Disclaimer

This document has been prepared by Deep Yellow Limited (Deep Yellow, DYL or the Company) in connection with providing an overview to interested analysts and investors.

This presentation is being provided for the sole purpose of providing information to enable recipients to review the business activities of Deep Yellow. This presentation is thus by its nature limited in scope and is not intended to provide all available information regarding Deep Yellow. This presentation is not intended as an offer, invitation, solicitation, or recommendation with respect to the purchase or sale of any securities. This presentation should not be relied upon as a representation of any matter that a potential investor should consider in evaluating Deep Yellow.

Deep Yellow and its affiliates, subsidiaries, directors, agents, officers, advisers or employees do not make any representation or warranty, express or implied, as to or endorsement of, the accuracy or completeness of any information, statements, representations or forecasts contained in this presentation, and they do not accept any liability or responsibility for any statement made in, or omitted from, this presentation. Deep Yellow accepts no obligation to correct or update anything in this presentation.

No responsibility or liability is accepted and any and all responsibility and liability is expressly disclaimed by Deep Yellow and its affiliates, subsidiaries, directors, agents, officers, advisers or employees for any errors, misstatements, misrepresentations in or omissions from this presentation.

Any statements, estimates, forecasts or projections with respect to the future performance of Deep Yellow and/or its subsidiaries contained in this presentation are based on subjective assumptions made by Deep Yellow’s management and about circumstances and events that have not yet taken place. Such statements, estimates, forecasts and projections involve significant elements of subjective judgement and analysis which, whilst reasonably formulated, cannot be guaranteed to occur. Accordingly, no representations are made by Deep Yellow or its affiliates, subsidiaries, directors, officers, agents, advisers or employees as to the accuracy of such information; such statements, estimates, forecasts and projections should not be relied upon as indicative of future value or as a guaranteed of value or future results; and there can be no assurance that the projected results will be achieved.

Prospective investors should make their own independent evaluation of an investment in Deep Yellow.

Nothing in this presentation should be construed as financial product advice, whether personal or general, for the purposes of section 766B of the Corporations Act 2001 (Cth). This presentation consists purely of factual information and does not involve or imply a recommendation or a statement of opinion in respect of whether to buy, sell or hold a financial product. This presentation does not take into account the objectives, financial situation or needs of any person, and independent personal advice should be obtained.

This presentation and its contents have been made available in confidence and may not be reproduced, or disclosed to third parties or made public in any way without the express written permission of Deep Yellow.
ASX-listed advanced stage Namibian uranium company

Focussed on near-term development of its Tumas Project:

• Highest grade undeveloped calcrete resource in Namibia (~350ppm)

• Marenica’s U-pgrade™ process enables comparatively low costs

Holds an exciting project pipeline:

• Omahola Project

• Tubas Sands Project

Substantial resource base in uranium supportive jurisdiction

Rising tide opportunity – uranium market correction looming

**Major shareholders:**

- Paladin Energy Limited: 14.8%
- HSBC*: 13.1%
- National Nominees**: 9.4%

* Including Raptor Partners Limited
** Including Laurium L.P. Fund
Exploration in Namibia is conducted by DYL’s wholly-owned subsidiary Reptile Uranium Namibia (RUN) * Assuming a 250ppm cut-off at Omahola

93.8 Mlbs at 306ppm in resources*

Notes:

* For personal use only
Development of Marenica’s *U-pgrade*™ closely monitored by DYL since 2013
- Recognition that *U-pgrade*™ could significantly reduce capital and operating costs

First Tangible Steps Completed in 2014
- Successful mineral characterisation tests completed
- Concluded *U-pgrade*™ process could work on DYL’s Namibian Calcretes
- Successful resource review

2015 – Building Blocks in Place
- Infill grade control drill program & geophysics assessment completed – grade, tonnage & extensive resource upside confirmed
- Market Assessment for potential offtakers confirmed interest in product
- Bulk sample excavated for *U-pgrade*™ metallurgical testwork program

Gathering Momentum throughout 2016
- Successful *U-pgrade*™ metallurgical testwork program completed
- Technology Licence Agreement signed with Marenica for *U-pgrade*™ process
- Resource update completed, release imminent

Stepping up the pace going into 2017
- Project planning demonstrates fast track project clearly achievable
- Tumas Project could be commissioned just as uranium market turns ~2020
Tubas Sand Project: Summary

An extensive mineralised palaeochannel system in excess of 100 kilometres hosts the highest grade undeveloped calcrete resources in Namibia.

The Tumas Project consists of the Tumas Deposit (Zones 1-3) & the Tubas Deposit.

