ASX Release

1 March 2016

Xped develops Industrial IoT system for wired nodes

Highlights

- Xped extends ADRC technology across wired networks with **plug and play technology** which enhances the capabilities of existing **ADRC Technology**

- Allows the deployment of hybrid wireless and wired solutions for optimal communications reliability in challenging environments such as **Data Centres**.

Raya Group Ltd (**ASX: RYG)** ("**Raya**" or "the **Company**") wishes to announce that Xped Holdings Limited ("**Xped**") extends its Auto Discovery Remote Control ("**ADRC**") technology across wired networks to cater for Industrial Internet of Things ("**IoT**") devices.

Xped's Research and Development ("**R&D**") lab has recently developed a new system that allows wired nodes (sensors, displays, NFC tap points, etc) to be wired into a hub that can connect to your mobile device or remote server. The system allows plug and play of industrial or commercial nodes that the hub can identify and simply connect and control.

Plugging in a sensor or node will automatically bring up a user interface on the mobile device and is an extension of the wireless ADRC technology. This system provides a simple solution to a very low power wired network and has a variety of uses including industrial, medical or other applications where wireless can be problematic.

Xped is currently working to field trial this system in a Singapore Data Centre in the coming months and upon successful trial, the Company and its integration partner plan to roll out the solution into further Data Centre's across Asia.

By order of the Board

About Xped

Xped has developed revolutionary and patent protected technology that allows any consumer, regardless of their technical capability, to connect, monitor and control devices and appliances found in our everyday environment. It's as simple as two people shaking hands. By enabling the Internet of Things, Xped's ADRC platform will bring benefit to manufacturers, retailers, service providers and consumers.

Under a conditionally accepted Heads of Agreement signed on 25th October, 2015, Raya Group Ltd are in the final stages of acquiring Xped Holdings Ltd, including its subsidiaries and assets.

At Xped, we're *Making Technology Human Again*.
