ASX RELEASE

EXPLORATION UPDATE AT GIRO PROJECT, DRC

Burey Gold Limited (ASX: BYR) advises that additional steel casing has arrived on site at the Giro Gold Project in the Kibali belt, North East Democratic Republic of Congo to address the problems encountered at the start of the drill program with the extremely wet ground conditions.

The first hole has now been successfully drilled with dry sample recovered down to 120m. In view of the delays caused by the weather, the Company will continue to drill throughout the Christmas period to ensure that the planned 3,000m reverse circulation drilling programme is completed early in 2015 with all results expected during the first Quarter of 2015.

Soil sampling and detailed geological mapping and sampling programmes have been completed at the Giro Prospect, designed to confirm the potential strike extent and continuation of gold mineralisation identified in initial earlier drilling at Giro.
