**Qualifying Statements**

The information in this Report that relates to Exploration Information is based on information compiled by Michael Leu who is a member of The Australasian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists.

Mr Leu is a qualified geologist and is the Chief Geologist of Sovereign Gold Company Limited.

Mr Leu has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration and to the activity, which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Resources. Mr Leu consents to the inclusion in this announcement of the Exploration Information in the form and context in which it appears.

**Crescent Lake Lithium Receives Access Approval**

- Approval granted to clear and upgrade main access trail to the four identified Dempster lithium-bearing pegmatite occurrences and other target areas
- Additional Lithium-bearing pegmatites will also be explored for subject to Exploration Permit approval expected shortly

Sovereign Gold Company Ltd (**Sovereign Gold or Company**) (ASX: SOC) advises that Whitesands First Nations Administrators have given approval for Sovereign Gold in-country operators to clear and upgrade the main access trail to the highly prospective lithium-bearing pegmatite occurrences.

Clearing operations are expected to be completed within 7 days and additional lithium-bearing pegmatite occurrences will also be explored and assessed.

The geological team will travel to site and transport equipment for the initial non-mechanized stripping of the pegmatite.

The company expects to be granted its exploration permit within the next 14 days and will update the market accordingly.
