

ASX ANNOUNCEMENT

NOTES TO APPENDIX 4C

SYDNEY, Tuesday, 24 January 2017: Cellmid Limited (ASX: CDY) provides the following Notes to the Appendix 4C for the second quarter of the 2017 financial year (FY2017).

Cellmid closed the second quarter of FY2017 with a cash balance of \$5.3 million, reporting record cash receipts from customers of \$1.4 million, up 98% compared with the same period last year (\$713K in 2Q2016).

Through its wholly owned subsidiary, Advangen Limited, the Company's sales reached \$943K for its FGF5 inhibitor hair loss products during the second quarter of FY2017, up 79% compared with the same period last year (\$526K in 2Q2016).

During the quarter Cellmid received \$1.2 million from the exercise of the CDYO options that expired on 23 October 2016 and another \$3 million as a result of a private placement. A further \$831K R&D tax credit was received during the quarter.

Operational update – Advangen

Advangen Limited is Cellmid's wholly owned subsidiary that owns and operates the consumer health businesses in Australia, Japan and the USA.

The evolis® REVERSE product range was launched in the USA in November 2016 in a pre-sale format on a dedicated e-commerce platform, evolisprofessional.com. The first shipment to the USA arrived in mid-December 2016 and order fulfilment commenced during the third week of December. A comprehensive digital and social marketing plan, SEM, SEO, community management and other forms of digital strategies will be fully deployed in the coming months to build e-commerce based sales.

Evolis® REVERSE as 2017 TOP 10 New Grooming Product by Men's Health USA. A comprehensive US public relations programme was implemented prior to the product launch. As a result, evolis® has been featured in a number of publications, including The Daily Mail, which has 50 million readers in the United States alone. Evolis® has also been named as one of the 2017 Top Ten New Grooming Products by Men's Health Magazine. Other features and product mentions are expected in leading fashion and lifestyle magazines as the Company's PR push continues. A successful PR campaign is critical to the Company's e-commerce strategy.

Pharmacy distribution in Australia grew by several hundred stores during the quarter; these are expected to start stocking the full range of evolis® products during the third and fourth quarters of FY2017. The Company's dedicated national sales force is actively supporting the pharmacy distribution network, which will be critical for new product launches planned for FY2017 and beyond.

Advertising activity in television, digital and social channels continued in Australia during the quarter and is expected to increase substantially as the US e-commerce strategy is deployed during the second half of the 2017 financial year.

Operational update – Lynamid and Kinera

Lynamid Limited and Kinera Limited are Cellmid's wholly owned subsidiaries that own and develop midkine (MK) related research and development programmes.

Federal Government funding for Lynamid. Following the close of the second quarter Lynamid was awarded two Innovation Connections Grants from the Australian Government, totalling \$100,000. The grants will support collaborations with kidney specialists and University of Sydney research scientists at the Westmead Institute. The planned studies will test the efficacy of MK antibodies for the treatment of chronic kidney disease (CKD) and cardiovascular (CV) complications of CKD in preclinical rodent models (ASX Announcement, 18 January 2017).

The result of the glioblastoma research collaboration between Lynamid and Complutense University, Spain was reported during the quarter. MK antibodies have shown efficacy in improving tetrahydrocannabinol (THC) treatment response in animal models of cannabinoid resistant glioblastoma multiforme, one of the most common and aggressive forms of brain cancer (ASX Announcement 5 October 2016).

In October 2016 Lynamid licensee, Pacific Edge, became Approved Provider to Tricare Health Plan Networks in the US, which provides health care to 9.4 million beneficiaries of the US Military Health system. Also in October 2016 CxBladder® Monitor was adopted as a replacement for cystoscopy for low risk patients monitored for recurrence of bladder cancer by the Waitemata District Health Board in New Zealand.

In a further development, Pacific Edge reported in December 2016 that clinical study results of CxBladder® Monitor were accepted for publication in the American Journal of Urology. The study confirmed strong performance (93% sensitivity and 97% negative predictive value) of the test and the potential of it to replace cystoscopy in low risk patients.

These developments are expected to have a material, positive effect on CxBladder® sales, which in turn is expected to result in higher royalties for Lynamid.

End

Notes

1. The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standard applies to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
