WANGLE RECEIVES FINAL APPROVAL FOR DATA RETENTION IMPLEMENTATION PLAN

Highlights

- Wangle receives final approval for its Data Retention Implementation Plan from ACMA and CAC.
- The approval is a key step in the Wangle App being fully compliant with telecommunications laws and will allow the Company to expedite growth into other markets.

Wangle Technologies Limited (**ASX:WGL**) (**Wangle** or the **Company**) received confirmation yesterday evening that its final Data Retention Implementation Plan (**DRIP**) has been approved by the Australian Communications and Media Authority (**ACMA**) and Communications Access Coordinator (**CAC**).

The approval means that Wangle Technologies data retention plan has been accepted by the relevant security and law enforcement agencies within Australia. This is a critical step for the Wangle App toward ensuring it is fully compliant with the Australian Federal Government's Telecommunications (Interception and Access) Act 1979 under the Company's obligations as a Carriage Service Provider.

The approval is a key milestone in the commercialisation of the Wangle App and will assist in the global launch of the App as only minor modifications have to be made to make the software compliant in the markets Wangle is targeting for International growth.
