## iWebGate's Software Platform earns Highest CyberRx NIST Compliance Rating

### Highlights

- Successful completion of the NIST Compliance (FIPS 140-2) Review
- Highest Compliance Rating
- Independent affirmation of iWebGate Platform value proposition, especially for sensitive verticals

iWebGate LTD's software solution, *LaunchPad*, has earned the highest NIST Compliance Rating awarded by [CyberRx](#) yesterday. The NIST compliance evaluation determines the cybersecurity readiness of a process or product for formal NIST certification, per FIPS 140-2. CyberRx's rating assesses the identification, protection, detection, response and recovery capacity to cybersecurity events. An independent third party, Watkins Consulting, conducted iWebGate's cybersecurity "fitness" review in mid-June 2015.

CyberRx is a risk intelligence (RI) service developed by award-winning IT and cybersecurity firm, e-Management. CyberRx combines data, techniques and knowledge to enable businesses to assess and proactively respond to cybersecurity risks. CyberRx automates the new *NIST Cybersecurity Framework* in a unique way that allows companies to measure their cybersecurity capabilities, quantify their potential financial liability, and reduce their cybersecurity risk exposure. iWebGate's software solution achieved an impressive rating for its "fitness" test, and was able to further improve its security posture by incorporating recommendations suggested by Watkins Consulting.

"We were very impressed with iWebGate's test results, as we had not seen metrics like this before" stated Watkins Director James Plant. "Equally impressive, was iWebGate's willingness and ability to seamlessly and quickly integrate processes suggested by us", he said.

iWebGate CEO Tim Gooch lauded the opportunity provided by the software and consulting team to evaluate and work with iWebGate on its business processes and product. "With the amount of R&D invested in our platform over the past decade, we had taken extensive measures to ensure our product and business processes were fully prepared", Gooch said. "CyberRx was an incredibly valuable tool to further enforce our initiatives. Through our teaming with Watkins, we were able to strengthen our position to rapidly respond to possible future events."

"Understanding where your company has cybersecurity exposure is the #1 action, every business should take," asserts Ola Sage, Founder and CEO of e-Management. "Otherwise, it is likely money spent on tools or technologies may not be targeting the highest risk areas."

CyberRx assessments, delivered through evaluations by industry experts such as Watkins Consulting, allows for vertical-specific applications and strategy development. “It is also incredibly valuable for identifying companies such as iWebGate, who contribute so significantly to the cyber strategy of any business, especially sensitive market verticals such as financial services” added Plant.

#### ABOUT THE COMPANIES

**e-Management** is an award-winning cybersecurity and IT services firm named as the *2015 IT Company of the Year* for Montgomery County, MD. The company’s expertise and experience is backed by a successful 15-year record of keeping their clients prepared and secure. A CMMI® Maturity Level 3 rated company, e-Management’s software innovations include CyberRx for cybersecurity readiness and eGov Risk Portfolio Manager for enterprise risk management. For more information about e-Management, visit them at [www.e-mcinc.com](http://www.e-mcinc.com).

**Watkins Consulting, Inc.** is a management consulting firm specializing in all aspects of the Financial Services industry, representing the synthesis of multidisciplinary professionals in finance, accounting, bank regulation, economics, and information technology in order to provide a complete Risk Management and Evaluation solution. Their focus is on providing “results driven” industry expert analytical and management consulting services to financial institutions.
