*Definition of Cash / Non Cash

The Group's Cash EBITDA/NPAT is stated after eliminating the following from total Group EBITDA/NPAT:

- Fair value gain of biological assets;
- Revenue from recognition of deferred lease and management fees;
- Accounting treatment relating to the business combination transactions; and
- Unrealised foreign exchange gain / (loss).

TFS CORPORATION LTD (ABN: 97 092 200 854)

DIRECTORS' REPORT

Your Directors present the un-audited financial report of the Group for the nine months ended 31 March 2016.

DIRECTORS

The names of the Directors in office any time during or since the period end are:

Mr Dalton Gooding (Chairman) Mr Frank Wilson (Managing Director) Mr Julius Matthys (Deputy Chairman) Mr John Groppoli Ms Gillian Franklin

Mr Michael Kay

Directors have been in office since the start of the financial year to the date of this report unless otherwise stated.

DIVIDENDS PAID

A final ordinary dividend of 3 cents per share (100% franked) was paid on 9 November 2015 (declared on 31 August 2015) in respect of the financial year ended 30 June 2015 (total value: \$10.242m). No other ordinary dividend was declared and/or paid during the period.

PRINCIPAL ACTIVITIES

The principal activities of the Group during the nine month period were:

- promotion of Sandalwood plantation investment to institutional investors;
- promotion of Sandalwood investment to high net worth investors ("HNW") and via managed investment schemes ("MIS");
- manufacture and distribution of Indian and Australian Sandalwood oil and related products;
- manufacture of pharmaceutical grade Indian Sandalwood oil for end customers, including Nestlé-owned Galderma;
- research and development of botanical pharmaceuticals and bio-pharmaceutical products for commercialising;
- management and maintenance of Indian Sandalwood plantations;
- ownership, sale and leasing of land;
- ownership of Indian Sandalwood plantations; and
- provision of finance to investors in Indian Sandalwood plantations.

Apart from the changes arising from the acquisition of Santalis Pharmaceuticals Inc. ("Santalis") and ViroXis Corporation {"ViroXis") in July 2015, there have been no significant changes in the nature of those activities undertaken during the period.

REVIEW OF OPERATIONS

Operating results

The consolidated net profit after tax of the Group for the nine-month period amounted to \$66.156m (31 March 2015: \$81.322m). This represents basic earnings per share of 19.27 cents (31 March 2015: 24.85 cents).

Total revenues and other income for the period of \$161.984m (31 March 2015: \$235.418m) included \$62.261m (31 March 2015: \$138.007m) relating to the gain recognised on the fair value of the Group's wholly owned Indian Sandalwood tree plantations. This gain was attributable to a favourable exchange rate movement and an increase in the fair value of the plantations due to a shorter period to harvest. The higher gain in the prior year was due to a greater foreign exchange movement in the nine months to 31 March 2015. At 31 March 2016 the Group directly owned 2,392ha of Indian Sandalwood plantations, up from 2,353ha at 30 June 2015.

Revenue also included \$78.157m from sales and services performed by the Group, up from \$75.572m for the nine months ended 31 March 2015. Establishment fee revenue is recognised in proportion to the establishment work performed at the balance sheet date.

The Group's sales of financial products are heavily weighted towards the last quarter of the Group's financial year. Therefore, as in prior years, the results of the first nine months of the financial year tend not to be representative of the full year's results. The Group expects to derive significant cash inflows from operating activities in the final quarter and reaffirms its guidance for Cash EBITDA for the year to 30 June 2016 to be between 5% and 10% up on Cash EBITDA in the year to 30 June 2015.

TFS CORPORATION LTD (ABN: 97 092 200 854)

DIRECTORS' REPORT

On 31 July 2015, TFS Corporation Ltd completed the acquisition of Santalis Pharmaceuticals Inc. and ViroXis Corporation. Santalis manufactures and markets botanical pharmaceuticals using Indian Sandalwood oil, whilst ViroXis is a bio-pharmaceutical company focused on developing and commercialising innovative, proprietary, botanical pharmaceuticals derived from Indian Sandalwood oil. The strategic rationale behind the acquisitions was to:

- Extend the Group's vertically integrated business and bring within the Group the formulation and development of products which is likely to maximise the demand for the Group's Indian Sandalwood oil;
- Provide the Group with increased access to the significant potential returns from royalty and licensing fees from dermatology products; and
- Provide a direct contractual and operational relationship with leading global pharmaceutical companies.

The Group's sales of financial products tend to be weighted towards the final quarter of the Group's financial year. Therefore, as in prior years, the results of the first nine months of the financial year tend not to be representative of the full year's results.

EVENTS AFTER THE REPORTING PERIOD

Since the reporting date the following significant events have occurred:

- TFS successfully completed a placement to institutional shareholders of 39 million new ordinary shares to raise \$60.450m;
- A share purchase plan was offered to eligible shareholders which raised a further \$8.000m at an issue price of \$1.55 per share; and
- TFS announced plans to acquire up to 221 hectares of MIS grower interests across five MIS projects. The buyback is expected to have a maximum cost of \$53.000m. The price offered by TFS to growers is based on the book value of the plantations as at 31 December 2015, using the same methodology the Company uses to value its own plantations.

ROUNDING OF AMOUNTS

The amounts contained in this report and in the financial report have been rounded to the nearest \$1,000 (unless otherwise stated) under the option available to the company under ASIC Class Order 98/100. The company is an entity to which the class order applies.

Signed in accordance with a resolution of the Board of Directors.

Dalton Gooding – Chairman of the Board

Dated this 31st day of May 2016.

NOTE 1: STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES

The un-audited interim financial report covers TFS Corporation Ltd and its controlled entities (hereafter referred to as "the Group" or "TFS"). TFS Corporation Ltd is a for-profit listed public company, incorporated and domiciled in Australia.

