Options: 12.5m

Directors and Management:

John Davis
Managing Director

Justin Brown
Non-Executive Director

Peter Cole
Non-Executive Director

Dennis Wilkins
Company Secretary

Exterra Resources Ltd (“Exterra”) is pleased to advise the **grant of Exploration Licence E45/4462** at the Moolyella Lithium Project in the Pilbara region of WA. The grant of the Exploration Licence enables Exterra to move forward to commence systematic on-ground exploration activities.

Exterra announced on the 16 February 2016¹ the acquiring of an option to purchase 90% interest in Moolyella project (E45/4462).

Exterra has commenced a review of the project which confirmed reconnaissance rock chip sampling during 2011/12 over an area of 2 km² recorded the presence of **highly anomalous Li** in a significant number of samples analysed.

Exterra also completed a field visit during March 2016 which confirmed the location of previous Reverse Circulation drill holes and the presence of drill cuttings containing pegmatite lithologies, which have not previously been assayed for Lithium. Drill cuttings will be reviewed and re-sampled where pegmatites are recorded and pegmatite locations mapped in preparation for drilling.

Results reported in a previous announcement on 23 March 2016² included 39 samples distributed over a broad geographical area which reported above 0.1% Li₂O, including. (Figure 2).

- **Sample ID 3004587** **1.82% Li₂O**
- **Sample ID 3004651** **0.59% Li₂O**
- **Sample ID 3004663** **0.52% Li₂O**
- **Sample ID 3004688** **0.63% Li₂O**
- **Sample ID 46** **1.06% Li₂O**

These results confirm the potential of the **Moolyella Lithium project** to host significant lithium bearing pegmatites.

Exterra's Managing Director John Davis commented, "Now that Exploration Licence 45/4462 has been granted, we can focus on commencing systematic exploration activities on the ground, which is supported by the broad distribution of anomalous lithium mineralisation from previous first pass exploration, and determine the potential for significant lithium mineralisation in the Moolyella Li/Ta/Sn mineral field".

MOOLYELLA LITHIUM PROJECT

Figure 1: Moolyella Lithium Project Tenement Location Plan

As previously reported the Moolyella Project is located just 23 km ENE of Marble Bar and consists of EL 45/4462 covering 86 sq km, holding a substantial position in a highly mineralised Li, Sn, Ta district in the Pilbara region of WA. (Figure 1).

Swarms of lithium bearing (spodumene) pegmatites associated with the highly fractionated Moolyella pluton have intruded the adjacent migmatised and foliated Callina Supersuite granites and provide the source for potential Li mineralisation over an extensive area.

The majority of exploration to date has focussed on the Sn/Ta potential, however that recent broad based surface rock chip sampling has shown anomalous Li results. (Figure 2).

* In accordance with Listing Rule 5.23.2, the Company confirms in the subsequent public report that it is not aware of any new information or data that materially affects the information included in the relevant market announcement and, in the case of estimates of mineral resources or ore reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed.

About Exterra Resources Limited

Exterra Resources Limited (ASX:EXC) is a gold exploration and development company based in Perth, Western Australia, with a focus on high grade, high margin gold projects with near term production potential to fund the future growth of the company.

The Company's projects are all located in the Archaean Yilgarn Craton in WA, a world class gold province which has been a prolific producer of gold since the late 1880's and includes the Kalgoorlie "Golden Mile" deposit which has produced over 50 million ounces of gold since discovery in 1893.

Exterra's focus is on the Linden gold project in the North Eastern Goldfields region, within the Laverton Tectonic Zone, which hosts multi million ounce deposits including Sunrise Dam (Anglo Gold) and Granny Smith/Wallaby (Barrick Gold).

The Second Fortune gold mine, at Linden, 220km by road, NNE of Kalgoorlie, is currently the subject of a development study, with all Regulatory approvals received to commence project development of an underground mining operation.

Competent Persons Statement

The information in this report that relates to database compilation, sampling processes, geological interpretation and mineralisation, project parameters and costs and overall supervision and direction of Mineral Resource is based on and fairly represents, information and supporting documentation compiled under the overall supervision and direction of John Davis (Member of the Australasian Institute of Mining and Metallurgy and the AIG). Mr Davis has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activities undertaken to qualify as Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Davis consents to the inclusion in the release of the statements based on their information in the form and context in which they appear.

Information in this report that relates to estimation, depletion and reporting of Mineral Resources is based on and fairly represents, information and supporting documentation compiled by Mike Job who is a Member of the Australasian Institute of Mining and Metallurgy and a full time employee of QG Consulting Pty Ltd. Mike Job has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mike Job consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The information in this report that relates to Ore Reserves has been compiled by Stephen O'Grady, Principal of Intermine Engineering Consultants, who is a Member of the Australasian Institute of Mining and Metallurgy. Mr O'Grady has had sufficient experience in Ore Reserve estimation relevant to the style of mineralisation and type of deposit under consideration to qualify as Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Mineral Resources and Ore Reserves'. Mr O'Grady consents to the inclusion in this announcement in the form and context in which it appears.

Please note with regard to exploration targets, the potential quantity and grade is conceptual in nature, that there has been insufficient exploration to define a Mineral Resource and that it is uncertain if further exploration will result in the determination of a Mineral Resource.

Forward Looking Statements

Certain statements made during or in connection with this communication, including, without limitation, those concerning the economic outlook for the mining industry, expectations regarding gold prices, exploration costs and other operating results, growth prospects and the outlook of Exterra Resources' operations contain or comprise certain forward looking statements regarding Exterra Resources' exploration operations, economic performance and financial condition. Although Exterra Resources believes that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct.

Accordingly, results could differ materially from those set out in the forward looking statements as a result of, among other factors, changes in economic and market conditions, success of business and operating initiatives, changes that could result from future acquisitions of new exploration properties, the risks and hazards inherent in the mining business (including industrial accidents, environmental hazards or geologically related conditions), changes in the regulatory environment and other government actions, risks inherent in the ownership, exploration and operation of or investment in mining properties in foreign countries, fluctuations in gold prices and exchange rates and business and operations risks management, as well as generally those additional factors set forth in our periodic filings with ASX. Exterra Resources undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated event.
