

## FIRST REVENUE COMMENCES FROM WHUNDO COPPER ORE

- First trucks of copper ore leave from Artemis's Whundo Copper Mine for Whim Creek Plant.
- Blackrock Metals to truck and process Whundo's copper oxide ore at their Whim Creek SX-EW operations, at a rate of circa 16,000 tonnes per month.
- Net monthly revenue to Artemis estimated at circa \$100,000 per month.

David Lenigas, Artemis's Chairman, commented; *"Net revenue to Artemis of about \$100,000 a month kicked off yesterday with the first truckloads of copper oxide ore leaving the Company's Whundo Copper Mine yesterday for Whim Creek as part of an initial 50,000 tonne supply contract. Things were delayed slightly due to Blackrock requiring adjustments to their existing Whim Creek permits to import outside copper ore, but these matters were quickly resolved last week and the transport operations are now well underway. We have a lot more copper oxide material sitting at surface at Whundo and we will now look to expand and extend the existing ore sales contract with the aim of increasing our net cash flow."*

Artemis Resources Limited ("Artemis" or "the Company") (ASX: ARV) is pleased to announce it has started generating net revenue from copper ore sales, with the first truck load of copper oxide ore leaving from the Company's Whundo Copper Mine (Figure 1). The ore is being trucked to the Whim Creek copper SX-EW plant, under the previously announced (ASX 30 March 2017) copper supply deal with Blackrock Metals Pty Ltd ("Blackrock").

### Corporate Information

ASX Code: ARV

Blackrock has purchased an initial 50,000 tonne parcel of stockpiled copper oxide ore (grading about 1.5% Cu), located in SP1 and SP2 at the Whundo Copper Mine (“Whundo”) (Figure 2). Karratha Earthmoving & Sand Supplies have been contracted by Blackrock to truck 16,600 tonnes of ore per month to Whim Creek. Artemis will receive a net price of \$6 per tonne at the mine gate for the copper ore located in surface stockpiles SP1 and SP2, which will generate revenue of \$100,000 per month.

Blackrock are responsible for the payment of all applicable royalties, loading, transportation, processing and sales costs of the copper. Pricing of additional copper oxide ore sales to Blackrock Metals will be negotiated based on grade and potential heap leach recoveries and costs associated with delivery to stockpile trucking point. The next oxide stockpiles for potential sale are 30,000 tonnes grading 3.9% Cu (Fox Resources mine records) and the Company would expect significantly more than \$6 per tonne for this material.

The Whundo Copper Mine is located about 30km south of Karratha in Western Australia and about 12km from the Radio Hill Mine and Sulphide treatment plant.

**Figure 2: Stockpiles of Copper Oxide ore at Whundo containing circa +50,000 tonnes grading ~1.5% Cu.**

**BACKGROUND INFORMATION ON ARTEMIS RESOURCES:**

Artemis Resources Limited is a resources exploration and development company with a focus on its prospective Pilbara (gold, cobalt, base metals, platinum, platinum group elements and iron ore) and the Mt Clement-Paulsens (gold) project in Western Australia. Artemis owns the fully permitted 425,000tpa Radio Hill nickel and copper operations, processing plant and associated mining and exploration tenements with significant existing JORC 2004 compliant resources of Nickel, Copper and Zinc situated within a 15 km radius of the Radio Hill plant. The Radio Hill Plant is located 35 km south of Karratha in the Pilbara Region of Western Australia.