The financial report was authorised for issue on 31 May 2016 by the Board of Directors.

Basis of Preparation

These general purpose financial statements for the period ended 31 March 2016 have been prepared in accordance with AASB 134: Interim Financial Reporting.

This interim financial report is intended to provide users with an update on the latest annual financial statements of the Group. As such, it does not contain information that represents relatively insignificant changes occurring during the period within the Group. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Group for the year ended 30 June 2015, together with any public announcements made during the period.

The interim financial report has been prepared on an accruals basis and is based on historical costs, except for the Group's Indian Sandalwood tree plantations (which are biological assets), external MIS grower liabilities, contingent consideration and land which have been measured at fair value. This report does not take into account changing money values or, except where stated, current valuations of non-current assets.

The Directors make estimates, judgements and assumptions based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data obtained both externally and within the Group. The judgements, estimates and assumptions applied in the interim financial statements, including the key sources of estimation uncertainty, were the same as those applied in the Group's last annual financial statements for the year ended 30 June 2015, as set out in Note 1(y).

Accounting policies

The accounting policies adopted in the preparation of the interim financial statements are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 30 June 2015, except for the adoption of new standards and interpretations noted below:

• AASB 2015-3 - Amendments to Australian Accounting Standards arising from the Withdrawal of AASB 1031 Materiality. The Standard completes the AASB's project to remove Australian guidance on materiality from Australian Accounting Standards.

This amendment is effective for annual periods beginning on or after 1 July 2015. The adoption of this amendment had no material impact on the financial position or performance of the Group.

The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

Seasonality of Business

The plantation management segment is a provider of plantation establishment and management services for Indian Sandalwood plantations. Due to the seasonal nature of this segment, higher revenues and operating profits are usually expected in the second half of the financial year. Higher sales during the period May to June are mainly attributed to recognition of revenue in relation to the establishment of new plantations during the dry season in Northern Australia. The receipt of funds is also higher during May and June each year with the release of new projects by TFS. This information is provided to allow for a proper appreciation of the results.

		31 MAR 2016 \$'000	31 MAR 2015 \$'000

) Cash deposit – Bank guarantee facility	2,452	2,452
Other	20	19
	6,762	6,949

The MIS custodian accounts consist of 50% of establishment fees on new MIS sales and upfront annual fee and rent fees. These fees are kept in an interest bearing account, which is maintained by an independent custodian. The establishment fees are released quarterly to the Group until completion of the establishment services. The upfront annual and rent fees shall be released to the Group in satisfaction of the annual fee and rent in year 14 of the applicable project.

NOTE 6: PROPERTY, PLANT AND EQUIPMENT

During the period ended 31 March 2016, the Group acquired assets with a cost of \$16.657m.

No major assets were disposed of by the Group during the period ended 31 March 2016.

BTA Institutional Services Australia Limited (the security trustee for the 11% Senior Secured Note holders) has a fixed and floating security over all the assets of the Group, which includes a first registered mortgage over freehold properties owned by the Group. The freehold land is also subject to caveats which were lodged by the Group on behalf of Sandalwood project investors. These caveats protect the growers' leasehold interest in project land. The Group has registered collateral leases over the freehold land which further protects the growers' interest in project land.

Fair value measurement of the Group's freehold land and buildings

The Group's freehold land and buildings are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The fair value measurements of the Group's freehold land and buildings as at 31 March 2016 and 30 June 2015 were based on the independent and external property and land values obtained at the end of the 30 June 2012 financial year. The market appraisal was performed by Landnorth Consulting, a Licensed Real Estate Agent, with the appropriate qualifications and recent experience to fair value properties in the relevant locations. Properties were valued at their highest and best use which is consistent with current use. An updated valuation is expected to be performed during the June quarter of the 2016 financial year. The Group evaluates the impact of market conditions and arm's length transactions during the intervening period.

The fair value of the freehold land and buildings was determined based on the market comparable approach that reflects recent transaction for similar properties. There has been no change to the valuation technique during the period. The Group's freehold land and buildings are categorised as Level 3 in the fair value hierarchy at \$84.633m. The key input under the market comparable method adopted is the price per hectare (ranging from \$10,000 to \$30,000 per hectare) based on sales of comparable lots of land in the same area (location and size). A 10% increase/decrease in the price per hectare will result in a higher/lower fair value by \$7.904m.

Classified as current (iv)	17,589	-	17,589
Classified as non current	561,610	134,705	696,315

The Group's biological assets relate to Indian Sandalwood trees growing on plantations located across Northern Australia. The fair value less costs to sell of the Indian Sandalwood trees has been determined in accordance with a Directors' valuation. (i) Biological assets are encumbered to the extent set out in Note 9.

(ii) This represents plantations owned by TFS and TFS's direct interest within MIS projects.

(iii) The External MIS grower interest represents the third party grower interest in the biological assets in respect of certain MIS projects which are consolidated for accounting purposes (refer Note 14). The Group has a restricted interest in these assets and the proceeds from the monetisation of these assets will be used to settle the external MIS grower liabilities detailed at Note 9.

(iv) Biological assets classified as current are expected to be harvested, processed and monetised within 12 months.

(a) Measurement of fair values

(i) Fair Value Hierarchy

The fair value measurements for biological assets of \$713.904m (30 June 2015: \$624.574m) have been categorised as Level 3 in the fair value hierarchy.

The following information shows the valuation techniques used in measuring fair value less costs to sell, as well as the significant observable and unobservable inputs used.

Valuation Technique

Discounted Cash Flows: The valuation model considers the present value of the net cash flows expected to be generated by the plantation. The cash flow projections include specific estimates until harvest. The expected net cash flows are discounted using a risk-adjusted discount rate.

