THICKENER CIRCUIT OPERATIONAL

HIGHLIGHTS

- Thickener circuit commissioning completed, and is in full operation.
- Run rate production on schedule for October 2017.

NSL Consolidated Limited (Company, ASX: **NSL**), wishes to update the market regarding progress of the wet plant thickener circuit addition to further enhance plant efficiency in order to reach nameplate capacity.

The thickener has now completed commissioning and is in full operation. The project has remained on schedule during trying monsoonal conditions, with an unrelenting focus on safety that has seen incident free completion.

With the thickener operational run rate production of 200,000 tonnes per annum is on schedule for October 2017.
