Northern Territory Extend Patient Flow Solution to Katherine Hospital

Highlights:

-) **Patient Flow Solution to be deployed across three wards at Katherine Hospital.**
-) **Optimises Patient Flow, Bed Management across the hospital.**
-) **Northern Territory Health Department extends relationship with Alcidion.**

Adelaide, South Australia, 18th April 2017 – The Northern Territory Department of Health have extended their relationship with Alcidion, with the deployment of Alcidion's Patient Flow Solution throughout Katherine Hospital.

The Miya platform provides all the necessary data to best manage patient care, from the reception of the patient (Emergency Department or elective admissions) through the hospital wards and specialist clinical areas, through to discharge. Clinicians can access individual patient information on mobile devices at the point of care, on computer work stations distributed across the hospitals, and on large format digital displays in shared work areas.

This data access includes clinical information such as pathology and radiology results as well as access to clinical documentation. Furthermore, the platform identifies emerging clinical risk and highlights "at risk" patients to the clinicians.

In the Emergency Department, clinical staff can quickly identify those patients nearing the National Emergency Access Target (NEAT) and plan care accordingly.

The patient flow component of Alcidion's solution provides an overview of capacity and demand at both the ward and unit level, providing real time information about open and available beds, patients coming in (together with the admission source) and potential and confirmed ward discharges.

CEO of Alcidion Group Limited, Mr Ray Blight commented, "We are delighted to see the Northern Territory Department of Health extend the relationship with Alcidion. Whilst this is a relatively small project, it reiterates the valued relationship between Alcidion and the Department of Health."

In the May 2016 Budget, the Northern Territory Government committed \$186m over five years to renewal Core Clinical Systems.