Significant Observable Inputs

(i) US Dollar exchange rate used is constant through the valuation model at 1.305 AUD being the spot exchange rate at balance date (30 June 2015: 1.297 AUD).

Significant Unobservable Inputs

(i) The trees will be harvested within 14 to 16 years of being planted. The weighted average year of harvest is 15.6 years (30 June 2015: 15.6 years).

(ii) Forecast heartwood production provides a weighted average of 20.8kg (30 June 2015: 20.8kg) per Sandalwood tree at a 25% moisture content. The forecast heartwood production of each plantation vintage ranges from 6.7kg to 25.6kg per Sandalwood tree.

(iii) Projected oil content from the heartwood of 3.7% (30 June 2015: 3.7%) from forecast heartwood at a moisture content of 25%.

(iv) The price of Indian Sandalwood oil is determined with due consideration to market transactions and industry projections, arriving at an estimate of \$2,800 USD/kg (30 June 2015: \$2,800 USD/kg) and not inflated.

(v) The costs consist of growing, harvesting, processing, marketing, and sales costs, including:

- Harvesting and processing (oil extraction) costs, estimated at \$16,000 (30 June 2015: \$16,000) per hectare and \$207 (30 June 2015: \$207) per litre of oil; and
- Marketing and sales costs, estimated at 5% (30 June 2015: 5%) of proceeds.
- Harvesting and processing (oil extraction costs) are held constant in real terms with an annual inflation rate of 3.0% (30 June 2015: 3.0%).

(vi) The pre-tax average real rates at which the net cash flows have been discounted range between:

- 14% (30 June 2015: 14%) for trees aged 0 to 5 years;
- 13% (30 June 2015: 13%) for trees aged 6 to 10 years; and
- 12% (30 June 2015: 12%) for trees aged 11 years to harvest age.

(vii) Cash flows exclude income taxes.

The fair value measurement of biological assets is sensitive to changes in the observable and unobservable inputs which may result in a significantly higher or lower fair value measurement.

NOTE 7: BIOLOGICAL ASSETS (b) Sensitivity analysis – TFS interest in biological assets

(i) Foreign Currency Risk Sensitivity Analysis

At 31 March 2016, the effect on profit (after tax) as a result of a change in the Australian dollar to the US Dollar, with all other variables remaining constant would be as follows:

	31 MAR 2016 \$'000	30 JUN 2015 \$'000
Change in profit Improvement in AUD to USD by 10%	(47,078)	(41,647)
Decline in AUD to USD by 10%	47,078	41,647

🗁 (ii) Price Risk Sensitivity Analysis

At 31 March 2016, the effect on profit (after tax) as a result of a change in Indian Sandalwood oil price, with all other variables remaining constant would be as follows:

))		31 MAR 2016 \$'000	30 JUN 2015 \$'000
	Change in profit Increase in Indian Sandalwood oil price by \$100/kg Decrease in Indian Sandalwood oil price by \$100/kg	16,814 (16,814)	14,874 (14,874)

(iii) Heartwood Yield Risk Sensitivity Analysis

At 31 March 2016, the effect on profit (after tax) as a result of a change in the heartwood yield, with all other variables remaining constant would be as follows:

	31 MAR 2016 \$'000	30 JUN 2015 \$'000
Change in profit Increase in heartwood yield by 10% Decrease in heartwood yield by 10%	44,411 (44,411)	39,273 (39,273)

(iv) Discount Rate Risk Sensitivity Analysis

At 31 March 2016, the effect on profit (after tax) as a result a change in the tax discount rates, with all other variables remaining constant would be as follows:

	31 MAR 2016 \$'000	30 JUN 2015 \$'000
Change in profit		
Increase in discount rates by 2%	(67,969)	(63 <i>,</i> 839)
Decrease in discount rates by 2%	84,464	80,360

NOTE 7: BIOLOGICAL ASSETS

(c) Project Risk

The Group is exposed to risks relating to its Indian Sandalwood plantations including:

(i) Supply and Demand Risk

The Group is exposed to risks arising from fluctuations in the price and sales volume of Sandalwood. When possible, the Group intends to manage this risk by aligning its harvest volume to market supply and demand. Management performs regular industry trend analysis for projected harvest volumes and pricing.

(ii) Climate and Other Risks

The Group's Indian Sandalwood plantations are exposed to the risk of damage from climatic changes, diseases, forest fires and other natural forces. The Group has extensive processes in place aimed at monitoring and mitigating those risks, including regular forest health inspections and industry pest and disease surveys. The Group is also insured against certain natural disasters such as fire and wind damage. The insured value of the plantation under the Group's existing insurance policy is less than the fair value of these plantations, but greater than the cost of re-establishing the plantations.

(iii) Foreign Currency Risk

Foreign currency risk is the risk that the fair value of future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The Group has a natural hedge of this exposure in place by maintaining foreign currency denominated debt that partially offsets the currency exposure described.

	8,536	9

	31 MAR 2016 \$'000	30 JUN 2015 \$'000
NOTE 9: FINANCIAL LIABILITIES		
Non Current		
11% Senior secured notes ⁽ⁱ⁾	264,502	229,346
External MIS grower liabilities (ii)	134,705	120,038
Contingent consideration (iii)	32,418	-
	431,625	349,384

⁽ⁱ⁾ A total of US\$200 million has been raised from international markets from the issuance of 11% senior secured notes, with a maturity date of 15 July 2018. This liability has been converted to Australian dollars using an exchange rate of 1.305 (30 June 2015: 1.297). All principle in US dollars is payable at maturity date with interest to be paid semi-annually, in arrears on 15 January and 15 July of every year. On or after 15 July 2015 the Group may redeem some or all of the notes at a premium that will decrease over time as set out below:

15 July 2015 to 14 July 2016 108% 15 July 2016 to 14 July 2017 104% 15 July 2017 to 14 July 2018 102% 15 July 2018 100%

The notes are represented by one or more global notes and are listed on the Singapore Stock Exchange (SGX-ST) for trading. The notes are secured by a fixed and floating charge over all the assets of the Group, refer Note 6. During the period a further US\$25 million (A\$36.007m) of additional notes was raised under the provisions of the existing Senior Secured Notes. These additional notes were issued at a premium to par of 5.75% and have the same terms and conditions as the existing notes. The effective interest rate to maturity is 8.5% for this tranche.

