

INVESTMENT PERFORMANCE OF FUNDS

16 March 2015

The Board of Blue Sky Alternative Investments Limited (ASX: BLA) (Blue Sky) provides the following update on the investment performance of funds and investments managed by the company on behalf of investors.

Blue Sky is exposed to the investment performance of these funds through the generation of performance fees and equity owned by the company in those funds. In addition, this investment performance represents the collective investment track record of Blue Sky's investment managers which plays an important role in the company's ability to increase Assets Under Management (AUM).

Since inception in July 2006, the company has generated an internal rate of return (IRR) across its funds of **15.3% p.a. net of fees** on an equity-weighted basis to 31 December 2014.

The Board of Directors acknowledges the investment performance of the company's funds is an important driver of value and will continue to provide this update every six months following the completion of half yearly reviews of the investment portfolio.
