Largest supplier of popping corn in Australia with over 40% share

### Branded Portfolio – North America

### Distribution base provides for growth in range into 2017

Innovation is our Passion

New Product Development Overview

## "Australia's Own" and "Freedom Foods" brands will increasingly be at the forefront of driving our returns from our innovation and manufacturing capabilities

- We believe the ability to control manufacturing inputs and our commitment to deliver innovation across a range of formats for our brands and our key customers will be a key strategic advantage in the medium to long term, particularly in value adding Australia's unique agricultural base
- We continue to invest to achieve this outcome which will drive scale and generate profitability:
  - Expansion at Ingleburn → meet increasing demands for plant-based beverages
  - Shepparton → absorb growing Asian demand for Australian dairy products
  - Expansion into Dairy Nutritionals → build a more integrated dairy processing platform
  - Capital investment at Leeton, Dandenong and DP Mill → deliver manufacturing efficiencies
  - We are actively evaluating acquisitions that add value to and significantly accelerate and or leverage our sales, marketing and operational platforms
- We will ensure we maintain a strong balance sheet capability to execute our strategy.
- Our operating profits will increase through the investment cycle, balanced against a requirement to invest in people, systems and process to manage a scaled and diversified business platform.
- A strong start to the 2017 financial year in sales across all business areas will further accelerate into the second half FY 17. The Company anticipates the ongoing benefits of the strategy and its multi stage capital investment programme to accelerate increased group profits and returns in FY 2017 and beyond.