⁽ⁱⁱ⁾ The external MIS grower liability arises from the consolidation of certain MIS for accounting purposes (refer Note 14). The liability will be settled with the proceeds arising from the monetisation of the external MIS grower interests in the Group's biological assets as detailed in Note 7, and will not require any additional cash contribution from the Group outside of the MIS projects. External MIS grower liabilities are carried at fair value through profit and loss. The basis of determining the fair value of the liability, Level 3 within the fair value hierarchy, is consistent with the method adopted by the Group to value its biological assets (refer Note 7) and factors in credit risk and the security provided by the underlying trees.

(iii) The contingent consideration is carried at fair value through profit and loss. Refer to Note 21 for the basis of determining the fair value of the liability within the fair value hierarchy.

Capital management

Management controls the capital of the Group in order to maintain an appropriate debt to equity ratio, provide the shareholders with adequate returns and ensure that the Group can fund its operations and continue as a going concern.

The Group's debt and capital included ordinary share capital and financial liabilities, supported by financial assets. There are no externally imposed capital requirements. Management effectively manages the Group's capital by assessing the Group's financial risks and adjusting its capital structure in response to changes in these risks and in the market. These responses include the management of debt levels, distributions to shareholders and share issues.

NOTE 11: ISSUED CAPITAL

There have been no changes in the strategy adopted by management to control the capital of the Group since the end of the prior financial year. The gearing ratios for the current period and past year end are as follows:

\mathcal{D}	31 MAR 2016 \$'000	30 JUN 2015 \$'000
Total borrowings	264,502	229,355
Less: Cash and cash equivalents	(22,608)	(72,674)
Net debt	241,894	156,681
Total equity	657,107	574,523
Total capital	899,001	731,204
Gearing ratio	26.91%	21.43%

NOTE 12: BUSINESS COMBINATIONS

On 31 July 2015, TFS Corporation Ltd acquired Santalis Pharmaceuticals Inc. ("Santalis") and ViroXis Corporation ("ViroXis"). Santalis manufactures and markets botanical pharmaceuticals using Indian Sandalwood oil, whilst ViroXis is a biopharmaceutical company focused on developing and commercialising innovative, proprietary, botanical pharmaceuticals derived from Indian Sandalwood oil. The strategic rationale behind the acquisition was:

- Extend the Group's vertically integrated business and bring within the Group the formulation and development of products which is likely to maximise the demand for the Group's Indian Sandalwood oil;
- Provide the Group with increased access to the significant potential returns from royalty and licensing fees from dermatology products; and
- Provide a direct contractual and operational relationship with leading global pharmaceutical companies.

	Name	Туре	Location
31 July 2015	Santalis Pharmaceuticals,	50% of the shares in the Company	San Antonio, TX,
	Inc.	(now 100% owned subsidiary).	United States
31 July 2015	ViroXis Corporation	100% of the shares in the	San Antonio, TX,
		Company.	United States

The business combinations contributed revenues of \$0.141m from ViroXis and \$0.446m from Santalis and net loss before tax of \$1.412m from ViroXis and \$1.268m from Santalis for the period ended 31 March 2016 from their date of acquisition. It is expected that the Group would have reported \$162.033m in consolidated revenues and \$65.696m consolidated net profit after tax attributable to members, for the period ended 31 March 2016, had the business combination occurred at the beginning of the reporting period.

NOTE 12: BUSINESS COMBINATIONS

In accordance with "AASB 3: Business Combinations", an acquirer has one year from the acquisition date ("the measurement period") to finalise the business combination accounting. At the date of lodgement of these financial statements, the Group is still in the process of finalising the business combination accounting. Due to the proximity of the acquisition to balance date, the acquisition accounting is provisional.

(a) Equity instruments

The fair value of the 2,565,176 ordinary shares issued to Santalis, and 916,255 ordinary shares to be issued to Santalis, and 11,851,115 ordinary shares issued to ViroXis as part of the consideration paid (\$5.274m and \$17.421m respectively) was measured using the closing market price of TFS ordinary shares on acquisition date.

(b) Financial assets

Included in the assets acquired were receivables with a gross contractual and fair value of \$0.293m resulting from trade sales with customers and related parties. Management expects these amounts to be collected in full and converted to cash consistent with customer terms.

(c) Consideration

(i) Cash consideration: A portion of the consideration of \$4.883m was paid in cash to ViroXis during the period. On acquisition, the Group acquired the cash balances of \$0.789m in Santalis and \$1.123m in ViroXis, resulting in a net cash movement of \$2.971m as shown as a payment on the Consolidated Statement of Cash Flows for the period.

(ii) Contingent Consideration: The Group will pay the vendors further consideration over the next 8 years if further milestones and performance criteria are achieved (as detailed below). The additional future contingent consideration has been assessed to have a fair value (discounted) of \$38.192m at the date of acquisition. At 31 March 2016, the fair value of the contingent consideration had increased to \$40.954m due to the unwinding of the discount (\$0.194m), changes in foreign currency (\$2.325m), and changes in other valuation inputs (\$0.243m).