JORC 2004 Palaeochannel Resource: 22.2 Mt at 368 ppm for 18 Mlbs U₃O₈
Resource Base – well defined with ample upside

Location of first bulk sample excavated November 2015

Grade control drilling program (12.5m centres) confirmed resource continuity prior to bulk sample
Bulk Sample Excavation

Excavation of bulk sample demonstrates simple geology – little overburden, shallow to drill out in Zones 1 & 2
Marenica U-pgrade™ Plant:

- **Beneficiation (Scrubbing & Attrition)**
- **Clay And Calcite Removal**
- **Carnotite Concentration**

**U-pgrade™**

- **Uranium Concentrate 1**: ~92% Recovery, ~3,000 to 3,500ppm
- **Uranium Concentrate 2**: ~95% Recovery, ~3,000 to 3,500ppm
- **Uranium Concentrate 3**: ~94% Rec, ~82% Cum Recovery, 2.5% ~ 5% Mass Pull, Product up to 15,000ppm

- Yellowcake production
- Toll Treatment or Concentrate sale

- That’s 1.5% $U_3O_8$

**For personal use only**

- Based on the recently completed testwork program
- Subject to confirmation by additional testwork & feasibility studies
Marenica U-upgrade™ Plant – Implications

This is what a 2.5% mass pull enables...
Potential to toll treat – reduces capex
Potential to toll treat – accessible options

Given its prior offtake discussions for the Tubas Sand Project DYL has a unique insight into the potential market for offtake.
However a standalone mine is also attractive...

**MINING and BENEFICIATION/LEACH**

**Conventional Process**
- Higher Cut-off Grade
- Increased Strip Ratio
- Ore Preparation
- Leach Circuit

**U-pgrade™ Process**
- Mining
- Lower Cut-off Grade
- Reduced Strip Ratio
- Inert Waste
- Option to Leach and Refine Offsite

For personal use only
...due to much smaller plant requirements and...
...because services required are so much lower.

*Enables first production early in 2020*

*Assumes no pilot plant required and funding availability throughout the project program*
Conclusions

Gathering Momentum despite the Challenging Market Environment

- **Tumas Project - Potential for fast track, *low cost* project**
  - Stepping up the pace heading into 2017
  - PFS and Variability testwork to be completed by mid-year
  - Accelerated DFS program
  - Commissioning ~2020, as the uranium market turns...

- **Enviable Project Pipeline**
  - Omahola can be a competitive mid-size heap leach operation
  - Tubas Sand Deposit could potentially use *U-upgrade™*

- **Improving uranium market sentiment**
  - Highly leveraged to looming correction in uranium market

*Singularly focussed on developing the next Namibian uranium mine*

“The most highly leveraged uranium play on the ASX...”
Thank you....

**Notes:** Figures have been rounded and totals may reflect small rounding errors; XRF chemical analysis unless annotated otherwise.

\* eU₃O₈ - equivalent uranium grade as determined by downhole gamma logging.

\# Combined XRF Fusion Chemical Assays and eU₃O₈ values.

Where eU₃O₈ values are reported it relates to values attained from radiometrically logging boreholes with Auslog equipment using an A675 slimline gamma ray tool. All probes are calibrated either at the Pelindaba Calibration facility in South Africa or at the Adelaide Calibration facility in South Australia.
Omahola Project
The information in this report that relates to Exploration Results for the Ongolo, MS7 and INCA deposits is based on information compiled by Dr Katrin Kärner* who is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM CP(Geo)). Dr Katrin Kärner, who was the Exploration Manager for Reptile Uranium Namibia (Pty) Ltd, has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which she is undertaking, to qualify as a Competent Person in terms of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’ (JORC Code 2004 Edition). Dr Katrin Kärner* consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.

The information in this Report that relates to the Ongolo and MS7 Mineral Resources is based on information compiled by Malcolm Titley of CSA Global UK Ltd. Malcolm Titley takes overall responsibility for the Report. He is a Member of the Australasian Institute of Geoscientists (‘AIG’) and the Australasian Institute of Mining and Metallurgy (‘AusIMM’) and has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration, and to the activity he is undertaking, to qualify as a Competent Person in terms of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’ (JORC Code 2004 Edition). Malcolm Titley consents to the inclusion of such information in this Report in the form and context in which it appears.

The information in this report that relates to the INCA Mineral Resource Estimates is based on information compiled by Neil Inwood who is a Fellow of the AUSIMM. Mr Inwood was employed by Coffey Mining as a consultant to the Company at the time of the resource estimates and public release of results. As Mr Inwood is no longer employed by Coffey Mining, Coffey Mining has reviewed this report and consents to the inclusion, form and context of the relevant information herein as derived from the original resource reports for which Mr Inwood’s consents have previously been given. Mr Inwood has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which is being undertaken to qualify as a Competent Person in terms of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’ (JORC Code 2004 Edition).

The information relating to the Omahola Project Exploration Results and Mineral Resource Estimates was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.

Tubas Sand Project
The information in this release that relates to the Tubas Sand Mineral Resource Estimate is based on information compiled by Dr Katrin Kärner* of Reptile Uranium (Pty) Ltd and Malcolm Titley of CSA Global Pty Ltd. Malcolm Titley takes overall responsibility for the MRE. He is a Member of the Australasian Institute of Geoscientists (‘AIG’) and the Australasian Institute of Mining and Metallurgy (‘AusIMM’) and has sufficient experience, which is relevant to the style of mineralization and type of deposit under consideration, and to the activity he is undertaking, to qualify as a Competent Person in terms of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’ (JORC Code 2012 Edition). Malcolm Titley consents to the inclusion of such information in this Report in the form and context in which it appears.

