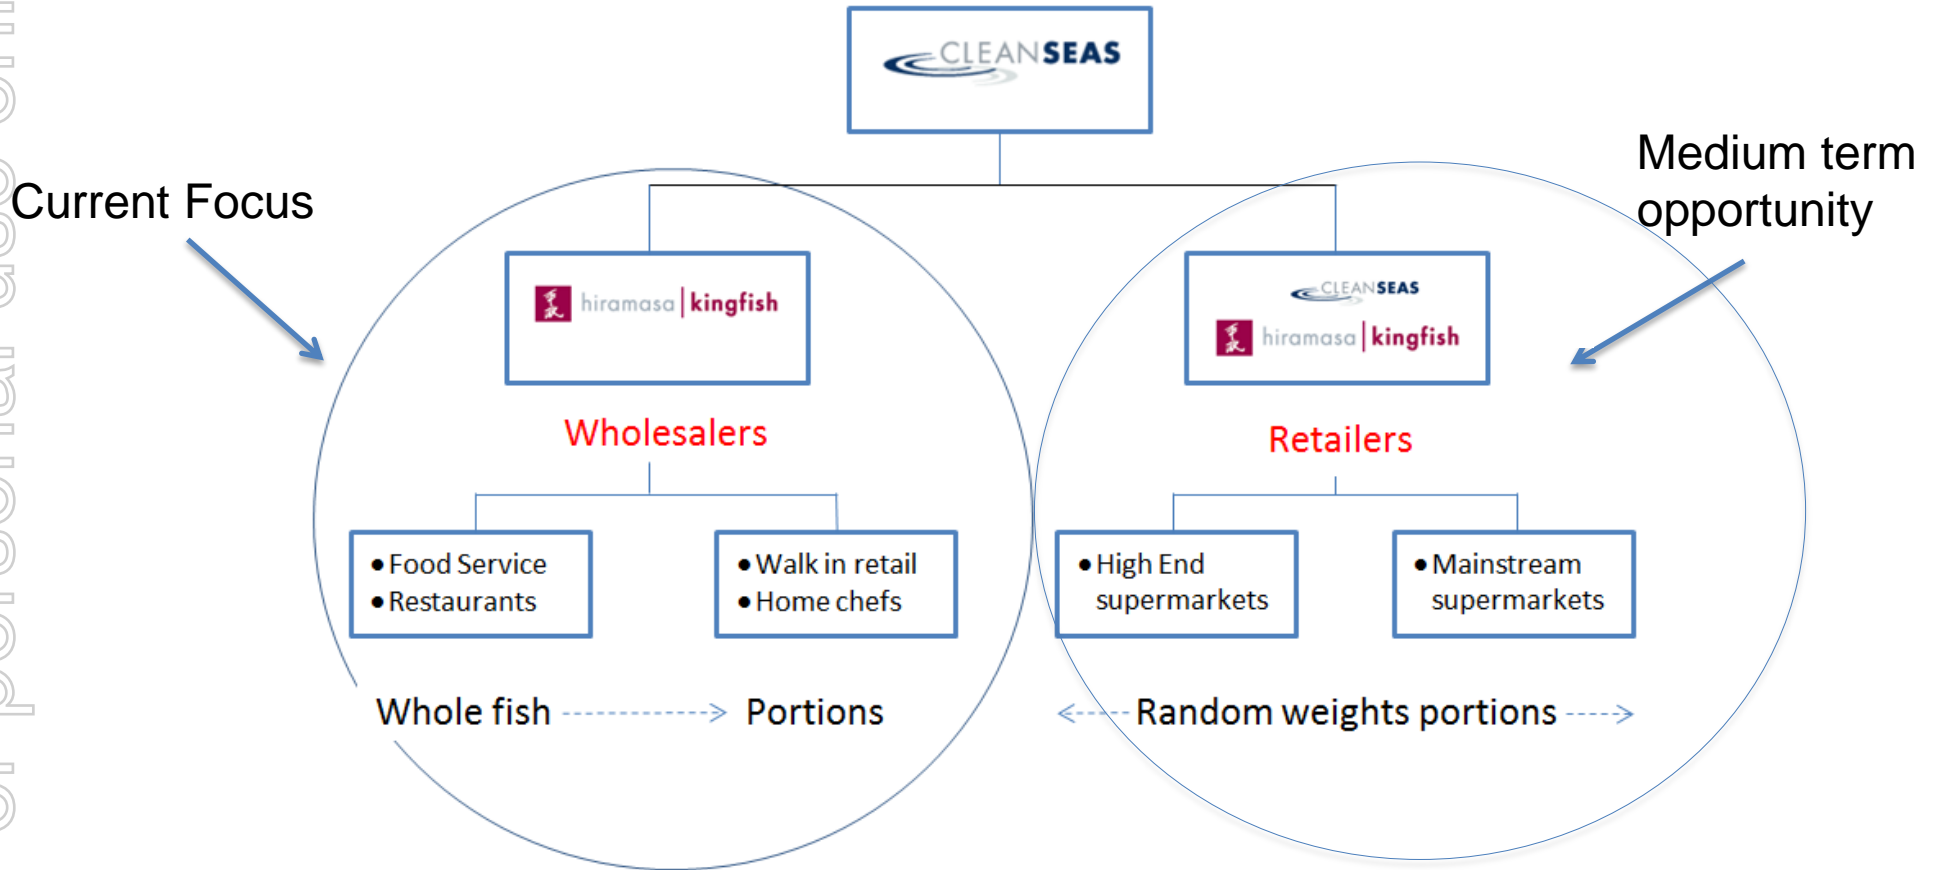

- 2013/14 sales of 571 tonnes
- Approximately 80% sold domestically and 20% export
- A net farmgate of \$14 per kg whole, from domestic and export market
- Europe is the main export market
- Current target fish size at sale is 4.0 to 4.5kg, achieving 4.0 kg average for 10 months of the year
- Last year harvest size ranged between 2.8 and 3.5 kgs
- Also establishing a market for 1.0kg fish