NOTE 12: BUSINESS COMBINATIONS

Performance criteria

Milestone payments

The purchase price for ViroXis will increase by a maximum of US\$26.0 million if the following milestones are achieved within certain periods in up to five years after completion:

- 1. US\$2.0 million on the launch of an over-the-counter ("OTC") product
- 2. US\$4.0 million on the enrolment of the first patient in a Phase 3 FDA trial for a skin indication
- 3. US\$4.0 million on the enrolment of the first patient in a Phase 3 FDA trial for a second skin indication
- 4. US\$8.0 million on FDA approval of a prescription product for a skin indication
- 5. US\$8.0 million on FDA approval of a prescription product for a second skin indication

The purchase price for Santalis will increase by a maximum of US\$20.0 million if the following milestones are achieved in the five years after completion:

- 1. US\$5.0 million on the launch of a new OTC product
- 2. US\$2.5 million on the enrolment of the first patient in a Phase 3 FDA trial for a skin indication
- 3. US\$2.5 million on the enrolment of the first patient in a Phase 3 FDA trial for a second skin indication
- 4. US\$5.0 million on FDA approval of a prescription product for a skin indication
- 5. US\$5.0 million on FDA approval of a prescription product for a second skin indication

If FDA approval of a prescription product (milestones 4 and 5 above) is granted between five and eight years post completion then 50% of the relevant milestone payment will be payable.

All milestone payments are payable in shares and/or cash, at TFS's election and in such proportions as TFS determines.

Base earn out payments

The purchase price for ViroXis will increase by a maximum of US\$50.0 million based on the level of aggregate net cash flow("NCF") generated by the business in the five years post completion. The base earn out payment thresholds are:No earn out paymentLess than US\$4.3 millionUS\$5.0 millionNCF equal to or greater than US\$4.3 million and less than US\$8.6 millionUS\$15.0 millionNCF equal to or greater than US\$8.6 million and less than US\$12.8 million

US\$15.0 million	NCF equal to or greater than US\$8.6 million and less than US\$12.8 million
US\$35.0 million	NCF equal to or greater than US\$12.8 million and less than US\$17.1 million
US\$50.0 million	NCF equal to or greater than US\$17.1 million

The purchase price for Santalis will increase by a maximum of US\$31.0 million based on the level of aggregate net cash flow ("NCF") generated by the business in the five years post completion. The base earn out payment thresholds are:

lo earn out payment	Less than US\$2.5 million
JS\$5.0 million	NCF equal to or greater than US\$2.5 million and less than US\$5.0 million
JS\$10.0 million	NCF equal to or greater than US\$5.0 million and less than US\$7.4 million
JS\$20.0 million	NCF equal to or greater than US\$7.4 million and less than US\$9.9 million
JS\$31.0 million	NCF equal to or greater than US\$9.9 million
JS\$10.0 million JS\$20.0 million	NCF equal to or greater than US\$5.0 million and less than US\$7.4 million NCF equal to or greater than US\$7.4 million and less than US\$9.9 million

All base earn out payments are payable in shares and/or cash, at TFS's election and in such proportions as TFS determines.

Incentive earn out payments

The purchase price for ViroXis will increase by an incentive earn out payment equal to 20% of the NCF in excess of US\$10.0 million for each of the three years ending on the six, seven and eight year anniversaries of completion. The incentive earn out payment is capped at US\$60.7 million.

The purchase price for Santalis will increase by an incentive earn out payment equal to 20% of the NCF in excess of US\$10.0 million for each of the three years ending on the six, seven and eight year anniversaries of completion. The incentive earn out payment is capped at US\$37.5 million.

All incentive earn out payments are payable in shares and/or cash, at TFS's election and in such proportions as TFS determines.

NOTE 12: BUSINESS COMBINATIONS

Final earn out payments

The purchase price for ViroXis will increase by a final earn out payment equal to 20% of the amount, if any, that aggregate NCF for the 8 year period after completion exceeds US\$111.9 million, subject to the maximum purchase price cap for all purchase payments of US\$154.9 million.

The purchase price for Santalis will increase by a final earn out payment equal to 20% of the amount, if any, that aggregate NCF for the 8 year period after completion exceeds US\$111.7 million, subject to the maximum purchase price cap for all payments of US\$90.0 million.

All final earn out payments are payable in shares and/or cash, at TFS's election and in such proportions as TFS determines.

Description of contingent consideration arrangements

The undiscounted total of all future payments that the Group could be required to make under the contingent consideration arrangement is between US\$0 and US\$221.500m (A\$0 and A\$289.057m based on the 31 March 2016 spot rate).

The fair value of the contingent consideration arrangement relating to all milestone payments of \$38.192m was estimated by using the discounted cashflow methodology less, the fair value of the option to settle in shares at TFS's election. The fair value measurement is based on significant inputs that are not observable in the market, which AASB 13 *Fair Value Measurement* refers to as Level 3 inputs. Key assumptions include a discount rate of 15 per cent, revenue from the successful commercialisation of products, and USD exchange rate of 1.305 AUD being the spot exchange rate at balance date.

(d) Separately recognised assets

No transactions were required to be recognised separately from the acquisition assets and assumptions of liabilities in the business combination.

(e) Acquisition-related costs

Direct costs relating to the acquisition totalling \$1.848m have been recognised as corporate and other administration expenses in the Statement of Profit or Loss and Other Comprehensive Income for the period ended 31 March 2016.

(f) Goodwill on acquisition

The goodwill of \$12.086m in Santalis arising from the acquisition consists largely of synergies and economies of scale expected from combining the operations of these entities and TFS, and the assembled workforce acquired. None of the goodwill recognised is expected to be deductible for income tax purposes.

