ASX Announcement

June 2017 Quarterly Activities Report

TikForce Limited (ASX: TKF) (“TikForce” or “the Company”) today lodged its Appendix 4C quarterly report of cash flows for the quarter ended 30th June 2017 with the Australian Securities exchange (“ASX”).

As at 30 June 2017 cash at bank and cash receivables will consist of \$381k at bank and \$90K in trade debtors (\$471K).

Delays to cash at bank over expectations were due to delayed in the job active work changing from a credit card to a post transition integrated invoicing processes.

The Company, as per announcement last week, continues to grow its services in the job active market and is confident of delivering solid returns for these activities.

Staff costs and administration & corporate costs in the current quarter are in line with expectations.

Business Activity

As previously announced and updated, the previous quarter has seen TikForce enter the Jobseeker sector with a live trial. The trial required a more streamlined approach to support mass onboarding and invoicing via multiple branch locations in line with legislative requirements.

This previously agreed approach led to delays meeting processing targets and after close consultation with the client, the new process was agreed and implemented in June. The new process has already realised subsequent revenue increase in the client revenue of \$43.5K in July and is expected to increase throughout the remainder of the new quarter.

Along with the Jobseeker trials, the quarter saw the re-launching of the TikRide portal at the end of June and the commercial partnership with luxury vehicle operator BRG Technologies, trading as Zeffer.

Corporate Activity

The Company appointed veteran international technologist Mr Duncan Anderson as Non-Executive Chairman. Mr Anderson brings considerable

experience in successfully transitioning start-up technology into a sustainable and profitable international enterprise.

In addition, the Company's founder Mr Kevin Baum has also joined the Tikforce Ltd board

Significant Developments Subsequent to the Reporting Period

Intellectual Property capitalisation at June 2017, for the year, was approximately \$1.181M.

The Australian Government Research and Development grant for 2016 resulted in \$350K funds received and is anticipated to result in approximately \$510K for the 2017 financial year.

It is envisaged that along with the Jobseeker trial that further recurring revenue contributions will be realised from existing clients and projects, to include:

- MTM Metro – Flinders Station and Victorian Level Crossing programs, which are now in progress
- Melbourne Metro Rail Authority (MMRA) – in support of Victorian Tunnel Project
- Resources WA – Verification services for RWA in support of their recent appointment Top Level Vendor status to Tronox Resources
- BRG/Zeffor Technologies – Go live of the managed driver recruitment and compliance solution

In addition to the previously mentioned clients/projects, the Company has also launched the Enterprise Workforce Supply Chain platform. This platform is the result of 12 months of extensive industry consultation, development and assessment that has created an unprecedented, real time workforce compliance system to support the most complex procurement-centric projects.

It is anticipated that at least one major client will be transitioning from beta status to a full commercial engagement. Securing a major supply chain workforce management project entails the verification and ongoing compliance monitoring of all employees, contract organisations and sub-contractors within the Master/Peak Supplier network.

The Company is pursuing additional financing options to commercialise this level of business activity in the future.

About TikForce <http://www.tikforce.com/>

Tikforce is a Human Resource Technology Platform that provides businesses with a more efficient and complete solution for workforce identity, compliance
