Other Matters

APRA has informed the four major Australian banks, including the Ultimate Parent Bank, that it is reviewing the level of non-equity and contingent funding that can be provided to their respective New Zealand banking subsidiaries and branches. Whilst details of this review are subject to further discussions with APRA, we believe that the Ultimate Parent Bank will continue to be able to provide financial support to ANZ New Zealand. 3. Segment Analysis

ANZ New Zealand is organised into four major business segments for segment reporting purposes - Retail, Commercial, Wealth and Institutional. Centralised back office and corporate functions support these segments. These segments are consistent with internal reporting provided to the chief operating decision maker, being the Bank's Chief Executive Officer.

Segmental reporting has been updated to reflect minor changes to ANZ New Zealand's structure. Comparative data has been adjusted to be consistent with the current period's segment definitions.

Retail

Retail provides products and services to personal customers via the branch network, mortgage specialists, the contact centre and a variety of self-service channels (internet banking, phone banking, ATMs, website and mobile phone banking). Core products include current and savings accounts, unsecured lending (credit cards, personal loans and overdrafts) and home loans secured by mortgages over property. Retail distributes insurance and investment products on behalf of the Wealth segment.

Commercial

Commercial provides services to Business Banking, Commercial & Agri, and UDC customers. Business Banking

services are offered to small enterprises (typically with annual revenues of less than NZ\$5 million). Commercial & Agri customers consist of primarily privately owned medium to large enterprises. ANZ New Zealand's relationship with these businesses ranges from simple banking requirements with revenue from deposit and transactional facilities, and cash flow lending, to more complex funding arrangements with revenue sourced from a wider range of products. UDC is principally involved in the financing and leasing of plant, vehicles and equipment, mainly for small and medium sized businesses, as well as investment products.

Wealth

Wealth comprises the Private Wealth, Funds Management and Insurance businesses, which provide private banking, investment, superannuation and insurance products and services.

Institutional

Institutional provides financial services through a number of specialised units to large multi-banked corporations, often global, which require sophisticated product and risk management solutions. Those financial services include loan structuring, foreign exchange, wholesale money market services and transaction banking.

Other

Other includes treasury and back office support functions, none of which constitutes a separately reportable segment.

Residential mortgages by loan-to-valuation ratio

As required by the RBNZ, LVRs are calculated as the current exposure secured by a residential mortgage divided by ANZ New Zealand's valuation of the security property at origination of the exposure. Off balance sheet exposures include undrawn and partially drawn residential mortgage loans as well as commitments to lend. Commitments to lend are formal offers for housing lending which have been accepted by the customer.

11. Liquidity Portfolio

ANZ New Zealand holds a diversified portfolio of cash and high quality liquid securities to support liquidity risk management. The size of ANZ New Zealand's liquidity portfolio is based on the amount required to meet its liquidity policy and includes both items classified as cash and those classified as operating assets in the Condensed Cash Flow Statement.

The Bank also held unencumbered internal residential mortgage backed securities which would entitle the Banking Group to enter into repurchase transactions with a value of NZ\$5,906 million at 30 June 2015.

12. Fair Value Measurements

Financial assets and financial liabilities not measured at fair value

Below is a comparison of the carrying amounts as reported on the balance sheet and fair value of financial asset and liability categories other than those categories where the carrying amount is at fair value or considered a reasonable approximation of fair value.

The fair values below have been calculated using discounted cash flow techniques where contractual future cash flows of the instrument are discounted using discount rates incorporating wholesale market rates or market borrowing rates of debt with similar maturities or a yield curve appropriate for the remaining term to maturity.

¹ Fair value hedging is applied to certain financial instruments within these categories. The resulting fair value adjustments mean that the carrying value differs from the amortised cost.

² Includes commercial paper (note 8) designated at fair value through profit or loss.

Financial assets and financial liabilities measured at fair value in the balance sheet

ANZ New Zealand uses a valuation method within the following hierarchy to determine the carrying amount of assets and liabilities held at fair value, all of which are recurring fair value measurements. There are no assets or liabilities measured at fair value on a non-recurring basis.

- Level 1 – Financial instruments that have been valued by reference to unadjusted quoted prices in active markets for identical financial instruments. This category includes financial instruments valued using quoted yields where available for specific debt securities.
- Level 2 – Financial instruments that have been valued through valuation techniques incorporating inputs other than quoted prices within Level 1 that are observable for a similar financial asset or liability, either directly or indirectly.
- Level 3 – Financial instruments that have been valued using valuation techniques which incorporate significant inputs that are not based on observable market data (unobservable inputs).

Notes to the Financial Statements

There have been no substantial changes in the valuation techniques applied to different classes of financial instruments during the period.

Transfers into and out of Level 1 and Level 2 are deemed to have occurred as of the beginning of the reporting period in which the transfer occurred.

13. Concentrations of Credit Risk to Individual Counterparties

ANZ New Zealand measures its concentration of credit risk in respect to bank counterparties on the basis of approved exposures, and in respect to non-bank counterparties on the basis of limits.

For the nine months ended 30 June 2015 there were no individual counterparties, excluding connected parties, governments and banks with long term credit ratings of A- or above, where ANZ New Zealand's period end or peak end-of-day credit exposure equalled or exceeded 10% of the Overseas Banking Group's equity as at the end of the period.

This credit exposure information does not include exposures to counterparties if they are booked outside New Zealand.

14. Insurance Business

ANZ New Zealand conducts insurance business through its subsidiary OnePath Life (NZ) Limited. OnePath Insurance Services (NZ) Limited, which was a subsidiary of OnePath Life (NZ) Limited, also conducted insurance business until it amalgamated with OnePath Life (NZ) Limited on 30 November 2014.

ANZ New Zealand's aggregate amount of insurance business comprises the total consolidated assets of OnePath Life (NZ) Limited of NZ\$862 million (30/06/2014: NZ\$827 million; 30/09/2014 NZ\$850 million), which is 0.6% (30/06/2014: 0.6%; 30/09/2014 0.6%) of the total consolidated assets of ANZ New Zealand.

ANZ New Zealand guarantees the performance of customers by issuing standby letters of credit and guarantees to third parties, including its Ultimate Parent Bank. To reflect the risk associated with these transactions, they are subjected to the same credit origination, portfolio management and collateral requirements as for customers that apply for loans. The contract amount represents the maximum potential amount that could be lost if the counterparty fails to meet its financial obligations. As the facilities may expire without being drawn upon, the notional amounts do not necessarily reflect future cash requirements.

Other contingent liabilities

On 11 March 2013, litigation funder Litigation Lending Services (NZ) Limited announced plans for a representative action against banks in New Zealand for certain fees charged to New Zealand customers over the past six years. Proceedings were filed against the Bank on 25 June 2013. The potential outcome of this litigation cannot be determined with any certainty at this stage.

ANZ New Zealand has other contingent liabilities in respect of actual and possible claims and court proceedings.

An assessment of ANZ New Zealand's likely loss in respect of these matters has been made on a case-by-case basis and provision made where deemed necessary.

On 3 December 2014, the Commerce Commission and the Financial Markets Authority (FMA) announced settlements with the Bank relating to the Commission's and the FMA's investigations into the promotion, sale and offer of interest rate swaps to rural customers from 2005 to 2009; the settlement includes a payment fund of NZ\$18.5 million and a contribution to the Commission's and the FMA's costs.