Dr Katrin Kärner* of RUN was the Competent Person responsible for the exploration activities and drill hole database and assaying who is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM CP(Geo)). Dr Katrin Kärner, who was the Exploration Manager for Reptile Uranium Namibia (Pty) Ltd, has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which she is undertaking to qualify as a Competent Person in terms of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’ (JORC Code 2012 Edition). Dr Katrin Kärner* consents to the inclusion in the report of the matters based on their information in the form and context in which it appears.

CSA is an independent geological consultancy. Fees were charged to RUN at a commercial rate for the work completed and preparation of the Tubas Sand Deposit Mineral Resource Estimate, the payment of which is not contingent upon the conclusions of the Resource Estimate. No member or employee of CSA is, or is intended to be, a director, officer or other direct employee of RUN. There is no formal agreement between CSA and RUN as to RUN providing further work for CSA.
Tubas-Tumas Project

The information in this report that relates to the Tumas Zone 1 Infill Drilling Exploration Results is based on and fairly represents information and supporting documentation prepared or reviewed by Mr Geoffrey Gee, a Competent Person who is a Member of the Australasian Institute of Geoscientists. Mr Gee, who is employed as a contract Exploration Geologist with Deep Yellow Limited, has sufficient experience which is relevant to the styles of mineralisation and types of deposit under consideration and to the activity which he is undertaking, to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Gee consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this report that relates to previous Exploration Results for the Tubas Calcrete and Tumas Mineral Resources is based on information compiled by Dr Katrin Kärner who is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM CP(Geo)). Dr Katrin Kärner, who was the Exploration Manager for Reptile Uranium Namibia (Pty) Ltd during 2013, has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which she is undertaking, to qualify as a Competent Person in terms of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC Code 2004 Edition). Dr Katrin Kärner consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.

The information in this report that relates to the Tubas Calcrete Mineral Resource is based on information compiled by Mr Willem H. Kotzé Pr.Sci.Nat MAusIMM. Mr Kotzé is a Member and Professional Geoscientist Consultant of Geomine Consulting Namibia CC. Mr Kotzé has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person in terms of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC Code 2004 Edition). Mr Kotzé consents to the inclusion in this release of the matters based on his information in the form and context in which it appears.

The information in this report that relates to the Tumas Mineral Resources is based on work completed by Mr Jonathon Abbott who is a full time employee of MPR Geological Consultants Pty Lt and a Member of the Australian Institute of Geoscientists. Mr Abbott has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify a Competent Person in terms of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC Code 2004 Edition) and as a Qualified Person as defined in the AIM Rules. Mr Abbott consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information relating to Tubas-Tumas Mineral Resource Estimates was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.

Geophysical Results: Resource Potentials

The information in this report that relates to Geophysical Results is based on information compiled by Dr Jayson Meyers who is a Fellow of the Australian Institute of Geoscientists. Dr Meyers is a full time employee of Resource Potentials Pty Ltd. Dr Meyers has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Dr Meyers consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Aussinanis Deposit

The information in this report that relates to Exploration Results for the Aussinanis Mineral Resources is based on information compiled by Dr Katrin Kärner* who is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM CP(Geo)). Dr Katrin Kärner, who was the Exploration Manager for Reptile Uranium Namibia (Pty) Ltd, has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which she is undertaking, to qualify as a Competent Person in terms of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC Code 2004 Edition). Dr Katrin Kärner* consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.

The information in this report that relates to the Aussinanis Mineral Resources is based on work completed by Mr Jonathon Abbott who is a full time employee of MPR Geological Consultants Pty Lt and a Member of the Australian Institute of Geoscientists. Mr Abbott has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking, to qualify a Competent Person in terms of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves' (JORC Code 2004 Edition) and as a Qualified Person as defined in the AIM Rules. Mr Abbott consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information relating to Aussinanis Exploration Results and Mineral Resource Estimates was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not materially changed since it was last reported.

Management

Broad range of mining, technical and financial experience

- Senior mining executive with over 28 years international industry experience
- Former companies include Terramin Australia, Uranium One, Mitsubishi Development, BHP Billiton and Billiton’s predecessor companies

- Highly experienced (over 22 years) exploration and production geologist
- Formerly Chief Geologist for Forsys, Trekopje (Areva) and Rössing Uranium (Rio Tinto)
- Expert knowledge in geological modelling and resource estimation

- Over 20 years financial management experience within mining and private security industries
- Member of the Governance Institute of Australia (ICSA)
- Formerly Finstone SA (Pty) Ltd

- Over 34 years international experience in design and delivery of projects
- 10 years with Rio Tinto Project Development & Implementation and Technology & Innovation and 24 years with Aker Kvaerner and its predecessor companies
