Aconex Signs Enterprise Agreement with Bechtel

Leading Global EPC Standardizes on Aconex for All New Projects Worldwide

MELBOURNE, Australia, 24 June 2015 – Aconex Limited (ASX: ACX), provider of a leading cloud collaboration platform for the global construction industry, today announced that it has signed an enterprise agreement with Bechtel, one of the world's largest engineering, project management and construction (EPC) firms. The three-year agreement will standardize the use of Aconex across all Bechtel business units globally in a phased implementation.

Under the agreement, new projects will be implemented on the Aconex platform as part of a multi-year plan to replace Bechtel's internal document and record management system with project-wide collaboration. The terms of the agreement are user-based, providing flexibility for Bechtel to add an unlimited number of platform users to its projects over time.

Aconex plans to invest in the Bechtel corporate relationship with the addition of product functionality that it believes will benefit all Aconex customers and users worldwide. This investment is expected to moderately increase Aconex operating costs for research and development in the next 12 months. Over the medium term of 1-3 years, Aconex will also invest in sales and marketing with the addition of account resources in its international regions to drive long-term growth within and beyond the Bechtel project network.

"This enterprise agreement reflects our growing relationship with Bechtel across a range of global projects," said Aconex CEO Leigh Jasper. "The world's leading EPCs and contractors are increasingly trusting the Aconex platform to manage their largest and most complex developments. The network effects of Bechtel's project partnerships and industry influence are helping us drive new business in multiple regions. The conversion of individual project engagements to enterprise agreements with Bechtel and other EPCs solidifies our relationships while expanding our market penetration and global user network. We look forward to serving increasing numbers of Bechtel projects worldwide under the new agreement."

Bechtel projects managed on the Aconex platform include:

- Riyadh Metro, a rapid transit system in Saudi Arabia with a total project value of approximately US\$23 billion.

- Santa Clara Valley Transportation Authority Berryessa Phase I and II, a US\$7-billion extension of the Bay Area Rapid Transit (BART) system to the San Jose metropolitan area.
- Antapaccay Copper Mine in southern Peru, a US\$1.5-billion expansion of a brownfield copper mine owned and operated by Glencore (formerly Xstrata).
- Muscat International Airport, a US\$1.1-billion air transportation infrastructure project in Oman.

Under the enterprise agreement, Bechtel will use Aconex to automate key work processes; content, document and record management; and overall information management across its project teams. Aconex supports the entire project lifecycle, from feasibility and design through construction, inspections, handover, and asset operation. For building information modeling (BIM) projects, Aconex enables full collaboration between design and construction teams.

About Aconex

Aconex Limited provides a leading cloud collaboration platform for the global construction industry. This platform gives owners and contractors in the construction, infrastructure, and energy and resources sectors project-wide visibility and control between the many different organizations collaborating across their projects. With more than 50,000 user organizations and approximately A\$1 trillion of project value delivered in more than 70 countries, Aconex is the industry's most widely adopted and trusted platform. Founded in 2000, Aconex has 41 offices in 22 countries around the world, including headquarters in Melbourne, Australia and San Francisco, California. The company's ordinary shares are traded on the Australian Securities Exchange (ASX) under the ticker code ACX.