(g) Gain on deemed disposal of Associate/Investment

(i) Immediately prior to the acquisition of Santalis, the Group held a 50% non-controlling interest in Santalis which was carried at nil value by the Group. As part of the business combination, the Group is deemed to have disposed of its 50% interest in the Associate. At acquisition date, the fair value of these equity interests was deemed to be \$16.760m which was derived from the consideration from the payment of the acquired 50%. This resulted in a net gain on disposal of Associate of \$16.760m, factoring in a control premium.

(ii) Immediately prior to the acquisition of ViroXis, TFS exercised a warrant to acquire a 7% non-controlling interest in ViroXis which was carried at \$1.979m in the Group. As part of the business combination, TFS is deemed to have disposed of its 7% interest in ViroXis. At acquisition date, the fair value of the initial 7% interest was deemed to be \$2.106m which was derived from the consideration for the remaining 93%. This resulted in a net gain on disposal of Investment of \$0.127m, factoring in a control premium.

(a) The Group has interests in a number of Managed Investment Schemes. As a wholly owned subsidiary is the Responsible Entity for these schemes, it has the power to affect the returns of the schemes through contractual arrangement, for example by its management of the plantations. A review of the Group's interests in the Managed Investment Schemes at the end of the period, for which the Company or one of its controlled entities is the Responsible Entity, has identified that these schemes are controlled by the Company based on the definition contained in AASB 10: *Consolidated Financial Statements*.

To assess whether the Group is exercising its decision making rights in the capacity of a principal or agent, the Group considers a number of factors including the quantum of its exposure to variable returns. In determining the Group's exposure to variable returns from these schemes, the direct and indirect interests are considered and converted into a measure of the Group's overall effective economic interest in the scheme. Where this economic interest is 30% or more of total returns, the Group considers that for accounting purposes it has control over the scheme.

The ownership interest reflected in the table above represent TFS' direct interest in the wood lots within the schemes. In addition to these direct interests the Group had an indirect interest in TFS 2004 Premium, TFS 2005, TFS 2006, and TFS 2007 of 37%, 23%, 26% and 16% respectively.

(b) At 30 June 2015, Santalis was held as an Associate and equity accounted and not considered a subsidiary hence the % owned in the table is shown as nil.

NOTE 14: RESTATEMENT RELATING TO THE APPLICATION OF AASB 10 CONSOLIDATED FINANCIAL STATEMENTS

As more fully explained in the financial statements for the year ended 30 June 2015, the group restated its financial statements as a result of the application of AASB 10, which was effective for the first time in the year ended 30 June 2014. AASB 10 requires a continuous assessment of control to be performed. A review of the Group's interests in the Managed Investment Schemes in 2015, for which the Company or one of its controlled entities is the Responsible Entity, identified that the following schemes were controlled by the Company:-

TFS Sandalwood Project 2004 Premium TFS Sandalwood Project 2005 TFS Sandalwood Project 2006 TFS Sandalwood Project 2007

The assessment of control was performed based on the factors outlined in Note 13. As a significant interest in each of the schemes listed above was acquired in the financial year ended 30 June 2014 due to the acquisition of 354 hectares from six existing growers in July 2013, it was determined that control of these schemes was obtained in 2014. The consolidation of the four schemes was accounted for in the financial statements for the year ended 30 June 2015 from the date control was obtained. Comparative information in the Consolidated Statement of Profit or Loss and Other Comprehensive Income for the interim period ended 31 March 2015 has also been restated to consolidate these entities.

As disclosed in the financial statements for the year ended 30 June 2015, the impact of consolidating these schemes on the Group's assets and liabilities as at 30 June 2015 and 30 June 2014 was as follows:

	30 JUN 2015 \$'000	30 JUN 2014 \$'000
Increase in biological assets	\$120,038	\$86,135
Increase in total assets	\$120,038	\$86,135
MIS grower liabilities	\$120,038	\$86,135
Increase in total liabilities	\$120,038	\$86,135
Change in net assets	-	-

The impact on the Group's net profit or loss for the nine months ended 31 March 2016 and 2015 is as follows:

	31 MAR 2016 \$'000	31 MAR 2015 \$'000
Revaluation of biological assets – external MIS growers	14,755	43,356
Re-measurement of external MIS grower liabilities	(14,755)	(43,356)
Increase in net profit or loss	-	-

The consolidation of the four Schemes had no impact on net assets as at 31 March 2016 or 30 June 2015 nor did it have an impact on opening retained earnings at 1 July 2014 or EPS disclosures. Refer to Note9(ii) for details on the realisation and settlement of the related assets and liabilities.

NOTE 15: SHARE-BASED PAYMENTS

On 13 November 2015, 250,593 performance rights were granted to the Managing Director under the TFS Long Term Incentive Plan ("TFS LTIP"). The performance rights are subject to two performance hurdles which are independent and will be tested separately. Details of the performance hurdles are as follows:

EPS performance hurdle - Basic cash EPS – performance rights will be subject to the Group's basic cash EPS growth performance over the period 1 July 2015 to 30 June 2019.

TSR performance hurdle – performance rights subject to the Group's growth in Total Shareholder Return ("TSR") over the period 1 July 2015 to 30 June 2019.

The number of performance rights, subject to the EPS hurdle and TSR hurdle, that vest, if any, will be determined by the Board with reference to the EPS achieved and annual TSR growth over the performance period.

NOTE 15: SHARE BASED PAYMENTS

A Monte Carlo simulation was used to value the TSR performance rights, given they are subject to a market based vesting condition. The Monte Carlo simulation model determines the probability that the market condition will be fulfilled and arrives at a value based on the number of rights that are likely to vest. The risk free rate of the performance rights on the grant date was 2.15%. The EPS performance rights are not subject to a market condition and therefore have been valued using the Black Scholes valuation methodology to determine the present value of the rights at the grant date.

