Boorara Trial Open Mining

MacPhersons Resources Limited (ASX: MRP) is pleased to announce that it has commenced the trial open pit at the Boorara Gold Project and intends to develop a pit to a depth of 20 metres and about 100 metres long at the Southern Stockwork deposit.

MacPhersons has employed experienced local contractors and equipment will be used on hourly hire rates. The pit should be completed by the end of September.

The 30,000 tonnes will be hauled some 60 kilometres to the FMR Pty Ltd mill at Coolgardie. We anticipate processing of the ore will take approximately 10-12 days.

MacPherson's Managing Director, Jeff Williams, said, "the startup at Boorara is an exciting step in the Company's development plans for Boorara and we now watch with interest the deeper RC drilling at Boorara and the results from the current metallurgical test work on the high grade Nimbus silver lodes".