Yellowtail Kingfish - Global Marketing Success

- Clean Seas has successfully positioned its Yellowtail Kingfish at the high end of the sashimi market based on:
 - Our Brand HIRAMASA KINGFISH the King of Kingfish
 - The quality of Hiramasa Kingfish with superior taste, texture and shelf life compared to other species of Yellowtail Kingfish
 - Successful marketing strategies
- Diversified market, strong market demand in Australia and Europe.

Clean Seas' quality is recognised by multiple industry awards:

delicious Magazine Produce Awards

- National Medallist – From the Sea (Kingfish) 2014
- Finalist-From the Sea (Kingfish) 2013
- National Medallist – From the Sea (Kingfish) 2012
- Finalist – From the Sea (Kingfish) 2011

Outlook

Sales

- Forecasting 1350 tonnes in 2014/15 up from 571 tonnes in 2013/14
- In 2015/16 we anticipate sales around 2,000 tonnes
- Current planning is to achieve 3,000 tonnes per annum sales by 2018/19
- Current capacity exists in the hatchery and farm to achieve 6,000 tonnes per annum
- Sales must be demand driven and we are implementing necessary marketing strategies to underpin the demand and maintain our price position.

Funding

- To assist in our future working capital requirements will seek limited debt financing to support the profitable development of the business beyond 1,500 tonnes.
- Anticipated R&D tax incentive cash refund for FY2013/14 is approximately \$4m – to be recognised in 2014/15 accounts.

Seasonal Profitability

- Most of our growth in fish occurs in the second half of the financial year, thus profitability is largely driven by the performance of our fish in the period from November to May.

Likely Further Scale Back of Tuna Propagation

For personal use only

- Focus is on continuing to profitably expand Yellowtail Kingfish production
- In the interim, Tuna propagation program has been scaled back
- If we are unsuccessful in finding a JV partner for funding tuna propagation, we plan to transfer the tuna broodstock from the shore based broodstock tank and return them to our sea based broodstock pen
- Will continue limited R&D activity in Tuna

R&D – Future Improvement

- Hatchery
 - Continued improvements in underlying culture efficiency
- Feed & feeding
 - Forty percent of our cost is feed. Continue to improve the feed quality and begin research on better feed management.
- Fluke control
 - Skin, gill and blood flukes are our main health problems. We are seeking alternative mechanisms to control other than expensive hydrogen peroxide bathing.
- Selective breeding program
 - Our selective breeding program continues to offer improved growth rates. Each generation should improve growth by ten percent

Refreshed Marketing

For personal use only

- In November 2014 we will relaunch our Hiramasa Kingfish brand.
- Hiramasa Kingfish is our brand for the 4.0-4.5 kilogram fish that we supply to the wholesale market.
- It has been grown to provide the sashimi quality that is expected of this fish. Also an ideal size for white table fish
- Hiramasa Kingfish website to be launched at hiramasa.com.au
- Social media strategy to be implemented via Facebook, Twitter and Instagram
- Refreshed point of sale and other advertising materials.

Clean Seas - Competitive Advantages

- Successfully pioneered the propagation, husbandry, harvesting and marketing of the Yellowtail Kingfish species outside of Japan since 2000
- Excellent job of positioning its Hiramasa brand at the high end of the Sashimi market
- The Hiramasa Kingfish brand is recognised internationally as a premium sashimi and white table fish
- Australia's only commercial producer of Yellowtail Kingfish
- Ability to produce Yellowtail Kingfish fingerlings at any time of the year
- There is no other reliable producer of fingerlings in the world
- Established pool of genetically selected broodstock
- Existing extensive hatchery resources and infrastructure to support growth
- Existing water lease area to produce greater than 6000 tonnes
- IP facilitates expansion into other suitable growing waters
- Active R&D program for ongoing business improvement

Questions ?

Shareholder Visit – November 2014

For personal use only

- A 1 day Shareholder tour of Clean Seas operations at Port Lincoln and Arno Bay in South Australia
- Two Tours Scheduled for late November 2014 given anticipated demand
- Maximum 43 people per tour
- Shareholders will need to make their own accommodation and travel arrangements to and from Port Lincoln
- Tour will commence at 9.00am and will commence with a visit to our sea farming pens in Port Lincoln on a large boat followed by a bus trip to and tour of the Arno Bay Hatchery. A Hiramasa Kingfish lunch will be provided at Arno Bay. Shareholders will then be returned by bus to Port Lincoln
- Selected senior managers will accompany the tour to explain operations and answer questions
- Management will select from Shareholders who confirm their interest in participating
- Individual shareholders will be able to bring their partner on the tour only if numbers permit, at management's discretion.