The weighted average fair value of the options at grant date was \$1.69 (EPS performance right) and \$0.91 (TSR performance right) and \$0.91 (TSR performance right) and \$0.91 (TSR performance right) and some set of the set

Weighted average exercise price	\$0
Expiry date	22 January 2023
Underlying share price at date of grant	\$1.69
Share price volatility	45.73%
Dividend yield	1.9%

On 22 January 2016, 1,192,321 performance rights were granted to Key Management Personnel under the TFS Long Term Incentive Plan ("TFS LTIP"). The performance rights are subject to two performance hurdles which are independent and will be tested separately. Details of the performance hurdles are as follows:

EPS performance hurdle - Basic cash EPS – performance rights will be subject to the Group's basic cash EPS growth performance over the period 1 July 2015 to 30 June 2019.

TSR performance hurdle – performance rights subject to the Group's growth in Total Shareholder Return ("TSR") over the period 1 July 2015 to 30 June 2019.

The number of performance rights, subject to the EPS hurdle and TSR hurdle, that vest, if any, will be determined by the Board with reference to the EPS achieved and annual TSR growth over the performance period.

A Monte Carlo simulation was used to value the TSR performance rights, given they are subject to a market based vesting condition. The Monte Carlo simulation model determines the probability that the market condition will be fulfilled and arrives at a value based on the number of rights that are likely to vest. The risk free rate of the performance rights on the grant date was 2.15%. The EPS performance rights are not subject to a market condition and therefore have been valued using the Black Scholes valuation methodology to determine the present value of the rights at the grant date.

The weighted average fair value of the options at grant date was \$1.55 (EPS performance right) and \$0.78 (TSR performance right) and \$0.78 (TS

Weighted average exercise price	\$0
Expiry date	22 January 2023
Underlying share price at date of grant	\$1.55
Share price volatility	45.73%
Dividend yield	1.9%

NOTE 16: OPERATING SEGMENTS

Segment Information

Identification of reportable segments

The Group has identified its operating segments based on the internal reports that are reviewed and used by the Board of Directors (chief operating decision makers) in assessing performance and determining the allocation of resources.

The Group is managed primarily on the basis of product category and service offerings since the Group's operations inherently have notably different risk profiles and performance assessment criteria. Operating segments are therefore determined on the same basis.

Reportable segments disclosed are based on aggregating operating segments where the segments are considered to have similar economic characteristics and are also similar with respect to the following:

the products sold and/or services provided by the segment;

the manufacturing process;

the type or class of customer for the products or service;

the distribution method; and

external regulatory requirements.

A new operating segment has been created to capture the pharmaceutical product business, arising from the acquisition of Santalis and ViroXis. The results and position of this segment are included in internal reports that are reviewed and used by the Board of Directors for decision making.

Basis of accounting for purposes of reporting by operating segments

Accounting policies adopted

Unless stated otherwise, all amounts reported to the Board of Directors as the chief decision maker with respect to operating segments are determined in accordance with accounting policies that are consistent to those adopted in the annual financial statements of the Group.

NOTE 16: SEGMENT INFORMATION

The Group's operations involve the management and operation of forestry plantations, cultivation and sale of agriculture produce, the provision of finance, and the production and sale of Sandalwood oil and related products, including pharmaceutical products. All material operations are conducted in Australia and in USA.

	31 MAR 2016 \$'000	31 MAR 2015 \$'000 Restated
NOTE 17: EARNINGS PER SHARE Earnings used in calculating basic and diluted earnings per share	66,156	81,322
	31 MAR 2016 Thousands	31 MAR 2015 Thousands Restated
Weighted average number of ordinary shares for basic EPS ⁽ⁱ⁾ Effect of dilution from warrants Weighted average number of ordinary shares adjusted for effects of	341,823 9,643	325,716 12,875
dilution ^{(ii), (iii)}	351,466	338,591

(i) The weighted average number of ordinary shares takes into account the 916,255 shares to be issued at a future date relating to the acquisition of Santalis.

- (ii) Excludes contingently issuable shares relating to the acquisition of Santalis and ViroXis.
- (iii) The 31 March 2015 diluted EPS has been restated for the effect of dilution from warrants.
- (iv) The weighted average number of shares for EPS and Diluted EPS in respect of all periods presented has been adjusted by a conversion factor of 1.00 relating to the bonus element of the placements described in Note 19.

Final fully franked dividend of 3 cents per share paid 9 Nov 2015		
(2014: 3 cents per share)	10,242	9,758

NOTE 19: SUBSEQUENT EVENTS

Since the reporting date the following significant events have occurred:

- TFS successfully completed a placement to institutional shareholders of 39 million new ordinary shares to raise \$60.450m;
- A share purchase plan was offered to eligible shareholders which raised a further \$8.000m at an issue price of \$1.55 per share; and
- TFS announced plans to acquire up to 221 hectares of MIS grower interests across five MIS projects. The buyback is expected to have a maximum cost of \$53.000m. The price offered by TFS to growers is based on the book value of the plantations as at 31 December 2016, using the same methodology the Company uses to value its own plantations.

NOTE 20: CONTINGENT LIABILITIES

(i) A controlled entity has a replanting commitment in relation to Sandalwood projects to ensure a tree mortality rate of no more than 25% at the end of the first year of each project. Possible associated costs associated with this replanting have not been provided for. These possible future costs are not considered to be material.

(ii) A controlled entity is managing a portfolio of MIS grower loans on behalf of the Commonwealth Bank of Australia (CBA) and under the agreement the entity has a legal liability to indemnify the CBA for any defaulting grower loans. This legal liability is limited to \$2.051m, being the amount of cash available in the First Loss Account (refer Note 5). The portfolio of loans consists of existing loans sold to the CBA in 2008 and direct grower funding for the TFS2008 and TFS2009 projects. Once indemnified the Group takes the loan back onto its balance sheet with the established Sandalwood trees acting as security over the receivable.

