## QUARTERLY ACTIVITIES REPORT

30 September 2017

### PROJECTS

#### Paterson Province Mineral Projects, Western Australia

Peako's Paterson Province Mineral Projects; the Sunday Creek and Mount Sears initiatives, comprise a ~403km<sup>2</sup> tenement group in the Rudall River area of the Paterson Province of Western Australia. The Paterson region is well known for its gold, base metals and uranium potential, hosting Australia's fifth largest uranium deposit at Kintyre. Uranium occurrences are known in both the Sunday Creek and Mount Sears prospects. Both prospects are considered polymetallic.

Peako's tenement package comprises four tenements, one of which is the granted Exploration Licence E45/3278, and three at the applications stage. They were the cornerstone of Peako's portfolio of mineral assets when it first listed on ASX as Raisama Limited in 2009.

Exploration activities have commenced with the acquisition of samples and data previously acquired by a third party, the assessment of which will inform and shape our exploration work program for the Sunday Creek project.

Peako's Paterson Province tenement package is shown below.

Figure 2 Paterson Province Tenement Package

The Sunday Creek area was first explored by others between 1978 and 1981. The lack of high resolution data available at that time resulted in limited structural interpretation by previous explorers.

The Sunday Creek Prospect was initially identified as a radiometric anomaly without GPS or high resolution airborne data, with subsequent rock chip samples containing copper, uranium and lead. Radiometric anomalies were also followed up with soil geochemical surveys, which produced low assay responses, mainly due to sand cover.

A four-hole reconnaissance drilling program was conducted at spacing of 4km and a prospective contact of 20km strike length is considered to remain largely untested.

The Mount Sears Prospect is located 25 kilometres east of the Sunday Creek Prospect covering an area of 150km<sup>2</sup>. A known uranium occurrence in the Mount Sears Range was discovered by Occidental Minerals Corporation in 1978 and has an associated airborne radiometric uranium anomaly. An overview of the Mount Sears project geology and historic data indicates that the project area is prospective for copper and uranium.

In June 2017, following the March 2017 change of government of Western Australia the new government implemented a ban on uranium mining on all future granted mining leases in Western Australia. Peako is reviewing its strategy and exploration work program as a consequence of this ban.

**Other Opportunities**

Peako is seeking to expand its mineral interests. During the quarter it reviewed a number of opportunities, located in Victoria and Western Australia.

#### Farm-in / Other Agreements

Peak's interests in relation to the SC6 Cadlao Oilfield re-development project are held via its subsidiary Peak Oil & Gas (Australia) Pty Ltd (Peak). The interests are all disputed, as follows:

1. A 25% Cadlao joint venture interest (held in trust by Cadlao Development Company Limited (Cadco)) for Peak or, alternatively, an entitlement to receive \$6.7 million as consideration for the buyback of the 25% interest; and
2. A prospective indirect economic interest held by way of a 40% shareholding held by our subsidiary, Energy Best Limited (EBL), in VenturOil Philippines Inc (VenturOil) (itself a 20% interest holder in the Cadlao Joint Venture) and a 5% interest in the Service Contract SC6 Cadlao held by VenturOil in trust for EBL. The 40% shareholding and subsequent associated funding obligation was intended to provide EBL with 75% dividend rights in respect to its 40% shareholding.
3. An aggregate 80% interest in overriding royalty interests relating to 3.3% of production held by Peak Royalties Limited
4. A loan receivable from VenturOil for US\$736,188

#### Farm-out Agreements