NOTE 20: CONTINGENT LIABILITIES

(iii) Included in the sales to high net worth investors during June 2014 are put options whereby the investor can elect to sell the trees back to the Group at the lower of market value or a predetermined price. These put options are to be exercised in September 2018, and if exercised the Group would be required to pay the consideration in November 2018 and November 2019. If all the options were exercised the Group would be required to acquire the plantations from the high net worth investors at the lower of a predetermined price (estimated at \$51.322m) or market value. The Group has deemed the likelihood of the put options being exercised to be low as the predetermined value is likely to be significantly below the fair value of the trees at the exercise date.

(iv) Included in the sales to an institutional investor during June 2014 is a put option whereby the investor can elect to sell the trees back to the Group at a predetermined price. This put option is to be exercised by 30 June 2016, and if exercised the Group would be required to pay the consideration by 30 September 2016. If the option is exercised the Group would be required to acquire the plantation from the institutional investor for \$30.480m. The Group has deemed the likelihood of the put option being exercised to be low as the predetermined value is likely to be significantly below the fair value of the trees at the exercise cate.

NOTE 21: FINANCIAL INSTRUMENTS

The Group's financial instruments consist of trade and other receivables, other financial assets (made up of cash deposits), trade and other payables and financial liabilities.

Aggregate net fair values and carrying amounts of financial assets and financial liabilities at balance date:

	31 MAR 2016		30 JUN	I 2015
	Carrying amount	Fair value	Carrying amount	Fair value
7	\$'000	\$'000	\$'000	\$'000
Financial assets:				
Held to maturity financial assets - cash deposits:

Loans and receivables	111,509	110,952	136,812	134,684
	119,021	118,464	146,742	144,614
Financial liabilities:				
Secured notes	264,502	277,106	229,346	247,077
External MIS grower liabilities	134,705	134,705	120,038	120,038
Trade and other payables	33,927	33,927	55,098	55,098
Contingent consideration	40,954	40,954	-	-
	474,088	486,692	404,482	422,213

(i) Fair Value Hierarchy

When measuring the fair value of an asset or a liability, the Group uses market observable data as far as possible. Fair values of assets or liabilities are categorised into different levels in the fair value hierarchy based on the lowest input used in the valuation techniques as follows:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

If the inputs used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Group recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

NOTE 21: FINANCIAL INSTRUMENTS

Financial liabilities measured at fair value are categorised as follows:

	0					
		31 MAR 201	5		30 JUN 2015	
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3
	\$'000	\$'000	\$'000	\$'000	\$'000	\$'000
Financial liabilities:						
External MIS grower liabilities (ii)	-	-	134,705	-	-	120,038
Contingent consideration (ii)	-	-	40,954	-	-	-
\bigcirc	-	-	175,659	-	-	120,038
Reconciliation of recurring fair value me	easurements ca	tegorised w	ithin Level 3	of the fair va	alue hierarch	y:
				\$'000		

	\$'000
As at 1 July 2015	120,038
Loss on re-measurement of external MIS grower liabilities	14,755
Contingent consideration from business combination	38,192
Re-measurement of contingent consideration – Refer Note 12(c)(ii)	2,762
Addition/(disposal)	(88)
As at 31 March 2016	175,659
As at 1 July 2014	86,135
Loss on re-measurement of external MIS grower liabilities	34,226
Addition/(disposal)	(323)
As at 30 June 2015	120,038

(ii) Valuation methods and assumptions

External MIS grower liabilities

The fair value of the external MIS grower liabilities is determined using a probability weighted discounted cash flow method. This is consistent with the method adopted by the Group to value its biological assets (refer Note 7) and factors in credit risk and the security provided by the underlying trees.

Contingent consideration

As part of the acquisition of Santalis and ViroXis, part of the total consideration is contingent, based on performance of the acquired entities. A probability weighted discounted cash flow method has been used to determine the fair value of the contingent consideration, net of the fair value of the option to settle in shares.

Sensitivity analysis – Contingent consideration

(a) Foreign Currency Risk Sensitivity Analysis

At 31 March 2016, the effect on profit (after tax) as a result of a change in the Australian dollar to the US Dollar, with all other variables remaining constant would be as follows:

_		\$'000
)		
	Change in profit	
	Improvement in AUD to USD by 10%	3,245
	Decline in AUD to USD by 10%	(3,245)

(b) Discount Rate Risk Sensitivity Analysis

At 31 March 2016, the effect on profit (after tax) as a result of a change in the discount rate, with all other variables remaining constant would be as follows:

31	MAR 20	16
	\$'000	

31 MAR 2016

Change in profit Increase in discount rate by 2% Decrease in discount rate by 2%

1,449 (1,577)

NOTE 21: FINANCIAL INSTRUMENTS

(C) Revenue Risk Sensitivity Analysis

At 31 March 2016, the effect on profit (after tax) as a result of a change in revenue, with all other variables remaining constant would be as follows:

Change in profit Improvement in revenue by 10% Decline in revenue by 10%

2,630 303

TFS CORPORATION LTD (ABN: 97 092 200 854) DIRECTORS' DECLARATION

In accordance with a resolution of the Directors of TFS Corporation Ltd, I state that:

In the opinion of the Directors:

The un-audited financial statements and notes of the consolidated entity:

- (a) comply with AASB 134: Interim Financial Reporting; and
- (b) give a true and fair view of the consolidated entity's financial position as at 31 March 2016 and the performance for the nine months ended on that date.

There are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Dalton Gooding – Chairman of the Board

Dated at Perth this 31st day of May 2016.
